Hot Forged and Hammer Pointed Nails

IMITATING THE

Old Fashioned Hand Process.

FAC-SIMILE OF AUSABLE BOX AND BRAND.

Genuine Ausable Nails are packed in boxes bearing their FULL NAME and Trade Mark.

LIGHT HEAD

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

MERCHANT'S SOLDERS

There are a number of evils which honorable manufacturers of Solder have to contend with, the most general being the evil of misrepresentation—using a brand which does not give the true proportions of their mixture. To illustrate: By putting into a mixture 9 parts of tin and 10 parts of lead, instead of 10 parts of tin and 10 parts of lead, the value of a ton of Solder can be reduced materially,—and no consumer will be the wiser, as the only certain test of its composition is by analysis. That is what is being done by unscrupulous makers. We have tested 50 different brands and found 87 per cent. to be sold under a misleading stamp—to be fraudulent goods, in fact. When Merchant's Solder is branded "½ and ½," it IS made of equal parts of lead and tin. Whatever the proportions may be, they ARE as branded. If you have any questionable brands, we will test them free upon receipt of samples.

HARDWARE

VOL. XVIII. OCTOBER 10, 1898. NO. 1.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Sales of general Hardware by the jobbers and manufacturers, so far as the Eastern trade is concerned, have not been of a volume to fulfil all the hopes formed in advance of the season's business. Many special goods for the fall and winter supply have met with a steady demand, especially those having reference to the kitchen and heating departments of domestic life; stove boards, the demand for which has increased the net prices largely since season opened; elbows have known similar conditions; while coal hods and other stove Hardware have been in excellent demand.

The Western trade is reported as still maintaining a noticeable activity in many seasonable goods, and manufacturers continue unable to make as prompt supply as is desired; the disposition of letting the factory carry the larger part of the season's stock still continues a prominent characteristic of the methods adopted by conservative buyers.

Wire products, especially wire nails and wire woven fencing, are in good request, and from Western points barbed wire continues to find an active market. The export trade on wire nails and barbed wire being in a good healthy condition, fulfils every expectation.

Many lines of goods, from causes noted above, are actually scarce. The loss of sales resulting from avoiding the former custom of carrying good stocks in the hands of the jobbers, will be found to cut into the natural profits of the business by losing sales; as when the house favored by the customer loses the order from having no stocks, the popularity bought by expensive "drumming" is lost, and habits formed of ordering direct from the factory will be found hard to eradicate. The conditions should be reversed, to make the jobbers' trade profitably successful. They should be in possession of complete stocks, and the manufacturers would then be shy of the goods desired by the urgent retailer.

Manufacturers that have not been inundated with orders, have not heaped up too largely full warehouse stocks of surplus products, involving as it does increasing pay-rolls and the appearance of over-production. Of course, this conservatism is largely influenced by the limited demands in face of a trade counted upon as being in advance of any fall season for years.

The trend toward consolidation among large and competing companies manufacturing special goods still continues, as the unsuccessful efforts of the plated-ware manufacturers and the more encouraging ones of the refrigerator companies amply demonstrate. Competition has become so close, profits reaching the disappearing point, that almost any state of affairs promising a future that will economize labor, reduce the number of non-producers in staff positions, and by lessening the pro rata expense of production promise dividends on invested capital, would seem to meet discussion and consideration, in such quarters as would make a combine possible.

While every observant Hardwareman is satisfied that the approaching year will be one that cannot but bring in all departments a satisfactory business, the disposition seems prevalent to make the annual inventory as moderate as possible in order to start the coming year with fresh and attractive stocks.

The prospect for the future of general business is considered as being unusually good, notwithstanding the comparatively low prices which large crops of our country staples are bringing by comparison with the previous season.

The Advantage Of Paying Bills.

The recent failure of the Tradesman's Bank, of New York, has read a moral to at least two of *Hardware's* friends.

This bank was one of the oldest institutions of like character in the city; and by its later absorption of the Clinton Bank, was supposed to have strengthened its position. It was known to be more or less interested in the Wool Exchange; but the closing of that institution was accompanied by the announcement that pecuniary difficulties did not enter into the causes contributing to its suspension of business, and consequently the bank was not regarded as being a sufferer. It was therefore, a shock to the bulk of depositors to learn of the visit of the Clearing House Investigating Committee followed by the advent of the Bank examiner, and the subsequent suspension of the bank.

The two depositors mentioned were creditors of the bank to the extent of several thousands each up to three weeks ago; and without forewarning of any kind, but in the natural course of business, checked against their balances in such a lively manner, in payment of current obligations, as to reduce their credits to less than two hundred dollars in each case when the bank doors closed.

Speaking of his good fortune one of them remarked that it simply added another proof to the principle for which he had always contended; that it was better to have a small bank balance and no outstanding liabilities, than a fat balance and bills out-standing that

Digitized by Google

should be paid. His argument that the cash discount secured by prompt payment should always be taken advantage of by a merchant is a sound one; and while two per cent. discount for the use of money for say fifty days, seems small it amounts to fourteen per cent. per annum, a profit not to be lightly regarded.

The general tendency of many financially strong institutions is to secure the longest credit, leaving the money to the slothful desuetude of a current bank account. Some day a bank closes its doors, and this handsome balance is tied up indefinitely, and finally made good in part only, if at all; while the depositor has to "scratch gravel" to get enough ready money to meet obligations that will admit of no further delay. As one of our fortunate, or rather far seeing, friends remarked: "A debt must be paid sometime if a man be honest; and if by paying it now one can obtain a fair discount, and lessen the firm's business risk by just that much, I for one prefer to get these advantages to the rather questionable satisfaction of being able to see a large balance in the bank representing what you owe other people."

The Canadian Market.

When the announcement was made by the Canadian authorities of a preferential tariff, favoring goods of British origin by twenty-five per cent., many American manufacturers dropped their efforts to cultivate this trade. From an item gleaned from the columns of an English contemporary, whose representative is travelling through Canada, we surmise that this is not altogether a wise step.

This correspondent writes that there is an impression, justified by fact in some cases, that the British manufacturer would advance his prices and thus capture the value of the tariff. This means that he will still compete with American goods on an equal footing, so far as price is concerned; and experience has proved that we are more than able to stand such competition.

It is possible that this market is worth watching, and we would advise the manufacturers of this country to keep an eye on it in future.

By a unanimous vote, in accordance with the recommendation of the board of directors, the stockholders of the American Screw Co., Providence, R. I., some days since, authorized the sale of the foreign properties of the company, the British Screw Co., Limited, of Leeds, England, and the Canada Screw Co., Limited, of Dundas, Ontario. The action was taken without knowledge of the purchaser or the price to be received for the English company, on the assurance that the sale was satisfactory to the board of directors.

The Goodell Bros. Co., Greenfield, Mass., have just purchased the entire plant and business of Goodell, Son & Co., of the same town, manufacturers of hack-saw blades, bench hack-saws, etc. They are now operating in the newly purchased plant, although they eventually expect to move the whole business into their own factory. This is another illustration of the increasing success which is one of the most valuable assets of an enterprising concern, whose business is pushed with vigor and good judgment.

The richest gold mine in the world is located under the thriving town of Ballarat, Victoria, Australia. It has yielded more than $150,000,000 of gold since it was opened thirty years ago.—*Exchange.*

Heavy Hardware Jobbers.

The twentieth annual session of the National Heavy Hardware Jobbers' Association was held in Omaha, Neb., several days since, with W. B. Dean, of St. Paul, president, in the chair. The body discussed prices, conditions of trade, relations of the jobber to the manufacturer, and credits. The attendance on the opening session was fairly good. The following officers were elected for the ensuing year: W. B. Dean, St. Paul, president; W. C. Brown, Chicago, secretary and treasurer, and C. R. Blake, of St. Louis; W. B. Bruce, of Memphis, and H, A. Gille, of Kansas City, vice-presidents. The place for the next meeting is left to the officers.

New York Hardware Jobbers.

The annual meeting of the New York State Association of Hardware Jobbers occurred at Albany, on Thursday, September 22nd. The election of officers for the ensuing year preceded the usual business meeting, which was followed by a banquet at the Fort Orange Club. The guests on this occasion were: T. James Fernley, of Philadelphia, secretary-treasurer of the National Hardware Association, and H. C. Mandeville, of the law firm of Herendeen & Mandeville, Elmira, N. Y., attorneys of the York State Association.

Mr. Mandeville read a paper on the "New Bankruptcy Law," which was most ably presented and proved of great interest to the members. The following were re-elected as officers of the association:

President: Chas. H. Turner, Albany.

Vice-president: J. William Black, Syracuse.

Secretary-treasurer: Silas J. Weaver, Rochester.

Directors: James H. Boucher, Rochester; Irving D. Booth, Elmira.

A Paper of Tacks.

We all regret to-day what we did yesterday. Will we regret the day after to-morrow, what we do to-morrow? Is it not the only safe way to do nothing at all?

Life is a sad riddle. There is, at last, only one way out—to give it up.

A hog may act the part of a man without knowing it. A man can never act the part of a hog without knowing it.

A dispatch from Ithaca, N. Y., under date of October 1st, announces the death of Elias Treman, of that city. In June last, while driving, he was thrown from his carriage and received injuries similar to those which befell Mrs. W. C. Whitney. The best medical specialists were called in attendance upon him, but they were unable to save his life. Mr. Treman was seventy-six years old, the senior member of the wholesale and retail Hardware firm of Treman, King & Co., and was connected with nearly every financial institution in the city. He was Ithaca's foremost citizen, and leaves a fortune of nearly $500,000, it is said. A widow and three children survive him.

The annual convention of the National Hardware Association for 1898 will be held at Milwaukee, Wis., on November 16th, 17th and 18th. Fred. C. Pritzlaff, of Milwaukee, is chairman of the entertainment committee, and arrangements are being made to make this occasion one of the most interesting and profitable in the history of the association.

The first day called up gravest fears that made me nervous hearted;
The next day called up memories of friends from whom I'd parted;
The third day called up thoughts of land where one is safely carted;
The fourth day called up everything I'd eaten since I started.
—*I. A. W. Bulletin.*

Business Correspondence.

It sometimes happens that an order is taken by the traveller from a man about whom he has been unable to learn much regarding his credit. He sends in the order requesting the house to look him up, and that he is doubtful if he is worthy of credit. Upon examination by the house he is found to be a weak mark and it is thought best to refuse to fill the order. Shall the man be written or shall no attention be paid him? He should be written by all means and a reason given why his trade is not desired. Herewith is a sample of such a letter:

DEAR SIR: We are just in receipt of an order for Hardware from you taken by our traveller. We regret to say however, that we are at present unable to fill the same. As we do not remember of ever having your name upon our books, and as we lose a good deal in these hard times by selling to irresponsible persons, we thought better to write you. As you are an entire stranger to us and as we have no means of knowing anything regarding your ability or disposition to pay we would thank you to refer us to several reliable references. If we should hear from you satisfactorily we will then send the goods. Trusting we may be enabled to open up business relations with you and that you may see the reasonableness of our request, we remain Yours respectfully,

BLANK & BLANK.

This will give the man a chance to vindicate himself if worthy, and if not he cannot find fault with your manner of treating him.

Again it sometimes happens that a customer requests a renewal of his note or longer time than it is thought advisable to give.

In such a case it is well to refuse, but try and do so in a manner which will leave no ground for ill feeling on the part of the suppliant. Herewith is a sample illustrating a case in point:

DEAR SIR: Your letter of recent date enclosing your note for three months for $60 in renewal of your note due today is received.

In reply, we beg to state that we are not now in a position to renew notes and therefore regret that we are unable to accept the same, and consequently return it.

As you are no doubt unaware of our usage in this matter, we are willing to compromise the matter with you by extending the time a month longer and enclose you a note, with interest added, for that time, which kindly complete and return.

Trusting this explanation may be satisfactory we remain Yours very truly,

BLANK & BLANK.

It is sometimes desirable to obtain a note or cash from a customer who may owe you quite a large amount but with whom it is difficult to get a settlement. You do not wish to do anything which will cause him to leave you, yet you cannot afford to lay out of the money. A letter something like the following sometimes has the desirable effect:

DEAR SIR: Just now we are needing considerable money with which to meet our maturing liabilities. As our purchases of last season were unusually heavy, and as collections seem unreasonably slow, we are in consequence considerably cramped We herewith enclose you a three months' note for the amount of your account, which if agreeable we would be pleased to receive before the fifteenth inst. Relying upon your kindly co-operation and assistance, and thanking you in advance for the favor, we beg to remain Your obedient servants,

BLANK & BLANK.

At one time a statement of account was sent to a customer with notice of a draft at same time. The man had just started in business and he felt a little annoyed and wrote back to the house quite a cutting letter. A reply something like the following was sent him:

DEAR SIR: Your letter of recent date regarding our draft is received. We very much regret that we should be the cause of your annoyance, as we had no intention of using you differently than our other customers. It is our usual custom to notify every customer of our intention of closing their accounts by drafts at the close of each month and presumed you would have had no objections to complying with our rules.

However, if you prefer to keep your account open we will be satisfied, and will not trouble you again on this matter.

We might add that it is an accommodation to us to have our accounts closed in this way and we usually have few to object to it.

Trusting that this explanation may set us right and effect a better understanding between us which will be mutually agreeable, we remain Yours truly,

BLANK & BLANK.

The result of this letter was that the man saw the reasonableness of the request and he wrote a very polite letter in reply apologizing for his former letter and signifying his willingness to accept the draft.

We have since had pleasant and profitable business relations with him. LYLE MERTON.

Increasing Exports.

The invasion of foreign markets by the manufacturers of the country continues to increase. The figures of the Treasury Bureau of Statistics show that the July exports of manufactures were greater than in any July in the history of the country and formed a larger percentage of the total exports than in any preceding year or month in its history. The exports of manufactures for the month were $25,983,116, and formed 36.47% of the total exports. No July has ever shown such a record of exports of manufactures, and in no month or year have manufactures formed so large a percentage of the total exports. Compared with a decade ago the July exports of manufactures have doubled and the percentage which they form of the total exportations has also nearly doubled. In July, 1888, the total exports of manufactures were but $11,559,606, or less than half those of July, 1898; while they formed but 26 27% of the total exports, against 36.47% in July, 1898.

The gain which the manufacturing interests are making in the proportion which they are obtaining of the total export trade is strongly marked. In July, 1890, they supplied 24 82% of the total exports; in July, 1894, 28.16%; in July, 1895, 31.38%; in July, 1886, 32.80%; in July, 1897, 33 78%, and in July, 1898, 36.47%. Exports of manufactures in July, 1897, were double those of a decade earlier, yet July, 1898, shows an increase of more than 10% over July, 1897, The increase in export manufactures extends to nearly all of the important industrial interests of the country.

A Card of Thanks.

Editor Hardware: Accept the thanks of the Iowa Retail Hardware Dealers' Association for your kind co-operation in publishing our reports in your issue of September 10th. We feel that this will be of great assistance to us in bringing the matter before the retail dealers of the State.

P. C. DEVOL, President.
T. N. PETERSON, Vice-president.
H. A. COLE, Secretary.
CHAS. SWAINE, Treasurer.

Council Bluffs, Iowa, September 20, 1898.

Lane Bros.' New Hanger.

Lane Bros. Co., Poughkeepsie, N. Y., have recently added to their line of Special Barn Door Hangers. The hanger designated as Special No. 40 is between their No. 30 and No. 50 sizes, and meets a large demand for an intermediate class of goods.

James B. Tetley, Hardware, No. 4727 Liberty Avenue, Pittsburg, Pa. *Hardware* Publishing Co.: Enclosed I hand you one dollar, paying my subscription to *Hardware* for another year. Am well pleased with *Hardware* and would not like to do without it.

Arcade File Works' Improvements.

The Arcade File Works, Anderson, Ind., in consequence of the unprecedented demand at home and abroad for the Arcade files with Weed's improved increment cut, find it impossible to keep pace with trade requirements without largely increasing their already extensive plant. They are engaged at present in erecting an important addition to their works in the shape of a steel factory building, covering an area of 200 by 40 feet, which will make their productive capacity 3000 dozen files a day and make suitable provision for a number of improvements that have been in contemplation for several months, and which the constantly increasing business up to date has prevented giving a satisfactory consideration to. It is confidently believed that with this addition to their present facilities, they will be fully able to keep abreast of current demands, and ship their orders with that degree of promptness which has always been a prominent characteristic of Arcade methods of distribution. The business done during 1898, at their stores, No. 97 Chambers Street, New York, and No. 118 Lake Street, Chicago, is reported to be largely in excess of any previous year, giving practical evidence of the complete resumption of business in the manufacturing centres where their product receives its highest meed of appreciation.

Weeds' Eightieth Birthday.

An institution of any kind that has existed for eighty years in Buffalo has witnessed many mighty changes. From 1818, when the tiny village was just beginning to outgrow the ravages of Indian raids in the second war with Britain, to 1898, when a great city stretches from the lake half way to Tonawanda creek, is a long history.

The great Hardware house of Weed & Co. will be eighty years old to-morrow (September 23, 1898). Without doubt, this is the oldest business house in Buffalo, as it certainly is the pioneer Hardware store of Western New York.

The first store was established at Main and Swan Streets, the old Weed Block. Here the firm remained, constantly enlarging and improving until 1896, when their increasing trade forced them to open their present handsome store in the White building.

Some time ago there was discovered in the basement of the old corner-store, the original sign of G. & T. Weed, which, eighty years ago, was placed in position over the doors of the little two-story wooden building, which then marked the crossing of Main and Swan Streets, and which was the first shelter of the business.

This weather-beaten relic will occupy the place of honor in the modern store to-morrow. The original advertisement, published on September 23, 1818, is also in possession of the present firm, and will merit attention as an example of the typography of the beginning of this century.

For many years in the early history of the store it was customary to issue an almanac every year, and *Weed's Hardware Almanac* was a welcome annual contribution to household literature half a century ago. An incomplete file of these has been kept, and will interest lovers of local history. The almanac of 1858 bears on its front cover a fair wood cut of the present Weed Block, with the sign, "Dewitt C. Weed & Co." over the door, and from this volume it is learned that this block was built in the preceding year (1857) with a "front of white stone, quarried at Lockport, near Quincy, Ill." The chronicle pursues: "This being the age of improvement and embellishment in building, we have aimed to serve the public taste, in producing an ornament to the city, as well as to increase our own facilities and profits." The same article briefly tells us that the building which was superseded by the then new and still standing Weed Block, was a three-story brick structure, erected in 1842–3 to replace the original store built in 1820. Also, that when the business was founded in 1818, the population of Buffalo was less than 2000. Thereafter the city grew, according to statistics, from 2095 in 1820, to 8653 in 1830, to 18,213 in 1840, to 42,260 in 1850, and, says the veracious chronicler, "Its present population (1858) is estimated at 100,000."

The Hardware business was founded by George and Thaddeus Weed under the firm name of "G. & T. Weed." It continued under various partnerships, some recorded, some passed into oblivion. The late S. G. Pratt and the present president of the Manufacturers' & Traders' Bank, P. P. Pratt, were at one time part proprietors. In 1851, Dewitt C. Weed became owner, and with him were associated in succession Messrs. George Beals, W. A. Anderson and a younger brother, Hobart Weed, under the title of "Dewitt C. Weed & Co." The firm name remained unchanged until the death of Dewitt C. Weed in 1876, when the title became simply "Weed & Co." Since that date the business has been continued under this sign to the present day, the present members of the firm being Messrs. Hobart Weed and James R. Smith.

The present store is one of the largest and handsomest Hardware stores in America, and the great variety of stock is truly wonderful. Almost everything in metal is carried, from bar iron to a solid silver tea service, and the stocks are admirably arranged so that the different lines in no way conflict.

It is acknowledged by Hardwaremen all over the country to be a model of systematic arrangement, and many of them come from distant States for the sole purpose of seeing this beautiful store.—*Buffalo News.*

Fred. W. Peck's New Catalogue.

Fred. W. Peck, Cohoes, N. Y., has just issued a new catalogue, covering his entire production, and giving for the first time a full idea of the important line of axes and edge tools now being made under the old established Peck "Champion Blade" brands, so long and favorably known to the trade, when produced by A. G. Peck & Co., to which business Fred. W. Peck has succeeded, and has now in successful operation. The catalogue is a well printed pamphlet of upwards of 30 pages, and covers in its contents, single and double bitted axes of all the various patterns desired by the trade, including the Spanish pattern, so largely in demand by the South American and Cuban requisitions, broad axes in large variety, handled axes in similar assortment, including ice and firemen's axes. The hatchets shown cover every possible variety from "Phantom Blade" and regular styles of shingling, lath, claws and half hatchets and including solid steel goods like the "Star Bostonian" and Boston Barrel hatchets, which have achieved a national reputation. The Champion blade hatchets are illustrated in this catalogue with full sized cuts beautifully bronzed, giving a very natural appearance to the goods, and admirably adapted for export trade, as they would naturally impress a foreign buyer. For export trade the cases of axes as well as tools are all lined with heavy water proof sheathing paper, in order to afford perfect protection against sea dampness. The dealer not already in possession of this catalogue should write for one and mention *Hardware.*

Holmes, Booth & Haydens, Waterbury, Conn., are making extensive repairs and additions to their plant. The Berlin Iron Bridge Co., East Berlin, Conn., have secured the contract for the steel roof work for the boiler room, 40x80 feet; the new muffle room, 35x80 feet; and the new brass mill, 118x90 feet. These new additions are to be fireproof throughout. The side walls are of brick, the roof supports are of steel, and the covering corrugated iron. The roofs are arranged with skylights for lighting the interior of the building, and monitors for ventilation.

Southern Hardware Jobbers' Association.

We have received from C. B. Carter, secretary-treasurer of the Southern Hardware Jobbers' Association, with headquarters at Little Rock, Ark., the following newly revised list of officers, committees and members of that great association for the years 1898–'99:

OFFICERS.

President: Jas. J. Mandelbaum; Fones Bros. Hardware Co., Little Rock, Ark
First vice-president: O B. Barker; Barker-Jennings Hardware Co., Lynchburg, Va.
Second vice-president: R. E. Bell; R. E. Bell Hardware Co., Weatherford, Tex.
Secretary-treasurer: C. B. Carter, P. O. Box 433, Little Rock, Ark.

EXECUTIVE COMMITTEE.

W. E. Gibbins: Woodruff Hardware Co., Knoxville, Tenn.
W. A. Parker; Beck & Gregg Hardware Co., Atlanta, Ga.
Frederick Orgill; Orgill Bros. & Co., Memphis, Tenn.
James Moroney; Moroney Hardware Co., Dallas, Tex.

TRANSPORTATION COMMITTEE.

W. E. Newill; King Hardware Co., Atlanta, Ga.
H. S. Bettes; H. S. Bettes Hardware Co., Paris, Tex.
W. S. Robertson; Watkins-Cottrell Hardware Co., Richmond, Va.

MANUFACTURERS COMMITTEE.

C. E. Thomas; May & Thomas Hardware Co., Birmingham.
C. H. Ireland; Odell Hardware Co., Greensboro, N. C.
C. E. Speer; Speer Hardware Co., Fort Smith, Ark.

GRIEVANCE COMMITTEE

J. C. Sproul; Anniston Hardware Co., Anniston, Ala.
Frank S. Gray; the S. B. Hubbard Co., Jacksonville, Fla.
Wm. M. Teague, Jr.; Teague & Sons, Montgomery, Ala.

MEMBERSHIP COMMITTEE.

A. P. Duncan; McLendon, Duncan & Co., Waco, Tex.
H. S Anderson; Anderson Hardware Co., Atlanta, Ga.
Paul R. Howard; Paul R. Howard, Norfolk, Va.
W. A. Pleasants; W. A. Pleasants Hardware Co., Shreveport, La.
J. J Wescoat; Marshall, Wescoat & Co., Charleston, S. C.

MEMBERSHIP.

Alabama.

Anniston: Anniston Hardware Co.
Birmingham: May & Thomas Hardware Co., Milner & Kettig Co.; Moore & Handley Hardware Co.
Mobile: Cunningham Hardware Co.
Montgomery: D. M. Snow & Co.; Teague, Barnett & Co., Teague & Sons, Tullis Hardware Co.
Tuscaloosa: Allen & Jemison Co.

Arkansas.

Fort Smith: Speer Hardware Co.
Little Rock: W. W. Dickinson Hardware Co.; Fones Bros. Hardware Co.

Florida.

Jacksonville: The S. B. Hubbard Co.
Tampa: Knight & Wall Co.

Georgia.

Athens: Athens Hardware Co.
Atlanta: Anderson Hardware Co., Beck & Gregg Hardware Co., Clarke Hardware Co., King Hardware Co., F. I. Stone & Co.
Gainesville: S. C. Dinkins & Co.
Macon: Dunlap Hardware Co.
Rome: Rome Hardware Co.
Savannah: Edward Lovell's Sons, Palmer Hardware Co., J. D. Weed & Co.

Louisiana.

Shreveport: W. A. Pleasants Hardware Co.

Mississippi.

Meridian: Melton Hardware Co.
Natchez: Baker & James.

North Carolina.

Charlotte: Charlotte Hardware Co.
Greensboro: Odell Hardware Co.

South Carolina.

Charleston: Marshall, Wescoat & Co.

Tennessee.

Bristol: Mitchell, Powers & Co.
Chattanooga: E. C. Atkins & Co., Tom Fritts Hardware Co., Magill Hardware Co.
Knoxville: S. B. Luttrell & Co., Woodruff Hardware Co.
Memphis: E. C. Atkins & Co., Manogue Pidgeon Iron Co., Orgill Bros. & Co.; Thomas, Barnes & Miller.

Texas.

Dallas: Moroney Hardware Co.
Houston: F. W. Heitmann & Co.
Paris: H. S. Bettes Hardware Co.
Sherman: Roberts, Sanford & Taylor Co.
Waco: McLendon, Duncan & Co.
Weatherford: R. E. Bell Hardware Co.

Virginia.

Lynchburg: Barker-Jennings Hardware Co.
Norfolk: Paul R. Howard, Watters & Martin.
Petersburg: Charles Leonard.
Richmond: W. S. Donnan & Co., Watkins-Cottrell Hardware Co.

ASTOR, LENOX AND TILDEN FOUNDATIONS.

Contract of Purchase.

The following is an extract from a recent address by T. H. Green, treasurer of the National Association of Credit Men:

When a merchant purchases goods of a jobber or manufacturer he does so in specific terms as to date of payment, and a contract is entered into under which each has certain rights which they are equally bound to observe and respect.

When the jobber or manufacturer has made shipment and has properly observed the agreed terms as to price, quality, time of shipment and date of payment, and an invoice has been furnished for the goods and a receipt in good order has been taken from the transportation company or other agent of the purchaser, he has performed his part of the contract. The merchant always insists upon strictest compliance with the contract on the part of the jobber, and he should observe and carry out his part of the same with an equal degree of care and promptness.

I am sorry to say that there are some merchants who totally disregard their obligations in this respect and become offended when their attention is called to the fact. It never occurs to them that it is incumbent upon them to observe their part of the agreement with the same degree of promptness as they exact of the jobber.

Every merchant should discount his bills, if possible, but in case his means will not permit of his doing so he should pay them promptly at maturity. A draft should be in the hands of his creditor the day it is due, and not one day or more thereafter. He will thus have performed his part of the contract as faithfully as he insists the jobber shall perform his. Should it happen that from causes that are unavoidable the merchant is unable to pay promptly the day the bill is due, it is his duty in strict justice to the other party to the contract to arrange beforehand for an extension, and not, as many do, ignore the matter, as if the other party to the agreement had no rights which he is bound to respect.

Jobbers make their calculations upon receiving their money when bills are due, and they make contracts which will require the use of money thus collected. If they do not get it they are discommoded, and are obliged to borrow extra sums to make the deficiency good, thus contracting liabilities and making expense which their debtors are responsible for without rendering an equivalent. This, all good business men will agree, is an injustice. The retail merchant, as a rule, is not wholly to blame for slowness of payment. The jobber must bear his due proportion of it and for the many failures, with the loss and humiliation attendant, which are caused directly or indirectly by his indulgence or carelessness in the matter of making collections.

The A. J. Phillips Co., Fenton, Mich., on September 15th started up their factory for the season's run, which lasts until July next. Their specialties, as is well known, are the manufacture of snow shovels, window screens, screen doors and novelties. They report that the outlook is good for a very large screen business, and that, so far as they are able to ascertain, stocks were pretty well cleaned out during the past season.

The Lancaster Machine & Knife Works.

The Lancaster Machine & Knife Works, Lancaster, N.Y., Allerton-Clarke Co., Nos. 97 Chambers and 79 Reade Streets, New York, sole agents, are in possession of one of the most complete manufacturing plants of its size in the State of New York. Equipped with up-to-date machinery, and with both steam and water power, having their own

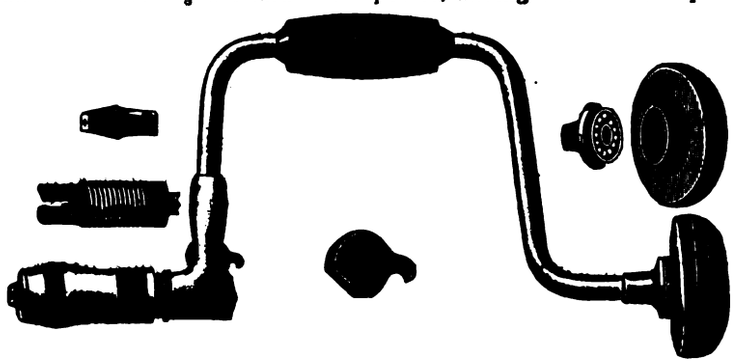

FIG. 1.

electric service to light the entire establishment, they can run day and night with corresponding ease and convenience. Among their leading productions they call attention to a line of ball-bearing and plain quill Braces which have been on the market for a few years and have lately been greatly improved. The Lancaster Ratchet Brace, of which an illustration is given herewith, Fig. 1, is claimed to be a great improvement over the "pawl and ring" ratchet, being constructed in a manner which is considered more simple and durable. The sweep is made from finished cold drawn steel, the jaws being made of tempered

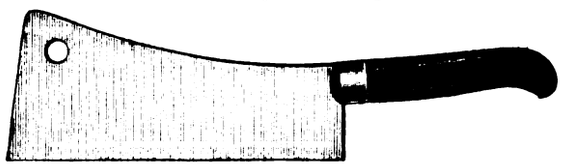

FIG. 2.

steel and the chuck having a hardened steel washer between the sockets. The jaws bring the bit to an exact centre, and are not depended upon to hold the tool entirely, as the interior of the socket is so constructed as to securely hold all sizes of bits, thus giving a perfect centre and extra strength. The quality of material used, the perfect workmanship and superiority of finish, give evidence of factory facilities worthy of a more extended notice. We illustrate, in Fig. 2, the head and bearings used in these braces. The balls running on solid steel cups, are fully as strong and as admirably adapted for propelling purposes as those found in bicycle construction. Of braces, they are now producing as large a variety, adapted to all

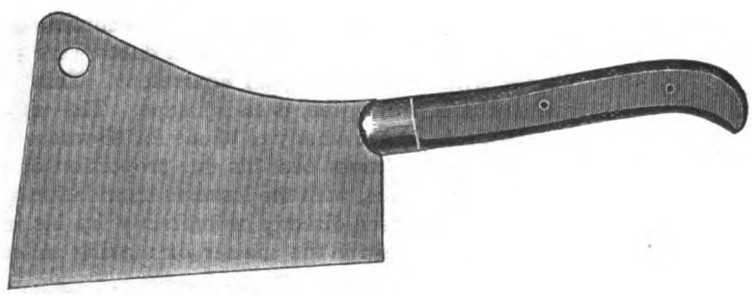

FIG. 4.

trade requirements, as any factory in the country, the latest addition being the line of low-priced braces noticed recently among our "New Goods and Specialties."

The reputation of the "Lancaster" Butchers' Cleavers has been widely extended by the adoption of these "warranted quality" goods in such sections of the country where a superior article in this line meets with a constantly increasing demand. We illustrate in Fig. 3 the Lamb Cleaver and in Fig. 4 the Regular Butchers' Cleaver. These are shown in the flat split handle variety, although in the full and complete line made by this company, they make the round handled Butchers' Cleaver and also the "iron handle cord wound," which style includes the packing-house cleavers. Their full assortment embraces "lamb splitters" and "beef splitters." These goods are all sold

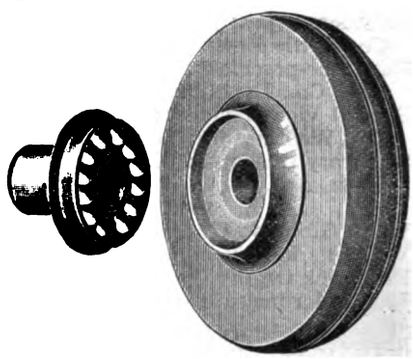

FIG. 3.

under a special guarantee, that "in the event of any imperfections as to temper, etc., they will be replaced by other goods without expense."

One part of the extensive products of the Lancaster Machine & Knife Works, not so universally known to the Hardware trade proper, is the line of "machine knives" for special factory purposes, and from the original production of which the company derives its name. These goods, which of necessity have to be of the highest quality as to temper, and uniformly perfect in proportion, are in steady demand by such large factory specifications indicated by their various uses in the construction of such machines as the following: Planer, veneer, rag cutter, paper trimming, cheese box, hoop, match cutting, barker, tobacco and chipper machines. Included also are such knives as mitre, shaper, spoke and shingle. We illustrate in Fig. 5 several of the leading shapes constantly in demand. Their new catalogue is of sufficient importance to make it worthy of a place in the working library of the Hardware dealer, or machinery manufacturer producing goods which require the above appliances.

The Wells & Nellegar Co., Chicago, Ill., have issued their October circular of seasonable Hardware. This is thoroughly illustrated with cuts of their extensive lines, including almost everything which can be mentioned in the general Hardware business. Full prices are given, and the circular becomes a compendium of great value to any Hardware dealer.

The Logan & Strobridge Iron Co., New Brighton, Pa., have issued a handsomely illustrated catalogue of their

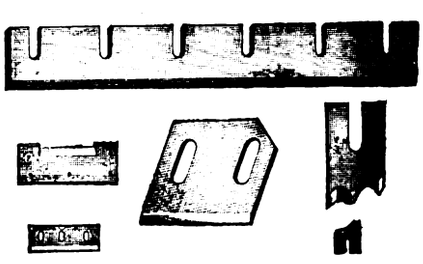

FIG. 5.

house-furnishing and builders' Hardware, iron toys, etc. The extent of these lines may be gathered from the fact that four pages are occupied in an index. The catalogue is printed upon heavy calendered paper, which brings the numerous illustrations out in a first-class manner. They term this their "live, active goods catalogue," as it contains only such goods as are moving and readily salable.

NEW GOODS AND SPECIALTIES.

White's Improved Stove Pipe Collar.

White Bros , No. 1347 Fulton Street, Chicago, Ill., are manufacturing an improved Stove Pipe Collar shown in the accompanying illustrations. Fig. 1 shows the collar, and Fig. 2 as applied to stove pipe. The manufacturers make the following claim for their stove pipe collar: It will keep

FIG. 1.

FIG. 2.

the pipe from going too far into the chimney; the arms are flexible and are easily attached to pipe or elbow; holds the collar firmly to the wall, preventing the escape of soot or dust; wire can be attached to arm for fastening pipe and elbows together, doing away with hooks in ceilings. Made in three sizes, 5, 6 and 7 inch. For prices, etc., address the manufacturers.

The Miller Oil Heater.

We illustrate in this connection the Miller Oil Heater, being very successfully manufactured by Edward Miller & Co., Meriden, Conn., with New York offices at Nos. 28–30 West Broadway. This heater has recently been brought out, and its good points and qualities can be largely understood from an examination of the two illustrations here

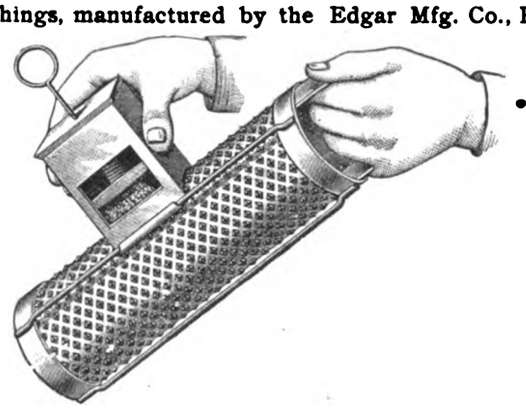

FIG. 1.—THE MILLER OIL HEATER COMPLETE.

shown. In Fig. 1 is shown the heater complete, this being but one of the several styles they make, both with and without bails. Some have oil receptacles resembling an embossed lamp fount. The main feature of all the styles of this line is the burner shown in Fig. 2, which has an automatic extinguisher and cannot smoke. A is the stop nut for regulating the height of perforated thimble; B and C are flame spreaders; D is the top plate and extinguisher combined; E is the wick. The top plate, D, makes it impossible to turn the wick E to more than a correct height, thus preventing smoke, and when wick E is lowered by the thumb screw, plate D of the perforated thimble will drop on to the wick tubes and extinguish the flame. This burner has a central draft and is described as giving 800 candle power. Some other features of note are the two ring handles for removing the fount. large feeder for filling, registering oil indicator, and outside thumb screw wick adjustment.

Edgar Chocolate Grater.

The article herewith illustrated is a new article in housefurnishings, manufactured by the Edgar Mfg. Co., Read-

ing, Mass. It is the Edgar Chocolate Grater, for chocolate, bread, cheese and table use generally. The manufacturers point out the fact that it "grates chocolate as fine and dry as meal, producing a superior article for cake, blancmange, ice cream, puddings, fudge, confections, etc." They add: "The great and constantly increasing use of chocolate as an article of food, has demonstrated the need of something better than the antiquated sheet grater, for

FIG. 2.—THE OIL HEATER BURNER.

getting the chocolate into convenient form for use; and as manufacturers of the Edgar Nutmeg Grater, now so widely known and used, we have received numerous calls for such an article. It is intended to supply a real need: is admirably adapted to the purposes intended; embodies some of the principles of the Edgar Nutmeg Grater. It saves handling the chocolate while grating; saves lacerating the hands, and renders the preparation of chocolate for cook-

Digitized by Google

ing purposes, a pleasant, instead of a disagreeable task. The Edgar Chocolate Grater is equally good for cheese, bread, macaroons and other articles. It retails for 25 cents and pays a good profit."

Goodell Bench Drills.

Goodell Bros. Co., Greenfield, Mass., are putting on the market a line of Bench Drills as herewith shown (Fig. 1).

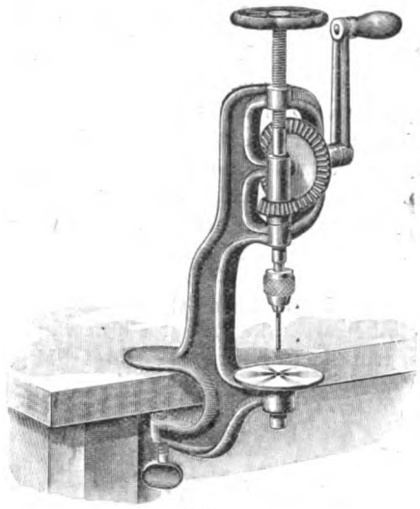

FIG. 1.

These little machines are described as a decided departure in quality from anything of the kind which has heretofore been put on the market. The No. 8, the smaller size, is capable of drilling up to ¼ inch, and is fitted complete with a three-jawed chuck. The gears used on these machines are all correctly cut from solid stock; the feed-screw and spindle are of steel; the table is adjustable; the frame is of iron sufficiently heavy for doing work up to its extreme capacity. Amateurs and others desiring a small drilling machine will find this an article which cannot fail to merit their endorsement after use. The No. 9 machine (Fig. 2) is correspondingly larger and heavier than the one previously

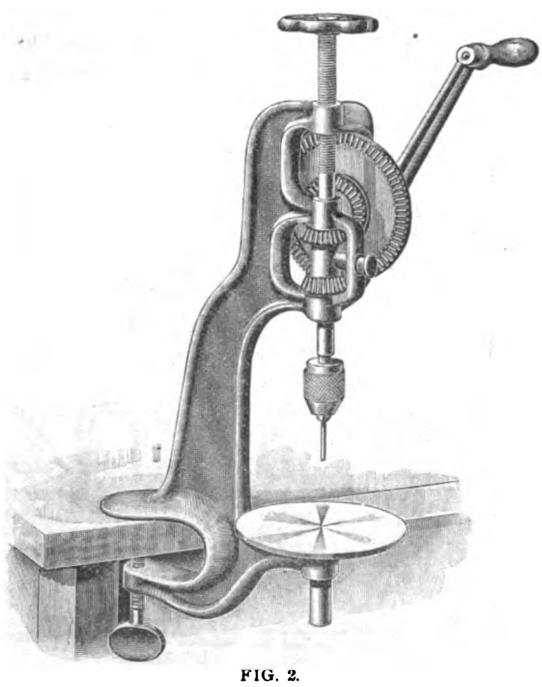

FIG. 2.

described. It is fitted with a three-jawed chuck with a capacity to ⅜ inches. It has two speeds regulated by a quick change; the gears are correctly cut; the table is adjustable, and this size is practical in much more than an amateur way. They are also furnishing a machine known as the No. 9½, identical with the No. 9 except that a double acting vise as shown in the illustration is furnished with it (Fig. 3). This can be used in place of the table whenever desired. In bringing out these little machines, the manufacturers have aimed at a much higher standard of quality than is usual in small tools of this character. They are well

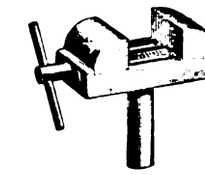

FIG. 3.

made and carefully constructed in every detail; painted and finished in an attractive manner, and, upon examination, cannot fail to be appreciated.

Good Words From Ohio.

Editor Hardware: Replying to your incidental inquiry in a recent letter, regarding trade on the Champion Wheelbarrows and as to which classes are the best sellers, will say our trade for 1898 has been very satisfactory. The better classes of goods have sold largely, and we think the days of the inferior goods are over for some time, as the very best are so low in price that the dealers can purchase them and sell at a better margin than the inferior a few years ago. As to our best sellers in a wood frame, our No. 75 is our great seller. Its construction makes it so much stronger than any other, that the trade seems to prefer it in steel frame. Our No. 10 has sold away beyond our expectation, folding up and requiring so little space for shipping and storing, and so very strong, and weighing no more than a wood frame, makes it a very popular seller. In wood frame and steel tray, our No. 77 has had a remarkable sale. It has taxed us to keep up with our orders. In our all-steel mining and coal we can hardly say, as they are all moving well. We have many compliments on our angle steel frames that we use in the mining and coal. The trade say they are preferable to the pipe. The outlook for the future is very promising, and we think the country never had as bright prospects as now for all kinds of business. The new territory we shall have very soon will give us a new outlet, and "Uncle Sam" and his family will make good use of it.

Truly yours,

THE BRYAN MFG. CO.
M. V. Garver, Secretary.

Bryan, Ohio, October 3, 1898.

The Manufacture of Springs.

One of the best equipped plants for the manufacture of springs is that of the Wallace Barnes Co., Bristol, Conn.

A representative of *Hardware* recently had the pleasure of going over the factory, through the courtesy of the present manager, Carlyle F. Barnes,

The Wallace Barnes Co. was established by the latter's father in 1857; and from that time to the present has steadily increased in size, until the present plant is comprised of three capacious brick structures and two wooden ones devoted to the actual manufacture, as well as a large brick building in which are stored large quantities of the raw material.

The latest improved machinery has been constantly added to the equipment, until the producing capacity of the plant is practically unlimited. In every place possible, automatic machinery is used, while the most recent invention in tempering insures, by a continuous process, absolute uniformity throughout any quantity of material.

In order to meet the increase of business and to preserve the reputation of the company for promptness and dispatch, the motive power is now being increased by a 80 H.P. engine, to receive which it has been found necessary to enlarge the engine house. Mr. Barnes reports fall business of a most active character, and looks forward to a record year for 1899.

Review of the Markets.

Hardware business, while steadily improving in volume, does not seem to possess the vitality and briskness, which would be so grateful to the dealer.

Prices are strong, and quotations for future firm in tone; very few if any signs of weakness being manifested along the line. Stocks are none too full for the season's customary requirements, in fact, in a number of lines, appertaining to this season of the year, a scarcity of goods is the discouraging condition.

Wire Nails: The market continues very strong in tone on this important staple with a firm prospect of its continuance. The advanced prices made recently, being fully sustained and any concessions from the schedule rarely heard of. The demand which has been moderate, is daily becoming more pronounced with the mills possessing no desire to book orders beyond the last day of October. Prices are held as previously announced: To jobbers in carload lots, f.o.b. Pittsburgh, $1.35; buyers of single carload, f.o.b. Pittsburgh $1.40. A discriminating ratio is made for shipments from Cleveland, which is 2½ cents a keg advance on above quotations, and from Chicago, Cincinnati and Louisville, 7½ cents; while St. Louis, is 12½ cents. Early delivery orders only are solicited, as it is the firm conviction in the trade that a further advance in base quotations may be expected at an early date. New York prices, are quoted at $1.50 for carload lots on dock; with smaller lots from store $1.60. Export shipments are reported as being very satisfactory.

Cut Nails: The demand has been improving since our latest issue, and a fairly satisfactory business is being done on a basis of $1.10 for carload lots f.o.b. Pittsburgh. New York prices continue as follows: carload lots on dock $1.25; smaller lots from store $1.30.

Barb Wire: Continues in good demand at current quotations: represented by quotations of $1.40 for painted in carload lots, f.o.b. Pittsburgh, and $1.70 for galvanized, with the usual advances for other factory points as is the case with wire nails. New York prices, remaining as quoted: four point galvanized in carload lots on dock, $1.85 @ $1.90; smaller lots from store being held at $1.95@ $2. Export business continues very good, and local demands daily on the increase.

Smooth Wire: With a demand growing more and more active, warehouse stocks are becoming lighter daily. No changes in price, previous advances being substantially maintained. The market is represented by the quotations of $1.15 for Nos. 6 to 9 f.o.b. Pittsburgh, with same advances as on other wire products, from factory points; Cleveland, 2½ cents; Chicago, Cincinnati, Louisville, 7½ cents; and St. Louis, 12½ cents.

Cordage: While there are indications of a rising market on manila and sisal hemp, the manufacturers are holding rope at prices recently announced. The following, representing manufacturers quotations for carload lots, smaller quantities being subject to the usual advance.

Manila, 7-16 inch and larger	per pound,	9	cents.
" ⅜ inch	"	9½	"
" ¼ and 5-16 inch	"	10	"
Sisal, 7-16 inch and larger	"	8	"
" ⅜ inch.	"	8½	"
" ¼ and 5-16 inch	"	9	"
" Lath Yarn	"	7½	"

Shovels and Spades: The advance in price of 25 cents a dozen by the manufacturers, is being sustained with unanimity even by the jobbers, and the present demand being a satisfactory one for all concerned, little fear exists of a weakening in price for some time to come.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of September 29th, quote as follows: In lots of less than 5 barrels, 36 cents per gallon; in lots of 5 barrels or more, 35 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE PORTLAND TRADE.

Fall trade is starting in with much of the old time swing, and bids fair to be fully up to the average.

Builder's Hardware is not quite so much in demand as at this time last year, owing to lack of building enterprise in the spring, but we do not see why we should not get an average season on general lines. Everyone is full of hope for the future, and many business enterprises are being talked that have only been hinted at in the past.

The lumbering interests are not being pushed as much as usual, but we think those that are doing the most will feel well satisfied when the spring opens, as there must be a very heavy demand for all kinds of lumber another year. We do not see why we should not round out the last year of the century, and make 1899 a banner year.

Farmers all over the country have harvested crops very much above the average, and are getting good prices for all that they have raised. This will make money easier. Collections are fair. THE EMERY-WATERHOUSE CO.

THE CLEVELAND TRADE.

The combination of the great steel works is the most important act in the manufacturing interests.. The foreboding of evil as the result of combination does not seem to prevent them, and for good or evil they continue. If we are to capture and hold foreign trade, expenses of manufacturing must be reduced.

Manufacturers are averse to reducing wages, and combining offers the best means of reducing expenses. The expense of officers and office work, salesmen and advertising will go far towards paying dividends on the capital. The number of employees also can be greatly reduced.

In visiting the immense works at Homestead, one is surprised to see so few men. One man sitting at the lever is doing the work of hundreds; less men, lighter work and better wages seem to be the trend; brain mixed with muscle, the new renaissance.

The stage coach was succeeded by the railroad; the sail vessel by steam; horse cars by electricity; small craft on the lakes by 20 feet channel, destroying the value of millions for individuals, but increasing capacity for public benefit immensely.

Combinations will hurt some individual interests, but that they have largely promoted manufacturing interests of Germany resulting in great public benefit, is not doubted by students of economic interests, and for this country they seem to offer the best means of meeting the demand for decreased expenses.

The waiting process in trade has affected September business. It is the first month for '98 showing decreased sales, but the country is prosperous and reward of industry is certain.

The important questions pending affecting our foreign relations will undoubtedly cause some hesitation in investmeets, but we can wait in confidence.

The absence of the writer prevented giving his views on the organization of a National Retail Hardware Association.

There is danger of over-organization, as there is danger of over-systematizing in business. The Sabbath was made for man, and systems and organizations are made to aid and not control business. Organization and system must be made subordinate, or they will prove an injury. The personal equation must not be made secondary; tendency to depend too much on organization and system endangers both. Too much is likely to be expected from organizations and combinations, and they are likely to break in the strain imposed upon them.

I do not think the organization of a National Retail Association would be wise. Experience shows that local Asso-

Digitized by Google

ciations are of most value; county ones preferable to State and city, and townships preferable to county, and unless these can be made prosperous, it is useless to attempt to organize larger ones. A conservative estimate of the purpose, and determined opposition to radical action is the only means of preserving present organization. The controlling spirit must not be present personal gain; the work must be on larger lines if it is to be of permanent value. It would be wise to make haste slowly.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURG TRADE.

"Best September for past five years" is our head bookkeeper's report. This is cheerful, and more especially as the opening days of October keep up the pace, and the fall season promises a decided increase over that of 1897. All manufacturers about our city are well employed, and mills running steadily.

As we write, preparations on a grand scale are making for the entertainment of the Knights Templar next week. The city will put on gala-day attire, and weather permitting, will present a beautiful appearance to our visitors.

One of the signs of the times is that people are looking about to go into business—we have had several parties recently ask us to let them know of places to start in—of course most of those will try old stands and revive them with new energy and more capital, but it will be for the better.

LOGAN-GREGG HARDWARE CO.

THE KANSAS CITY TRADE.

While the volume of business could be greater, prices are quite steadily maintained at fair values. Business is only "moderately good;" large orders just now are the exception. In many seasonable lines this is really advantageous to the jobber, because as we recently said to our salesmen in a change sheet,—"there is no trouble experienced in selling goods. The trouble comes in getting goods fast enough to meet our wants."

This is doubtless true all over the country, in such goods as sheet steel, hods, elbows, stove boards etc.

We have had to advance prices considerably on the last item. This concern handles an extensive line of wagon woods and we find a scarcity of good material, and we meet unexpectedly higher prices. The writer hereof long since reached the conclusion—which he is more and more convinced was correct when first formed,—that dealers and consumers of wagon material must consent to pay constantly higher prices for goods into which hickory and ash timber enters.

Eventually, we will sell single trees, double trees, rims, shafts, poles, neck, yokes, etc. made of structural steel, or else will substitute and use a very much cheaper and inferior grade of timber. One of the two things is as certain as fate.

The timber and lumber problem of the United States is too little thought of. As a people we are the most short sighted human beings on earth, professing to be cultured, civilized, progressive.

This remark applies to economic problems with more force than to any other. We are constantly consuming, but giving little or no heed to reproduction. Out in Kansas the once treeless praires are everywhere dotted with artificial groves, until to day many hundreds of thousands acres are thus given over to "timber culture." However, this is utterly valueless in commercial sense, since cottonwood, box elder, maple and catalpa very largely predominate. Speaking from more than thirty years of intimate knowledge of Kansas climate, the undersigned knows that these artificial groves have done more to work a marked and favorable change than probably all other artificial means combined. If therefore the matter of timber culture became a really serious thing with our "statesmen," so that we could look ahead fifty years for the benefit of posterity, the inhabitant of that day might know what a "forest" looked like. Anybody has the idea of a "grove."

This week our kustomers kome to town and kavort in komikal kapers—This is our "Karnival" week. These festivities bring us into personal contact with many friends whom the people in the house would never otherwise see.

Business, as such is very little benefited.

The movement of grains, live stock, etc., has been unusually heavy of late. Barring an occasional train robbery, for which Kansas City has become notoriously prominent, there is no excitement to report as worthy of mention.

GILLE HARDWARE & IRON CO.

THE COLUMBUS TRADE.

The fall trade is now on in full force, and keeps us busy early and late. We, like some others that we know of, are having trouble in getting certain lines of goods. Guns are very hard to get. Foreign orders are slow coming in. It seems that foreign gun makers were in serious doubt about American importers taking chances on getting guns through without being confiscated as contraband of war, and did not make many guns, and now they cannot fill orders. American guns are also getting scarce. The demand has been unusually good this fall, for both guns and ammunition. Bob-Whites and Cotton-Tails are plenty.

Prices are fairly well maintained on staple goods, and are somewhat firmer on a number of articles. Glass is extremely scarce, and it is impossible to get some sizes. Shovel manufacturers wanted to increase their dividends a little, so they issued a circular to the trade that they must pay 25 cents per dozen more for all kinds of shovels. We are expecting notice that some of the high officials want to go to the World's Fair in 1900, and the trade must pay their

Digitized by Google

expenses; so they will assess each dealer who sells shovels the sum of 25 cents a dozen for each dozen shovels they purchase. These combinations are a nice thing—for the ones belonging to them. We beg pardon for calling the Shovel Association a combine, but we do not know any other name that will cover the ground. We know of some manufacturers who were decidedly opposed to the advance, and said there was no need of an advance as the profits they were making should be satisfactory; but who is ever satisfied? THE SMITH BROS. HARDWARE CO.

THE ALBANY TRADE.

In this section, as the months pass toward the end of the year, some increase of sales over the corresponding months of '97 is noticed and, as it is pretty well admitted by the majority of dealers, there has been a falling off in the trade on nails, fence wire and a few other "heavy" articles, this increase in trade is naturally all the more satisfactory.

There is but little to note in firmer prices and this is confined to some lines of "season" goods made scarce by the demand earlier in the fall, and the inability on the part of the manufacturers to obtain a prompt supply of raw material. Stove boards command a premium, and the dealer with a good stock can readily unload it at a handsome advance over cost. The higher prices fixed by the makers of shovels has "toned" the market on this line which surely needed a tonic, competition among the jobbers having brought prices lower than retailers could secure direct from the works.

Ammunition is quite an item among the orders now coming in, and stocks receive close attention to prevent the dreaded "shorts" so commonly in evidence.

Oil heaters have become an article of large sale among some of the jobbers. The "Beauty," so well-known in this section, enjoys an annual sale of over one thousand, and, not being a cheap affair, runs into quite a volume for a single article in this comparatively limited territory.

Meat and food choppers are in active demand. The exhibition given in many places a year ago had a telling effect, and up-to-date housekeepers appreciate the rapid and thorough work these diminutive machines accomplish, all of which helps likewise the jobber and retailer.

The uniform prices in the leading articles sold by Hardwaremen to blacksmiths and carriage makers brought about by the Association established first in Eastern and later in Western New England followed as well by the Eastern New York and Vermont organization, is greatly appreciated by the houses of modern ideas who are sustaining such associations. The increase of profit is appreciated by those within the circle, and those who remain outside the lines are unquestionably missing a good deal. Why do they not join hands and do as the largest manufacturers have been doing of late? ALBANY HARDWARE & IRON CO.

THE ST. PAUL TRADE.

The trade conditions in our city are very good, though none of the jobbers are so rushed that they wish they had less to do. The prices on staples are held up in very good shape as our location merits, by reason of our ability to get here by lake and rail.

Our own city is growing nicely. There are more houses being built this year than any during the "nineties." Surely good times are here and will remain for some time to come. C. W. HACKETT HARDWARE CO.

THE PHILADELPHIA TRADE.

Straw hats and summer clothing on the first of October are not conducive to a brisk, fall business, yet there is a large tonnage moving—the only cause for regret being the low prices existing.

In staples, however, these prices have shown some betterment, as the last few days have seen advances or a marked stiffening in price of wire, wire nails and cut nails, while the number of nail mills now shut down on account of strikes, is creating a scarcity of supplies which augurs well for higher prices.

In other lines the market continues steady, without much change in either direction, and collections are quite up to the average.

It will be surprising if, in the next few weeks, we do not have a spell of decidedly cold weather, in which case a marked increase may be expected in the demand for all seasonable goods Already large quantities of goods suitable for the season have been shipped, and the temporary lull is readily explained by the unusually warm weather.

BIDDLE HARDWARE CO.

THE DAVENPORT TRADE.

County fairs, political conventions and the Omaha exposition were of no especial or immediate advantage to the Hardware trade for the last half of September; in the month, however, sales were rather better than last year. October trade starts out brisk, and is quite an improvement, so far, over the corresponding days of 1897.

The Iowa Hardware Jobbers' Association at Oskaloosa was well attended, and peace and harmony prevailed. One pleasant feature was a number of visitors representing manufacturers who gave some interesting talks; notably among them were Messrs. E. C. Lott and W. P. Bissell, of the American Wire & Steel Co.

The country is looking beautiful; there has been no frost, consequently the pastures, meadows and fields of winter wheat are as green as in June. There will be a large crop of corn, but none will be harvested until the frost comes to hasten the ripening. Money is more plenty, collections are better, and there has been no cause to mourn over failures for some time,

UNION AUCTION CO., 79 Murray St., New York City.

ment of prosperous business. Like the proverbial clam, we are enjoying high water, with the hope that the tide may never recede.

We are filling orders in all directions, and from all directions orders are filling us; day after day it's nip and tuck. Sometimes we are under, and at other times the orders are on top.

This pleasant one-sidedness applies to all the Graphite products, and the monthly footing makes very pleasant reading.

A new three-story annex to the pencil works, 40x80, will be in full operation before the close of October.

Business relations are changed. The "Kicker's" voice is rarely heard in the land and the prices are right and the "Little Account," does not ask to be extended. The office force slips in earlier and stays a little later, and the merry click of the type-writer and tinkle of the incessant telephone bell, break more loudly upon the silence accompanying stupendous brain work.

JOSEPH DIXON CRUCIBLE CO.

A Clever Draftsman.

The slickest draftsman in our office at this kind of work is a little, dark complexioned fellow who sits in a corner and says never a word. He has a glass eye and three wooden legs. His name is Camera. He takes his cap off at a drawing for only a minute and says to the foreman: "I have made a more accurate copy than any tracer in the office could have done. Every line is exact, every circle is true and all your figures are correctly copied. If you are using your drawing for constant reference, I will only delay you for a minute, and your copy will be ready for printing in an hour." To any intelligent man such an appeal will not pass without a careful examination.—*American Machinist.*

Clerk: "I have been in your employ now going on five years, and I am getting the same salary I started with."

Proprietor: "I know it, but every time that I've made up my mind to cut you down or discharge you something has reminded me of your wife and little ones at home, and so I couldn't do it. There, my man, you see I have a heart as well as a head."—*Chicago News.*

Maine's Axe-Handle Man.

The axe-handle man is another peculiar worker in the Maine woods, and he lives just as unconventionally and has just as good a time as the hoop-pole man or the gum-picker. He frequently accompanies the hoop-pole man in his tours through the woods in the wake of the loggers. The saplings needed for axe-handles must be larger than those the hoop-pole man is looking for, and consequently their interests do not conflict, unless it is that the hoop-pole man denudes the forests so thoroughly that he leaves very few saplings behind to grow up for the axe-handle cutter. The ash saplings are about the only ones that the latter looks for, and he goes into the woods in the fall and chops down every sapling of the desired size. The young tree is then split, and the chopper blocks out the handle in a rough way. When a good collection of handles is thus blocked out, they are buried so they may season without cracking. If the sun is allowed to shine upon these ash handles for any length of time while seasoning, the fiber loses its firmness. In addition to this precaution, the large ends of the handles are smeared over with a greasy paint that tends further to hold the grain together. In the winter the axe-handle men collect their handles that have been buried throughout the forest at convenient places, and send them to the railway station, and thence to the factory, where they are finished off.—*New York Evening Post.*

A correspondent sends us some verses in which he refers to the "touch between the foot and the brain." He must have had rather more than the usual trouble in learning to ride.—*L. A. W. Bulletin.*

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores

Chippewa Falls, Wis —T. Weinberger.

Coloma, Mich.—J. P. Thomas has opened a Hardware store in this city.

Elkton, Ky.—The firm of Wells, Perkins & Miller has been organized to engage in the Hardware business. The firm is composed of S. H Wells, J. B. Perkins, Joe M. Perkins, late of Decatur, Ill., and Harry C. Miller.

Franklin, Ohio.—Chas. E. Thomas.

Marshalltown, Iowa.—Abbott & Son have incorporated; to deal in Hardware. Capital stock $30 000

Nashville, Tenn.—Keith, Simmons & Co., No. 309 College Street. The firm is composed of Walter Keith. W. G. Simmons and James A. Crutchfield. All of the members of this firm were formerly associated with the J. H Fall Co. The new firm bought out the business of Donigan, Weakley & Mason some time ago, and this stock has been removed to the new store. The firm also bought the mill supply business of Bowler & Shinn, and Mr. Bowler will go with the new firm as manager of this branch of the business.

Changes and Improvements.

Ashland, Neb.—The Blodgett Hardware Co., Hardware, stoves and tinware has been succeeded by L. H. Reynolds.

Bagley, Wis.—B. F. Keeler & Co., Hardware, agricultural implements, etc., sold to H. Harvey.

Bennett, Neb.—John P. Bratt, Hardware and agricultural implements, has been succeeded by Peter Olson.

Bloomfield, Neb.—Blanchard & Lauver, Hardware, succeeded by Coleman & Stein.

Cassville, Mo.— Denbo & Thompson, Hardware, etc., succeeded by S. D. Thompson.

Clayton, N. Y.—R. D. Grant has purchased a half interest in Hungerford's Hardware business. The business will be conducted as before under the name of Hungerford & Grant.

Cocoa, Fla.—Edward Stiling, Hardware, offering to sell out his business.

Covington, Ky.—Alonzo Graves, Hardware and iron, succeeded by Ignatius Droge, Jr.

Dearborn, Mich.—O. P. Gulley, Hardware, etc., reported to have sold out.

East St. Louis, Ill.—The Herman Gutwald Hardware Co. changes name to Herman Goedde Hardware Co.

El Paso, Tex.—G. W. Davis, plumber, succeeded by R. D. Richey.

Farmersburg, Ind.—Branson & Co., Hardware, stoves, etc., succeeded by Jennings & Lloyd.

Fort Myers, Fla.—Fred Robenets, Hardware dealer, has moved his large house out to the corner of First and Lee Streets, and will use the lower part as a storehouse in the near future.

Fostoria, Ohio.—The Alcott Hardware Co. have sold out to D. R. Ballmer, former buyer and part owner in the old firm.

Granville, N. Y. — Ernest Wilson has moved his Hardware store from D. J Abbott's building, on Main Street, to the quarters recently vacated by the *Salem Review-Press*.

Hastings Minn.—Henry F. Emery, Hardware, succeeded by Emery A Peterson.

Hazel, S. D.—Warner & Clifford, Hardware, sold out.

Hudson, Iowa.—Gain Bros. & Co., Hardware, succeeded by Switzer & Abbs.

Iola, Kan.—Shannon & Horville, Hardware dealers, succeeded by T. B. Shannon.

Jefferson, Iowa.—W. W. Anderson, Hardware, reported to have sold out.

Little Cedar, Iowa —Kindschuh & Fraser, Hardware, succeeded by Kindschuh & Hammond.

Manchester, Iowa. — Williams & Davis have taken possession of the Hardware stock purchased of W. L. Martin

Missouri Valley, Iowa.—M. S. Ellis, Hardware and agricultural implements, succeeded by B. H. Gavitt.

Montreal, Que.—Jas. Hutton & Co., iron and steel merchants, Mrs. W. H Hutton has withdrawn from the firm.

Moulton, Ill.—S. C. Sloss, Hardware, has been succeeded by W. B Jordan & Son.

New London, Iowa.—Smith, Robertson & Co., Hardware and agricultural implements, succeeded by C. W. Graham.

Norwalk Ohio.—Butt & Peck Co, Hardware sold stock.

Omaha, Neb. — Carter Hardware Co., amended articles filed changing style to Dunning Hardware Co.

Ong, Neb.—J. O. Walker & Co., Hardware and agricultural implements, sold out.

Princeton, Mo.—R. Bowsher, Hardware, etc., succeeded by O. P. Smirl.

Rudd Iowa.—A. G. Brenner, Hardware, succeeded by G. A. Kollman.

Sheyenne, N. D —W. D. Humphrev & Co., agricultural implements, succeeded by W. D. Humphrey.

Sioux City, Iowa. — Hills & Peterson, plumbers, reported to have dissolved partnership.

Stamford, Conn.— Tafft & Davenport, Hardware, succeeded by J. S. Davenport & Son.

St. Louis, Mo.—Another warehouse is to be constructed at once by the Simmons Hardware Co. on the east side of Ninth Street, between Walnut and Clark Avenues. According to the plans, it is to be a six-story structure, 63x120 feet, and will cost $45,000.

Thornburg, Iowa.—Milan Shaw, Hardware, succeeded by Sands & Miner.

Trenton, Mich.—Bailey & Kemp, Hardware, etc., succeeded by Kemp & Son.

Utica, N. Y.—J B. Stone, for many years with the Dunning Hardware Co., of Auburn, has entered the employ of Roberts Hardware Co., and in the future will represent that concern through their southern territory.

Waitsfield, Vt —C. F. Eddy, Hardware and groceries, has sold out to D. D. Waterman.

Waterville, Minn.—C. D. Arnold, Hardware, sold to North & Rich.

Woodbine, Iowa.—J. A. Boies, Hardware dealer, succeeded by J. A. Boies & Co.

Business Embarrassments.

Cadiz, Ohio.—William B. Adams, Hardware, has made an assignment.

Cleveland, Ohio.—Alexander Romains, a Hardware dealer at No. 2765 Euclid Avenue, has filed a deed of assignment in insolvency.

Erie, Pa.—Addie M. Weller, Hardware, etc., reported to have made an assignment.

Hamilton, Ont.—Peter Bertram, Hardware merchant, who was unable to arrange a settlement with his creditors, has assigned to R. T. Wilson, of Dundas and at a meeting of the creditors it was decided to wind up the business.

Oshkosh, Wis.—The Baker-Ogden Furniture & Hardware Co., of which A. W Priest is president and H. E. Baker, secretary, have made a voluntary assignment for the benefit of their creditors to William Decker, of this city.

Sheffield, Ala.—Sheffield Hardware Co., reported to have made an assignment.

Warren, Ohio.—Alex. Campbell & Sons, Hardware dealers, have assigned to Charles Fillius.

Burglaries in Hardware Stores.

Albany, N. Y.—John Kurtz, cutlery.

Barnesville, Minn.—Wm Harrison, $200.

Bay City, Mich.—Jennison Hardware Co., revolvers.

Humboldt, Neb.—E. P. Tinker, cutlery.

Neenah, Wis.—Stroebel & Baumgarten, revolvers.

Petersburg, W. Va.—C. P. Peters, cutlery.

Racine, Wis.—Andersen & Fritz, $40.

St. Louis, Mo.—A. J. Jordan Cutlery Co., $75.

Sylvania, Ohio.—A. R. Chandler, $75.

Weeping Water, Neb. — Sackett Bros., cutlery.

West Plains, Mo. — Funkhouser-Davis Hardware Co., $250.

Williamsport, Pa —Kline & Co., $400.

Fires in Hardware Stores.

Deer Creek, Ill.—W. H. Pifer, Hardware dealer, damaged by fire.

New York, N. Y.—Fire in the basement of the four-story brick building, No. 177 Greenwich Street, occupied by Charles Wendt, a dealer in Hardware, spread to the upper floors and caused $10,000 damage.

Washington, D. C.— The store of C. Schneider & Sons Hardware dealers, has been damaged by fire. Loss, $600.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Atlanta, Ga.—Charles Jewett Swift, a son of the late George P. Swift, of Columbus, one of the most successful cotton manufacturers of this State, has come to Atlanta to establish a gun factory, which will employ 250 hands and make 2000 guns a year. Mr. Swift and his associates in California, Boston and the United States navy, own the East Boston plant of the Ostrander Arms Mfg. Co., and propose to move it to Atlanta. The plant is said to have cost $50,000 to $60,000, and fills a space 40x200 feet, with expensive machinery, such as lathes, milling machines and other appurtenances of a high grade machine shop. Mr. Swift proposes to raise here $25,000 for the purpose of removing the plant to Atlanta and housing it here.

Birmingham, Ala.—The Birmingham Iron Bed & Spring Co. have commenced the manufacture of iron and brass beds; materials used in such a factory are wanted.

Charleston, S. C.—Jno. F. Riley (now operating machine and boiler works) will erect a brass and iron foundry.

Charleston, W. Va.—The Tool Mfg. Co. has been incorporated by O. C. Reed, of Uniontown, Pa.; W. B. Neal, of Sewickley, Pa.; Geo. L. Walter, of Sharpsburg, Pa.; V. Curll, of Pittsburg, Pa., and E. N. Dunlop, of Washington, D. C.

Cincinnati, Ohio.—The Ohio Knife Co. has been incorporated with a capital stock of $5000, on which it will manufacture machine knives and other cutlery tools. The incorporators are: Harry N. Rudolph, Harry H. Prugh, W. H. Clapper, Charles H. Waldo and Silas E. Farmer.

Gaffney, S. C.—T. H. Littlejohn, J. D. Templeton and B. T. Porter have formed a partnership as the Gaffney Machine Shop, and will establish foundry and machine shop.

Gatesville, N. C.—Trotman & Hofler will engage in the manufacture of wood-excelsior Hardware packing.

Hartford, Conn.—The Waterbury Tool Co. has been organized for the manufacture of machine tools with a capital of $5000. The shareholders are Horace G. Hoadley, S. B. Hill and J. M. Warner as trustee.

Kokomo, Ind.—The Globe Steel Range Co. has been incorporated with a capital stock of $6000.

New York, N. Y.—The Gas Stove Utensil Co. has been incorporated by Rodmund Gibbons and others. Capital stock, $25.000.

Plainfield, N.J —The Pond Machine Tool Co., with a capital of $500,000, has been capitalized in Illinois for $2500.

St. Louis, Mo.—The Simplex Revolving Sash Co. has been incorporated, with capital stock of $50,000. by Frank Lohse, Albert Weingaertner and John L. Shumate.

St. Louis, Mo.—The St. Louis Beer Pump Co. has been incorporated, with a capital stock of $16,000, by Frank O. Fisher, Albert Weber and S. J. Mahara.

Changes and Improvements.

Beaver Falls, Pa.—The American Weldless Tube Co. has secured possession of the McCool Tube Co., of this place, capitalized at $150,000. President W. E. Shelby, of the Shelby (Ohio) Tube Works, is said to have made the deal and secured a controlling interest in the stock.

Bridgeton, N. J. —The Ferracute Machine Co. are enlarging their plant, owing to increasing business.

Chattanooga, Tenn.—The Mountain City Stove & Mfg. Co. are making some extensive repairs on their King Street depot, which is between Market Street and the Western & Atlantic crossing. This is an iron building and is being repaired with new iron roofing, girders, posts, etc.

Cincinnati, Ohio. — Charles Davis will leave the presidency of the American Tool Co. because of ill-health. A. B. Voorhees or Franklin Alter will probably succeed him. The capital of the company will be increased.

Cleveland, Ohio.—The Standard Tool Co. will erect a new factory on Central Avenue, at the C. & B. crossing. The building will cost about $15,000.

Denver, Colo.—The McCormick Harvester Co., manufacturers of farming machinery, have submitted to the building inspector plans for a large warehouse on Fifteenth Street, next the Studebaker warehouse. The building will be constructed on what is known as "mill construction," a large and heavy frame.

Greenfield, Mass.—Henry E. Goodell & Son, who for the past eighteen months have been perfecting and manufacturing hacksaws, meat saw blades and bench hacksaw blades in Pond's Block on Miles Street, have sold their business to the Goodell Bros. Co. and will retire from manufacturing.

Muskegon, Mich.—The Davis Iron Works have been sold under foreclosure, to Wm. A. Moore, of Detroit, for $4200.

New Haven, Conn.—The Winchester Repeating Arms Co. are putting up a one-story building which will cover a great deal of ground. It is in the factory yard and is to be utilized for packing and cartridge inspection.

Pittsburg, Pa.—The Graff Stove Co. are getting ready to move into their new buildings at Monongahela, Pa.

Rockford, Ill.—The Forest City Bit & Tool Co., brace and machine bits, held a meeting recently and re-elected L. M. Noling, C. Peterson, Edward Alverson and W. Johnson, directors. The business of the company is reported to be in a flourishing condition. A six per cent. dividend was paid to stockholders five months ago and another one will be paid next month. Improvements are being made in the machinery and buildings, and the plant is one of the most thoroughly equipped in the city.

Sharon, Pa.—The Bessemer Furnace Co. will build a $2,000 000 steel mill.

Springfield, Ohio.—The Superior Drill Co. are building an extension to their factory, 147 feet by 41 feet and four stories high. The foundry is to be enlarged to the extent of 75 feet more in length and a new cupola will be added.

Recent Embarrassments.

Cleveland, Ohio.—The United States Wire & Nail Co., Jacob Schoen has been appointed receiver.

Corry, Pa.—The Corry Radiator Works have been seized by the sheriff.

Lebanon, Pa. — The Lebanon Boiler, Foundry & Machine Co. have made an assignment to John K. Funk, for the benefit of their creditors. The liabilities are $22,000, and their paid-up capital $50,000.

Racine, Wis.—The A. P. Dickey Mfg Co. have made an assignment to David G. James. The liabilities are estimated at about $25.000, with assets about the same. The company manufacture dustless chain separators, warehouse mills, fanning mills, bob sleighs, land rollers, corn shellers, etc., and do considerable jobbing and specialty work.

Toledo, Ohio.—M. A. Hanna & Co., of Cleveland, have had a receiver appointed for the Toledo Drop Forge Co.

Toronto, Ont.—David Plews, pump manufacturer, has assigned to J. H. Boustead. The assets amount to $2800, and the liabilities, aside from real estate covenants, $1600.

Recent Fires.

Cleveland, Ohio.—The Reliance Machine & Tool Co.'s stock has been damaged by fire.

Milwaukee, Wis.—Fire broke out in the Racine Hardware Mfg. Co., and before the flames could be checked stock and building were damaged nearly $10,000.

Pittsburg, Pa.—The works of the Iron City Mfg. Co., corner of Twenty-third and Mary Streets, South Side, were completely destroyed by fire Monday morning, September 10th. The loss on machinery and stock is estimated at $8000; insurance about $2000. The company was engaged in the manufacture of steel ceilings, iron and steel roofing and other material in that line.

Miscellaneous.

Detroit, Mich.—The Michigan Malleable Iron Co. has increased its capital stock from $150,000 to $250 000.

Fremont, Ohio.—The Jackson Knife & Shear Co. have made their first shipment of pocket knives manufactured in their new plant in this city—part of a large order for Daniel Scotten & Co., Detroit. The building is nearly completed and the shear department will be started in a few days. The factory promises to be one of the largest industries in Fremont.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Auburn, N. Y.—The Henry & Allen Co. was incorporated to manufacture bicycle chains. The incorporators are W. J Henry, M. E. Henry, G. Q. Allen and A. R. Allen, all of Auburn. The capital stock is $25 000.

Enon, Ohio.—The Victor Rubber Co. is erecting a plant for making rubber tires and pneumatic goods. The plant will be in operation ih October. John S. Harshman, backer of the Dayton, Springfield & Urbana Electric Railway Co., is a member of the company.

Moultrie, Ga.—C. M. Blanton & Co. have opened a new Hardware, sporting and athletic goods store.

New Haven, Conn.—A new bicycle will be built here shortly by the firm of Kelley & Co., who will locate in the property of the Eastern Machinery Co. on Ashmun Street.

Sandusky, Ohio.—F. J Miller has opened a bicycle store at No. 821 Market Street.

Springfield, Mass.—The J. H. Burt Mfg. Co. has been incorporated to manufacture and sell the Ridgeway adjustable handle bar and Call's rubber band tire repair tool. Charles J. Riegeway, of Boston, is president of the company. The capital stock is $50 000.

Trenton, N. J.—The Watson Automatic Seat Post Co.; capital, $500 000; to sell bicycle seat posts and fittings for bicycles. Incorporators: Edward S. Mayo, Isaac L. Swegle, and Edward H. Hazen, New York.

Changes and Removals.

Akron, Ohio.—The B. F. Goodrich Co., of this city, have purchased the Palmer Pneumatic Tire Co. of Chicago. From this time forward the B F. Goodrich Co., who have from the outset been identified with the manufacture of Palmer tires, will have the exclusive right to manufacture and sell pneumatic tires embodying any of the inventions covered by the Palmer patents.

Carrollton, Mo.—W. C. Couch, bicycle dealer, has sold out to M. D. Lease, who will continue the business.

Greenwich, Conn.—Ferris & Abbott, dealers in bicycles and sundries, will remove to the News Building.

Indianapolis, Ind.—Grosch & Spring, bicycle repairers, have been succeeded by John G. Grosch.

Mamaroneck, N. Y.—James A. McDonald, sporting goods dealer, has gone out of business.

Marion, Ill.—Halladay & Rubey, bicycles and Hardware, have been succeeded by Lewis P. Halladay.

Milwaukee, Wis.—The Andrae people expect to be settled in their new factory at an early date. The machinery is now being moved and the large factory is receiving the carpenters' finishing touches. The new factory is located at Madison and Clinton Streets.

New Haven, Conn.—Arthur D. Weeks, bicycle dealer, is reported to have sold out.

Philadelphia, Pa.—J. A. Barten & Bro., dealers in bicycles, have dissolved partnership. Joseph A. Barten continues.

Pittston, Pa.—J. S. McKaig, bicycle repairer, has begun the manufacture of bicycles.

Pratt City, Alla.—E J. Hudnall has purchased the bicycle establishment of Daniel & Taylor at Pratt Station. Mr. Hudnall, by this trade, secures control of all the bicycle work in this city.

Reading, Pa.—The Reading Cycle Mfg. Co. will erect a new addition to their plant.

South Meriden, Conn.—Chas. Griswold and Fred. Woodstock have closed their bicycle repair shop off South Grove Street for the rest of the season.

Stamford, Conn.— Park, Wood & Co., dealers in bicycles, have dissolved partnership.

Syracuse, N. Y.—L. Manson, of this city, has purchased the bicycle stock belonging to A. Sweet, of Ithaca.

Washington, D. C.—The proprietors of Palmer's bicycle and repairing store, at No. 901 Sixth Street, N.W., are closing out the business.

Waxahatchie, Tex.—B. E. Boren, bicycle dealer, is reported to have been succeeded by Cleo Dillon.

Webster City, Iowa.—The Brown Carriage Co. will soon locate a plant in Des Moines, Iowa, for the manufacture of bicycles and novelties, carriages, etc.

Westfield, Mass.—The Lozier Co., and the Lozier factory at Thompsonville, Conn., will be removed to this place and consolidated with the Lozier factory here. New buildings will be erected and the plant enlarged to admit of the increased output which the Lozier Co. has agreed to turn out from this factory.

Wilmington, Del.—Work has begun on the establishment of a large powder factory for the navy. It will be located about two miles from the naval proving station at Indian Head, Md., and within twenty-three miles of Washington. The new factory is being built under an appropriation of $97,000 secured last session, and when in operation will have a greater capacity for producing smokeless powder than any private concern in the country. Lieutenant Bernadon, formerly of Claymont, who is an expert on the development of smokeless powder, will superintend the building of the factory.

Recent Fires.

Clinton, Mass.—A disastrous fire, which occurred here recently, destroyed the cycle store and stock of Asa Windle, once famous in the racing world, who has been in business here for some years.

New York, N. Y.—Fire damaged the bicycle store of A. Wise, No. 2051 Eighth Avenue. Loss, $400.

Recent Embarrassments.

Boston, Mass.—Morrill Bros. Co., wholesale dealers in bicycles, etc., at No. 403 Washington Street, have made an assignment. It is estimated that indebtedness to local manufacturers will aggregate $10 000.

Chicago, Ill.—John D. Warfield, who petitioned for voluntary bankruptcy in the United States District Court, filed liabilities approximating $90 000, with no available assets. He ascribes his insolvency to having guaranteed the payment of notes by the Fowler Cycle Co., of which he was a vice-president. The principal creditor is Hermann Boker & Co., of New York, who have filed a claim for $51,105.79. The amount is for a promissory note given by the Fowler Cycle Co. and guaranteed by Warfield. Morgan & Wright have a claim for $21,116.46.

Hyannis, Mass. — Hallett & Eldridge, clothing and sporting goods, reported to have filed petition in bankruptcy. Liabilities, $6908; assets, $5008.

New Britain, Conn.—Wm. T. Burritt & Co., jewelry and bicycles, reported to have made an assignment.

Springfield, Mass.—Jesse H. Bailey has been appointed assignee of the Spaulding & Pepper Co., of Chicopee Falls. His bond was fixed by the Insolvency Court at $12,000.

Yonkers, N. Y.—H. W. Pagan, dealer in bicycles, has made an assignment.

Miscellaneous.

Anderson, Ind.—The Victor Filling Co. and the American Cycle Co., of Chicago, have representatives here, closing a deal with the city for the location of a consolidated plant at this point which will employ 500 men.

Middletown, Conn.—James Donovan has been elected general manager of the Mills Mfg. Co., which was recently reorganized to push the manufacture and sale of the well-known Mills bicycle bells.

New York, N. Y.—President Overman, of the Overman Wheel Co., has returned from his trip to England, Holland, Scandinavia, Denmark, Sweden and Germany. It was his thirty-sixth trip across. It was in the interests of his company, and he was well satisfied with the orders he brought back with him.

New York, N. Y.—Recent mails from Hamburg, Germany, are said to have contained large orders for cheap wheels, in anticipation of increased German import duties. The value of a shipment just made on the steamer *Pennsylvania*, to Hamburg, is placed at over $60,000.

Rochester, N. Y.—The Red Cross Rubber & Cement Co. is now managed by Robert Thompson, the old agent of Victor renown. Being a stockholder, Mr. Thompson was asked to take hold of the works, and he is doing justice to his opportunities.

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

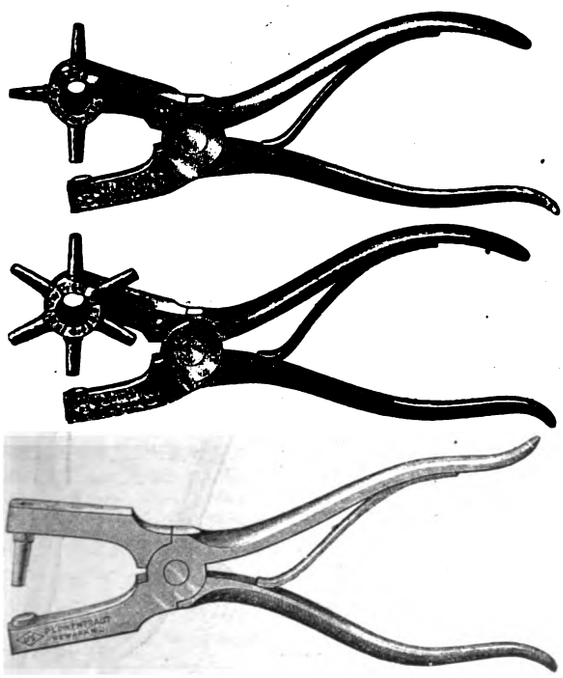
In favor of the

Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.



This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,

CARY MANUFACTURING CO.

S. C. Cary Pres't

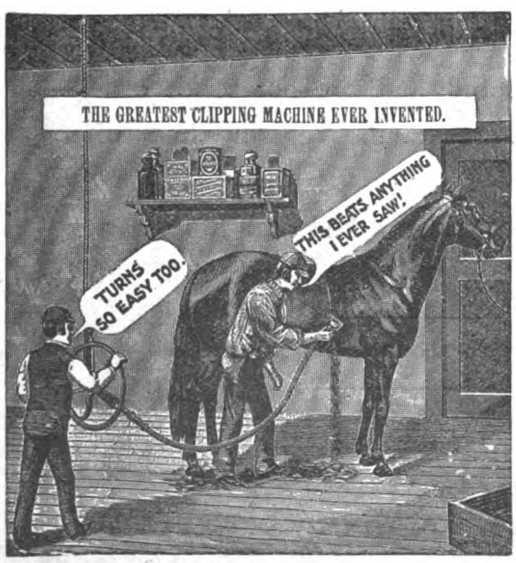
Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.



CHAMPION MODEL.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. List, per doz., Nickeled, $30.00; Full Nickel, $42.00.

"The NEW '98 CHICAGO CLIPPER,"

"FAMOUS THE WORLD OVER"

AS THE

"GREATEST CLIPPING MACHINE EVER INVENTED."

Patented in United States, Canada, England, France, Germany and Russia. All records were broken with this Clipper by clipping a horse complete in 19 minutes. Weight of machine only 35 pounds. Retails at $10.75. All Hardwaremen can sell them in place of the old fashioned two-hand Clippers. Get posted.

TOILET CLIPPERS.

There are all kinds, but if you want a Clipper with a "REPUTATION" INSIST on the "Stewart Patent." They will cost you no more than the "inferior kind" -all parts are absolutely interchangeable. Clippers stamped with our name is a guarantee of quality. Send for Catalogue of Modern Clippers.

BARGAIN OIL HEATER.

THIS Heater is rightly named. It is the greatest bargain ever offered in this line It is made entirely of polished steel, polished brass, and polished aluminum; nicely japanned and nickel plated. There are no castings to break, consequently it is practically indestructible.

Burns a clear white flame without smoke or odor.

Every stove guaranteed.

DIMENSIONS.

Height, 26 inches.
Size base, 13½ inches.
Size drum, 7 inches.
Circular wick, 8 inches.
Weight, 10 pounds.

NOVELTY MFG. Co.,
Jackson, Mich , U.S.A.

"COULD NOT KEEP HOUSE WITHOUT IT."

Sickels, Preston & Nutting Co., Davenport. Iowa. [*Wholesale Hardware*]: We would not know how to keep house without HARDWARE. The review of the Hardware markets, trade reports and editorials are frequently read before letters are opened that are received in the same mail with HARDWARE.

"THE MOST HELPFUL AID."

Pike Mfg. Co., Pike Station, N. H. [*Whetstones, Oil Stones, etc.*]: We like to keep our name and our wares before the public in a modest way. We have found HARDWARE the most helpful aid toward accomplishing that purpose.

"IN YOUR COLUMNS FROM THE FIRST."

Van Wagoner & Williams Hardware Co., New York and Cleveland. [*Hinges, Anvils, etc.*]: Having been represented in your columns almost from the first issue, we have a feeling of pride and pleasure in your achievements.

"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

"LIKED 'HARDWARE' FROM THE START."

Gibbs Mfg. Co., Canton, Ohio. [*Hardware Specialties*]: We liked HARDWARE from the start, and have no reason to think otherwise now.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"TOO VALUABLE TO BE WITHOUT."

Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

"GREAT VALUE AS AN ADVERTISING MEDIUM."

Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google

WE ARE NOT GIFTED WITH ONE OF THOSE

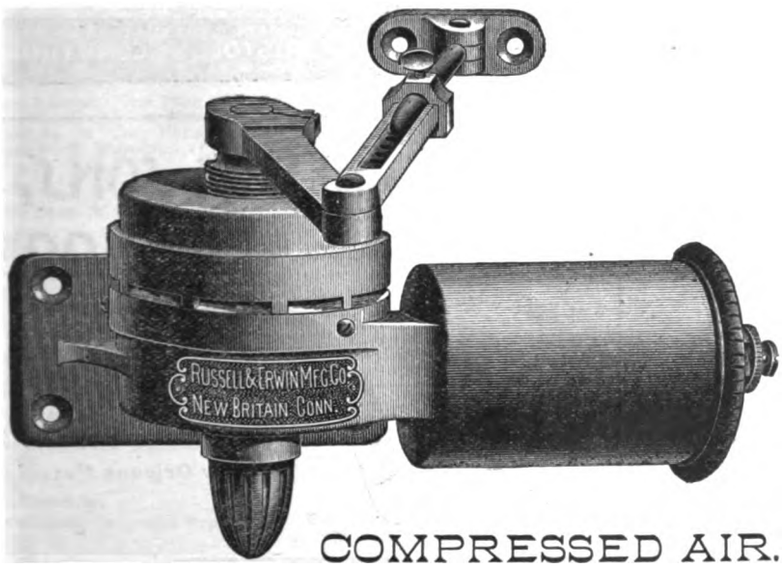
Magnificent Business Intellects

Which are so carried away with the idea that they **must** "du bisness" that they rush wildly about making impossibly low prices on Screen Goods, then discover that they have sold the goods at less than it costs to make a decent article, and try to save themselves by rank cheapening.

We know just enough to make the goods right and then get all we can for them. However, you don't pay much of a premium for Phillips Screens, and you **know they are reliable every time.**

And, by the way, the features that enable us to guarantee every "Flyer" Window Screen to **stay together** and to **adjust freely** under all circumstances, are patented. The patent is now becoming valuable as all the imitations of the "Flyer" have now been in the market long enough so that

the difference is apparent to { User, Retailer, Jobber.



The A. J. Phillips Co., Fenton, Mich.

MANUFACTURER OF

Curry Combs and Sheet Metal Goods. . .

Solid Steel Spout Machine Oilers and Roller Skates.

It will pay to write us for samples and prices.

SURPLESS, DUNN & CO.,

SOLE AGENTS.

55 Warren St., NEW YORK.

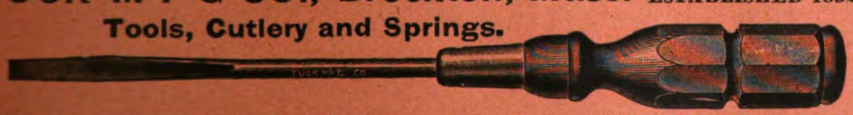
"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Tinned Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices. It will gather Apples, Peaches, Pears, &c.

THE LOW PRICE AT WHICH IT IS SOLD



brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price per dozen, $5.00.* *Liberal discount to the trade.*

MANUFACTURED BY **EDWARD DARBY & SONS,**

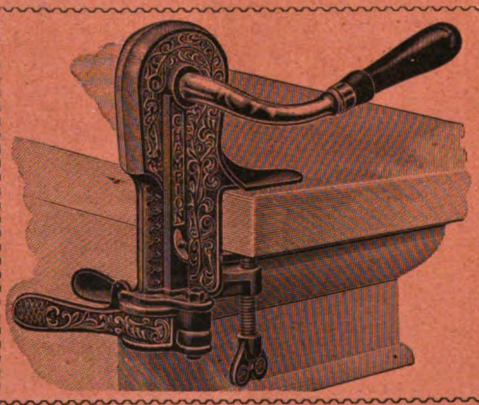
THE BURR PATENT STEEL

Safety Lift Block

A Perfect Self-Locking Rope Tackle Block.



Runs as freely as an ordinary rope tackle block.
Holds more securely than a chain block.
Locks instantly and does not cut the rope.
Allows the load to be lowered safely and slowly, the operator using only one hand.
Cannot stick nor jam when the load is to be lowered.

"I have tested the Burr Self-locking Steel Tackle Block and find it the most practical, quick and reliable Safety lift I know of." J. C. DEBES,
Supt. of the C. & G. Cooper Co., Mt. Vernon, O.

Adopted by the Penna. R.R. Co.

THE TOLER
Liquid Door Check and Spring.
PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.
It has a vertical case, with openings only at the top.
It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.
The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.
It is made of the very best of material throughout.
It works to perfection, closing the door quickly and gently.
It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.
Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HIT THE PIPE

as hard as you like with chisel or mallet and observe that the surface finished with simply one coat of our

ELASTIC IRON ENAMEL

is scarcely marred. It also withstands a high degree of heat; in truth it is as nearly indestructible as it is possible to make a varnish. For smoke-stacks, fire-place casings and stove-pipes

ELASTIC IRON ENAMEL has no equal.

The accompanying cut represents a miniature stove-pipe finished with one coat of

ELASTIC IRON ENAMEL.

We send these display pipes with dealers orders for this specialty. Pints, half pints and quarts are its most salable packages.

MERCHANT'S SOLDERS

There are a number of evils which honorable manufacturers of Solder have to contend with, the most general being the evil of misrepresentation—using a brand which does not give the true proportions of their mixture. To illustrate: By putting into a mixture 9 parts of tin and 10 parts of lead, instead of 10 parts of tin and 10 parts of lead, the value of a ton of Solder can be reduced materially,—and no consumer will be the wiser, as the only certain test of its composition is by analysis. That is what is being done by unscrupulous makers. We have tested 50 different brands and found 87 per cent. to be sold under a misleading stamp—to be fraudulent goods, in fact. When Merchant's Solder is branded "½ and ½," it IS made of equal parts of lead and tin. Whatever the proportions may be, they ARE as branded. If you have any questionable brands, we will test them free upon receipt of samples.

ARE GUARANTEED TO BE AS BRANDED

HARDWARE

VOL. XVIII. OCTOBER 25, 1898. NO. 2.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Business during the fortnight just passed has been extremely moderate in the Southern section of the country, the prevalence of yellow fever in many localities having a deterrent influence on prosperous conditions. The fatalities connected with the spread of the disease have been of a more limited number than the fever stricken inhabitants could have anticipated, and the approach of colder weather will soon make a livelier business appear among the possibilities.

The extremely genial weather we have lately been favored with, has not created the demand for such goods as are considered seasonable for the holiday trade, or wintry requirements generally; the West has been favored with a greater show of colder conditions than the East, and they are consequently deriving a greater impetus to their daily traffic. The slowness of the business in many lines this fall has made competition very close, and the fear of a lower range of net profits on the season's trade than the amount of business done should warrant, has had the effect of more hustling than usual to increase the volume of business sufficiently to make up for it.

When comparisons are made with the amount of business done a year ago, much consolation will be given to both manufacturers and dealers to notice how the natural trend toward a better condition of affairs generally is manifested by increased sales for each month, a cleaner distribution of stocks in hand, the prospect of healthy stock requirements before another season has to be provided, and the thousand and one indications easily understood by the merchant, that at last we can face the future with less of the feeling of fear and despondency than has been the case for several years

It has been indeed a long time since such sanguine hopes have so completely filled the breasts of those who are responsible for the industrial prosperity of our country; and while every evidence of a prosperous future is apparent on every hand, it is gratifying to notice no grasping cupidity endeavors to stifle, by advancing prices, this healthy movement and general good feeling. The few things that have been advanced in price, such as stove boards, gas-pipe and some others, have arisen from causes which made low prices at the outset stimulate orders so largely that complete and full deliveries were impossible through inability to make the goods, advancing quotations being relied upon to check fresh orders, while stocks already in process of being delivered were further advanced.

The market continues firm in existing quotations on nails, wire, cordage and other leading staples, and this has a beneficial tendency in preventing any positively depleted stocks. The expanding of our export trade and the satisfaction that this knowledge gives the manufacturer, will do more to regulate prices and keep them uniformly steady, than almost any other single cause. The fear of an over-stock in production of goods now demanded by our trade situation with foreign countries, will prevent the panicky fear some producers experience when a dullness in demand creates a factory supply that looks formidable to the pay roll provider, suggesting as it usually does, the necessity for some concession in order to move it. With a healthy export trade providing an outlet of no small dimensions, this apprehension ceases to be of importance.

The Trade Letters of "Hardware."

The reader of *Hardware* who does not give careful attention to our trade letters from the leading Hardware houses of the country, is missing some very good things. In every case, these correspondents are practical Hardwaremen, who have full personal knowledge whereof they speak; and the value of their statements is attested by the reputation of the companies whose names are attached. These letters are something more than mere dry details of the prices and conditions holding for the moment in the territory from which they emanate. They go deeper than the surface of things, and each takes on a special value from the frame of mind or mood of thought dominating the writer at the moment of composition. Many bright and sparkling things are found in these letters. The writers have travelled, observed, thought, and commented, through many years of successful business life, and have collated facts and collected choice theories, which are freely poured forth twice each month, for the benefit of the readers of *Hardware*. Each man knows his own territory from A to Z, and every business movement set going therein, is discovered at the start, traced to its causes, and fully understood as to possible results. This gives a value to these recorded observations, that could have been secured in no other way.

Every section of the country is covered. The man in Kansas City casts his eyes over the wind-blown reaches of Kansas, and across the fertile fields of Missouri, and with a pen full of humor—with a touch of cynicism at times—sizes up the situation neatly, and tells the world where the great Southwest "is at."

Digitized by Google

Down from the Hub comes an even and serious voice telling us that New England holds her own, and that the balance of trade is not against classic Boston. (People must drive nails, and use wheelbarrows, even in the Athens of America.) The Central West is represented by the scholarly philosophy and thoughtful political economy which Cleveland utters in so clear a voice; and the playful humor and sharp sarcasim which have made famous the correspondent at Columbus. The South speaks through those busy B's—Baltimore and Birmingham—in no uncertain voice; the rattling gossip of the one, off-setting admirably the somewhat serious philosophy of the other. The letters from Iowa are read with interest and attention wherever *Hardware* goes; and if Davenport is short of facts, it has the imagination of a novelist, and the fancy of a poet, to fall back upon. And who would know how stands the business of the world, were it not for those models of choice diction from Philadelphia?

These cities are only a few from the many. Who is not pleased to hear from Omaha, Minneapolis, Chicago, and St. Paul? From Buffalo, Pittsburgh, Toledo, Denver, Portland, Albany, and Manchester? Who has not read the graphite—we mean graphic—letters from Jersey City? To merely name these cities is to recall choice and polished essays with a business theme; sermons, not from stones but from iron and steel; skits that would be a credit to Mark Twain; jabs at the follies and fool fancies of men; eulogies of good business methods and honest dealings; obituaries of things that have passed, and left the world better for their passing.

These letters are of value to the trade in many ways; add to the gaiety of nations; show the world that our business men are alive; and place *Hardware* under lasting obligations to the gentlemen whose friendship and patriotic interest have made them possible.

The Coming Cycle Season.

The large number of bicycle companies who have successfully reached the end of the present season without being caught on the rocks of financial stringency and bankrupting competition, are busy at the present time endeavoring to form some plans by which business may be done next year, and dividends predicated.

There is a strong probability that the highest list prices prevailing in the bicycle market for the coming season, even for the best known goods, will be, for single wheels, $50; chainless, $75, and tandems, $75. At these prices there is but little doubt the future is full of promise for such makers as have this year found it difficult to market their product at list prices established a year ago, without disrupting all their organized methods, by working up cut prices through some department stores.

The large department stores will surely be forced to stick to their former manner of handling these goods, that of selling "bargains" only. The $14.99 bicycle will still find purchasers among the reckless and inexperienced, and the grade of wheels that can be sold at prices represented by this minimum quotation, will make buyers of people who, after they have become fairly expert, will demand safer, better known and more expensive mounts, but the day for calling any wheel "a regular $100 wheel" will be found to have passed beyond recall.

Already, wheels having an established reputation for excellence, are announced at list prices for 1899, as low as $40; and the fact that similar wheels, under other highly esteemed name-plates, have been sold by department stores as low as $25, will not militate to their disadvantage, provided a more reliable class of agents is selected to distribute the 1899 product. The factories that have been making up phenomenal outputs to be sold at any and all prices, will be noted as being more conservative in their views, as the former plan was unproductive of a sufficient net profit. They will now be found soliciting the Hardware dealers in the leading cities of the country, and a better class of agents could not well be selected than these would prove for bicycles having a name and reputation, which would merit the pushing endorsement of this well established industry, so substantially backed by capital and experience.

The bicycle manufacturer on the verge of being pushed to the wall, who can throw together a large lot of material into a semblance of wheels of repute, will still find a friend in the department store buyer to whom price is everything and reputation of small account; but the product of the ambitious maker, proud of the fame resulting from continuous advertising and the making of meritorious cycles, will find responsible agents who will sell first-class cycles only, at a moderate profit, and manifest a proper degree of pride in a reputation which "is not for a day, but for all time."

Politics usually interfere with business, but this year business seems to be booming along in the good old way, without much reference to political conditions. This is a hopeful sign. It shows that things will in all probability hum after election.

They Got Their Man.

The Iowa Retail Hardware Dealers Association has proved once more the fact that benefits of a direct business character can be secured by organizations of this character. A circular was issued by the Association calling attention to the fact that a man was systematically working a "check racket" through Iowa. As a result of this circular, the offender was apprehended at Iowa City, but not until he had worked his little game in Sioux City, Council Bluffs, Iowa Falls, and elsewhere. The secretary of the Association, H. A. Cole, states that the Association will see that the offender serves more than one term in the penitentiary, in order to protect the Hardware trade of the United States against his dangerous methods. Mr. Cole continues as follows: "What makes him a dangerous and successful confidence man is the fact that he looks, acts and talks just like an old farmer, and is the last person in the world that any one would take for a confidence man."

The story of his capture at Iowa City, was that Lienty & Thomas, after reading the warning sent out by the Iowa Retail Hardware Dealers' Association, immediately telephoned, as per instructions, to the furniture stores of the town, and by one o'clock that day one of the furniture men brought in a stove dealer who had been worked by a man answering his discription, that morning. Before night he had been apprehended at the railroad station where he had purchased a ticket for Cedar Rapids, and has practically admitted his guilt.

Was it of the plumber who makes an appointment to mend that leak and does not show up, of whom Tennyson's maiden sang: "He cometh not, she said."

HARDWARE'S "Prices Current" are reliable.

Digitized by Google

HARDWARE NOTES BY THE WAY.

Editor Hardware: Retail associations of national scope are the order of the day. They will be the feature of the near future. Probably the first organization of this kind will be found among the retail druggists of the United States, a class of merchants who are supposed to lead in thought and action, on account of the intelligent element which it embraces. The Hardware dealers ought to be a close second in this undertaking, for their interests are fully as large, if not larger, than those of the retail druggists. They likewise comprise an element of superior intelligence; the very nature of the business would suggest a keen acumen. Then, modern conditions and exigencies have imposed problems affecting every Hardware dealer alike, and whose solution for mutual good is no longer possible under mere local consideration. These questions might be advantageously considered at a full-delegated national convention.

Could there be any commercial interest more powerful than a National Retail Hardware Dealers' Association? Who would dare to defy its resolutions, manufacturer, jobber, trust, legislative body, in an appeal for equity? But it would seem superfluous to eliminate even the fundamental reasons why such an organization should exist. Every dealer knows them best himself. They are too obtrusive to be ignored. Through the wholesome advice published in *Hardware*, much enthusiasm has already been engendered. All it needs now is good organizing talent. It goes without saying that the movement towards a national amalgamation should go out from the seats where local organizations already exist. These once *en rapport*, the evolutionary details will shape themselves.

DISPENSING WITH TRAVELERS.

A large Western distributor recently sent out circulars to the wholesalers of three States containing the interrogation: "Suppose we came to a general agreement to dispense with the services of our traveling salesmen, placing our business upon a mail, telegraph and telephone order basis, each house employing a general route agent who would give his personal attention to our customers at stated intervals during the year, would such an arrangement, in your opinion, solve the question?"

The correspondence resulting from this inquiry would fill a good-sized tome, and would be interesting reading. A cursory examination of the suggestions offered convinced me, however, that the question of the traveling salesman is as intricate as ever, and not one out of the entire number of respondents would take the initiative in abolishing the road salesman. Thus, the whole result in a nutshell may be put in the following words: We would like to do away with the traveling salesman, but can't afford it, and we could not trust our competitors nor ourselves in the carrying out of so useful a plan.

Thus, one of the most momentous problems of modern commerce has again come to grief. So far, I know of but one house which has reduced its traveling force from fifteen to five, with equitable results. This house has practically placed its business upon a mail-telegraph-telephone basis, and is now intent upon relieving the remaining five salesmen of their duties. But it is essentially a specialty rather than a general Hardware house, but this achievement is nevertheless remarkable.

ATTRACTING BUSINESS.

Here is a novel ad.: "We do not sell goods upon the guarantee of the manufacturer, or upon their merit, so-called, of which probably you nor we know enough to fully meet our views. But we sell goods on our commercial morality, upon which our business is founded. Thus, if we were to sell you unsatisfactory goods, it would be equivalent to knocking the props from under us. Do you now realize that, by dealing with us, you are in safe hands?"

Schemes to further the sale of goods are generally to be disapproved. But schemes to attract the public to your store and make yourself talked about in a pleasant way, are within the scope of even the conservative Hardware dealer. A Chicago dealer of the strictest respectability has made such a scheme feasible in the following feature: In a window were dumped an incongruous lot of nails, making in itself an interesting display. To every one who made a correct or approximately correct guess of the number of nails in each box, or of each variety, was given a household article representing a value of no less than $5, or more than $25, the choice to be left to the successful contestant.

"Playing Poker," was a sign in large letters in the window. These are magnetic words to the average American. The crowd of men in front of the windows proved it. Stepping nearer, I discovered an individual costumed as a juggler. He was seated on a stove, and there were stoves all around him. His face was as black as the ace of spades; his costume represented card figures. The chips were probably represented by the round stove pieces piled up. There was no money in sight, but a card announced that a clean-profit jack pot could be bought with every stove. And the juggler continued to grin pleasantly and give a juggling exhibition in stove pokers.

Moving figures are a popular spectacular feature, and a Hardware clerk put it to good account. The toy season is soon to open, and so this bright pupil of the modern art of window dressing, secured a lot of automaton toys representing animal and human figures, and other phenomena of the now-you-see-me-and-now-you-don't-see-me variety. He employed an electrician to assist him in properly arranging the figures so that there would be no mix-up in the programme. After several nocturnal rehearsals behind the curtain, the show ran smoothly enough to allow of its being announced in the newspapers. It proved the biggest feature of the town, especially for young America, and its advertising value may easily be imagined.

"MADE IN AMERICA."

A dealer in a Southwestern town sent a card to the editor in which he tried to demonstrate that "commercial patriotism" should be the order of the day, and in order to give American manufacturers a full scope at home before even an attempt could be considered to effect similar conditions abroad, every American dealer should place the motto, "Made in America, by Americans, for Americans" and "Good enough for all the World," before any other consideration. Said dealer runs an ad. in the town paper from which the following excerpt is made: "I handle goods, made in Germany, but I don't like to. I handle goods, made in England, but I don't like to. I handle goods, made in America, and these are the goods I like to sell. If the public had the same likes and dislikes, the commercial patriotism of our nation would be a thing in fact, not fiction."

No one fears the outcome of '98. It will be one of the biggest business years since '92. The disgruntled ones

Digitized by Google

will be those whose energies have not carried them far enough into the fray of competition. No one need expect a full measure of success to-day who has not laid down his mite at the altar of sacrifice. Perseverance is the highest priced virtue of modern commerce.

From an ad.: "Things these post-bellum times are rather uninteresting. The newspapers gall one with politics. To gain a complacent mood, turn your thoughts to your home. Spend your leisure there. Our handy house tools will help you. We have a full line, enabling you to pleasantly employ your leisure and save all unnecessary repair bills."

Snow and ice tools may now be pushed to advantage. Sell early if you desire to sell largely. Rather sell cheap early in the season than late in the season. The public and trade are now generally intent upon providing for the needs of the winter season. Fructify that intent by interesting it. A drive in snow shovels now will be a much better success than next March. Try by actual comparison, and you will agree.

A Western Hardware dealer specializes door checks and springs. He even employs solicitors who handle this specialty exclusively. They are mechanics in their way, affixing new springs and checks and regulating old.

Cleveland, O., October, 1898. J. B. Rindfleisch.

Death of James L. Work.

A formal announcement is made by James A. Farless, secretary of the New England Hardware Dealers Association, of the death of the treasurer, James L. Work, who passed away at his residence in Medford, Mass., on Monday, October 10th. Mr. Work was fifty-three years of age at the time of his death. He was born in Topsham, Maine, on April 11, 1845. In early life he entered the Hardware business in Boston, and was later admitted to the firm of J. W. Vinal & Co., now located in Dock square. In 1868 he made Boston his home, and five years later he took up his residence in Medford, where he had resided since.

A meeting of the wholesale and retail Hardware dealers of Boston was held on Saturday, October 15th, for the purpose of taking action in regard to the death of Mr. Work. Anthony S. Morss acted as chairman, and James A. Farless as secretary. The following resolutions were unanimously adopted:

Whereas, The members of the wholesale and retail hardware trade of Boston learn with exceeding regret of the death of their late esteemed associate, James L. Work, be it

Resolved, That we hereby express our heartfelt sorrow at this dispensation of Providence which has removed from our number one who was greatly beloved and respected by all of us.

Resolved, That our late brother had endeared himself to us by many years of business activity during which his unfailing courtesy and his sterling integrity made it a pleasure and a privilege to be associated with him, and that his memory will be gratefully cherished by all.

Resolved, That our heartfelt sympathy be extended to his widow in this hour of her bereavement.

Resolved, That a copy of these resolutions be sent to Mrs. Work.

Wm. Schollhorn & Co.'s Announcement.

In a notice to the trade, the Wm. Schollhorn Co., of New Haven, Conn., make the following announcement: "Having sold our scissors and shear business to the National Shear Co., New York City, we would kindly request you to forward your orders and correspondence for such goods to the above named company. The closing out of the scissors and shear departments of our business will in no manner affect, only favorably, our other lines of manufacture (pliers, tools and Hardware specialties), which we are constantly increasing as rapidly as can be accomplished."

Make Your Own Signs.

Most retail merchants do not realize how easy it is to acquire considerable skill in the art of making attractive card signs for placing on their counters and in their windows. With a proper outfit, which costs but a very little money, the average clerk can learn in an hour's time enough about this sort of work to render the services of a professional sign painter entirely unnecessary. That attractive little card signs, often changed and ingeniously placed, are most excellent advertisements, and add much to the prosperity of the merchant using them, is self-evident.

The instruments necessary for the making of these store guide posts are pens, brushes, inks and Bristol board. But all these have to be of a special kind made purposely for this kind of work. Most Hardware dealers do not know

where to buy them, and even if they did they would have to send to many different places for them, and pay separately for them much more than that for which it is possible to sell them when all are collected into an outfit.

This work has been done by the Spatula Publishing Co., No. 8A Oliver Street, Boston, whose object was to get together an outfit for this work that should contain everything necessary for the making of a large variety of store-card signs, and which should not cost the retailer as a whole, including the faintly ruled Bristol board, delivered anywhere in the United States, more than $2.50.

This is the only outfit of this kind that has been offered to the trade, and its usefulness will quickly be demonstrated to any one who purchases it. The outfit is enumerated and illustrated in their advertisement.

The New Chicago '98 Clipper.

T. J. Clark, secretary and treasurer of the Chicago Flexible Shaft Co., Nos. 158 and 160 Huron Street, Chicago, is at present in New York for the purpose of extending the trade distribution of their product among the leading owners of fine horses in this community. One of the first important changes that followed his advent, was a reduction in the price of their most popular machine, the "New Chicago '98," from $12.75 to $8 75 each, placing it at once within the reach of almost every horse owner in the country. Recent methods of manufacturing have so economized the cost of production, the company were enabled to take this step, believing the low price would open up a large trade in sections never before fully attended to. The result of so doing has been of the most gratifying character, as the machine is sold even at this low price, under a guarantee for two years. The Allerton-Clarke Co., Nos. 97 Chambers and 79 Reade Streets, are the New York agents for the Chicago Flexible Shaft Co.

Theodore Roosevelt, the Republican candidate for Governor of New York, has many attractive qualities, among which may be mentioned a glistening set of good, sound teeth. A little girl in Brooklyn, who saw him smile when being introduced to an audience the other evening, turned to her mother, and whispered excitedly, "Oh, see that man staring at us with his teeth!"

English Hardware Associations.

The movement in the direction of organization within the Hardware trade, which has been so successfully carried forward in America, has passed onward with great momentum, and is being felt with power upon the English shores.

Reference has been heretofore made to the movement toward a Hardware Club in London. Further steps in that direction are being taken. At a recent meeting of the council of the National Hardware Association held in London, the principal topic discussed was this proposed club. A report was made by Thomas Coates, the secretary, to the effect that he had issued a number of circulars on the subject, and had received in reply a large number of letters from leading members of the trade, both in London and in the provinces. These letters showed that the feeling in favor of the establishment of such an organization was almost unanimous, as out of a total of sixty firms who answered, only one or two were in opposition to the project. The record of the Hardware Club of New York was placed before the council, and proved to be an incentive toward definite action. It was decided that a further circular should be issued on the subject of inviting suggestions as to the financial basis on which the club should be founded. The secretary was instructed to write to the Royal Metal Trades Pension Society, and the Hardware Musical Association, asking that the matter should be brought before their members, in order to secure an expression of opinion. The secretary was also instructed to write to the trade journals of the United Kingdom, asking their aid in the movement.

An association is in existence in Birmingham known as the Birmingham & District Petroleum & Hardware Dealers' Association. At a recent meeting, rules were adopted to the effect that all members of the oil and Hardware trades in Birmingham and district, were eligible for membership, whether engaged in the wholesale or retail trade. The objects of the association were declared to be as follows: "The objects of the association are to promote the welfare of the trade and to induce members of the trade to become more united, and to act together to watch over the interests of the trade as effected by legislation or other external influences, and also to endeavor to obtain the selling of petroleum at a uniform retail price."

It was decided that the minimum subscription for retailers should be 2s 6d per annum, and for wholesalers 5s per annum.

There has recently been formed an association at Huddersfield, known as the Huddersfield Ironmongers Association.

An association known as the Scarborough Ironmongers Association has also been formed in the town named, composed of retail and wholesale ironmongers.

These various movements show that the Hardware Association in England, as in the United States, has come to stay.

Hardware Dealers and Wheels.

Hardware is not alone in its belief that the bicycle is eventually to be handled, except in rare cases, by the established Hardware dealers. The logic of the situation demands it. There is much evidence in support of the statement that others are coming to view the matter in the same light. In a late issue of the *Wheel*, one of the leading organs of the bicycle trade, we find an interview with a manufacturer, who unhesitatingly takes the position we have so long maintained. The questions and his answers run in this wise:

"But the exclusive dealer——"

"——Is a goner. I mean the one-store, small-capital man."

"Where will the thing end?

"Bicycles will be sold by people who will handle them as a side line. They will be content with very small profits."

"What class of people?"

"Hardware dealers, I think."

This dealer has indeed thought to a good purpose.

Chicago Retail Hardware Dealers Association.

The Hardware dealers of Chicago have come together and formed the Chicago Retail Hardware Dealers' Association, which is practically an expansion of the Hardware Dealers' Association of the northwest side of that city, which has been in existence for some years. The meeting was held some days since, at which the above action was taken, and the officers of the parent organization were continued until next January as officers of the new, as follows:

President, Theodor Krueger, No. 139 Milwaukee Avenue.

Vice-President, Fred Kurtz, No. 1061 West Madison Street.

Secretary, E. Goettsche, No. 1049 Milwaukee Avenue.

Financial Secretary, John Hora, No. 661 Milwaukee Avenue.

Treasurer, J. L. Smith, No. 752 West North Avenue.

Charles W. Emery.

A recent issue of the St. Joseph (Mo.) *Daily News*, has the following pleasant words in regard to a gentleman who is very favorably known in the Hardware trade: Charles W. Emery, who has been in charge of the salesmen's department of the Wyeth Hardware & Mfg. Co. of this city since its organization, has resigned the position. Since the time Mr. Emery has been in charge of the department the travelers have been increased from twenty to thirty. Mr. Emery's warmest friends are the salesmen who have co-operated with him and assisted in building up their trade, and who will not soon forget his indefatigable labor in their behalf, as well as for the company. He has demonstrated to the business men of St. Joseph who have had an opportunity of coming in touch with the affairs of that department, that he is an expert. Mr. Emery has been in the employ of the company twelve years, beginning in 1887 as a traveling salesman in southwestern Kansas and western Missouri.

The Pastime Lawn Mower and Trimmer.

This mower which has been on the market for the past two seasons, has met with universal favor, but on account of the high price at which it was held, has prevented many from feeling they could afford such a luxury. The manufacturers have decided to reduce the price for the season of 1899, in order to make it more popular, and be within the reach of any one desiring a good combined mower and trimmer. Its features are principally being able to trim within one-quarter of an inch of any object, and the facility with which it can be sharpened by the user with an ordinary file. The manufacturers, the Pastime Lawn Mower Co., of Detroit, Mich., will be glad to quote prices on application.

New Members of the Hardware Club.

At the regular meeting of the board of governors of the Hardware Club of New York, held on October 13th, the following gentlemen were unanimously elected to membership in the club:

Selden Bacon, Tribune Building.

Bradford Merrill, Pulitzer Building.

Vincent S. Mulford, No. 192 Broadway.

A tombstone always has a good word for a man when he's down.—*Exchange.*

Howard-Allard Spiral Screw Driver.

Voigt, Starr & Co., No. 67 Reade street, New York, have been appointed sole agents for the sale of the important line of spiral clutch and triple-bit screwdrivers, manufactured by F. A. Howard, Belfast, Maine, known under the names of the "Jones Patent Reversible Spiral," which will be found represented in their advertisement on page 34B, and the "Howard-Allard," of which we give an illustration herewith (Fig. 1), showing it either closed or extended. It is claimed by the manufacturers of these screw drivers that the blades are made of the finest steel and tempered with great care, so they will not crumble or turn. They are warranted throughout. The Howard-Allard screwdriver, represented in the cuts, may be used as a spiral, ratchet or ordinary screw driver, whereby if it is found that a screw cannot be driven to its place by use of the spiral, it is readily done by using it as a ratchet or ordinary screwdriver. It is provided with three bits nicely finished, of different sizes to enable the operator to select one to fit any size screw he may wish to use. These bits can be instantly interchanged and secured in the clutch provided for the purpose. The knurled nut of the clutch is made of steel and the socket of steel, as is also the spindle which is provided with four spiral grooves, which are cut deep and have square sides, and which nicely fit corresponding grooves in the extra long nut through which it passes into the handle. This gives it several times the bearing surface to wear usually found in this class of tools, which have fewer spiral grooves and shorter nuts. The handle is made of thoroughly seasoned hard wood, nicely finished. The whole tool is not only attractive, but also very strong and durable. It is made in two sizes, Nos. A1 and A2, each with three bits, each screwdriver being packed in a strong wooden box.

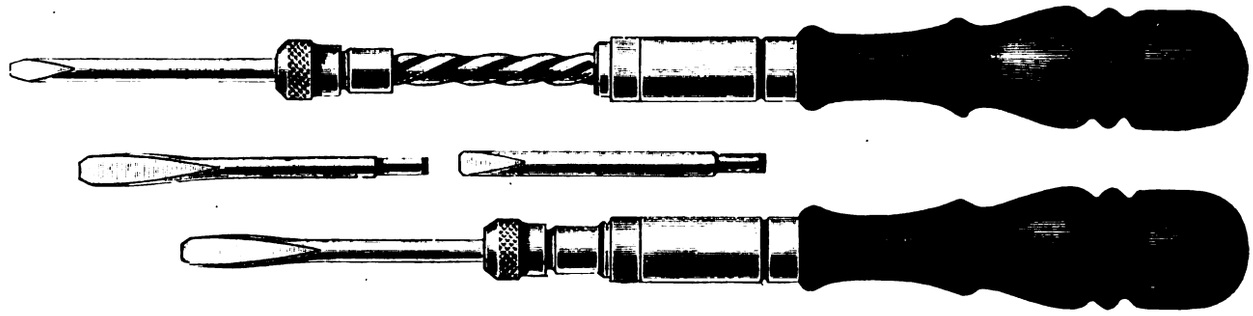

FIG. 1.

A lower priced spiral screwdriver called the "Electric" is also included in the assortment, which in many respects is a vast improvement over screwdrivers intended to be marketed at same price. We give herewith an illustration of the same (Fig. 2). It is made in two sizes, Nos. 02 and 01, the length of each when closed being respectively 8½ and 11½ inches. Full particulars regarding these screwdrivers will be forwarded upon request to the New York agents.

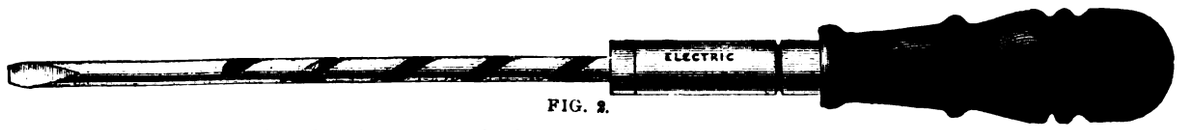

FIG. 2.

Iver Johnson's Arms and Cycle Works.

William H. Cole will on November 1 resign from his position as manager of the New York office of Iver Johnson's Arms & Cycle Works, his interests with his former firm of Tower & Lyon making it desirable he should return to his original field of labor in order to relieve his partner, Mr. Tower, from the constant care and attention which the details of their aggressive business make necessary. The office of the Iver Johnson's Arms & Cycle Works will be continued at the present address, No. 99 Chambers street, although the new manager has not as yet been assigned to the place. While the cycle business of this company for the year has been more largely in advance than any previous season, the strike now in progress at the works has handicapped later deliveries to some extent. It is the intention of the company to add cycles having 30 inch wheels, and also a superior cycle of the chainless variety to their line for 1899. The fire arms division of their production has enjoyed a phenomenal business during the year, and orders in process of fulfilment even at the present time are so liberal, prompt deliveries on later specifications would be difficult to obtain.

Makers of Agricultural Implements.

The first convention of the National Association of Agricultural Implement & Vehicle Manufacturers of the United States held east of Chicago was held at Philadelphia, October 19, 20 and 21.

This was the fifth convention of the organization, which has met twice in Chicago and once each in Nashville and in Detroit. The members are makers of agricultural implements, wagons and carriages. Among the most prominent of the manufacturers present were: W. H. Parlin, president, Canton, Ill.; O. D. Frary, secretary, Chicago; W. A. Merrifield, vice president, Freeport, Ill.; H. C. Staver, chairman of executive committee, Chicago; Charles H. Deere, Moline, Ill.; J. H. Bradley, Bradley, Ill.; H. W. Conger, Milwaukee; Colonel J. B. Morrison, Fort Madison, Ia.; F. E. Myers, Ashland, O.; H. A. Carnah, Canton, O.; Colonel G. Watson French, Davenport, Ia.; John W. Good, Moline, Ill.; E. G. Hoble, Batavia, Ill.; W. W. Collier, Detroit; W. T. Lewis, Racine, Wis.; H. K. Walcott, Batavia, Ill.; S. B. Lafferty, Davenport; U. G. Orendorff, Canton, Ill.; W. R. Wooden, Battle Creek, Mich.; J. M. Metcalf, Omaha; Oliver Stitus, Shortsville, N. Y.; Frank Bateman, Grenloch, N. J.

Two-thirds of all the letters which pass through the post-offices of the world are written by and sent to people who speak English. Only one-quarter of these people, it is said, use English as their native tongue. The curious circumstance is explained by reason of the fact that commercial intercourse is largely in English, even among those who do not speak the language as their native tongue.—*Ironmongers' Chronicle.*

There was a little man,
And he had a little gun,

And his bullets were made of
Lead, lead, lead;

And his name was Uncle Sam,
And he didn't care a—clam,

How many little Spaniards
Were shot dead, dead!

RECENT TRADE PUBLICATIONS.

The Cleveland Rubber Works of the Mechanical Rubber Co., Cleveland, Ohio, have issued a remarkably artistic and attractive catalogue, illustrating and describing the extensive lines manufactured by them. How extensive these are, may be learned from the fact that three closely printed pages are devoted to an index alone. The work contains 120 pages, is compactly put together, and well bound; printed in colors; contains a highly artistic frontispiece, and on the back cover there is a view of the extensive works of this concern at Cleveland. A large number of illustrations are scattered through the work, and as heavily calendered paper is used, these are all brought out in excellent and artistic shape. A description of the Cleveland Rubber Works is given, with further information as to shipping facilities, the manufacture of rubber belting, etc. In a note of introduction the company say: "This business was established in 1872. The present management has directed the business from the beginning. The ripe experience gained during these years has been instrumental in bringing our factory up to its present high standard. Many steps of advancement have marked the manufacture of rubber goods. The Cleveland Rubber Works has always been in the very front of this advancement. In addi tion to mechanical goods of every description, we also manufacture a complete line of druggists' sundries and clothing. The needs of customers have always been carefully studied. Not alone present requirements, but our attention has often been directed toward the extension of the field of usefulness for rubber goods. These efforts have opened new lines, requiring added facilities. No expendi ture of either time or money has been spared in prosecuting investigation and experiments. These efforts have been appreciated by the trade general'y, and have established for us a reputation as leaders in our line of business. The tendency to cheapen rubber goods by the use of inferior materials below a point of safety, has become almost universal. We make goods as cheaply as possible. When quality is given proper consideration, our goods will compare favorably with those of any other factory in the world There is a point in price and quality below which we refuse to go. Our success has been attained by making good goods at a reasonable price. Our past success has been achieved by the methods above suggested. They will characterize our future efforts."

The Woodruff Hardware Co., Knoxville, Tenn., have forwarded us their gun and ammunition catalogue No. 2 for 1898–'99, which contains a descriptive price list of the large line of breech-loading shotguns, revolvers, ammunition, etc., handled by them. The catalogue is very thoroughly illustrated, and on the front cover is a photograph of their large establishment at Knoxville. A look through these pages is sufficient to stir the heart and excite the envy of any sportsman, or anyone to whom a gun, especially at this season of the year, means something of practical and effective value. There is nothing in the way of sporting goods which is not found illustrated and described herein. The catalogue is a credit to the house by which it is published.

The Matthai, Ingram Co., of Baltimore, have certainly condensed a great deal of information into a moderate space. Their recent catalogue of sheet metal goods for the present season, is a neat, handsome and compact volume of 250 pages and more, printed upon very good paper, and finely bound, but of a size which enables it to be used with ease, and kept upon the desk for instant reference. It measures only 8x5 inches, but is sufficiently large to permit the illustrations to show up in first-class shape. The publication contains a number of views of their establishments in Baltimore, New York and elsewhere, interior views of their salesrooms, telegraph code, etc. Four pages of fine print are used for the index alone. Each article shown is accompanied by full description. The work is divided into sections as follows: Section No. 1, Grey Stone Enameled Ware; Section No. 2, Stamped Ware, Plain and Re-Tinned; Section No. 3, Pieced Tinware, I C Heavy Polish, Old Time Embossed; Section No. 4, Galvanized and Black Iron Ware; Section No. 5, Japaned Tin Ware; Section No. 6, Tinners' Trimmings and Supplies. In a note to the trade, the company say: "In compiling this revised edition of our catalogue, we have retained the comprehensive manner of illustrating and describing the various lines of sheet metal ware manufactured by us. Our greatly increased facilities, both as regards the extent of our works, as well as the addition of the latest and most improved machinery, enables us to supply the wants of all classes and meet the requirement of any section of this country, as well as that of the export trade."

We have received from J. B. Kessler & Son, Clayton, Mich., their very valuable publication entitled "100 Ads. for One Dollar," prepared by Burton R. Kessler, the well-known writer and designer of advertising. A great deal of care, and not a small amount of genius, have been displayed in the preparation of these one hundred advertisements, all of which are intended for practical use by local Hardwaremen, in their home publications. In other words, by the payment of one dollar, the Hardwareman in any section of the country can receive one hundred advertisements set up in attractive shape, applicable to his own business, and ready to be inserted in the home publications, by simply the addition of his name and address. The retailer who does not avail himself of this opportunity to get an immense amount of experience aud knowledge for a small sum, has missed one of the opportunities of his business life.

The W. Bingham Co., Cleveland, Ohio, are sending their friends a handsome little monograph, in which the establishment is permitted, by use of a camera, to speak for itself. It is a series of photographic reproductions of their large store in Cleveland, showing in various photographs the general office, the president's corner, the buyer's office, sales department and photographs of some of the older employees. We miss the attractive countenance of Hon. William Bingham, the head of the house; the genial H. S. Blossom, the executive head, and other well-known men of the younger generation, who assist in keeping this great house in the conspicuous position which it has occupied for so many years. This publication seems to have been suggested by the excursion of the Wholesale Merchants' Board of the Cleveland Chamber of Commerce, on October 4–7, 1898.

F. E. Kohler & Co., Canton, Ohio, the well-known manufacturers of Hardware specialties, have issued a catalogue in which one finds shown in excellent form, those famous and long known articles which have made the name of this company known in any part of the world where post holes are dug, lawns are raked and corn is planted. Among

Digitized by Google

these articles are their curry combs, hog ringers, lawn sprinklers, pruning shears, snow shovels, garden trowels, weeding hoes, etc., etc. Unlike some catalogues, each article is thoroughly described in every detail as to use, size, price, etc., and the reader knows as much about goods after an inspection of this work as he would after a visit to their factory. This catalogue will be sent on application.

The Iowa Farming Tool Co., of Fort Madison, Iowa, have issued a very handsome catalogue for the season of 1899, illustrating and describing their well-known lines of farm and garden tools. This is handsomely bound in colors, contains over one hundred pages, is printed in brown and blue, and upon paper of a quality that brings the illustrations out in a very attractive manner. A view is shown of their workshops and warehouses, twenty-three in number, which constantly employ from 200 to 225 hands.

We have received from Farwell, Ozmun, Kirk & Co., St. Paul, Minn., their large illustrated fall catalogue of silverplated ware, cutlery and clocks. This publication is especially adapted for the fall trade of 1898, and contains over one hundred pages, filled with illustrations and descriptions of about everything that can be conceived of in the line mentioned.

The Skinner Chuck Co., New Britain, Conn., have issued an illustrated 1898 catalogue of their Skinner Chucks, including their lathe chucks, drill chucks, trainer chucks, etc. It is illustrated with sizes and prices.

Bissell's Christmas Offers.

The Bissell Carpet Sweeper Co., ever mindful of the increasing popularity of the Bissell Carpet Sweepers, and being desirous of further stimulating the interest on the part of the dealers in their favorite brands of sweepers, are issuing to their customers a very comprehensive circular letter setting forth their Christmas offers for this year, in which they call attention to the unqualified holiday inducements for their cash prize offer, emphasizing again their reduced prices, and calling attention to the fine finishes of their extra high grade sweepers, also calling attention to their latest effort in carpet sweepers, the "American Queen," which, they say, for an acceptable Christmas gift cannot be surpassed.

All of these features are brought out very strongly in the circular letter that is now being circulated among the customers of the Bissell Co; likewise, impressing upon their customers the importance of placing at once, orders for their holiday wants. The factories of the Bissell Co. for the next eight weeks will be crowded to their utmost capacity. Their trade during the present fall season has exceeded that of any other in the history of their business.

We would advise readers to write the Bissell Co. for full detailed information concerning this Christmas offer if they have not already received it; also, to get their Christmas order blanks, which set forth very clearly the special inducements that this company are offering. The offer is as follows:

"To stimulate our customers to push the sale of our goods to the fullest extent during the holiday season, we offer the following cash prizes for the best advertisement of Bissell's 'Cyco' Bearing Carpet Sweepers,—newspapers containing these advertisements to be mailed so as to reach us not later than January 10th, 1899:

First Prize	$50.00
Second Prize	35.00
Third Prize	15.00
Fourth Prize	15.00
Fifth Prize	10.00
Sixth Prize	8.00
Seventh Prize	7.00

"Most dealers have regular newspaper space, hence this competition will cost them extra.

"In properly advertising our goods you cannot fail to largely increase your sales on carpet sweepers; besides you will stand a good chance of winning a liberal cash prize. We will furnish you gratis attractive cuts that will draw the attention of the reading public to your advertisements and business, thus benefiting you in a general way. We call your attention to the attractive series of electrotypes shown herewith, which we shall be pleased to furnish you for use in your newspaper space, and in conclusion, we trust you will see the advantage to be gained in making a strong push on Bissell Sweepers during the holiday season. Yours truly,

BISSELL CARPET SWEEPER CO.

Grand Rapids, Mich., November 1, 1898.

Following are the conditions governing Bissell's cash prize offer:

1st. Only customers of the Bissell Carpet Sweeper Co., are eligible to this competition. 2d. All advertisements in this competition must dwell upon the merits of Bissell's "Cyco" Bearing Carpet Sweepers, and their desirability as Christmas gifts 3d. Newspapers containing competitive advertisements must be mailed so as to reach us not later than January 10, 1899. 4th. There is no limit in this competition to the number of advertisements from one dealer. 5th. Competitive advertisements must appear between the dates of November 1, 1898, and January 10, 1899. 6th. Advertisements will be passed upon and prizes awarded by a committee of advertising experts, selected from an advertising agency of national reputation, and prizes will be paid as soon as possible after January 10, 1899. 7th. A copy of the successful advertisements will be sent to all who enter this competition.

Death of Newall W. Belcher.

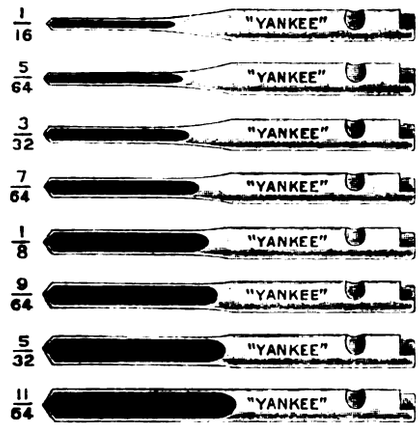
In the death of Newall W. Belcher, at the age of 55, at his summer residence in Bayside, Warwick, Providence, R. I. lost a citizen well known in business circles. Mr. Belcher was the third son of Joseph and Hannah Belcher. He was born in Providence, where he was educated in the public schools. After completing his high school course he entered the Hardware business with his brothers Leander C. and Joseph, who did business under the name of Belcher Bros. He became a member of the firm, as also of the firm's successors, Belcher Bros. & Co. and Belcher & Loomis. When the Belcher & Loomis Hardware Co. became a corporation the deceased became a stockholder and silent partner, though he no longer engaged in active business. He was well-known in business circles and had many friends and admirers. He was a member of the F. L. I. Veteran Association.

In a recent issue of *Hardware* we made mention of a new Hardware store at No. 1,388 Fifth Avenue, New York, and regret to say that the name of the proprietor was incorrectly given. This name should have been E. H. Barrett. We are advised that Mr. Barrett is doing a nice business, and his years of experience in the Hardware business enable him to give the people good goods at a right price. He has been for the past seven years with Smith, Lyon & Field, New York, and for the past four years their traveling salesman. We wish him success in his new enterprise, and he will appreciate catalogues, circulars, etc. He carries a line of builders' and general Hardware, wood and willow ware, crockery, glassware, brushes, etc.

"What's the matter with Holland? I hear he's laid up."

"Yes; he bought his wife a chafing dish a couple of weeks ago."

"But surely that isn't responsible for his illness. Why, that fellow can eat anything!"



"Oh, it wasn't anything that he ate. She hit him over the head with it."—*New York World.*

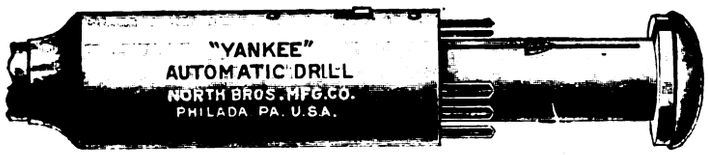
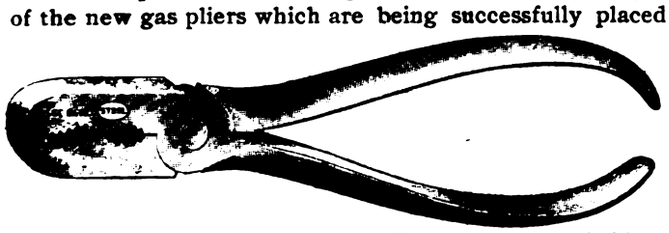
NEW GOODS AND SPECIALTIES.

"Yankee" Automatic Drill.



The North Bros. Mfg. Co., Philadelphia, Pa , are placing upon the market the new "Yankee" Automatic Drill, No.

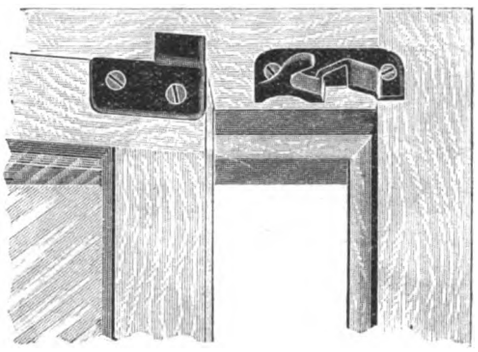
40, illustrated herewith. In describing the same, they point out the fact it embodies improvements over those now in the market in the Magazine for Drills. This is found in the handle and reached by pushing the catch toward the top of the tool, which causes the interior of the handle to move upward, showing all the drills in plain sight as in the illustration, and so they can be readily removed. This enables the user to quickly select the drill required. When the two upper parts are closed together they are fastened



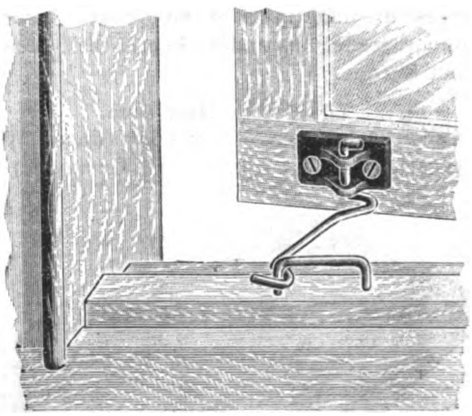
automatically and held firmly in place. "The chuck is of new design, is stronger and will last longer than any now used in such tools. To insert the drill the sleeve of the chuck is turned to the left, the drill inserted and the sleeve let go. If the sleeve does not return to its place, push on drill and turn in chuck until it does. In hard or tough woods this drill can be operated as a ratchet. The tool is made of brass, nickel plated and finely finished. The material and workmanship throughout are of the best. Eight

drills are furnished with each tool, one each 1-16, 5-64, 3-32, 7-64, ⅛, 9-64, 5-32, 11-64 inch, shown full size in cut. The entire length of tool, inclusive of drill, as in illustration, is 10¼ inches. Packed one in strong paper box. Net prices quoted on application."

Smith & Egge's Gas Pliers.



We take pleasure in showing in this connection a sample of the new gas pliers which are being successfully placed

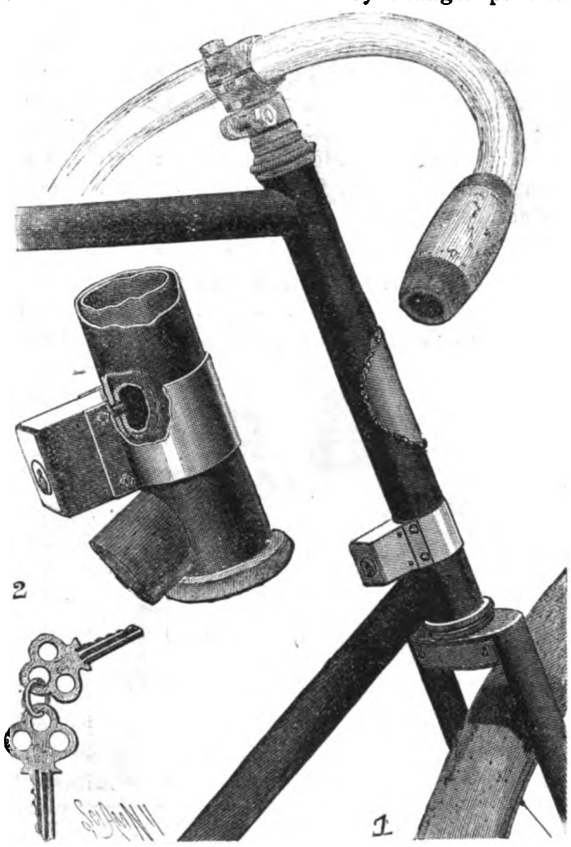


upon the market by the Smith & Egge Mfg. Co., Bridgeport, Conn. It will be noticed that these pliers have a new easy working joint, which, the manufacturers point out, is an improvement over "all gas pliers now on the market." These are made in 5, 6 and 7 inch sizes, and all are made of the best steel forgings, carefully hardened and finely polished. The high standing of this company is a guarantee that these goods are first-class in every respect. The manufacturers will be pleased to furnish prices and discounts on application.

Magic Sash and Screen Hanger.

The Whaley-Dwyer Co., Nos. 108–114 South Robert Street, St. Paul, Minn., are placing upon the market the

Magic Sash and Screen Hanger and Fastener shown herewith. This is described as an article which permits of the removing or replacing of the sash or screen without bother or inconvenience, and this may be done from the inside of the window. It is described by the manufacturers as "simple and durable, practical and economical." The manufacturers further say: "The sockets have lugs or hinges, which prevent the sash from falling out of position when inserting or detaching, which is done by simply holding at the proper angle and pushing upward, or the reverse action. Made of malleable iron, enameled finish. The patent fastening or ventilating rods on either side

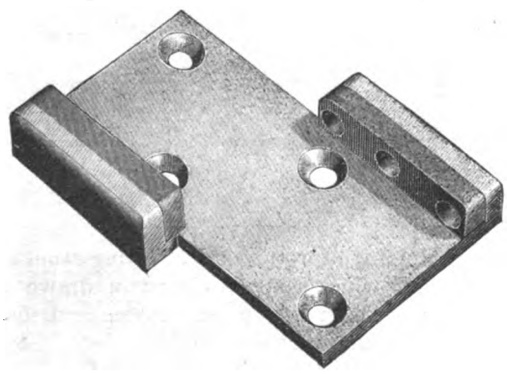


allow of opening sash for purposes of airing room or washing window, and when same is closed or drawn in they lock securely through staple on inside, and lay snug against same. Nickel-plated finish."

The "Sentinel" Bicycle Lock.

The above named article is an ingenious Bicycle Lock being successfully placed upon the market by the Yale &

Digitized by Google



Towne Mfg. Co., Stamford, Conn., with New York office at No. 9 Murray Street. It is permanently fastened to the steering-head of a bicycle, and holds the front wheel at an angle to the frame, thus rendering it impossible for the bicycle either to be led or ridden away. The locking mechanism is that of the well-known Yale pin-tumbler type, which makes the number of key changes practically

limitless, thus absolutely precluding the possibility of other keys being in existence which may fit the lock. During the past summer, a number of these locks have been in use by riders, and the company inform us that it is their unanimous testimony that they are of the greatest service. The lock is of neat design and finish, and, as one rider says, "no better insurance can be put on a wheel." It is stated that it will be extensively placed on bicycles by manufacturers, as a special feature for the coming season; but it may be easily applied to any wheel. While shown in the present cut attached to the head with a separate band, it may also be used directly behind the name plate; the latter being employed as a band to secure it to the wheel. One of the largest manufacturers in the country, having an extensive export trade, has undertaken to introduce the lock throughout Europe.

The Duplex Door Stop.

The Duplex Door Stop, recently introduced by the Yale & Towne Mfg. Co., Nos. 9, 11, 13 Murray Street, New

York, illustrated herewith, is designed for use in connection with their Blount Door Check, as a substitute for double-acting hinges, and there would seem to be many reasons why it should become extremely popular. We are told that the original plans for the Waldorf-Astoria Hotel in New York covered a large number of double-acting doors, but at the suggestion of the Yale & Towne Mfg. Co. the plans were amended to substitute in place of the double-acting spring butts (except for a few single doors) the Blount Door Checks combined with the Duplex Door Stop. The results are said to be highly satisfactory, and the arrangement has since been extensively adopted elsewhere, and is growing in popularity with thoughtful architects. The manufacturers say: "The use of double-acting hinges with a pair of double doors is not only unnecessary, but distinctly objectionable. It encourages people to use the wrong door, thus causing interference between the two streams of travel, and is frequently the cause of accidents. The Duplex Stop permits each of a pair of doors to be opened one way only, and thus compels the stream of travel from each side always to keep to the right. Each door can thus be hung on regular butts and controlled by a Blount Door Check, closing it firmly but quietly, and eliminating the annoying 'flip-flap,' particularly aggravating in the case of double doors, or of a door hung on double-acting hinges. This arrangement involves less first cost than double-acting hinges, and practically eliminates all subsequent expense for repairs. It is the latest and best system of hanging and controlling double doors in the corridors of hotels, stations and public or commercial buildings of all kinds." The Duplex Stops are of bronze, with rubber protectors, as shown in the illustration, and are regularly furnished in almost any finish desired.

Kearney & Foot Co. And Saws.

There is a saw concern in the West that is one of the "coming people" in the Hardware trade.

Quality will always get and hold business where it is uniformly correct, and when it is combined with reasonable prices.

The world is big, and there is enough business for all who try to get it on the *right* basis.

But as to the saw concern,—they have interested the Kearney & Foot Co., the file people, and a full stock is now on exhibition at Nos. 100 & 102 Reade Street, New York, Kearney and Foot Co.'s headquarters.

The saw firm is Geo. H. Bishop & Co. of Lawrenceburg, Ind., and with the opening of their New York office, Kearney & Foot Co., having been appointed salaried Eastern and Export representatives, the trade will be invited to acquaint themselves with these new, fresh and ultra solid goods. The prices are inducing and all who call on or write to the Kearney & Foot Co. may obtain a fifty-four page illustrated catalogue and discount sheet. The many customers of Kearney & Foot files or rasps are urgently requested to communicate with them regarding Bishop's saws, as arrangements are such that files, rasps and saws may be shipped together at the minimum cost of freight.

Kearney & Foot Co. hope by right all-round good treatment to make many new friends with this saw line of goods, besides selling those who are already customers. All are cordially invited to obtain fullest information.

The New England Hardware Dealers' Association held the first meeting and dinner of the season at the United States hotel Boston on the evening of October 12th. There were over 65 members present. The chief guest of the evening was Maj. James A. Frye of the 1st heavy artillery, who gave a pleasant after-dinner talk on coast defense from the standpoint of observations he had made off the New England coast during the recent campaign. Musical selections were rendered during the evening by the Allston male quartet. President Edward A. Loomis presided.

Review of the Markets.

Hardware: Local trade has felt the effects of weather too genial to make purchases of winter goods seem of special importance. The first freezing weather is relied upon to create a demand that will reduce stocks that have accumulated in some lines of goods, and cause a brisker movement in seasonable Hardware, gladdening to all concerned. Prices on staple lines are held in good shape to stimulate purchases; and a good winter business is looked forward to.

Builders Hardware: Some improvement has been noticed recently in the market for builders Hardware, and the indications point to a gratifying increase in the business for the coming season, for which preparations will soon have to be undertaken. No line of business in the Hardware industry so fully represents the artistic advance in the public taste as affecting architectural expression, as in this one extremely important line of manufacture, in the distribution of which the handsomest catalogues in the business are used, no expense being spared to market it properly.

Wire Nails: No new developments are apparent in regard to the market on this important line. Quotations remain at the prices recently determined. Transactions have been moderate in volume; very little of a speculative feeling being noticeable, purchases apparently being only for immediate requirements, assisted by the indisposition on the part of the mills to book specifications very far ahead. We quote, as in our previous report: To jobbers in carload lots, f. o. b. Pittsburgh, $1.35; buyers of single carload, f. o. b. Pittsburgh, $1.40. New York prices are quoted at $1.50 for carload lots on dock; with smaller lots from store $1.60.

Cut Nails: But little activity is noticed in the cut nail market, beyond the fact that the price is sustained at the slight advance made recently. Prices may therefore be quoted at $1.10@$1.15 base, f. o. b., Pittsburgh. New York prices being held at carload lots on dock, $1.28@1.30. Smaller lots from store, $1.33@$1.35.

Cordage: As the market for Manila hemp is controlled by a few manufacturers, it has been advanced in price sufficiently to slightly increase quotations on cordage, the Manila product being held at ½c. a pound higher, while Sisal remains as previously announced. As only a moderate demand is experienced, the market continues firm at the following prices for carload lots:

Manila, 7-16 inch and larger	per pound,	9½	cents.
" ⅜ inch	"	10	"
" ¼ and 5-16 inch	"	10½	"
Sisal, 7-16 inch and larger	"	8	"
" ⅜ inch	"	8½	"
" ¼ and 5-16 inch	"	9	"
" Lath Yarn	"	7½	"

Smaller quantities are held at the customary advance.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of October 20th, quote as follows: In lots of less than 5 barrels, 37 cents per gallon; in lots of 5 barrels or more, 36 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE BOSTON TRADE.

Although the volume of business is not what we might wish at this season, yet it is fully up to the prediction of many of our best merchants who did not expect a large increase of business during the closing months of '98. In certain lines we are feeling the effects of our recent foreign complication, and this is especially noticable in builders' Hardware, the trade in which is far from satisfactory.

In our coast cities and towns, the building of many a projected block, dwelling house, summer cottage, etc., was postponed owing to the conditions as they existed in the early spring months, until more favorable opportunities presented themselves. We feel sure that the outlook for the season of '99 is much more encouraging, and we fully believe that the demand in this particular line of goods will exceed anything we have had for the past five years.

The cool weather has stimulated the call for seasonable goods, and as there were not many "futures" placed early in the season, we are receiving satisfactory orders for such goods as axes, handles, saws, skates, etc.

The absence of any cutting in prices from either manufacturer or jobber, is especially to be noted, and certainly is indicative that values have reached low water mark, and we hope to see advances rather than any further decline.

FRYE, PHIPPS & CO.

THE CLEVELAND TRADE.

Over-capitalization is the most serious evil in American business. The attempt to get rich by organizing, or combining existing companies on fictitious capital, and overvaluation with a purpose of disposing of the watered stock to the public, should be prevented by law. Scores of instances where the real capital has been multiplied by ten and the stock unloaded on a confiding public, could be cited.

The names of successful men and of business firms are used to mislead. Electric roads are built from the proceeds of bonds issued, and a liberal percentage of this goes into the pockets of the promoters, and the stock then sold to the public.

Every incorporated company should be compelled to have the capital paid in for all stock issued. Investors are misled by State authority; firms that have been prosperous and paid the stockholders good dividends, by these reorganizations become worthless, paying no dividends and the promoters never expecting they would.

Stocks in many of the large manufacturing companies are of value only to trade off; thousand of people depending upon their income, have been and are, being defrauded by investing in them. Prosperous merchants are peculiarly liable to be victimized by these transactions, so that their accumulated capital becomes a source of danger involving its owners in speculation.

Contentment with a fair paying business, investing surplus capital only in solid securities secures most happiness. There are so many things of more value than riches that business men are likely to overlook in the scramble for success, and by overlooking make life bankrupt, that we need to be admonished. Real prosperty includes all that makes life worth living.

National banks are compelled to have capital paid up to the amount of stock issued and if the capital becomes impaired, it must be replaced, and there is no reason why corporations authorized by the States should not be controlled. The State should not lend its aid to organize frauds. The authority to incorporate should include such supervision as will compel legitimate and honorable use for the purpose stated.

The evil of over-capitalization has become very serious, and trade journals will become public benefactors by calling attention to it. It has become a foe to uprightness in business; it is the prevailing cause of much of our trouble between labor and capital, as dividends are expected on inflated capital, and wages reduced in attempting to make that possible.

Capital invested and honestly used ought to pay dividends and it is in the interest of labor that it should. If incorporated companies were protected from fraud as National banks are by making peculation and manipulation criminal, it would tend to make incorporated American business clean, and the State's endorsement would give confidence.

Wrecking corporations is a crime and to create them for the purpose of wrecking should not be permitted to con-

WRITE FOR DISCOUNTS.

tinue. Respect and pride for one's country are parents of patriotism, and rascality should not be permitted to wear the garb of respectable business, and cannot without impairing the patriotic instinct.

We do not want a State religion, but we need a State morality embodied in the laws of incorporations.

Demagogism finds its prolific field in the feeling against corporations; legislatures are seeking by new laws to cure the evil, and in most of the States incorporation is under a general law which is subject to revision and can be easily amended.

The mercantile class can, if they will, exert an influence for the cure of this evil and it would be well for organized associations to give this their consideration.

The waiting feeling is gradually becoming displaced by the prevailing conviction that nothing can prevent prosperity. October trade shows improvement in volume and confidence. The disposition in the grain growing districts to hold products for higher prices will be likely to affect remittances, making collections slower for the winter, unless another speculator tries to corner the market and distribute his fortune among the farmers, but the immense productions of last year and more that is on the way, with the demand for it, one adding to the wealth of the country, making the outlook promising.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE ST. PAUL TRADE.

For the last two weeks the cry of too much rain has reached us from Manitoba to Iowa, and from the west line of North Dakota to Wisconsin. The result is bad, and if reports are not incorrect the damage is growing great. It is claimed that sections have lost 60 per cent. of the good crop because the grain was in shocks, and has been soaked so long that it is beginning to grow. Anyway, it does not look so rosy as it did, and the jobbers in all lines are feeling it. Still, our business is fair, and we hope that when the threshing is done the damage will be found less than talked about. Prices are firm; advances and declines are followed promptly, and the trade is altogether in a healthy condition, although the farmer may be disappointed in his income.

C. W. HACKETT HARDWARE CO.

THE KANSAS CITY TRADE.

Since our last report we note a favorable increase in the volume of business, and especially in our department of "house furnishing" goods. In this line the increase is very marked. We are pleased to note also a continuation of steady prices in staple goods.

The advance recently made in shovels and spades is not a factor in present prices whatever. We have not and will not advance prices. "Combines" are all right, and this writer believes in them to a limited extent; but when combines grow into compels, the farther limit of righteousness and commercial equity is reached, and we say, smash them.

Profits are necessary, justifiable, legitimate. When a combination of makers agree to pool issues and advance prices 50 per cent. almost above selling basis of two years ago; when the raw and finished product, labor, tax, expense and everything else connected with the manufacture is little if any greater, the talk about anarchists among the laboring classes is hilariously absurd as compared with the procedure of some of the upper-ten classes in the disregard they evince toward the masses of consumers, who are practically at the mercy of the producers.

Pooling and combinations may be the tendency of the times. Organization and aggregation seem to be headed toward a complete control of capital and industry. If this were sanctified and energized by, say, one-half less selfishness, the world need not grow seriously alarmed; but this writer soberly puts on paper what he believes to be true and what he believes others do believe, but fear to say so, that unrestrained license is little better than theft, and if unchecked in its headway will culminate in moral, social and political evils which students of history and economics know will lead to disaster.

One counter-balance remains, and that is that the "vaulting ambition" of these people may "o'erleap itself" and greed be swallowed up in their demolition.

Yesterday, the 17th, we had eighteen hours of snow. Of course, the most of it melted, but it was a paralyzing sort of a storm as it was. The dry weather is now no more, and we enter upon the winter with favorable prospects indeed.

We believe that apple and cherry trees in the second blossom of the year, yet hidden from sight by snow, is so rare a sight that it merits mention herein.

Our local conditions of trade remain fairly brisk and with four to five weeks more good weather the building boom will be ready to house for the winter in splendid shape for the spring "opening."

GILLE HARDWARE & IRON CO.

THE OMAHA TRADE.

Trade is good, prices are satisfactory, collections are all that could be expected, visitors are plentiful, the Exposition is an immense success and time is limited.

RECTOR & WILHELMY CO.

THE BUFFALO TRADE.

The market presents very few new features that call for particular mention. The extreme fine weather that we have been having for the past few days has had a tendency to retard business somewhat in seasonable goods; still, the constant demands for general stocks have been of such fair proportion, that the volume of business is quite satisfactory. It is our judgment that if the manufacturers could

Digitized by Google

get on a settled basis, and the jobbers be content with less cutting of prices, better and more satisfactory results could be obtained, and they would all feel happier at the expiration of the next three months when they look at the balance sheet.

Collections are fairly good, and we feel that when the cold snap reaches us we shall have continued good business.

WEED & CO.

THE PORTLAND TRADE.

With the coming of cooler weather fall goods are moving in good volume. Mail orders are coming in freely, and salesmen's orders are well assorted. The trade are feeling much encouraged and the outlook is good.

Prices are well maintained, and collections are fair.

Jobbers are looking forward to the meeting of the National Hardware Association at Milwaukee next month, and anticipating much pleasure and profit.

THE EMERY-WATERHOUSE CO.

THE COLUMBUS TRADE.

The weather is a little more favorable for fall goods, and trade with the country merchant is somewhat improved and they are beginning to assort up their stocks again. Jobbers distribute seasonable goods early, and then if the weather is not right for the country merchant to dispose of them, there is always a dull spell with the jobber. Good cold weather is what we want now to put snap in certain lines of trade, as well as to kill microbes.

By looking over our change sheet for the past two weeks, we do not find any very important change. Manila rope has advanced a one-half cent, and from reports it would seem that it must go still higher. We believe that Uncle Sam will need that manila fibre the insurgents do not burn, to hang a few of them with as a warning that they must not get too gay. It is next to impossible to get some articles. We might mention glass, guns, granite iron ware, coal hods, plush lap robes and several other articles that manufacturers are unable to fill orders on promptly. On the whole, trade is very satisfactory and if wheat would go up about 10 cents a bushel so the farmers would sell, we think collections would be as satisfactory.

SMITH BROS. HARDWARE CO.

THE PITTSBURG TRADE.

Cool weather has started the movement of seasonable goods, which was rather backward for the season. The great improvement in gas stoves for both heating and cooking, has brought them into very general use, and as natural gas for domestic purposes is still plentiful in this region, practically everybody uses it, wherever it is available.

Of the recent advances in Hardware we hear more complaint of shovels than anything else. In fact that seems to be the one item which has been pushed up beyond its value by the assistance of the combine. It is singular that men cannot learn from the history of combines, that a high price means a short life for their combination. Already we are importuned to buy outside makes of shovels, and factories will spring up like mushrooms if prices are forced higher. Legitimate advances from unprofitable prices of manufacturing will be welcomed by merchants as a desirable change from the down hill slide we have had to buck against for so long, but artificial high prices can only result in disaster to all concerned.

A strike has begun among the window glass workers, which bids fair to be a bad one. Prices of glass are in consequence very unsettled at present.

LOGAN-GREGG HARDWARE CO.

THE BIRMINGHAM TRADE.

James D. Moore, of the Moore & Handley Hardware Co., writes as follows, explaining the absence of his usual trade letter:

"My silence is explained, not by want of interest, but rather by rush of business."

And thus Mr. Moore, unintentionally, furnishes a very good comment on the present trade of the South.

THE MANCHESTER TRADE.

Business, if improving at all, is improving very slowly. In our manufacturing cities, although the cotton and woolen mills are doing well, general trade is still quiet.

In conversing with our large contractors and builders, they do not seem to see any improvement, at least before another spring.

Our jobbing trade holds up fairly well, but as New England was the last to feel the depression of several years ago, so it is the last to feel the great improvement that seems to be going on in the West and South.

JOHN B. VARICK CO.

THE MINNEAPOLIS TRADE.

There is a general improvement all along the line; little better prices on staple goods, with better hope for the future. We feel that next year no one in the cities will have any reason to complain of lack of business. Contractors complain some on account of the fact that they have taken work based on the old prices for material and labor and are paying higher prices all along the line, consequently their margins are marked out.

W. K. MORISON & CO.

The town of Somerville, Somerset County, N. J., have given the Berlin Iron Bridge Co., East Berlin, Conn., the contract for their new iron bridge. The span is about sixty feet, and the bridge has a clear roadway of fourteen feet. The trusses will be of substantial latticed type. The floor will have steel beams and joists.

Digitized by Google

Dating Ahead.

Every merchant and every manufacturer understands the meaning of dating ahead. Few, however, recall the adoption of the plan which of late years has become a fixed custom. Dating ahead within proper limits may be desirable, but, as it is commonly practiced, it has become a nuisance, and is a direct and certain cause of loss to the retailer.

During the past twenty years the population of the country has immensely increased. Immigration has also added its millions. As a result, the rivalry among the workers in manufacturing centers where the wage has not been lessened, has been intensified. A larger output per hand employed than ever before has been forced. Again, the lowering of freights, due to the increase in facilities for transportation and the creation of improved machinery and better methods of manufacture, with the reduction of profits to the minimum, due to the intense competition for an outlet, have combined to cause a continuous reduction in the price of almost every product of skilled labor that is put upon the market. This has been true in spite of protective tariffs, which have only temporarily checked the fall. As a consequence of this condition, the manufacturer was long since obliged to abandon the old system of accumulating a stock of merchandise ahead of the season, for, as a rule, his stock declined in value upon his hands before it could be distributed to those who supplied the consumer. The remedy was to manufacture only upon definite orders and thus insure beforehand a market for the product of the mills at a known and agreed price.

As an inducement to the jobber or distributing buyer, the manufacturer said: "You want goods for the spring trade. If they were made and in stock now you would not buy them before spring. Therefore, if at present, say in September, you will give me an order for such merchandise as you will want next spring, I will manufacture it and deliver it to you from time to time from this date on, and date the whole of it as if you had purchased it February 1."

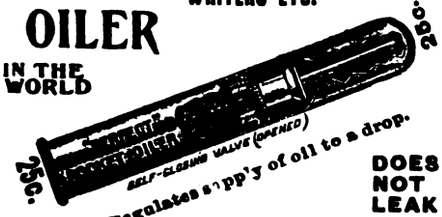
This proceeding was and is entirely legitimate, because it enables a manufacturer to run his factory during a series of months upon a certainty and because it lessens the cost of his product. For example, he has upon this plant no insurance to carry upon completed stock; it is all shipped as soon as finished.

The abuse of the scheme came later. The jobber or distributing buyer argued something as follows: "Well, here I have these goods on hand. The invoices do not date until February 1st. Therefore, I may do with my customer, the retailer, what the manufacturer has done with me. I will give him the same date that I got, or even something better, as an inducement to buy. I will deliver as soon as he will accept the goods, thus getting ahead of some of my competitors and throwing upon my customer the burden of insurance."

Of course, at first only a few followed this plan and perhaps they reaped an advantage from it, but in this country there is no monopoly of ability to grasp a situation. Ere long the whole business community followed the practice. The bait to the retailer was an extension and enlargement of credit. It was a fancied but fictitious benefit. By this means there was established a custom which, carried to the extent of the original intention, was for the manufacturer a gain, but which, carried to the extent which now obtains, is an actual disadvantage, especially to the retailer.

The retailer is the one who should, above all others, buy on short time and carry the smallest stock necessary to the business that he does. He should open up at the proper season fresh lines of each class of goods that he carries and these new goods should be bright and seasonable. Too often tempted, however, by dating ahead, he makes his purchases out of season and thereby cumbers his shelves with goods that long before the proper time for consumption arrives have become shop-worn, undesirable and, in the eyes of employees and customers, old or past style. All these disadvantages follow upon the plan of dating ahead. In addition, the retailer under the offer is very generally tempted to overbuy in his early purchases, because the time of payment seems so far ahead.

Look back at the history of the past five years, which has been so disastrous to many business interests. Let us inquire who are the men who have succeeded during the period? They are those who have done business within the just limits of their capital and credit, whether large or small; who have bought frequently, who have managed to have seasonable and attractive merchandise to offer to their trade at the proper time, and who have not been burdened with old and undesirable stock.



It is unquestionably to the interest of the retailer to buy as nearly as possible for cash. It is to his advantage to buy frequently and in small quantities. He should aim to have constant arrivals of fresh merchandise in every department and should never fail to remember that the discounter is the money maker.

The country has undoubtedly reached the termination of the period of depreciation. A reaction is now in progress. Manufactured and unmanufactured products, which have been squeezed to the very lowest mark, are now rising in value. While large advances are not to be expected, it is clear that the bottom has been reached and that there is in progress and will continue to be a marked advance in prices in almost all lines. The merchant who would reap all the advantages of the new opportunities that are opening up as a result of our changed condition, will do well to carefully follow those lessons which have proved profitable during the past term of commercial distress. He should leave to the manufacturer all speculative dating ahead. He should be a purchaser of merchandise only, and not of dates.

Signs of Prosperity.

There are few things that more completely illustrate the general trend towards the most prosperous conditions among manufacturers the country has ever known, than the publication of statistics making a comparison between the failures of the years of 1896 and 1898. There has been, since the earlier date, an impressive decrease in the number of these, the liabilities showing a great contraction, giving a confident background for future efforts in the industries enumerated. The table referred to is one furnished by *Dun's Review*, representing the month of August, and will undoubtedly be read with interest:

Manufacturers.	Liabilities. 1898.	1896.
Iron, foundries and nails	$2,610	$590,000
Machinery and tools	195,100	374,300
Woolens, carpets and knit goods	89,500	163,000
Cottons lace and hosiery	12,200	119,600
Lumber, carpenters and coopers	105,136	3,787,220
Clothing and millinery	80,755	113 200
Hats, gloves and furs	700	22,000
Chemicals, drugs and paints	47,300	49,108
Printing and engraving	20,695	41,944
Milling and bakers	71,200	653,833

How Emery Wheels are Made.

There are four different stages through which the small grain of emery travels before it is turned out ready for use. It first enters the mixing room, where it is weighed out in quantity according to the size of the wheel required. After mixing the material, which is then in a plastic form, it is put into metal rings somewhat larger than the wheels should be when finished. A plaster of paris wheel or bat is under the ring, so that the water from the material will quickly be absorbed. When this operation is completed the wheels are put into the drying room, where they are left for a number of hours. They are then transferred to another drying room, where the temperature ranges still higher. The wheels are held together by a material called "bond." Their hardness depends upon the proportions of the various constituents of this bond. as well as upon the length of time they are burned in the kiln. In making up the wheels it is customary to mix together at once enough of the substances entering into their composition to suffice for several sizes of the same grade and grain. Emery, water and the materials to form the bond are put into large tanks holding about 1500 pounds each, and are well mixed by hand for several hours.

When they have been thoroughly dried they are taken into the shaving room. The machines operated here are known as jiggers, and with them the wheels are trued and cut down to nearly their proper size, allowing only enough for contraction while being burned. After this has been done they are in condition to be put into the kilns.

The wheels have to be carefully packed in the kiln on clay bats, with fire clay rings around each, so as to insure their being burned evenly. They are then submitted to a heat of nearly 2500 degrees Fahrenheit for from sixty to eighty hours. After burning, it requires fully forty-eight hours for the kiln to cool sufficiently to permit the removal of the wheels. They are then turned so as to be made the size desired and also to be made true.

A blower is then used to remove all dust resulting from the truing operations. All wheels are bushed with lead before leaving the factory and are taken to the testing room, where they are run at a speed more than double that for which they are recommended. This is done as a precaution against the breakage which might result from a latent crack or flaw. They are tested by experts to see if their grade is correct for the work for which they are intended, as great care has to be exercised in this respect. The wheels are then labeled and are ready for packing and shipment.—*Kuhlow's Journal.*

Artillery Terms.

All artillery may be divided into two main classes, heavy and light. Heavy artillery is called also garrison artillery. Heavy artillery guns are placed permanently in forts, and the men who handle them form foot artillery batteries and regiments. Light artillery refers to guns not permanently emplaced—that is, light enough to be taken from place to place by means of horses and maneuvred by hand. In our army the light artillery gunners ride on the caissons and gun carriages. In horse artillery the gunners ride horses, so that a horse artillery battery has a great many more horses than a light battery. We have no horse batteries in our army. A field battery is a light battery. A flying battery is a horse battery. Siege guns are between heavy and light artillery. They are intended to be placed permanently for the time being and are brought to their places by teams, but they are not maneuvred as light guns are.—*New York Sun.*

Lake Superior Copper Mines.

The prosperity of the copper mining industry in Lake Superior is at the present time at its highest development.

In the Houghton district on Portage Lake, in which are centered the Calumet and Hecla, Quincy and Tamarack Jr. mines, various companies are employing upwards of 10,000 men, as against 6,000 in 1894. Calumet, which is the town having the largest population, already boasts of 40,000 inhabitants; constituting it the second largest mining town in the United States, with not over one or two rivals in the world.

The productive increase in the output of copper, and its relatively high price in the markets of the world, have doubled the value of the mining property during the last four years, being valued at present at the fabulous price of $90,000,000.

A cow has many good qualities, but she is too modest to blow her own horn.—*Exchange.*

Death of E. C. Palmer.

The death is announced of E. C. Palmer, the general manager of the Standard Tool Co. of Cleveland, Ohio, which took place at Stockbridge, Mass., on October 13th. His standing as manager of the Standard Tool Co. has invariably been acknowledged as of the highest grade, grounded on business intelligence and executive ability, and backed by the honesty of purpose, and fidelity to the interests entrusted to him, that were characteristic of the man. This loss will be greatly felt by the Hardware trade, with which he has been in close touch for many years.

Notwithstanding the hard times, seal skins are worn the year 'round—by the seals.—*Exchange.*

The Rock of Confidence.

W. I. Rosenfeld, a jewelry jobber in New York city, in a few well chosen words shows how important in business matters is the rock of confidence:

"I don't worry about selling. I 'walk the floor' about buying. If I buy right, I can hire a man at $20 per week to sell. It takes me all day and all night to figure out 'buying schemes,' but when I have figured them out and operated them—then anybody can do the selling. Can't they? An office boy can sell when the figures are closer than any competitor can possibly make. Can't he?

"I know that the dollar-getting, selling end of my business must be built on the solid rock of implicit confidence. I know that just one lie, just one deception, just one act of double or unfair dealing at the selling end of my business may do me a world of harm, and frighten away a hundred customers and ten thousand orders.

"I know that the buying end of my business is the end where I must exercise all the double-edged diplomacy that a lifetime's experience as a buyer has taught me. I want the manufacturer to respect me as a hard man to sell. The worse shark he considers me the better I like it. I want to see him when sales are slow with him. I am even willing to have him despise me a bit because I haggle and fight for dollar and half dollar and even penny margins. I want him to come to me when business is dull with him. Then he knows that cold spot cash is on tap for him at my terms. Then he is welcome to help himself at my prices. I am a buyer—exclusively. A schoolboy can sell my purchases just so long as he maintains his reputation for absolute truthfulness."

The genial countenance is again to be seen on Chambers street of George B. Main, the "dean of the guild" of traveling representatives of the Arcade File Works and the Allerton-Clarke Co., No. 97 Chambers street, New York. He states that he has had the most successful season in many years, having been away several months gravitating between Louisville, Ky., and London, Ont. "Prospects for the future never gave signs of more abundant promise," is the way he replies to an enquiry regarding business for the year 1899.

Hanrahan: "Some uv thim new guns will carry fifteen miles."

Houlihan: "At wan shot?"—*Exchange.*

Russian Agency.

RUSSIA.—The undersigned, who is a resident of Warsaw, Russia, this month in New York, desires to correspond with manufacturers with a view to introduce in Russian market. Address A. BARUCH, care of HARDWARE, No. 143 Chambers Street, New York.

Gas Stove Manufacturers' Association.

At a recent meeting of the gas stove manufacturers in Cleveland, the organization of the Gas Stove Manufacturers Association was completed by the adoption of a constitution, and the election of officers. It is stated that the fundamental purpose of the organization is to systematize and simplify the business; and while a great many gas stoves are now being manufactured, fewer types would suit the purpose, and supply the trade. One purpose of the Association is for the preparation of a list of prices which shall be charged on a stove of a given dimension and character as a basis. The next meeting will be held on the call of the president. The following gentlemen were elected officers of the Association:

President: D. A. Dangler of Cleveland, Ohio.

Vice-President: A. J. Conover, Dayton, Ohio.

Secretary and Treasurer: F. H. Wells, Chicago, Ill.

Chairman Executive Committee: G. B. Gunderson, Detroit, Mich.

The Association has nothing to do with vapor or oil stove makers, although some houses make all of these types of heating appliances. In due time it is expected that there will be a meeting with representatives of gas companies for the furtherance of their common interests and the arrangement of matters where their respective interests encounter each other.

The women of St. Joseph, Mo., have shown ingenuity and business adaptability in a recent movement made in that city. They took charge of the Hardware stores for one whole day, and sold all the goods they could, and turned the proceeds over to charity.

A Study in Character.

Are the Hardwaremen of America like their brothers in England, in every respect? A boy in one of the schools of the British Isles, has perpetrated an essay on the ironmonger, which shows that he has an observing eye, and a natural aptitude for criticism. "An ironmonger," he says, "is a man who stands behind a counter and sells nails and saucepans and things people ask him for (if he has them). He generally has a window in which he puts the things he wants to sell, and things his customers want too. (Last year the ironmonger near our school forgot his skates until the frost was gone, but he left the footballs in the window until the summer holidays.) An ironmonger is a very nice man when you have got money to spend, but when you want it put down in a book without paying for it, father says the price is a lot more. When an ironmonger wants to buy more things, and a traveller who knows him calls (especially if it is in the morning), he shakes hands with him and looks pleased; but when he does not want to buy and a traveller calls in the evening, he gets angry and says 'Get out!' There are lots of other things an ironmonger sells, and when people ask him for things he has never sold, he gets some—if he can find out where to buy them."

In America, he reads the advertisements in *Hardware*, and knows "where to buy them."

The largest tin factory in the world is situated on Sulo Brani, an island in the Bay of Singapore. It turns out monthly 1,200 tons of tin, more than the product of Cornwall and more than that of Australia. The ore comes from Selangor and Perak in Malacca.

Y.—The Leather & Hardware Specialty Co. is the name of a new enterprise which is soon to commence operations in the factory on East Fall Street, formerly occupied by the Davis & Stevens Mfg. Co. E. L. Bowell and F. E. Ten Eyck, formerly in the employ of the Davis & Stevens Co., will be the proprietors of the new concern. Their products will be all kinds of leather rings, packings and light Hardware specialties.

Wheeling, W. Va.—A new company called the Co-Operative Stove Co., is said to have been organized by employees of the late Fisher foundry, and a charter has been granted to the company. The company will build soon, and the site selected for the location of the foundry is the old B. & O. shop proper, in the yards at Twenty-ninth Street, near the Warwick Tool Co. This will give the new company the best railroad facilities. They will manufacture stoves and heavy castings.

Changes and Improvements.

Birmingham, Ala.—The Alabama Steel & Shipbuilding Co, awarded contracts during the week for $200,000 worth of construction work in connection with its million-dollar steel plant, now building. Contract was awarded to the Frank Kneeland Mfg. Co., of Pittsburg, Pa., for the 44-inch blooming mill; to Riter & Conley, of Pittsburg, for the construction of the producer building and for the iron work surrounding the ten open-hearth steel furnaces; contract was also let for boilers of 4000 horse-power. The steel plant is located at Ensley City, the industrial suburb of Birmingham.

Braddock, Pa.—Several acres of ground have been purchased by the Pittsburg Wire Co., adjoining its present plant, the purchase price being $35,000. Extensive additions will be made in the near future.

Buffalo, N. Y.—A certificate of incorporation has been filed with the Secretary of State by the Dold Woodenware Co., to make all kinds of woodenware. Capital, $10,000; principal office, Buffalo. Directors: Jacob Dold and Albert Dold, Buffalo; Alexander B. Enoch, Rochester.

Cincinnati, Ohio.—At the last meeting of the directors of the Niles Tool Works it was decided to build an additional structure between one of the large shops and the pattern house, the new building to be used for an extension of the shops, and to be 70x200 feet. This addition is made necessary by the crowded condition of the machinery in the shops and the fact that more is to be added. The company is now working 1000 men, and operating both night and day.

Columbus, Ohio.—The American Steel & Wire Works, which were recently incorporated under the laws of Illinois, have qualified to do business in Ohio, by filing a copy of the articles of incorporation with Secretary of State Kinney. The company has a capital stock of $24,000,000, of which $12,000,000 is preferred and $12,000,000 common stock. The principal office in Ohio is located at Cleveland, the trust taking in the steel and wire works of that city, with A. T. DeForest in charge.

Louisville, Ky.—John and Basil Doerhoefer have purchased from Mrs. W. L. Bridgeford her interest in the Bridgeford Co., manufacturers of stoves. Mrs. Bridgeford owned about one-third of the entire capital stock.

Middleville, Mich.—The Keeler Brass Co. will erect a new three-story factory building.

Mingo Junction, Ohio.—Work on the new departments of the Aetna-Standard Iron & Steel Co.'s plant is going forward rapidly. The steel plant is to be started in the near future.

Newark, N. J.—Gould & Eberhardt have received an order for eight large presses for the Rock Island arsenal. This order was awarded on the merits of the tool, as the bid was considerably above the lowest figure quoted. A large size drill press was also ordered from this concern for the Brooklyn navy yard. The company report a very active foreign trade, including several large shaper orders for England and Scotland, and a large number of automatic gear cutting machines of some ten sizes for all parts of the world.

Niagara Falls, N. Y.—A branch factory for the manufacture of ice cream separators is to be located by A. F. Gill & Co., of Lockport. The growing trade of this firm in Canada has spread out so much of late that the company have decided to manufacture here the goods needed for the Canadian and export trade.

Providence, R. I.—The American Emery Wheel Works, formerly of Boston, have erected a two-story brick building at the corner of Waterman and East River Streets near Red bridge. The first floor is used for mixing, moulding and firing the wheels, and the second for finishing.

Recent Embarrassments.

Cincinnati, Ohio.—The firm of A. H. Kerkhoff & Co., composed of A. H. George and John Kerkhoff, doing business as toolmakers at Nos. 1933-1935 Western Avenue, have failed in business.

Dover, N. H.—The Somersworth Machine Co., stove foundry, have made an assignment to Benjamin F. Neally.

Recent Fires.

Bennett Station, Pa.—The foundry of J. T. Snyder has been destroyed by fire. Loss, $12,000; partially insured.

Buffalo, N. Y.—The explosion of a lamp caused a fire in the broom factory of William S. Bentley & Co., in the rear of No. 73 Jackson Street, some days since, resulting in damage to the extent of about $7000.

Cleveland, Ohio.—A brisk fire occurred recently in the National Foundry & Stove Repair Co.'s building on River Street, owned by M. Abrahamson. The blaze was due to an explosion of gasoline, and the loss is estimated at about $1000.

Montreal, Can.—The factory of the Montreal Spring & Axle Works, owned by B. J. Coghlan, at Stadacona and Marlboro Streets, has been entirely destroyed by fire. Loss, $15,000; fully insured.

New Woodstock, N. Y.—The Belmont Powder Mills have been totally demolished by a terrific explosion of blasting powder.

Miscellaneous.

Columbus, Ohio.—The National Shear Co., which is the latest trust to be formed, and which proposes to control the cutlery business of the country, has qualified to do business in Ohio. The trust is incorporated under the laws of New Jersey, and so it acts under the corporation laws in force in this State. The property absorbed in this State is the Clauss Shear Co, of Fremont, of which John Clauss is president. The value of the plant in this State is put at $300,000.

Milwaukee, Wis.—The E. P. Allis Co. have shipped to the German small arms manufacturer, Loewe, at Berlin, $20,000 worth of electrical machinery. The Loewe factory is the one at which the Mauser rifles were made which were used by the Spaniards in the Spanish-American war.

Omaha, Neb.—The stockholders of the Peru Plow Co. have just closed their annual meeting in this city. William Holly, of Peru, Ill., was elected president; T. J. Foley, of this city, vice-president and general manager.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Camden, N. J.—The Rubber Tire Co. has been incorporated by John S. Latta, Wm. J. Latta, Wm. F. Beasley, Henry M. DuBois and George B. Martin; to manufacture bicycles, rubber tires, etc. Capital stock, $75,000.

Kittery, Me.—The Universal Mfg. Co. has been incorporated by Benjamin F. Tripp, Walter F. Taft and others; to manufacture chainless bicycles. Capital stock, $150,000.

Weston, Ohio.—F. J. Banks, bicycles, Hardware, etc., has opened new store.

Changes and Removals.

Ashtabula, Ohio.—The Ashtabula Carriage Works are making bicycle saddle forgings, and the Ashtabula Tool Co. bicycle cranks.

Barnwell, S. C. — Erwin A. Oakman is endeavoring to organize a company to manufacture a new driving gear for bicycles.

Bristol, Conn.—Codling Mfg. Co., manufacturers of bicycle grips, etc., increased capital to $30,000.

Chicopee, Mass.—Ames Mfg. Co., bicycles, etc., selling out.

Erie, Pa.—The Kellar Machine Co. have removed to Conneaut, Ohio, where a number of local capitalists have built the company a new factory for jig making and other work.

Halifax, N. S.—Griffith Cycle Corporation, selling out.

Hartford, Conn. — The Beam Cycle Co. has discontinued business.

Marshall, Mich.—The Royal Cycle works have elected new officers and the plant will be worked to its full capacity this winter, giving employment to 125 men.

Milford, Conn.—F. M. Brown, bicycles, advertising business for sale.

Minneapolis, Minn.—Northwestern Cycle Co., reported to have dissolved partnership.

New Britain, Conn.—Senf & Hadley, bicycles, Hardware, etc., No. 147 Main Street, stock purchased by F. C. Monier, Jr., who will continue business at the old stand.

New York, N. Y.—The Colonial bicycle plant, at No. 602 West Twenty-second Street, is for sale. Capacity, 10,000 wheels, and material on hand for about 3000.

North Milwaukee, Wis.—The A. D. Meiselbach Co. manufacturers of bicycles, succeeded by A. D. Meiselbach.

Orlando, Fla.—F. N. Boardman, bicycles and musical merchandise, has opened a store in the Empire Block.

Oswego, N. Y.—The C. B. Rice Cycle Co., reported to have sold out.

Richmond, Ind.—Bell & Inman, retail bicycles, reported to have dissolved partnership.

Rockdale, Ind.—The Bicycle Wood Rim Works will be removed to Urbana, Ohio. New buildings are to be erected.

Santa Monica, Cal.—Chambers & Miller, sporting goods, dissolved; now Lee Chambers.

Toledo, Ohio.—A. S. Raymond & Co. will soon enlarge their bicycle plant by adding a nickel plating department.

Toledo, Ohio.—Joseph L. Yost, manufacturer of Falcon cycles, has sold his big plant to the E. C. Breckenridge Co., for about $50,000. J. C. Tillotson will occupy a portion of the Yost factory with a bicycle manufactory, and the remainder of the plant will be leased to the Toledo Machine & Tool Co.

Utica, N. Y.—Horth & Watkins, bicycles, etc., reported to have dissolved partnership. Succeeded by W. S. Watkins.

Warrensburg, Mo.—Emmet C. Higgins, sporting goods, Hardware, etc., succeeded by Higgins & Bear, who have removed to the building at Nos. 115 and 117 North Holden Street.

Winter Park, Fla.—Mr. Bachelor, bicycle renting and repair shop, removed to larger quarters.

Recent Embarrassments.

East Orange, N. J.—Highland Cycle concern, reported to have made an assignment.

New York, N. Y.—Justice Pryor of the Supreme Court has appointed William H. Ricketts receiver of the Bevelgere Cycle Co., of which Theron Baldwin, of No. 40 Broadway, was president, on the application of Meyer Klein.

Orange, N. J.—Lewis M. Irving, bicycles, reported to have made an assignment.

Salt Lake City, Utah.—Western Cycle Co., reported to have appointed receivers.

Toledo, Ohio.—The Maumee Cycle Co., reported to have appointed a receiver.

Recent Fires.

Buffalo, N. Y.—The enameling room of the Buffalo Wheel Co.'s factory at Jewett Avenue, near Main Street, has been destroyed by fire. Loss small; covered by insurance.

Chicago, Ill.—The stock of A. H. Andrews, No. 63 West Washington Street, has been destroyed by fire.

Clinton, Mass.— Asa Windle, bicycles, damaged by fire.

Pensacola, Fla.—The Charles Le Baron Co., bicycles and bicycle sundries, destroyed by fire at a loss of $1000; fully covered by insurance.

Philadelphia, Pa.—Thomas Thomas, bicycle store, No. 2216 East Dauphin Street, slightly damaged by fire.

Philadelphia, Pa.—John Johnson, bicycle store, No. 6332 Woodland Avenue, damaged by fire to the extent of about $400.

Plainfield, N. J.—The Bald Cycle Co., stock destroyed by fire. Loss, $25,000.

Niagara Falls, N. Y.—G. & J. Rae, sporting goods, damaged by fire.

Recent Burglaries.

Fall River, Mass.—Burglars entered J. E. Newton's bicycle store, No. 101 North Main Street, a few nights ago, and made away with a bicycle, two sweaters, two punching bags, eleven pocket knives, and about fifty cents in change.

Miscellaneous.

Hartford, Conn.—The manufacture of the Pope motor carriages and chainless bicycles will be undertaken in France at an early date, and members of the staff of the Pope Mfg. Co. are already making preparations to leave this city for Paris to superintend the work. Hart O. Berg, who has been engaged in mechanical ventures in Belgium, will go to Paris and take charge of the factory.

Syracuse, N. Y.—At the annual meeting of stockholders of the Barnes Cycle Co., held at the company's office, directors were elected as follows: C. F. Saul, H. W. Plumb, W. S. Peck, Horace White, C. A. Bridgman, H. S. White, W. Snowdon Smith, John A. Hoxsie, E. I. Rice, Aime Harnois, A. R. Peck. At a subsequent meeting of the directors the following officers were chosen: President, Charles F. Saul; vice-president, Hamilton S. White; secretary and treasurer, Charles A. Bridgman; general manager, Arthur R. Peck; attorney, Horace White.

A soldier who is stationed at Ali Musjid, in the Khyber Pass, has been using his eyes. This is extraordinary, but true. Going through the bazaars and examining the goods for sale, he was astonished to find precious few of British manufacture. He found knives from Solingen, matches from Zidaholm (Sweden), candles from Antwerp, milk (milkmaid brand) from Switzerland, playing cards from Belgium, chocolate from Turin; while America supplied razor strops, shaving and tooth brushes, and Austria provided enamelled mugs. The worthy fellow seems surprised, wonder paralyzes him, and he forthwith catechizes himself thus:—"Is it for the encouragement of the sale of these foreign articles that we are keeping 10,000 men in and around the Khyber Pass?" Yea, even so.—*The Hardwareman, London.*

As a brick fell from a carrier's hod it knocked down a Spanish flag displayed from a store-front window.

"That must have been an American brick," said a passer-by.

"Yis," said the hod-carrier above, "but it was of Oirish descint."—*Richmond Dispatch.*

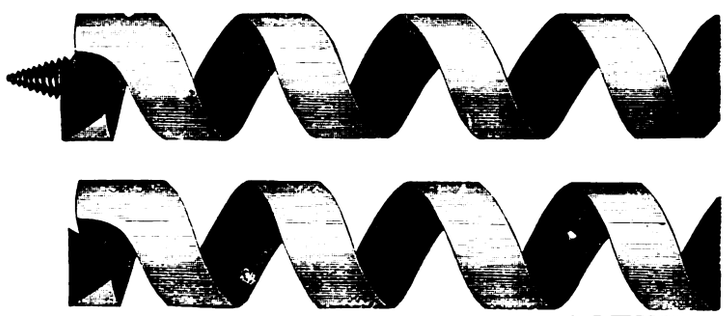
The CENTENNIAL

WATER CUT OFF

FOR CISTERNS.



There are others, but none like or equal to the Centennial. It is the only Cut Off in the market to-day that can be used in any position without extra pipe or elbows. Try them and you will use no other.

For sale by all the leading jobbers.

Manufactured only by

COONEY, SEINER & CO.,
17, 19 and 21 E. South St., INDIANAPOLIS, IND.

SNELL MANUFACTURING COMPANY, FISKDALE, MASS.

Ship Augers & Ship Auger Bits....

These goods are made by skilled mechanics on new and improved machinery from especially selected cast steel made for the purpose. . . .

The large increase in their sales testify to their quality that they are superior to any other make.

They are finished so they can be used to bore with the grain as readily as across the grain, through the knottiest timber without swerving. . . .

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

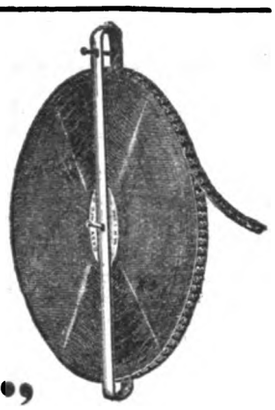
"GREAT VALUE AS AN ADVERTISING MEDIUM."

Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google



NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

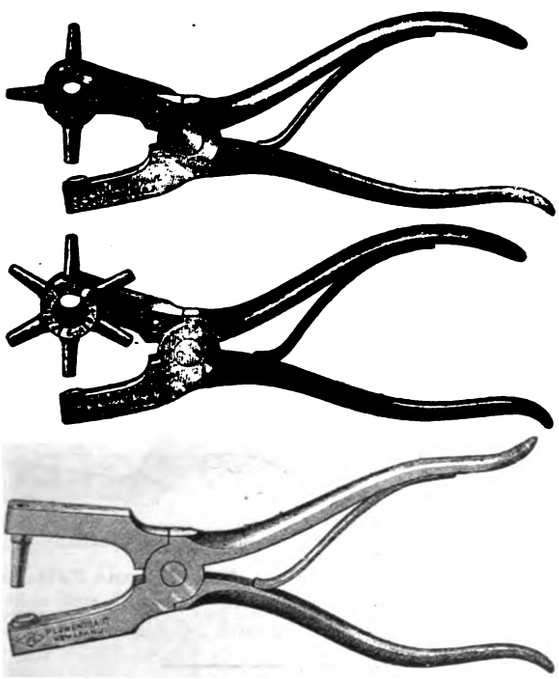
In favor of the

Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.



This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,

CARY MANUFACTURING CO.

S. C. Cary Pres't

"U. S." SPRING PUNCHES.

Manufactured by

P. LOWENTRAUT.

A new line of high grade spring and revolving punches. They will be known as the *"U. S."* brand and are not to be confused with Lowentraut's regular line of punches.

They are highly finished and fully warranted.

CUTLERY. CUTLERY.

Our special aim has been for years to make a little better goods, (stronger and more durable), than any one else for the same money. And we are well satisfied with the results. . . . . Before placing your fall order for butcher knives, carvers and table knives, send for our catalogue and prices. There are no goods on the market better in quality, finish or reputation, and our prices are right.

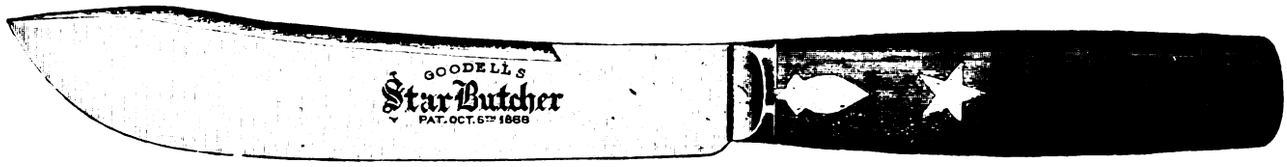

Table Knives and Forks, Carvers, Table and Butcher Steels, Butcher Knives, Boning Knives, Skinning Knives, Sticking Knives, Hunting Knives, Cheese Knives, Butter Spades, Bread Knives, Slicers, Scraping Knives, Cigar Knives, Kitchen Knives, Shoe Knives, Can Openers, &c. . . . . .

NEW YORK OFFICE, 10 WARREN STREET.

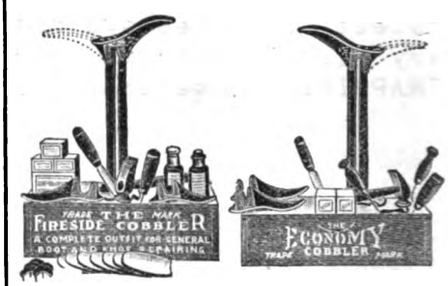
GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.



We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

NEW YORK OFFICE:

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

The reason why we have sold **8,000,000** feet of Track and **800,000** sets of Hangers the last six years is because True Merit has been its own reward.

THE COBURN TROLLEY TRACK MFG. CO., - HOLYOKE, MASS.

HAHN'S LATEST IMPROVED
WATCHMANS' TIME DETECTOR,
WITH SAFETY LOCK ATTACHMENT.
Highest Award at Columbian Exposition.

This Clock is neat, thoroughly reliable and very durable. Cannot be tampered with. Price moderate. Is adapted for six or twelve stations, having a different key for each. Registering is done by number from 1 to 6 and 7 to 12, each station having its number. No chance for a fraudulent record here. Old style detectors mark by holes or an impression on dial, the same for all stations. Allowance made for old Detectors. Send for circulars, prices and further particulars.

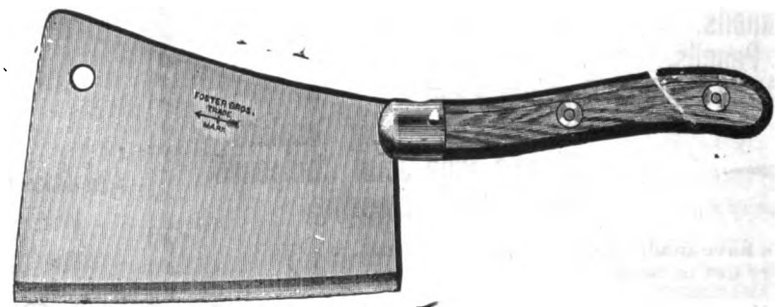
CHATILLON SPRING SCALES.

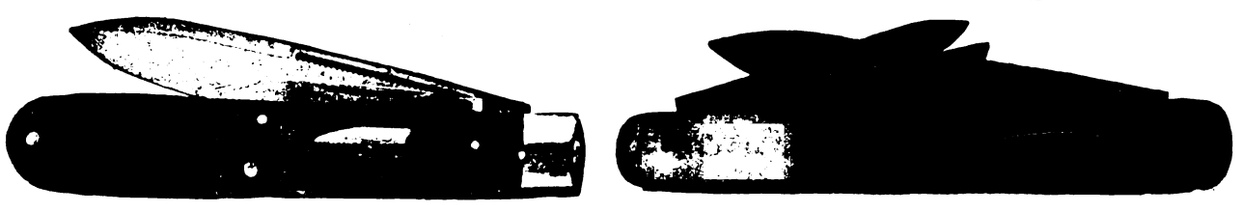


For more than **sixty years** we have carried on the business of making **Spring Scales,** and have made it OUR SPECIALTY.

All our Scales are warranted to weigh accurately and to be perfect in workmanship.

Our experience in the business, together with our unequaled facilities for manufacturing, enables us to produce a superior article, and thus to maintain the well-known reputation of **Chatillon's Spring Scales** as above that of other makes.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, &c.



These Tools are recognized in the Markets, Packing Houses and Abbatoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE
A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

MERCHANT'S SOLDERS

There are a number of evils which honorable manufacturers of Solder have to contend with, the most general being the evil of misrepresentation—using a brand which does not give the true proportions of their mixture. To illustrate: By putting into a mixture 9 parts of tin and 10 parts of lead, instead of 10 parts of tin and 10 parts of lead, the value of a ton of Solder can be reduced materially,—and no consumer will be the wiser, as the only certain test of its composition is by analysis. That is what is being done by unscrupulous makers. We have tested 50 different brands and found 87 per cent. to be sold under a misleading stamp—to be fraudulent goods, in fact. When Merchant's Solder is branded "½ and ½," it IS made of equal parts of lead and tin. Whatever the proportions may be, they ARE as branded. If you have any questionable brands, we will test them free upon receipt of samples.

ARE GUARANTEED TO BE AS BRANDED

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

There can be no doubt existing anywhere in the mercantile world, but that the conditions of trade as bearing on the prosperity of the year to come, are in a most encouraging state. Profits during the present season on very many lines of goods have shown a more desirable average than has been the case for several years, and create a feeling that with improvement in prices possible under the constantly increasing demand, there is a certainty of a pecuniary reward which should always accompany an intelligent prosecution of any established industry, and which will once again inspire the merchant and encourage the manufacturer.

The prevailing characteristic of the American merchant is one of sanguine expectation. He looks forward to a belief that success cannot help but follow sustained business enterprise; he has been a little too sanguine over the successful closing of the war with Spain, believing trade conditions, formulated under the supposition that the war would last at least a year or more, would at once rebound from a normal state and find a largely increasing distribution upon all sides.

Business, by comparison with the past, will, when inventory is taken, be found in all probability not only satisfactory as to volume, but especially so as to the profit on the year's business, and in the gradual but careful contraction of the expense account. As far as the future is concerned, there is a noted improvement in several lines, which for many months have been in a sluggish or dormant condition; the feeling in trade circles being that several good years are just ahead of us, and that 1899 will usher in a period of prosperity that will justify the faith of the present.

There has been for some time a market in all lines of Hardware, which has been well sustained, with few quotations at all indicating any organic weakness; and the trade, with a unanimity they are proud to acknowledge, hope for its further continuance. When a season, like that of this year, admits of several advances in price of more than the usual importance it makes glad the heart of the dealer who for several years has struggled over his inventory footings, endeavoring to account for the slim results so painfully apparent.

Combinations that are being formed in important lines of business, having for their object the prevention of an overproduction that invariably demoralizes the markets of the country, are criticized adversely by the dealers generally, although their advent has not always advanced prices materially. The uniformity of quotations that follow the formation of such a combine, has a soothing effect that results in a prospect of increased profit from less abnormal trade conditions affecting the entire wholesale trade of the country.

It is hoped that in the national convention now on the eve of meeting in Milwaukee, Wis., consideration will be given to the various problems confronting the trade; among which will be found how to subordinate competitive anarchy to well defined methods of obtaining trade, by less reprehensible practices than have been prevailing; how to offset department stores, which are a constantly increasing menace to the necessarily slow methods surrounding a legitimate general Hardware business. These should receive proper consideration. Catalogue supply houses which deliver the factory's production almost at the door of the consumer, should furnish a debatable subject worthy of the bright and shining intelligence among the associated dealers in convention assembled, that is only too anxious for an opportunity to present views worthy of discussion.

Revival of Roller Skating.

Most people can remember, without much effort, the cyclonic rush into public favor made by the roller skate a few years since. In the larger cities special rinks were erected in profusion, and small and miserable indeed was the village that could not boast of at least a converted "public hall," whose badly prepared floor resounded to the *whirr* and *whizz* of the merry roller,

Everybody got skates on in those days. The lame, the halt and the blind; the young and the old; the sedate and the frivolous, all flocked to the rinks; and, after a more or less protracted attack of spasms, in a wild endeavor to convince their feet that they were mates, and to make them work together, glided off on their graceful, tranquil way to the strains of a waltz or two-step. The dignified and sedate skated for the much needed exercise it gave, and the others skated for the fun of it. Both seemed satisfied for a time, but the unanimity with which they dropped it suggested that it was done for amusement only, and that the fun had all petered out when the novelty wore off.

All this was before the bicycle came into general use. It occurred when the leg muscles of ninety per cent. of the population were flabby, and their breathing apparatus wheezy through desuetude. It came before the great bulk of our fellow-beings had been trained, as they now have by the wheel, to regard physical exercise as a *sine qua non* to good health. It came with a rush, impetuous, violent and consequently unreasoning; and the inevitable result was that in short order

Digitized by Google

the public became indifferent, the owners collected the fire insurance on their rinks, and the only evidence of once enormous numbers of roller skates was an occasional small boy pegging along on one foot on the smooth surface of a flagged sidewalk.

Years have intervened, during which the wheel has impressed all the world and his wife and their children into its service. Muscles which hitherto have lounged about the house all day, with a little dancing at night, or have held down a chair in an office, or stood behind a counter, are now hard and elastic from driving a wheel through pure country air. At no period has there been such a large number of men, women and children who take and enjoy plenty of outdoor exercise.

In what position do they find themselves at this season of the year? Summer is over; winter, with its snow and hard winds, is upon us; and the wheel, much against the desire of its owner, is forced to take a short respite. For the next three or four months there must be exercise of some kind to keep up the wheeling condition.

Now we hear rumors of the resurrection of the roller skate. Rinks are being opened here and there throughout the country, and manufacturers of roller skates are beginning to blazon forth the merits of their particular lines. The query interesting the Hardwareman is: Will it come to stay, or is it to be another ephemeral spasm which will end in disaster to the manufacturer and the dealer? Of course it is all speculation. The dear public is fickle, and likes to keep the merchant guessing as to its tastes. But we venture to say that there is more logic in its return than there was in its inception, and there is some ground for hope that, if used with judgment, there is no reason why roller skating should not form a regular winter sport, to occupy the time and surplus energy of our wheel riders, and to bring them out of the cold months in as good physical condition as the wheel had left them in the fall.

The Bicycle Situation.

The announcement of the Pope Mfg. Co. giving their programme for the conduct of their business during 1899, and the prices that have been established for the distribution of their product, has set a pace for the future which grapples unreasoning competition with a firm hand, and will do more to put this legitimate business on a solid basis for the future, than any similar movement since bicycle manufacturing became an established industry.

The fictitious standard of $100, so long entertained as representing the selling value of a bicycle of standard make, simply enabled a number of financially weak concerns to market a product through various trade channels, at prices which were dictated by methods of selling which to call "regular" would be to distort the honest truth and question human intelligence. It enabled the calling of an apology for a first-class wheel by a fancy name, and by conveying the idea of its being a "regular $100 wheel," made it possible to dispose of it mostly through the bargaining seductiveness of a department store's "one day only" advertisement. Thus a market was created for a "thrown together" product in which price seemed low only when compared with cycles whose list prices should never have been agreed upon at so large an advance on net cost.

This season, a difference will be noted, for with recognized and advertised list prices running from $25 to $50, the margin for a phenomenally large profit doesn't exist; and under these circumstances, fewer confiding capitalists will be inveigled into a business from which annual dividends have been unintentionally eliminated on too many occasions. The cycle business will doubtless be placed on a footing in the approaching season, which would have been more appropriate and advantageous to the manufacturers if inaugurated two years ago, but which seemed too hard a thing to explain on the part of the largest makers, how list prices fifty per cent. less than the season previous had entertained, could be formulated without a suspicion of unjustifiable profits; so the come-down was made gradual from year to year, that buyers should not be prejudiced by previous extravagant ideas of large profits; and by making bargain-counter wheels seem less dangerous by comparison, when marketed much nearer actual cost.

White, Van Glahn & Co.'s New Store.

We have heard it said by old Hardwaremen that the first sale in a new Hardware store gives a pretty good indication of the character of the business which is to be transacted. If this is so, the new store of White, Van Glahn & Co., at No. 49 East Forty-second Street, New York, has certhinly commenced business under the most favorable auspices. The first barrel of goods had hardly been dumped upon the sidewalk, before a lady came along and purchased a mouse trap. This is surely an indication that the new concern is to have plenty of "spring" and "snap," and will certainly "catch" a great deal of business.

This new store, which was opened on Monday, October 31st, is a fine sample of the artistically fitted and finished, up-to-date Hardware store of modern times. It is located near the Grand Central Depot, right in the great center for retail business, and the patronage which it has already secured is a justification of the good business judgment which located it where it is. For eighty years and more the wholesale and retail Hardware business of White, Van Glahn & Co. has won great success on Chatham Square, and while the old concern is to remain in full vigor in its present location, the new branch will stand as an exponent of the fact that business is very rapidly finding its way uptown.

The branch is located in a new building, 88 feet deep and 32 feet wide at the rear, while a little narrower upon the street front. A visit to the store shows that it is equipped with all the modern conveniences, including trolley ladders, display cases, drawers with samples in front, and especially a full line of the J. D. Warren Mfg. Co.'s screw cases, and other modern Hardware store appliances. A great deal of artistic skill has been displayed in the arrangement of the store, and the presentation of the goods. The offices have been handsomely fitted up, the building is steam-heated, and lighted by electricity, and every convenience and attraction possible to the modern Hardware store has been provided. The basement is used for storing surplus stock, shipping goods, etc. This old concern—old only in the sense that it has existed a good many years—is certainly to be congratulated upon the enterprise which it has shown in keeping up with the procession.

The young man who strikes out for himself is always praised for it, unless he happens to be a baseball player.—*L. A. W. Bulletin.*

Always avoid the use of big words; they are sometimes inconvenient to swallow.—*Exchange.*

Eastern Manufacturers in the West.

Editor Hardware: I have just returned from a visit to the Trans-Mississippi & International Exposition, and, having been in the Hardware business for twenty years, I took interest in noting the distribution of the exhibits according to States, and also how well the manufacturers of the extreme sections whose goods I handle are represented there. Inasmuch as the exposition, while national to a great extent in its scope and influences, is yet more fully a Central West and Western effort, one would naturally expect to find the manufacturers of that section principally represented; and the fact that the territory which it opens into is largely agricultural, would lead one to look for the heavy lines mainly, to the exclusion of the lighter ones. I was not surprised, therefore, to find heavy builders' and carriage Hardware, agricultural implements and firearms from the manufactories west of New York State well represented; and, indeed, these lines from the extreme East also were not wanting.

But, as I say, I was principally interested in the representation of the distant manufacturers, and so in the face of the above considerations it really gave me pleasure to find two of my Eastern friends of the shelf Hardware line, the Peck, Stow & Wilcox Co., with their food cutters, and the Nicholson File Co., with a full line of files and rasps represented. The Nicholson File Co. have an ambitious and expensive exhibit in Machinery Hall, displaying, as their attendant told me, some 1200 different kinds of files and rasps, while the former company showed their line to nice advantage in a section in the same building. It may be that more have been installed since I have returned, but the file company and the cutter people were all up to that time.

I couldn't help thinking that it was indicative of a broad-mindedness and patriotic spirit for these extreme Eastern concerns to take expensive exhibits way out there, and it seems to me that they deserve in return the support of the trade in the West which they seek. I really felt proud to see it, and I congratulate my New England manufacturing friends upon their enterprise.

Very truly,

Detroit, Mich., October 12, 1898. AN OLD SUBSCRIBER.

The Salesmen's Department.

Editor Hardware: For several years much space in trade papers has been devoted to the discussion of matters along the lines of whether the manufacturer would be more successful if he sold his product directly to the retailer, ignoring the jobber, and whether the jobber was getting all the returns possible for the money expended in traveling salesmen's salaries and expenses.

It is pleasant to note that both manufacturer and jobber are now having their time so fully occupied in supplying the demands of the consumer that they have dropped the discussion for the present.

The space devoted to these subjects indicates their importance, and the desire on the part of many to solve the problem in such a way that the best interests of the majority will be advanced.

That the manufacturer has a feeling that the jobber does not fully fill the niche he thinks the middleman should in introducing to, and placing his wares with, the retailer, cannot be questioned.

It was hoped and expected that the traveling salesmen would solve the problem, and they have, to some extent, especially so far as those who stand between the manufacturer and jobber are concerned.

The jobber is better informed to day regarding the merits of the goods he is selling than ever before. The feeling of the majority of jobbers is voiced in the assertion that it is their desire to impart the knowledge at their command to the retailer, in order that sales may be increased and less goods returned because of the ignorance of the consumer and retailer regarding their utility.

The jobber's buyer will tell you honestly that he devotes all the time he can possibly spare in writing and telling the salesmen all about the new goods and their advantages, but he has other duties besides being a bureau of information.

To overcome this lack on the part of the jobber, some manufacturers have pursued the method of having a representative of the factory travel with the jobber's salesman to instruct and enthuse him regarding the advantages and merits of certain goods.

While much has been accomplished in this way, in the majority of instances the great expense entailed has been out of proportion to the results attained. The result of this method of endeavoring to overcome the so-called lethargy of the jobber's salesman has been in many instances a gratifying increase in the sale of their goods, but the benefits have gradually disappeared. The work must now be repeated with the salesmen of another jobber covering almost the same territory in order to keep the demand up to the proper standard.

Time brings changes and improved business methods.

The jobber has come to stay, and the traveling salesman is a necessity to the proper distribution of the manufacturers' products.

The salesmen's department at a moderate expense has come into existence, and to-day occupies the unique position of being the house representative of the salesmen, always alive to the best interests of the house as well as the salesman, and is always accessible to the manufacturer, through the jobber's buyer.

In the title of this article the trade has the solution of the great problem of: How can the greatest benefit be derived from the jobber by the manufacturer and in turn from the salesman by the jobber?

In the march of progress, and in the multiplicity of salesmen, this latest innovation and key to the success of any jobbing business cannot be ignored or overlooked.

St. Joseph, Mo. CHARLES W. EMERY.

Truth is Mighty.

The Advertising Man had exhausted his strongest arguments, and still the Prospective Advertiser remained obdurate.

"No," he said, "I will not do any more at present. The season is right, your paper is good, but I have too many irons in the fire already."

"If," said the Advertising Man, "you could only realize that, instead of offering you an additional 'iron,' I am really offering you a pair of pincers, with which to extract the nuts of business from the fire of competition, you would view the matter differently."

And the Prospective Advertiser, being a man of sense, recognized the force of the argument, and changed his views accordingly. His card will be found in to-day's issue.

A Home Application.

Rev. Daniel F. Bradley, pastor of the Park Congregational Church, Grand Rapids, Mich., is evidently a very practical man, and believes in the use of illustrations which his hearers can understand. In a recent sermon on this subject: "From the Firing Line," he used the following apt and home-made application: "You go and live among lazy people and become industrious and thrifty among them, and they will want to take hold and work. It is a matter of showing the goods and delivering them honestly when ordered. The missionary's goods are staple: they are like sugar, sheetings and Bissell carpet sweepers and Grand Rapids furniture. They sell themselves!"

A Frank Publican.

Candor to one's business associates or acquaintances is always lightly appreciated, so long as it is inoffensive. Perhaps this has something to do with the popularity of a certain hotel proprietor of Winsted, Conn., whom the boys all call "John," and whose notices to visitors, which hang in the bedrooms, begin as follows: "This hotel is run for the comfort of the guests *and for the pecuniary benefit of the proprietor.*" The italics are his, and, instead of giving offense, this frankness probably leads to a better understanding between host and traveler.

It is inferred in the foregoing paragraph that, when candor is brutally truthful, it is not always insisted upon. A painful example of brutal frankness may be found in the street cars of New Haven. At the end of the car, staring the most inoffensive passenger in the face, is the notice of the management, reading as follows: "DON'T BE A CHUMP; wait till the car stops." In the first place one resents the tone of familiarity, and even were it true that all passengers on New Haven street cars were "chumps," they would not thank you for telling them so. We assume that the gentleman having charge of that particular bureau for the street railroad company must be young—very young.

A Ponderous Shipment of Paint.

The following item of interest is from a Troy, N. Y., exchange: What is without doubt the largest single shipment of paint from any manufactory in this country was sent to-day from the American Seal paint works of William Connors, when a barge was loaded with 500 tons of material, consigned to contractors in New York, who have contracts for painting several large structural iron works. Owing to the high water only four hundred tons were put on the immense barge at the paint works near the dam, the owner of the craft fearing to pass through the Delaware & Hudson bridge with any larger load. This afternoon the barge was brought down to Grand Street and the remaining 100 tons will be loaded there, being brought from the works by teams.

The barge is twice the capacity of the average boat. If the shipment was made by rail it would require a train of about 50 ordinary freight cars. In this way the immensity of the load can be judged. The paint is in barrels, averaging about 450 pounds each, making the shipment consist of nearly 2500 barrels. There are eight different colors. The largest shipment ever made before by Mr. Connors from the American Seal works was a year ago, when he sent about 300 tons to New York by boat. The barge will be moored at the foot of Grand Street until Monday, when it will depart for the metropolis.

The popularity of the American Seal paint is shown conclusively by this large order, and when it is taken into consideration that Mr. Connors is building a very large addition to his present plant it becomes evident that the business of the concern is fast becoming one of the largest manufacturing establishments in the country. The enterprise of the proprietor of the American Seal paint works is commendable, and by judicious advertising he has made this plant known from one end of the country to the other.

The Covert Mfg. Co.

We take pleasure in publishing an extract from an article that appeared in the *Troy Press*, Troy, N. Y., under date of October 16th. When one takes into consideration the great progress that the Covert Mfg. Co., West Troy, N. Y., have made, and the difficulties they have overcome in reaching their highly-enviable position in the trade, their success seems truly surprising.

Their great battle with the infringers upon their patents is a part of the history of the trade, and they can justly feel proud of having reached their present prominence, notwithstanding these adverse efforts. The article referred to is as follows: "The Covert Mfg. Co. has for months been running to its full capacity, and having found it extremely difficult to fill orders, has been compelled to break ground for a substantial extension of the works. A large and commodious brick building for manufacturing purposes is now in course of erection, and immediately on its completion will be equipped with special and improved machinery, which has already been ordered. It is the intention of this company to enlarge its line of goods and many new articles of manufacture will be added. Notwithstanding the magnitude of the improvements now being rapidly pushed forward, the additional plant will be running by January 1st of the new year. The enlargement of the boiler house is already completed and a much larger boiler has taken the place of the old one. This was rendered necessary on account of the increasing business of the company. The Covert Mfg. Co. has never, since its organization, twenty-five years ago, closed its doors or shut down its machinery for want of orders or a depression of business."

Goshen Sweeper Co.'s Offer.

The Goshen Sweeper Co., Grand Rapids, Mich., make an announcement to the trade in which is found the following:

Our fall and holiday line of sweepers is now ready, and we call your attention to our liberal offer, and some of our leading brands that are specially designed for holiday trade, on which we quote you our recently reduced prices.

"Our Best"—Full nickel trimmed, hand polished, $24 per dozen.

"Select"—Nickel trimmed, $22; japan, $20 per dozen.

"Unrivalled"—Nickel trimmed, $20; japan, $18 per dozen.

"Our Leader"—Japan trimmed, $18 per dozen.

Children and Toy Sweepers: "Goshen Junior"—11 inch, oval top, $9 per dozen.

"Little Pet"—8½ inch sweeper, $6 per dozen; $54 per gross.

"Goshen Toy"—6½ inch sweeper, good quality, $1.50 per dozen; 3 gross, $16 per gross; 5 gross, $15 per gross; 10 gross, $14 per gross.

Orders placed with us for immediate shipment will be given November first dating, sixty days, two per cent. in ten days. Liberal discount for quantity and to jobbers. We will send you free with each dozen sweepers ordered: Five hundred handsomely illustrated and descriptive slips with your name printed thereon in red; two very attractive colored hangers; one display easel. Electrotypes if desired. By using only choicest figured stock and giving our sweepers a piano finish, we have produced most desirable effects. Our finishes for this season will be as follows: Mahogany, Old English, Golden Oak, Sycamore, Antique and Natural Oak. All stock quarter-sawed and beautifully figured.

The J. D. Warren Mfg. Co., of Chicago, Ill., removed from the Marine Building, in which they were located, on November 1st, to the Masonic Temple, in which they have display rooms on the fifth floor, to which they invite all Hardware merchants and traveling salesmen to call when in Chicago, and see their new system of shelving. It is well known that this building is one of the highest and finest in the world, and one which thousands of visitors, daily, to Chicago, visit, and is so centrally located as to be easy of access to all.

The name of a concern in New York making car wheels is rather a peculiar one: The Steel Tired Wheel Co. Why any railroad corporation should wish to use weary wheels is not explained in their advertisement. This is perhaps the reason our English cousins spell it "tyred."

A Clover-Leaf Conundrum.

Ever since it was rumored that the Stanley Works, of New Britain, Conn., and New York, had under consideration the location of a branch factory at some favorable point in the West, the people and the press of several Western cities have been very much exercised as to the fortunate choice. Some time since, an article appeared in the Buffalo *Commercial*, which declared that this branch was to be located in the Electrical City, where the benefits from the great plant at Niagara Falls could be realized. A warm welcome was extended to the supposed new-comer, and Buffalo was congratulated by the editor upon securing such an important addition to its manufacturing establishments.

If there is anything going on in or about Buffalo concerning which Hobart Weed, of Weed & Co., is not posted, it would be difficult to locate. A representative of *Hardware*, who discovered Mr. Weed at the Hardware Club some days since, showed him the clipping above named, and asked him what it meant.

"I am not in a position," said Mr. Weed, "to tell you what the Stanley people intend to do, but I think that a very dear friend of mine, who is known to the Hardware trade the country over, was unconsciously the point from which this rumor started. Do you know George P. Hart, the assistant manager of the Stanley Works? Of course you do, as not to know George is to show that you are not very well acquainted in the Hardware trade. George is quite shrewd, witty and epigrammatic, and has picked up more than one item of knowledge in his visits throughout the country. Some time since he purchased a block of land on the outskirts of Buffalo, and it has been a subject of wide comment, and some controversy among his friends, as to the purpose to which this land is to be devoted.

"No, I don't think that it was intended as the location for a factory, as it is off the main line of the railroads. I have heard it said that he purchased this land for the purpose of erecting a summer home, but those who know him best hardly believe this to be possible. You know that George is of a sunny, cheerful and happy disposition, with his windows always open towards the sunrise, and is the last man to surround himself, under any circumstances, with sombre or shadowy subjects, or to choose his friends among men who are not full of life and enterprise. Inasfour much as the land in question is within sight of three or of the largest cemeteries of Buffalo, it is hardly possible that he would choose it as a refuge to which he might resort in his few moments of relaxation from the cares of business."

"What do you suppose the land is to be used for?"

Mr. Weed pondered for a moment, while a shade of thoughtfulness swept across his expressive features. "I can only repeat to you," he said, "the suggestions that are made to me by his friends, as George himself is very reticent. For instance, Howard Rowland declares that inasmuch as Mr. Hart has a successful four-leaf clover farm in Connecticut, it looks very much as though he intended to locate a branch clover conservatory in New York State, for the purpose of demonstrating to the agricultural interests of the United States that this New England exotic would also thrive upon the soil of the Empire State. I know, however, that George H. Bartlett, who is another friend close to Mr. Hart, was in Buffalo a few weeks ago, and talked seriously of investing in land in that city. I understand that Mr. Bartlett has recently made a very successful sale of land, and perhaps has come to the conclusion that speculation in real estate offers better returns than the selling of screws at net.

"It has also been hinted to me," and here Mr. Weed lowered his voice, and looked at the Brooklyn Bridge, with a thoughtful, far-away glance, "that Hart and Bartlett constitute a committee sent forth to quietly secure a site for the permanent headquarters of the National Prohibition Association."

A Gold Medal Awarded.

The highest award within the power of the Omaha Exposition to bestow, that of a gold medal, has just been awarded the Chicago Flexible Shaft Co., Nos. 158–160 Huron Street, Chicago, and No. 97 Chambers Street, New York, for their newest invention, "The '98 Chicago Clipper," which has been conceded to be so great an advance on the horse clipping methods of the world. This machine has established a world's record, having demonstrated it was possible by its aid to clip a horse complete in fourteen minutes. In its advanced methods of construction the company has adopted the principle so prominent in the chainless bicycle, the slippage of which was formerly so noticeable in similar clippers, having been done away with by adopting beveled gears, thus increasing ease of propulsion. The '98 Chicago Clipper weighs about thirty-five pounds, and is suspended from the ceiling, which does away with all unnecessary stands, weights, pipes, etc. The machine can be set up by anyone in one minute in any place and requires no experience to operate it. The makers are noted for their high class work, all their tools, etc., being made on the interchangeable system. They have put the low price of $8.75 on their new clipper, which brings it within the reach of every man owning a horse, thus placing it in direct competition with the old fashioned two-hand horse clippers.

William H. Curtin.

William H. Curtin has accepted the position of manager of the salesmen's department of the Wyeth Hardware & Mfg Co., St. Joseph, Mo., made vacant by the resignation of Charles W. Emery. Mr. Curtin entered the employ of the company in July, 1880, at the age of fifteen, as order clerk, advancing gradually in the house until 1886, when he became a traveling salesman, representing them continuously since that time. This is another illustration of the fact that hard, thorough, conscientious work will be recognized and rewarded. Mr. Curtin's promotion is a guarantee that the push and energy which have characterized the work of his predecessor will be continued.

In the announcement published in our last preceding issue of the Christmas offer made by the Bissell Carpet Sweeper Co., an error was made in the sentence which reads as follows: "Most dealers have regular newspaper space; hence this competition will cost them extra." The dealers probably understood at a glance that there was a typographical error in connection wiih this statemeut. By mistake the word "*not*" was left out. The above sentence should have read: "Hence this competition will not cost them extra." Lest some, however, should have been misled by this statement, we take pleasure in making this correction.

T. D. Honeyman, of Honeyman, DeHart & Co., Portland, Ore., and George Boole, of the Union Hardware & Metal Co., Los Angeles, Cal., spent several days of last week in Philadelphia, as the guests of T. James Fernley, secretary-treasurer of the National Hardware Association. These gentlemen are making a tour of the East previous to their attendance at the convention of the National Association at Milwaukee.

J. F. Bigelow, the well-known manufacturer of the Wire Fly Killer, No. 19 Foster Street, Worcester, Mass., has been spending a few days with his business friends in the city, and reports that while this past season has been a great one for his specialty, the indications are that his business will be very much widened and increased during the coming year.

HARDWARE'S "Prices Current" are reliable.

Latest Trade Publications.

The Gille Hardware & Iron Co., Kansas City, Mo., have certainly combined artistic finish with practical usefulness in their handsome catalogue of 818 pages, which has just come to hand. This bears the date of October, 1898, and is just from the press. It is printed on heavy and well finished paper, is bound in red and blue, with flexible back, which will permit a great deal of rough everyday use without damage to itself. When we say that twenty-eight pages are occupied by an index, that fact will show the impossibility of attempting any enumeration of the line of goods they handle, which include, of course, everything known under the name of Hardware, and under the name of iron, so far as it relates to the stock of a wholesale Hardware concern. Illustrations with descriptions and prices are on every page, and the frontispiece, as well as the outside cover gives us a view of their extensive store at Kansas City. Several pages are devoted to greetings to the trade, and one new departure that certainly is to be commended, is a full page giving a list of officers and of the office force, from James Van Peyma, president, to the last assistant in the tinware department. In a note of introduction the company say: "We take pleasure in presenting you with this catalogue, containing a description of nearly everything we carry in stock in both shelf and heavy Hardware. Our aim in compiling this book has been to illustrate only such goods as we actually carry in stock. It is unnecessary to boast of the size of our building or the multiplicity of our business. It is sufficient to say we carry a variety of goods equal to any Hardware house in America."

The Standard Tool Co., Cleveland, Ohio, have prepared a very handsome and artistic publication, describing their electrically welded bicycle parts, welded specialties, etc. All these parts are illustrated, with full description. They have also published a leaflet in reference to their twist drills, reamers, chucks, milling cutters, taps, spring cotters, flat spring and riveted keys.

The W. Bingham Co., Cleveland, Ohio, have issued a new and descriptive catalogue of guns, rifles, revolvers, hunting clothing, ammunition, etc. This title describes the book very accurately, and about everything needed in the sportsman's line can be found described in this volume.

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis., are sending their friends several leaflets showing their hangers, tackle blocks, etc. A very timely article illustrated is their hot-air registers, ventilators, etc.

The Boston & Lockport Block Co., No. 142 Commercial Street, Boston, have certainly made an attractive exhibit at the Twentieth Triennial Exposition of the Massachusetts Charitable Mechanics' Association, opened in Boston on October 10th, to continue until December 3, 1898. Their exhibition was intended principally for yacht blocks, but they also show their diaphragm pump for contractors and sewerage work, and also a sample of their 24-inch double extra heavy purchase block with bail, metalline self-lubricating bushed, which has a capacity of not less than 75 tons, and is intended for railroad and extra heavy work. This block was a part of their exhibit at the Chicago Columbian Exposition, where it received an award. Their exhibit at the Massachusetts Exposition has attracted considerable attention of a favorable character. They have recently published a folder printed in black and red, showing a full line of their blocks of various kinds, and giving a great deal of information of use to those interested in goods of this character.

Truth is the most valuable thing we have. Let us economize it.—*Exchange.*

"Matchless" Cup Point Nail Set.

The W. W. Pryor Hardware Mfg. Co., Newark, N. J., and No. 124 Chambers Street, New York, are placing upon the market the "Matchless" Nail Set, as illustrated herewith, which is provided with an improved cup point and long knurled surface, making it well worthy of the attention of the retail dealer looking for the latest style of tools. Careful testing on a steel block makes it impossible for a nail set to leave the factory without having been properly hardened and tempered. The knurled portion is finely done, preventing all slipping when in use. To accommo-

date the retail trade, the nail sets are packed with three styles and sizes of points, 2–32, 3–32 and 4–32, in each box holding one dozen; or they can be had all one size if preferred. They are furnished in either the blued or nickel-plated finishes. Complete catalogue of the full line of tools made by the company, will be forwarded upon request, to the New York office. Mention *Hardware.*

The National Hardware Association.

On Wednesday of next week will be opened the annual convention of the National Hardware Association, at Milwaukee. The sessions will continue during the 16th, 17th and 18th of November. Arrangements have been made by the local committee for the entertainment of the members and guests. The headquarters will be at the Hotel Pfister. The local committee having the matter in charge is composed of Frederick C. Pritzlaff, chairman; John C. Koch, Lorenz Maschauer and Edwin Foerster. The first session will be held on Wednesday, with an informal reception on the evening of the same day. A tally-ho ride will be given the visitors on Thursday, while the different local associations will meet in separate session on Thursday evening. The grand banquet will be given on Friday evening. All the indications are that the attendance will be large, and that the convention will be one of great interest and pleasure.

A very large number of the members have already engaged rooms, and signified their intention of being present. There will be a meeting of the executive committe on Monday, the 14th, and Tuesday the 15th, and the session on Wednesday morning will be open to manufacturers and members of the press. It is expected that some of the leading manufacturers of the country will make remarks. The other sessions of the convention will be of an executive character.

The Hardware Club of New York was complimented some days since by a visit during the luncheon hour from Capt. Robley D. Evans, who was the guest of Gen. Anson McCook. Capt. Evans was in civilian dress, but every one knew him at a glance, and those who had the pleasure of making his personal acquaintance were strengthened in their admiration of him as a sailor, fighter and a gentleman.

"The wagon is a funny combination," said the wag. "It is composed, among other things, of a lot of fellows who are always tired. Nobody ever hears of a wagon having its leg pulled, but its tongue is pulled often. It has a bed, which it carries around but never gets in it. Wagons are indispensable in war. If the soldiers have no guns, the axles do, and when they get thirsty they can go to the springs under the seat."—*Farm Machinery.*

A Tacoma firm has shipped a large consignment of stoves to Alaska. This is certainly *not* carrying coals to Newcastle.

NEW GOODS AND SPECIALTIES.

The Twentieth Century New Lamp.

Success to be permanent, must be based on intrinsic merit. The Twentieth Century Bicycle Headlight is an article of this class, and the advertising and pushing methods of the firm owning it have made it known broadcast; but the ever increasing demand for the lamp shows plainer than words that it has been able to stand up against all comparisons and the criticism of practical bicyclists. In no line of the cycle trade has competition become keener than in the lamp line. Every year has brought out new ideas and designs, some of merit and some of none, but even the latter kind makes a brief competition if only in matter of price; for it leads to stock which the owners are anxious to get rid of, and to do so they are prepared to sell at almost any sacrifice. The large trade all know these facts very well, and at various times they have had offered them articles of nice appearance at figures they know must have been below the cost of manufacture, simply because there was no special merit to the goods and no demand for them. The "Twentieth Century" Mfg. Co. have kept abreast of the times, and have improved the mechanical construction of their lamps from year to year and at the same time have met, as far as possible, the tendency towards lower prices. The 1898 model, in point of convenience over their previous models, is a great improvement; and the sale this

FIG. 1. OIL LAMP.

year has been very much larger than ever before, not only in the United States, but in England and on the Continent, and also in more remote foreign countries. Mr. Crary, president of the company, probably does not exaggerate when he states that the "Twentieth Century" Headlight is undoubtedly one of the widest known cycle specialties in the world. When the lamp was placed on the market in the latter part of 1895, it was entirely original in its features and design, and at once became popular because it gave a large light and kept lighted—two features which at that time were rarities. The 1899 model, which will be ready for delivery in December, is, in the opinion of the company, nearly perfect. They have been able to reduce the size, making it more symmetrical and compact, without affecting the splendid light-giving qualities The bracket to attach to bicycle is better and more graceful, and it is predicted that the demand for this lamp for the coming year will be greater than ever before. The company, with scientific experts, have been experimenting for nearly two years on their Acetylene Gas Lamp, and they have been hard to satisfy, as they felt that they must have as good a lamp as their other is among oil lamps, to be worthy of the name "Twentieth Century," and to be backed by their reputation. Mr. Crary says that they are greatly pleased with the results, and that it is with pleasure and confidence that they now offer a gas lamp which is safe, simple and reliable, and which gives a full brilliant light. It is as light in weight and small in size as is consistent with strength, durability and lighting capacity desired. It is similar in design, and has many of the characteristics of the oil lamp, such as aluminum parabola reflector, etc. Both "Twentieth Century" lamps will be

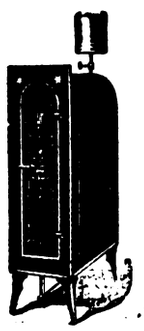

FIG. 2. GAS LAMP.

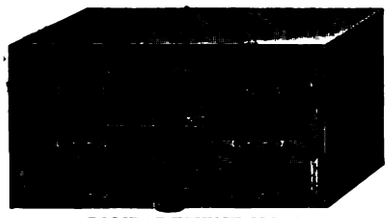
placed on the market to show a satisfactory margin of profit and yet retail at the popular prices, the oil lamp, $2.50, and the gas lamp, $3.50. The company have also placed on the market a handsome barrel-shape cyclometer which they guarantee in every respect accurate and reliable, deliveries of which can be made immediately. These goods were fully illustrated and described in a colored insert in our issue of October 25th. The "Twentieth Century" Mfg. Co., whose office is at No. 17 Warren Street, New York, will be happy to give further particulars and to supply electrotypes for trade catalogues.

Enameling Ovens.

The long experience of the National Cement & Rubber Mfg. Co. in the manufacture of Enameling Ovens, is clearly shown in illustration of their No. 2–A Enameling Oven. They carry in stock five sizes of these doubled walled enameling ovens, which can be furnished to hold from two to six bicycle frames, with larger sizes for tandems and triplets. They are made of the best material and built on scientific principles. The makers guarantee them to be absolutely dust-proof. These ovens are built with steel sides riveted to cast iron ends and base and stand free from the floor. The work placed in these ovens is exposed to radial heat only, which is evenly distributed, preserving a



uniform temperature throughout the oven. Regularly they are fitted with the National's Improved Hydro-Carbon Gasoline Burners, but can be furnished with gas or coal burner. A special thermometer with full directions accompanies each oven. Send for catalogue to Toledo, Ohio, mentioning *Hardware*.

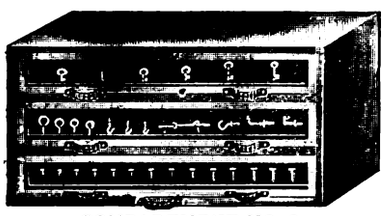
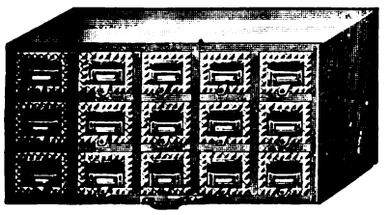
Warren's Latest Chests.

It only requires a casual observation to notice how rapidly Hardware merchants are changing their line of merchandise and their personal efforts to a greater assortment of miscellaneous small lines, which brings them a much greater profit on a smaller investment, but heretofore shelving arranged to keep these goods so that they could be instantly found and shown, has been lacking. The J. D.



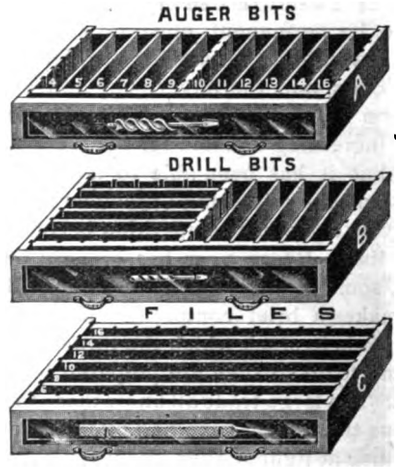
COMPARTMENT NO. 1.

Warren Mfg. Co., Chicago, Ill., are providing, in the many improvements they are bringing out in Hardware shelving, a multiplicity of partitions and a great variety of small drawers and innumerable places in them for all the small goods that bring to the Hardwareman the "Cream and Sugar" profit that other merchants have been wisely capturing. Mr. Warren has now brought out these innumer-



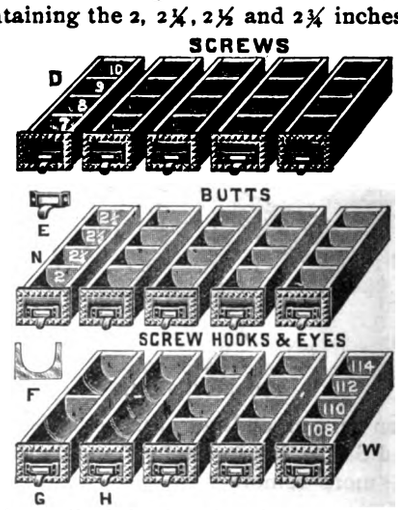
COMPARTMENT NO. 2.

able little "pockets," especially suited for such goods, in interchangeable chests, or sub-cases, that hold the small drawers. These chests, in turn, slide into spaces in large cabinets, the same as, and taking the place of, drawers, at any location along the shelving desired, thus enabling the merchant to place any line or class of goods in any portion of the store he desires and fit in the cabinet per-



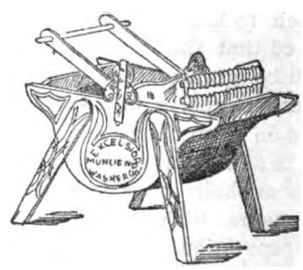
COMPARTMENT NO. 3.

fectly. We illustrate a few, which quite clearly explain the practical service of their shelving, in which other goods than those named can be placed. Compartments numbering one, two, three, etc., represent the sub-cabinets or chests that contain the small drawers A, B, C, D, etc. These chests are of the same height and length as a portion of the distances are between shelves in their large cabi-



COMPARTMENT NO. 4.

nets. These small cabinets are made with such a diversity of drawers that they are suited to nearly all lines, thus enabling the merchant to transfer a class of goods to any location he may desire, as the stock or season changes. The cuts of the drawers illustrate how goods can be conveniently arranged. The drawer A shows twelve spaces for bits; the drawer B has the same partitions as A, but one-half of them have been changed to run from side to centre, to form distinct spaces for two styles of bits, taper files, etc., thus providing a different form for each style. The drawers are grooved—front, back and ends—on inside; also the centre partition is grooved, enabling any one drawer to be changed, as shown in A, B and C. The fifteen small drawers are made with circular bottoms inside, each having four spaces formed by three movable partitions. "D" illustrates the arrangement of screws: for instance, 1 inch



No. 7–8–9–10 can be carried in one box, thus saving time in selecting the size wanted. "E" represents the brass card frame and pull combined, holding the label, giving length and size. "N" shows the arrangement for quarter-inch fractional measurements of butts, bolts, etc., the 1, 1¼, 1½ and 1¾ inch sizes being all in one drawer; the second drawer containing the 2, 2¼, 2½ and 2¾ inches. Through

these partitions all of the fractional ¼ measurements of the inch are provided for in one drawer, and the inches, being arranged consecutively, simplifies keeping the stock. "F" represents an end view, showing the inside circle of each drawer. "G" shows the drawer divided into two spaces, while "H" shows all the partitions removed, and "W" shows all partitions in place for bright wire screw eyes, or any other small articles.

Excelsior Washing Machine.

The accompanying illustration represents the Excelsior Washing Machine, manufactured by the Excelsior Mfg.

Co., Muncie, Ind., and advertised on page 43 of this issue. The construction of it is described by the makers as "perfect, made of the best material throughout, and is war-

Digitized by Google

ranted to give the best of satisfaction. It is sold at a price within the reach of all. Its simplicity, thorough work and price make it the most popular washer on the market." For prices and terms address the Excelsior Mfg. Co., Muncie, Ind.

The Victor Forks.

The very striking illustration which accompanies this is here introduced for a two-fold purpose. The first is to show to the readers of *Hardware* a handsome and model advertisement in which, while everything stands out in bold relief, the striking point is made that the Victor Fork is bound to impress itself, both for quality and appearance, upon the attention of the trade. The card taken merely as such is one of the most striking we have seen. The Victor Fork, it may be added, has also proved itself a great winner, and is being endorsed by its manufacturers, the Iowa Farming Tool Co., Fort Madison, Iowa, as among the win-

ners of the present day. This fork is made in manure, hay and header styles, with bent handles, braced shanks, and of superior quality. In speaking of the popularity of these goods, the manufacturers say: "Their hang does it. Then they are superior in quality—style, best we can buy; handles, better timber doesn't grow; finish, elegant. The braced shank is strong and gives the forks an increased capacity. We call them fine goods—ought to know; forty-three years' experience. Victors are only made by us." Full information will be given on application by the manufacturers.

"New Era" Oil and Gas Heaters.

Wilmot Castle & Co., Rochester, N. Y., are successfully placing on the market the two new heaters illustrated and described below. In Fig. 1 is shown their New Era Oil Heater, and in Fig. 2 their New Era Gas Heater. The construction of the one first named is as follows: It has tubes in which cool air is taken from the bottom, and heated while passing to the top; only enough air being heated directly by the flame to insure perfect combustion. In this way, the manufacturers inform us, a pleasant heat is secured, and there is no more odor noticed than from a lamp used without the heater. They add that this heater

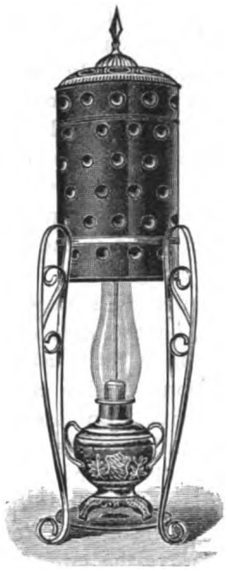


FIG. 1. NEW ERA OIL HEATER.

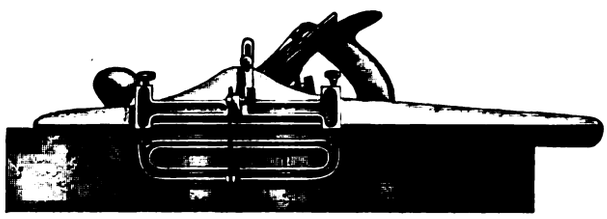

FIG. 2. NEW ERA GAS HEATER.

is adapted for use with any low lamp, one with a round wick being preferred. The stand has a simple adjustment by which the heater can be raised or lowered to adapt it to lamps of different size. In the Gas Heater, the same principle as the New Era Hot Air Radiators is used. The cool air from the floor is drawn up through the hot tubes, instead of passing through the flame. Enough air only passes through the gas to insure a perfect combustion, so that the air is not burned up, and all the rest is heated indirectly, making an efficient, but mild, heat. A rapid circulation of air is thus created in a room, producing an even temperature. Full information as to the size, prices, etc., will be furnished by the manufacturers.

Shepardson's Patent Iron Plane Gauge.

The Goodell Bros. Co., Greenfield, Mass., are just putting on the market Shepardson's Patent Iron Plane Gauge, known as their No. 333, an illustration of which is herewith shown. This device can be attached to any iron plane, and securely fastened with screws provided for that purpose. It can be set square or at any desired angle, and will be found of great assistance to any operator in either beveling or jointing, doing away with the contin-

ued use of a tri-square, to which mechanics now resort. The tool is made entirely of iron and steel, carefully ground on its flat surfaces, and attractively finished, being fully nickel-plated. The manufacturers are confident that its value as a labor saver will bring it quickly into popularity.

In the window of a wholesale hosier on Broadway is a nickeled stand called the "Silent Sock Salesman." On this are displayed what may, in the opinion of the owners of the store, be "silent socks." If they be, we will have to revise our opinion on the subject, as the combination of colors in those socks would drown the clang of the cable cars.

Review of the Markets.

Hardware: Business, locally, is not largely in excess of current requirements. Complaint is made that by comparison with a state of affairs eagerly anticipated earlier in the season, the present conditions give an appearance of a lack of energy on the part of the buyers not at all welcome. Still, a fair average business is being done, with no speculative feeling evident. Enquiry in several important lines bearing on the future, is developing, fears being entertained that the numerous combinations already formed, or in process of formation, will have a tendency to stiffen quotations materially and possibly instigate a few advances. Early orders are being entered for goods that are usually slow of delivery after January 1st, and which under existing conditions are apt to be found in short supply in consequence of an increased demand. Steel goods, in the shape of haying tools, etc., are noted in this category.

Wire Nails: With the hope of stimulating a more pronounced demand, the wire nail mills, on the date of our previous issue, announced a concession in price as compared with previously existing quotations, of five cents a keg. No orders are entertained for delivery on dates subsequent to December 31st next. This action of the mills is criticized adversely by the trade generally, as the impression is given the retailers that a weakness exists in the wire nail trade, which behooves the trade to order only from a day to day policy. This will not improve the current situation, as stocks are in fair condition among large jobbers, who, on the programme announced, feel they are compelled to throw away five cents a keg profit unnecessarily. They think it would have been more politic to have left price as it was, as the change will start a competition on sales not desirable at this end of the season. We quote as follows: To jobbers in carload lots, f.o.b., Pittsburg, $1.30; single carloads, f.o.b., Pittsburg, $1.35. The same advance on prices, for delivery in Cleveland, of 2½ cents a keg, and Chicago, Cincinnati and Louisville of 7½ cents a keg, continues in force. With the exception of the demand for export, which keeps favorably active, there is, locally, but little increased enquiry. New York prices are quoted as follows: Carload lots on dock, $1.45; smaller lots from store, $1.55.

Cut Nails: The cut nail market continues under very conservative conditions, with but a moderate business in sight. Prices are fairly well sustained at quotations recently established. Large specifications could doubtlesss obtain slight concessions with the view of increasing the output. Mill quotations of f.o.b., Pittsburg, are, for carload lots, $1.10 to $1.12½ base. New York prices continue as previously quoted: Carload lots on dock, $1.28 to $1.30; smaller lots from store, $1.33 to $1.35.

Barb Wire: Business continues fairly good in this important line, and quotations are firmly held. Since our previous issue, an advance of 5 cents a pound on galvanized barb wire has been made necessary by the increasing cost of spelter. The market is represented by the following quotations to jobbers: Painted, in carload lots, f.o.b., Pittsburg, $1.40; galvanized, $1.75. Single carload lots are quoted at 5 cents advance. New York quotations: Four-point galvanized, in carload lots on dock, $1.90; smaller lots from store, $2.

Brass Wire, Sheet Brass, etc.: In consequence of the advancing quotations on copper, the brass manufacturers have deemed it advisable to advance prices on their line of goods. Brass wire, sheet brass and brass rods, previously quoted at 40 per cent. discount, have been advanced to 35 per cent; and brass tubing formerly held at 45 per cent. discount, is now quoted at 42½ per cent.

Shot: On October 24, a change was made in the current quotations on shot by the manufacturers which make the following the prevailing prices with the Eastern manufacturers as follows:

Drop Shot, up to B, 25-pound bag	$1.25
" " " 5 "	.30
Buck Shot, 25-pound bag	1.50
" " 5 "	35
Chilled Shot, 25-pound bag	1.53
" " 5 "	.35
Dust Shot, 25-pound bag	2.00
" " 5 "	.50

Terms, net 30 days, or 2 per cent discount for cash in ten days. The Eastern market has been held very steady as to current prices, which, considering the varying quotations of the Western makers, must be a gratifying state of affairs.

Cordage: Notwithstanding the fluctuations in the hemp market which would ordinarily affect current prices on cordage, under the moderate demand prevailing, prices remain as previously quoted:

Manila, 7-16 inch and larger	per pound,	9½ cents.
" ⅜ inch	"	10 "
" ¼ and 5-16 inch	"	10½ "
Sisal, 7-16 inch and larger	"	8 "
" ⅜ inch	"	8½ "
" ¼ and 5-16 inch	"	9 "
" Lath Yarn	"	7½ "

Smaller quantities are held at the customary advance.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of October 31st, quote as follows: In lots of less than 5 barrels, 38 cents per gallon; in lots of 5 barrels or more, 37 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE PORTLAND TRADE.

Fall business is quite good, and the orders as many, or more in number than is usual at this season, but they are small in amount and growing smaller each year.

We sometimes wonder if jobbers realize how much more work is required to market goods to-day than was exacted for the same amount of sales a few years ago. The buyer, the financial man, and the heads of our large firms are apt to overlook the amount of detail attending the sales of Hardware at the present time. To begin with, prices are lower than ever, and even if our customers bought in the same quantities, much more would be required for the same amount of sales, but this is but part of the trouble. Fierce competition for orders, and the increased number of salesmen calling on the trade have encouraged retailers to buy in smaller quantities, and buy oftener.

Now it takes just as much time to get out one-quarter dozen of any article as it does a full dozen, just as much labor to pack, just as much labor to ship, just as much time to enter on our books, as much time to figure, as much time to carry through the books, as much effort to collect, and the only redeeming feature is, if the customer goes into insolvency, we lose less than formerly. Yet in the face of these facts, that cannot be refuted, the jobber is figuring all the time to cut down the percentage of his neighbor's profit by quoting lower prices, seemingly overlooking the fact that he is injuring himself as much or more than he does the other fellow.

It is no kindness to the retailer to sell him your goods without any profit to yourself, for be sure there is another behind you, just as smart, just as eager for business, and just as able to cut as you are. You may get business that does not belong to you for a time, but you are sure to lose at the other end, as someone will do to your customers what you have done to his, buy his business, and as the retailer bases his profit on his cost, he is, if anything, a loser by this unfair competition. It is human nature, you say. Yes, but human nature unjust to itself, as well as to its fellow man.

Again, there is a class of customers who quote prices that have not been made, or make offers that do not show

Digitized by Google

any profit, and some jobbers seem to think they can make that man their customer by meeting the supposed quotation or accepting the offer. Now if they will only stop to reflect they will see they cannot hold such a man, and he will only buy one or two bills, and use their prices to pry the next man down.

The jobber is his own worst enemy, and why cannot men who have good judgment in almost everything else, use a little common sense in making prices? No one can lay it all to the other fellow, there are few, if any, that can lay claim to any great amount of virtue in this direction, but why cannot jobbers be more fair with each other? Surely there never has been a time when a legitimate profit was needed any more than to-day, for the cost of doing business is constantly increasing.

THE EMERY-WATERHOUSE CO.

THE COLUMBUS TRADE.

It is surprising how quickly time flies when you are in no especial hurry, and how slowly it moves when you have something pleasant to anticipate. For example, we will say that the time to shoot the plump bob-white is slow coming, but the time to write a semi-monthly trade report for *Hardware* gets around before you know it. We sometimes think these frequent trade reports must become somewhat monotonous to the readers of *Hardware*, inasmuch as they are about the same thing from time to time. It reminds us of a parrot story that may be as stale as trade reports, but it illustrates the point at any rate. A gentleman owned a very smart parrot, and of course every one who talked to Polly would address it in the same old way—"Good morning, Polly, pretty Polly, Polly want a cracker?" Now Polly got sick of that cracker joke. A preacher went to interview Polly, one day, and he started in as usual—"Good morning, Polly." Polly never said a word. The preacher again said, "Good morning, Polly." Polly hitched up her wings and looked at the preacher and said: "Good morning—now don't get off that dam cracker joke." Now trade reports (from Columbus, at least) are the same old crackers. We cannot help it, however, as we know more about the prices of Hardware than we do about writing articles for a leading Hardware journal. If it were not for the fact that Columbus is one of the principal Hardware distributing cities of the country, and should be heard from with regularity, we would be tempted to not bore your readers again.

Now for the cracker. We can report business as being at high water mark. Perhaps not as high as the water was last spring, when it flooded the west side of our city and drowned nearly 400 cans of powder for us. We do not want it to get that high again, but trade can keep on rising and we will not complain. Seasonable goods are in active demand, and as before stated, many articles are hard to get; in fact, cannot be gotten fast enough to supply the demand. If the government could transform the guns that were used against Spain into shot guns to make war on rabbits and quail, they would have no trouble in finding a market for them now; but army guns do not spread shot over enough territory. The writer likes a gun that will spread shot over at least a ten-foot circle and put shot in every inch of that circle; then he can come home with a good bag of game. But a Winchester pump gun don't do that, and as that is what I shoot with, it is needless to say that many a cotton-tail and bob-white is only scared, and no doubt wonders what that fellow was shooting at.

We again return to the cracker. Changes are not many since our last report. Shot has taken three tumbles—one when it tumbles down the tower and two in decline in price. The price on nails is none too firm. Wire holds its own if it is good quality. We find some jobbers are already trying to book orders for wire cloth and poultry netting. If any one can show us where the average retail dealer is benefited by placing an order for goods six months before he needs them, we would be glad to be enlightened. If any salesman represents that there is likely to be an advance, he is trying to deceive his customers, as there is no indication of an advance, and if we read the signs of the times correctly, season goods for spring trade will be sold at lower prices than now prevail, and lower than have ever been known. They say prices are guaranteed. Well, what if they are? You will gain nothing, as you will have dozens of opportunities to buy when you need the goods, and you may see something new, or you may sell out, break up or die. We know from observation for the past twenty-five years that the average retail dealer makes a mistake when he buys goods months before he needs them. The best way is to get posted on prices of the different brands and styles of goods. If they are all the same price, then buy the one of highest quality, and there is a big difference in quality of wire cloth, poultry netting, screen doors and many other articles, but as a general thing you can buy the best at nearly, if not quite, the price of some "off" brand.

Well, we have strayed away from the cracker so far that we will not return to it again this time.

SMITH BROS. HARDWARE CO.

THE CLEVELAND TRADE.

The sooner the organized trade associations learn that agreeing on prices is entirely foreign to their purpose, their value will be increased. The first thought of many people, when invited to become members, is that nothing will be gained unless they can fix prices. Experience shows that nothing valuable can be permanently gained if the attempt to make prices higher by agreement is made. The most prosperous societies do not attempt to make prices, and this a principle of their organization. Much that would improve methods has been done and can be done. The tone of business can be greatly improved, and many evils corrected, by the influence of an organization that could not be accomplished by individuals.

Any system that does not benefit the public has no claim for public respect. Organizations for purely personal gain are likely to have an early death, and the one thing to be avoided in all trade organizations is an attempt to fix prices at which goods shall be sold by the members. This indicates a narrow and selfish purpose.

The secret of the prosperity of some associations and the failure of others will be found in the observance, or the non-observance, of this fundamental principle. It is better to disband unless a majority can be persuaded that the organization can be valuable, without attempting to agree upon prices.

The National Hardware Association, at its first meeting, prohibited such an attempt by its first by-law, which they have never violated; the retail associations will save themselves trouble by doing likewise.

There is very little change in trade conditions. Wire nails are weak in price, with an advance of five cents per 100 on galvanized wire. It is impossible to fill orders for some seasonable goods, as the factories cannot furnish them.

Now that export trade will take our surplus stocks, we are not as likely to be troubled by the unloading process that has demoralized prices in the past. Advances and declines are likely to be on a conservative basis, which is desirable to both jobbers and retailers.

LOCKWOOD-TAYLOR HARDWARE CO.

THE BIRMINGHAM TRADE.

The volume of trade in this section is large, and prospects for the future are quite good. It is true the price of cotton is very low, and one would think it would tend to produce hard times, but we have heard less complaint than

Digitized by Google

usual on this account. We suppose it is because the farmers are learning to diversify their crops and not to depend upon cotton altogether.

Our mines and furnaces are running full time, and, so far as we can learn, have plenty of orders. This tends to keep business in that direction good. The building of a steel plant has added some money to circulation locally, and is giving employment to quite a number of hands. We hear contractors say that it is more difficult to obtain labor than usual, which would indicate that there is more work going on, and that there is no idle labor in the vicinity. In addition to the steel plant, there will be built a rod mill, which will produce all kinds of wire and wire nails, so that in a few years Birmingham should be headquarters for iron and steel and the products produced from them. The building of this steel plant and rod mill also necessitates building quite a number of houses for employees, and it gives an increased demand for all kinds of building material, such as lime, cement, sash, doors and blinds, grates and locks. We anticipate that this work will increase rather than diminish for some time. Altogether the outlook is encouraging.

We learn that the export of pig iron keeps up and is rather on the increase than otherwise. We think this is a wise solution of getting rid of the surplus, and tends to keep the iron market in a much healthier condition. If we had to find a market in this country for 200,000 tons which have been exported, we do not anticipate that the conditions would be near so favorable as they are. Besides, this tends to bring into this district foreign capital, so that we do not have to live altogether upon each other.

If as wise a solution of the cotton question could be found and solved in a similar way, then the South would be decidedly the best section of the country. It has already many advantages over the other sections in the way of climate and many natural advantages, but if our farmers could keep a surplus of cotton off of the market, we would still have a better country than we have. Trust that some day will find a solution of this great question.

MOORE & HANDLEY HARDWARE CO.

THE CHICAGO TRADE.

The advance in the price of spelter, and the advance of the manufacturers on galvanized wire, both plain and barbed, with the small advance in the price of tin plates, have really been about all of the interesting features worthy of any consideration in the Hardware trade.

Whether it is because of the expected tinplate trust going into effect, or because there is more building going on in the country we do not know, but we certainly have experienced during the past two or three weeks a much better demand for roofing plates of all kinds, and quite a lively increase in the business of general building Hardware at the present time.

We are sending out quite a large opening stock for a new firm in the retail trade, and our mail orders are better than we experienced during either September or October, and we have every reason to expect that our trade for the month of November will be first-class in every respect.

WELLS & NELLEGAR CO.

THE KANSAS CITY TRADE.

A very few men have lived to read their own obituary and epitaph and know something of what others thought of them. We are aware of the fact that some are born great, some achieve greatness, while others have greatness thrust upon them. Measured by this category, where do we "correspondents" come in, in view of the editor's effusion in your October 25th issue? We think possibly we were born great, some of us; others achieved greatness, but if this "thrust" is to imply greatness, permit us to thank you. We lift our $10 plug hats and consider ourselves "greater" than ever.

Now we are able to appreciate Bobby Burns in his

> O, wad some power the giftie gi'e us
> To see ourselves as ithers see us, etc.

If the editor don't care, this writer will take a good-natured "fall" out of him and quote rugged old Ben Jonson. It was he who said: "Of all wild beasts, preserve me from a tyrant, and of all tame, from a flatterer."

In this connection, your correspondent asks permission to outline the formation of a correspondent's club to meet once a year in New York city, at the expense of *Hardware*: Suppose we adopt the name of "The Order of Amalgamated Correspondents." For High Muck-a-Muck, the editor of *Hardware;* for First Lord of the Slag Heap, the man from Pittsburg; for Chief Puddler (of beans), the man from Boston; for Inspector of (fish) Scales, the man from Cleveland; for Chief Greaser of the Rolls, the graphite fiend; for Purveyor of Bone Dust, the man from Columbus, etc., etc., etc. A called meeting will be held February 29th, 1899, at which time applicants for admission will present themselves to *Hardware* for boat fare to Hoboken. His royal highness, the High Muck a Muck will be at the "slip" and will easily recognize us. Should there be a "slip" in these plans on account of date or incomplete data, the matter will be postponed until we meet in Paris.

The first break in an otherwise steady market came last Saturday, October 29th. We reduced prices on nails and wire 10 cents per hundred pounds. However, we are now advancing galvanized wires 35 cents instead of 30 cents above the base. Thus far we have succeeded admirably in filling orders for seasonable goods—in fact far beyond our earlier anticipations. We are pleased to chronicle a steady and satisfactory business. One item on which the trade from sea to sea has been "at sea" for months, seems in a fair way of adjustment. We refer to manufacturers' and jobbers' prices upon horse shoes to the consumer and

PAN-AMERICAN R. R. BARROW.

COLUMBUS, O., U. S. A.

Digitized by Google

o legitimate retailers. This writer would be pleased to believe that he believes the new prices will "stick." So far as our house goes our salesmen have positive instructions to maintain the agreed price—but. We will hear from others later.

Our local business conditions during October touched the highest recorded notch in trade history. Political issues, thank fortune, are not this year a demoralizing factor, but just think what is to come in about ten months. Then it is that we sigh for a lodge in some vast wilderness, and berate ourselves because other "statesmen" will persist in "ruining the country," "scaring gold out of the country," howling about serfs, slaves, and other aristocrats; some for high tariff, horizontal nonsense and free trade; woman's rights, free whiskey, Alger, Croker and the devil. If we could have a six-months' "hiatus" how gladly we would hiate during presidential elections.

GILLE HARDWARE & IRON CO.

THE DAVENPORT TRADE.

Before this letter appears in print the November elections will occur, and the people of this great commercial, manufacturing and mining country will have expressed their opinion and wishes as to the sort of currency they desire in carrying on their large transactions.

There are some changes in prices to record; nails seem a little lower, white lead has declined a quarter of a cent per pound, and galvanized wire, both plain and barbed, has advanced five cents per hundred pounds. Grindstones are higher; manufacturers of steel goods hold prices firm on their revised discounts. The month of October has been one of the best of the ten for 1898 in the volume of trade, as well as collections.

This has been decidedly a floral year; blossoms appeared early, and the frequent rains and warm sunshine have kept the gardens and fields decorated with the most beautiful colorings and have delicately perfumed each gentle breeze that comes from the broad, rolling prairies to the overcrowded, overheated and turbulent cities. And now, just as we have bidden adieu to the last rose of summer, there comes from the Far East, even from the great metropolis of this country, aye, from the office of *Hardware*, a zephyr that at once cools perspiring brows and calms and rests the over-worked and tired brain of many literary workers in the West, bearing on winged winds bouquets of richest fragrance to all of those brave contributors to *Hardware*. With profound bow the writer herewith expresses his hearty thanks, which are not f. o. b., and subject to no discount.

SICKELS, PRESTON & NUTTING CO.

THE PHILADELPHIA TRADE.

As usual at this time of the year, county fairs are coming to the front with the customary interruption to business, and Philadelphia has lately had an experience of this kind in the Peace Jubilee held a few days ago, and which, while gotten up on a scale that we, as Philadelphians, have reason to be proud of, was an interruption to business as viewed from the wholesaler's standpoint.

With this disposed of, trade is again coming in, and there seems to be somewhat of a disposition to order rather more freely than in the past; the low prices of goods, probably, proving tempting in this respect.

In view of the heavy demand for iron and steel, it is surprising that prices should continue on the present low basis, and already we find some manufacturers refusing to meet the low prices which have prevailed, stating that they have orders on their books for some time ahead, and, therefore, do not care to take further orders at unremunerative prices. As soon as the majority of the leading manufacturers reach this conclusion, prices will naturally stiffen.

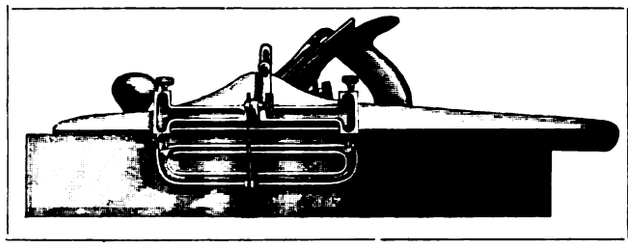
The event of the past week has been the retirement from the jobbing business of Wm. H. Allen, who has the unique record of having been in business in the same store for fifty-five years and without losing a partner until last year, his brother was removed by death. During all this time, Mr. Allen's career has been such as to win honor and respect of those about him, and he has stood the financial panics of 1847, 1857, '61 and '73, without embarrassment. It is certainly a record of which any business man should be proud, and we doubt whether many other cities in the country can surpass this record. In recognition of Mr. Allen's worth, a luncheon was given this week in the rooms of the Hardware Merchants' & Manufacturers' Association of Philadelphia, in honor of Mr. Allen's retirement, and many kind and sympathetic words were said in his hearing, and many good wishes expressed for his future happiness.

Such amenities go far to demonstrate the usefulness of our mercantile associations, and when such an example of business probity is held up in emulation to the young men in the trade, it cannot be otherwise but beneficial.

BIDDLE HARDWARE CO.

THE ALBANY TRADE.

The "Hegira" to Milwaukee to attend the National Hardware Association Convention on the 16th prox., absorbs the attention of the "jobbing fraternity" throughout the land, and the getting away of busy men involves necessary preparation to the exclusion of lengthy trade letter writing, but all will, no doubt, go away with the satisfactory feeling that trade will continue right along in the same "fullness" that has of late characterized its condition. October rounded out in good shape, the balance in the volume of business being on the right side, and the prospects for the rest of the season are undeniably good.



Among season goods, skates have sold up to expectations, when the "left overs" of last season, caused by the mildness of the weather, is considered. The slightly higher

GOODELL BROTHERS COMPANY, Greenfield, Mass., U. S. A.

prices help out, however, and compensate for loss of interest on stocks carried over. Snow shovels were well cleaned out in this section last winter, fortunately, too, for the prices this year are favorable for the buyer, if not for the manufacturer, and large sales for this line are obtaining. So are sidewalk cleaners, now an important jobbing article. Skate straps and skate sharpeners also are frequent items among the salesmen's orders with sleighs and coasters for "Young America."

Orders for nails are running heavier, as stocks have been trimmed down close, and the demand shows that assortments must of necessity be kept full now to meet requirements. The price, though a trifle higher than a few months ago, seems low, and a moderate advance would not appear unwarranted.

Pools and combinations appear to be growing. To get in in time before the books are closed requires alertness on the part of the watchful buyer. "Next" is what puzzles us, and just now full shelves and bins are more sightly than empties. While it is said "The mills grind slowly," but they do appear to grind and plenty of grist is now in the opinion of conservatives, good judgment.

The best season of the year for cutlery is at hand. The handsomely mounted carvers and table knives showing sensible shaped blades, reflect the highest credit to the deserving American manufacturers and appeal to the good sense of the appreciative buyers.

The same is true of pocket knives and razors. although many foreign goods are still imported in these to add to variety which is so helpful for elaborate displays. Food choppers and meat cutters are having large sales, and deservedly so, being now well introduced, and their merits so apparent to practical housekeepers. Keep up your stocks in these lines, is believed to be good advice, as back orders discourage those who depend upon yon for prompt shipments.

Good feeling and good prospects prevail generally throughout the trade in this section, and may hopes be realized. More anon after the convention.

ALBANY HARDWARE & IRON CO.

THE PITTSBURG TRADE.

The editor thinks these letters are of interest to his readers. We trust he is right in his surmise, and that the reports from all sections of the country are useful in making up opinions as to the general business situation.

Locally, we report the window glass strike settled and factories started on a seven months' run. This removes an unsettling element which threatened for a few days to disturb the market.

Our distinguished fellow citizen, Andrew Carnegie, is to be honored by a reception and banquet at the new Hotel Schenley, under the auspices of our Chamber of Commerce. Mr. Carnegie is to make an address, and we have no doubt will give expression to views as to the general business situation, which will be of great interest. Mr. Carnegie's success as a manufacturer, his liberality as a patron of the fine arts, and his broad views in beneficence, make him the man whom our citizens delight to honor.

The fall trade is moving along in very good volume, although not as heavy as we had hoped for. The extreme low price of goods makes it difficult to run the amount of sales beyond that of previous years. We welcome advances which come based upon increased demand, and hope for more of that kind by January 1st.

Election day is approaching, and interest is mainly centered in local and State affairs, as the people feel that national matters are in good hands and they can take this year to clean house at home.

LOGAN-GREGG HARDWARE CO.

THE GRAPHITE TRADE.

We may as well draw the long bow and say that at no time in the history of the world has there been such a demand—and a clamorous demand—for graphite productions. Like Uncle Sam, we can say that things seem to be coming our way.

Some day in the near future there will be added to the regular market reports of production of wheat, cotton, sugar and general staples, that of graphite goods.

We have a plant that should be large enough to supply everybody, but it has overflowed into a new 80 by 40 feet three-story annex, which merely relieves the strain, and does little towards stopping the inflow of the "Why don't you ship," "state when," "wire a shipping date" style of correspondence. On top of this come the foreign orders from representatives in London, Germany, France, Denmark, Austria, Mexico, and about everywhere else, all apparently dependent upon immediate supplies. We take them all, and we hustle and await a season of orderless days, which may enable us to restock our shelves with regular goods, a season which is as illusive as the will-o-wisp.

One day's shipment in the last week in October was eighty-four tons. If the new National possessions should also get into line and guess they will take some graphite productions, they may have to guess again. We are not turning people away yet, but keep on inviting them to call again, and whether a "five grosser," or a "five carloader" the orders will receive our best attention.

New fall catalogues will be out before we may have the felicity of again writing you.

Americans Coming to the Front.

W. T. Stead, the eminent English editor, writes from St. Petersburg, Russia, to the Associated Press, as follows:

"Americans are coming well to the front in Russia, as they are discovering more and more what an immense and undeveloped field the lands of the Czar offer to Western enterprise. Russia is but at the beginning of a new epoch of industrial development. Before the next century closes she hopes to have achieved a progress as great as that which the United States has accomplished in the closing century. No one adequately realizes the immense agricultural resources of the immense prairie through which the Czar and Prince Khilkoff are running an iron highway eight thousand miles long. Americans are supplying many of the rails, American engineers are everywhere. One American is superintending the construction of new steel works near St, Petersburg. Bates' dredges are to deepen the Volga, the Dnieper, the Don and I know not how many Russian rivers besides. The representative of Messrs. Worthington is laying down 200 miles of eight-inch piping in the transcaspian region, through which the Rothschild oil combination will pump petroleum by means of four pumping stations, all of which will be supplied with the latest American pumps.

"The other day I met an American geologist and engineer, who, having quit the post of city engineer in a great American city, had been spending the summer examining the gold mines of Northern Siberia, and before the day was over I stumbled on another who had been reporting on copper mines in the Khirgis steppes. The testimony of these Americans was favorable to the labor value of the Siberian workman. The Russian is docile, quick to learn and does quite as good work as any but the skilled laborer in the States. As a craftsman he is a past master with his only tool, the axe, and my American friends seemed to think that he would be equally deft with other tools if he had had the training of the skilled artisan.

"There is manifest in certain quarters a suspicion that after a time the cordiality of Russian and American friendship may undergo some little change. The American element in the country is as a little yeast leavening the Russian mass with American ideas. Already Russian workmen here and there have been heard to observe that they had no use for a Czar, a phrase which seems almost pure American."

The History of a Famous Blacking.

Some years ago, in a small country village, a poor old soldier called at a hairdresser's and asked relief, stating that he had stayed beyond his leave of absence, and, unless he could get a lift on the coach, fatigue and severe punishment awaited him. The hairdresser listened to his story respectfully, and gave him a guinea. The veteran was profuse in his thanks. "How can I repay you?" he said. "I have nothing in the world but this"—pulling from his pocket a dirty piece of paper. "It is a recipe for making blacking, and you may be able to get something for it to repay you for your kindness to the poor old soldier." That dirty piece of paper was the recipe for the renowned Day and Martin's blacking; and that hairdresser was the late wealthy Mr. Day, whose manufactory is one of the ornaments of London, and whose place in Regent's Park rivalled in magnificence the mansions of the nobility.—*Ironmongery (England)*.

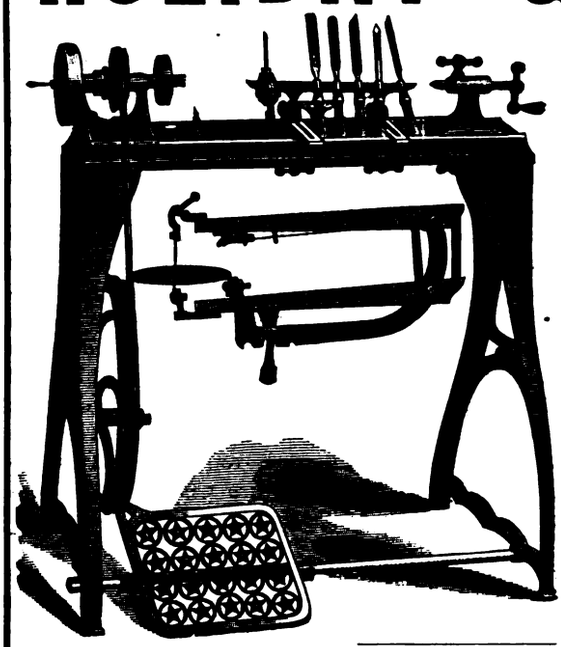
"Does this car go as far as one Minute Street?" asked a passenger on a Market Street trolley.

"Never heard of it," replied the conductor.

"Well, then, Sixty-second Street?" smiled the passenger.

And the conductor coughed and said: "That's hour terminus."—*Exchange.*

When American enterprise has a chance in the late Spanish colonies the change will be something like that which occurs when a section of the Colorado desert is brought under the influence of irrigation. The agricultural and the mineral resources of the West Indies and the Philippines have been little more than touched under a government that provides no roads, that heavily burdens industry and that makes the preservation of peace and order impossible. The American business man is already waiting in the waters of Cuba for the warrior to give him a chance to establish trade. The American financier is studying island maps as carefully as the soldier is, and is measuring the need of fiscal institutions and means of transportation. Commerce is already with its balm to heal the wounds of war. And the money that Americans will make will not be made out of the people emancipated from subjection to Spanish captains-general; it will be made by supplying those people with the things they need and assisting them to develop the resources of their own countries for centuries blighted by Spanish land pirates. The world will be astonished at the recuperation and expansion of industry in these islands east and west when the Spaniard is removed and the influences of the nineteenth century are permitted to operate.—*New York Journal of Commerce.*



The secret of success is never far to seek in a business career, because however many disguises it may wear at different times, it is always to be recognized as the old-fashioned hard work. Broadly speaking, the successful business man may be described as the man who always wanted success so much that he was willing to exert himself to the utmost for it, while the man who has failed to distinguish himself may be described as one who never wanted worldly success enough to practice self-denial in order to get it.—*Merchants' Review.*

In 1896, 185,914,000 cigars were exported from Cuba.

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

The Exportation of Wire Nails.

The rapid growth in exportation of American manufactures is illustrated by some figures which the Bureau of Statistics has recently compiled regarding the exports of wire nails. This compilation is the result of a recent publication in the *British Iron and Coal Trades Review*, which says that "it is clear that the United States threatens Europe with a serious competition in the nail trade, despite the fact that it is a highly finished product and involves the employment of a large amount of skilled labor." This compilation shows that the exportation of wire nails from the United States has grown from 1,547,078 pounds in the fiscal year 1888 to 22,894,099 pounds in the fiscal year 1898. The growth, which has been phenomenal ever since the beginning, has been especially so in the last two or three years. In 1895 the exportations were 4,367,267 pounds; in 1896, 8,031,927 pounds, thus practically doubling in one year, and in 1898, 22,894,099 pounds, showing a similar gain in the last two years, the exports of 1898 being more than five times those of 1895.

The universal demand for this product of American workmen is shown by the fact that our wire nails go to every grand division of the globe, and to practically every country. Germany, France, Belgium, Netherlands, the United Kingdom, Canada, Central America, the West Indies, all the South American States, China, Japan, Asiatic Russia, British Australasia, French Oceanica, British and Portuguese Africa, in fact, it is difficult to find a spot among the civilized and semi-civilized people of the globe where this recent product of American invention and American labor does not now find a place. To the Danish West Indies the exports last year were 4880 pounds; to Peru, 25,985 pounds; to Argentina, 268,942; to China, 9632 pounds; to British Africa, 49,299 pounds; to British Australasia, 1,118,459 pounds, and to Japan, 4,372,292 pounds, the exports to Japan being larger than to any other country, and forming in the fiscal year 1897 nearly one-half of the total exports of this article.

HARDWARE costs only One Dollar a year.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Mt. Vernon, N. Y.—Frazer & Dean Co.

Redwood, N. Y.—J. Soper.

Rugby, N. D.—H. W. Ellingson.

Changes and Improvements.

Akron, Iowa.—Hauck & Sargent, Hardware, succeeded by Robertson & Sargent.

Alliance, Ohio.—Oby & Love, Hardware, succeeded by A. B. Oby & Co.

Almonte, Ont.—The property formerly owned and occupied by the late D. C. Lochead, on Mill Street, is undergoing repairs prior to occupation by G. A. Muir & Co., Hardware merchants, who intend taking possession in a few days.

Ashby, Minn.—Henry K. Nelson, Hardware, reported to have sold out.

Brownsburg, Ind.—J. A. Morgan & Co., Hardware and furniture, succeeded by the Morgan-Tolle Co.

Cambridge, Mass.—Louis A. Stingel has bought the Hardware and bicycle business of the late Wm. T. Maguire.

Cascade, Wis.—Ruppenthal Bros., Hardware, succeeded by Adolph Ruppenthal.

Centreville, Mo.—Busteed, Price & Catlin have sold their stock of Hardware implements, carriages, etc., to Wright & McKenney, and have discontinued business.

Charlotte, Mich.—J. L. Colisi, Hardware, has sold his large establishment to Jerome Chapin and George W. Pue.

Chillicothe, Ill.—H. Thompson, Hardware, moved to Freeport.

Columbus, Ga.—J. Bush & Son, Hardware, succeeded by the Bush Hardware Co.

Connersville, Ind.—William J. Cain and Charles B. White, proprietors of the Cain & White Hardware store on West Fifth Street, have, by mutual consent, dissolved partnership.

Converse, Ind.—Bond, Powell & Sumpter, Hardware, succeeded by Bond & Powell.

Council Bluffs, Iowa.—Charles Swaine, Hardware, succeeded by Swaine & Mauer.

Delton, Mich.—Aldrich Bros. are building an addition to their Hardware store here. It will be twice the size of the store at the present time.

Fairfield, Iowa.—Willim J. Pattison, of Cedar Township, has purchased a half interest in the Hardware store of J. R. Speck and will be found hereafter at that place.

Galion, Ohio.—A. D. Helfrich has purchased the Hardware department of S. E. Riblet's Hardware, stove and tinware establishment, at No. 119 East Main Street, and will deal in a complete line of builders' Hardware, paints, oils, glass, etc.

Geneva, Ind.—Fred Pyle has sold his interest in the Pyle & Martin Hardware business to John W. Kelley. The same will be continued by the new firm at the old stand.

Greenwood, Ind.—G. B. Yount, agricultural implements, succeeded by T. W. Whitenack.

Hamilton, Ont.—The Bertram Hardware stock has been purchased by F. Hamilton, formerly of Wood, Vallance & Co. The new firm will reopen at the old stand, No. 65 King Street East.

Hastings, Minn.—E. O. Peterson has bought the interest of H. F. Emery in the Hastings Hardware Co., No. 203 Second Street, and will continue the business alone.

Ithaca, Neb.—F. F. Horne & Co., agricultural implements, succeeded by J. L. Acker.

Marion, Iowa.—George Cardell has removed his stock of Hardware from the rooms in the Daniels block, west of M. Voris' grocery store.

Maryville, Mo.—Sam Beattie has sold his interest in the Hardware business to his partner, Fred Curfman, who will continue at the same stand.

Medford, Wis.—Frank Brodowsky, Hardware, tinware, etc., succeeded by George Fritz.

Monroe, Neb.—Smith & Gates, Hardware and agricultural implements, succeeded by Gates & Cole.

Natick, Mass.—W. D. Parlin has purchased the Hardware business of French Bros. at South Framingham, and will add that to his many business enterprises.

Norristown, Pa.—The Hardware business of the late Wm. Koplin, has been sold to Geo. Sigler, who has taken possession.

Owosso, Mich.—Crowe & Payne, farming implement dealers, who were burned out a couple of months ago in the fire that destroyed the Woodard furniture factory, have begun the erection of a new building.

Plymouth, N. H.—George H. Corliss has sold his Hardware business to P. H. Crawford and Erl C. George.

Republic, Wash.—Fane & Fuller, Hardware, succeeded by C. F. Fane.

Rich Hill, Mo.—J. L. Minor, Hardware merchant, has disposed of his business in Rich Hill to the Gench brothers, prominent farmers of the country east of the river. The stock is now being invoiced.

Saginaw, Mich.—Valley Hardware Co., sold to Saginaw Hardware Co.

Seneca, N. Y.—Samuel G. Van Vleet, of Ovid, and H. H. Brooks, Elmira, have purchased the Hardware stock of the J. L. Swarthout Co. firm, at Ovid, and will hereafter conduct the business.

St. Cloud, Minn.—Mrs. A. Griebler, Hardware, succeeded by A. Henneman.

Streator, Ill.—T. L. Streeter has decided to move the Hattenhauer Hardware stock which he purchased some time ago to his store room at No. 404 East Main Street, and is busily engaged in making the change.

Tingley, Iowa.—Frank Landreth, Hardware and agricultural implements, succeeded by Job Nelson.

Uniopolis, Ohio.—Chas. Parlette, a former Hardwareman of this place, will commence business at Roundhead, successor to Bert Howe.

Viborg, S. D.—Lars Hanson, Hardware, succeeded by M. V. Olson.

Washington, D. C.—Josiah R. Bailey has purchased the entire Hardware stock in store at No 820 Seventh Street, N. W., formerly conducted by Bernard Bailey, and will immediately stock same with a complete line of mechanics' fine tools and builders' Hardware.

Wetmore, Kan.—Isaacson & Powers, Hardware, etc., succeeded by Powers & Liebig.

Whitmore Lake, Mich.—Stoutenburg & Wismer are building a large addition to their store, and will put in a large stock of Hardware.

Wilkesbarre, Pa.—C. Morgan's Sons, Hardware merchants, whose rapidly increasing business has rendered their present stand, No. 56 West Market Street, no longer adequate, will remove to No. 30 South Main Street about April 1. 1899. It is the intention of the firm to fit up the new place as a modern Hardware store. The new location is 100 feet in depth and this will be increased by an extension in the rear, giving an additional 100 feet. The store room will take up 150 feet, and the remainder of the first floor and the entire basement will be set apart for heavy Hardware.

Business Embarrassments.

Clarksville, Tenn.—J. F. Wood, Hardware merchant, has assigned to R. D. Moseley. His liabilities are about $19,000; assets about the same.

Marietta, Pa.—Limburger & Miller, Hardware merchants, have made an assignment for the benefit of creditors. The liabilities amount to $7000.

St. Louis, Mo.—Edward Pierce, who has been doing business as Edward Pierce & Co., has made an assignment to John S. Lehy.

Valley Mills, Tex.—J. W. Bullock, dealer in Hardware and implements, has made an assignment. Liabilities, $7000, assets, $8600.

Wolfe City, Tex.—N. Knight, Hardware, has made an assignment.

Willis, Kan.—Comer & Houston, Hardware, etc., succeeded by J. J. Comer.

Fires in Hardware Stores.

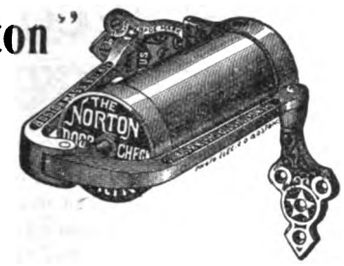
Brazil, Ind.—The Hardware stock of Tilley Brothers has been destroyed by fire. Loss, $5000; insurance, $4000.

Salem, N. Y.—Fred Toleman's Hardware store has been destroyed by fire.

Waterbury, Conn.—The Hardware establishment of the Barlow Bros. Co., at Nos. 63–65 Grand Street, has been badly damaged by fire. The actual loss is thought to be between $10,000 and $15,000.

Burglaries in Hardware Stores.

Buffalo, N. Y.—Frank X. Argus, razors.



Granville, Ohio.—Jones' Hardware store, $10.

Palmer, Mass.—E. A. Buck & Co., revolvers.

Toledo, Ohio.—W. F. Adams, cutlery.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements. etc , will be gladly received, and promptly published.

New Companies, Etc.

Asbury Park, N. J.—The W. M. Pawley Co. has been incorporated by Wm. M. Pawley, Elva F. Pawley and Annabelle Kent to manufacture housefurnishing goods, etc. Capital stock, $25,000.

Brockport, N. Y.—The Johnstone Harvester Co., with a capital of $500,000, has been licensed to do business in Illinois with a capital stock of $2500.

Brooklyn, N. Y.—The Sawyer-Boss Mfg. Co. has been incorporated by R. A. Stewart, G. T. Holihan, T. H. Boss and W. W. Sawyer to manufacture metal novelties. Capital stock, $5000.

Camden, N. J.—The Rancocas Foundry Sand Bo. has been incorporated by Wm. J. Stockton, Frederick J. Lambert, John A. Baumgardner, Clement G. Lippincott and Alexander Duer to deal in foundry supplies of all kinds.

Chicago, Ill.—The Chisel Nail Co., capital stock, $2500. Incorporators: Emory D. Frazer, Charles G. Mason and F. B. Johnstone.

Chicago, Ill.—The Chicago Mica Co., capital stock, $40,000. Incorporators, Wilton A. Snyder, Henry E. Miller and John A. McKeown.

Cleveland, Ohio.—The Modern Machine Co. has been incorporated by J. H. Dempsey, A. M. Snyder, C. E. Sanders, C. C. Owens and Chas. T. Brooks to manufacture and deal in machinery on $10,000 capital.

Detroit, Mich.—The Star Heater Co. has been incorporated by Brewer Margeson, Michael Keenan and Walter R. Robinson. Capital stock, $5000.

East Orange, N. J.—The Heckert, Baltzley Co. has been incorporated by John McIntyre, Edwin Baltzley and Wm. Heckert to manufacture steel, iron, etc. Capital stock, $10,000.

Fresno, Cal.—Hopkins' Agricultural Works has been incorporated by James K. Hopkins, Earl Hopkins, Frank T. Locon, Matthew F. Coon and Charles G. Bonner to carry on general blacksmithing, machine shops and the manufacture of farm implements. Capital stock, $50,000, all of which has been subscribed.

Goshen, Ind.—Standard Boiler Mfg. Co. has been incorporated with a capital stock of $35,000.

Jersey City, N. J.—The Liberty Lamp Co., principal office No. 1 Montgomery Street, to manufacture lamps, etc. Capital, $60,000. Incorporators: Elgin L. McBurney, Jersey City, N. J.; Eugene McOuat, Clemens Berghaus and Andreas Tomfohrde of Boston, Mass.; Reinold Berrenberg, Alvin E. Bliss and O. H. Carpenter, of Malden, Mass.; Charles O. Warner, Peabody, Mass.

Montclair, N. J.—The DeLuce Screen Co. has been incorporated by Edwin B. Goodell, John S. Carlson and Wm. Whitney Ames to manufacture window and door screens, sash, blinds, doors and house trimmings. Capital stock, $100,000.

San Francisco, Cal.—The McCall Sliding Hinge Window Co. has been incorporated by Wm. McCall, E. C. McCall, C. C. McCall, Michael O'Sullivan, Jones Weyl, to buy and sell useful inventions, etc. Capital stock, $100,000; amount subscribed, $80,000.

Toledo, Ohio. — The American Lamp Chimney Co., composed of Eastern and local capital amounting to $750,000, has been organized to start a lamp chimney factory. I. D. Libby is president of the new organization. The first factory will be built in Toledo, the ground to be broken immediately. Other factories will be put up as business progresses.

Toronto, Ont.—The Page Wire Fence Co. Ltd. has been incorporated with a capital stock of from $40 000 to $100.000.

Wheeling, W. Va. — The Co-operative Stove Co. has been incorporated with a capital stock of $50.000, to build and operate a foundry for the manufacture of stoves and heavy castings.

Changes and Improvements.

Anderson, Ind.—The Kelly Ax Co. have completed letting contracts for extensive additions to their plants. The additions will increase the number of workmen regularly employed fully 300, and make the total about 800.

Anderson, Ind.—With the transfer of the rolling mill of the Wright Shovel Co. from Greenfield to Alexandria, a transfer will also be made of the rolling and cutting departments of the factory here to Alexandria. A number of men employed in these departments will move to Alexandria when the rolling mill is ready to operate.

Cincinnati, Ohio.—A half interest in the Fosdick Machine Tool Co. has been purchased by Kyle Holloway, son of C. M. Holloway, and in future the concern will be operated by Mr. Fosdick and Mr. Holloway. Additional capital was needed with the growing business of the plant, and some improvements that have been contemplated will now be undertaken.

Cincinnati, Ohio.—The Cincinnati Shaper Co. have leased the plant at Webster and Sycamore Streets, formerly occupied by the George A. Gray Co., and will soon be at work turning out machine tools. The capital is $50,000.

Elwood, Ind.—The Akron Steel Forge Factory, built here in 1894 by a company headed by Colonel Conger and which was sold last spring to Messrs. Barber and Perkins, of Ohio, is being removed from Elwood to Titusville, Pa.

Harriman, Tenn.—The Harriman Tack Factory has changed management again. V. G. Farnham once more assumes the management.

Holyoke, Mass. — The factories of the Seymour Cutlery Co., of this place, have been formally taken over by the National Shear Co., which has a capital of $3.000.000.

Portland, Me.—The H. S. Crombie Rivet Co has been organized for the purpose of manufacturing and dealing in all kinds of machinery, tools and implements, with $500,000 capital stock, of which nothing is paid in. The officers are: President, Frank M. Davis, of Cambridge, Mass.; treasurer, John J. Dixon, of Woburn, Mass.

Santa Cruz, Cal.—The plant built to replace the one destroyed at the powder works a few weeks ago has begun operations. It is larger than the old one, and the daily output is now 8000 pounds. Enough orders for smokeless powder have been received to keep the mills running day and night for two years.

Recent Embarrassments.

Quincy, Ill.—The J. T. Blaney Implement Co. have made an assignment to John Rump for the benefit of their creditors. The cause of the financial embarrassment is said to be slow collections. The liabilities are listed at $11,000 and the assets are placed at $10,000.

Recent Fires.

Columbus, Ohio.—The Buckeye Saw Factory, owned by Charles and John Ohlen, and located at No. 285 North Water Street, has been badly damaged by fire. The loss is estimated in round numbers to amount to $5000.

Dallas, Tex.—Fire in Aultman, Taylor & Co.'s farm implement warehouse, Austin Street and Pacific Avenue, did damage to building and stock estimated at $10,000.

Paris, Tex.—The Paris Handle Factory, located twenty-five miles from the city of Sulphur, has been destroyed by fire. Loss on stock about $5000.

Spokane, Wash. — The National Iron Works, damaged by fire at a loss of $30,000; partly insured.

Waterbury, Conn.—The large Hardware and plumbing establishment of Barlow Bros. & Co. has been almost totally destroyed by fire. Loss, $10,000; fully covered by insurance.

Miscellaneous.

Lorain, Ohio.—An adjourned meeting of the stockholders of the National Vapor Stove Co. has been held at their office in this city to discuss plans for the ensuing year. The meeting was an adjournment from the regular annual meeting which occurs in September. The stockholders present were: C. E. Adams, E. C. Pope, G. O. Campbell, Jno. Wennick, W. H. Polhamus, A. Gerdum and Jas. Schendler, of Cleveland; Jas. B. Hoge and O. P. Moon, of this city.

Tacoma, Wash. — The Great Western Stove Co. have shipped a large consignment of stoves to Alaska on the last steamer.

Columbian 1000-Shot Air Rifle.

CHAMPION MODEL.

Patented Oct. 24, 1893.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. **List, per doz., Enameled, $30.00; Full Nickel, $42.00.**

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Anderson, Ind.—The Erie Cycle Motor Co. has been incorporated, with a capital stock of $25,000.

Eveleth, Minn.—E. M. Osborn, Hardware, sporting goods, etc., has opened new store.

Newark, N. J.—Articles of incorporation have been filed by the Taylor Tire & Development Co., by the county clerk. It will manufacture rubber tires for bicycles and other vehicles on a capital stock of $125,000, of which $1000 is paid up. Benjamin F. Taylor and Samuel G. Meeker, of Bridgeport, and John B. Ross, of Rahway, are the incorporators. The principal office will be in Newark.

Newark, N. J.—The American Registry & Security Co., mechanical, mercantile and trading business, unicycles, bicycles, tricycles, etc., has been incorporated by Anthony T. Brennan, Harry H. Leeds and Edward H. Wright, Jr. Capital stock, $100,000.

Orlando, Fla.—F. N. Boardman, bicycles and musical merchandise, has opened up in the Empire Block.

Rouse's Point, N. Y.—E. Elmer Bullis, Hardware, sporting goods, etc., has recently commenced business at this place.

Changes and Removals.

Akron, Ohio.—The Akron Woolen & Felt Co.'s plant has been sold to the Goodyear Tire & Rubber Co. It is expected to begin active operations within thirty days. Employment will be given to 150 men.

Chicago, Ill.—The Sterling Cycle Works, bicycle manufacturers, will remove their general offices from Chicago to their factory at Kenosha, Wis.

Chicopee, Mass.—The Spaulding & Pepper plant, which was sold recently to Reimers & Myer, of New York, has passed into the hands of Noyes W. Fisk, treasurer of the Fisk Soap Mfg. Co., of Springfield. The new company will make all kinds of tires, pneumatic cycle tires and tires for wagons. It is understood that the plant will be put in working order at once and that nearly 100 men will be employed.

Flint, Mich.—The White Hickory Wheel Co. has leased the plant of the Jackson Wheel Co. for three years. The business of the two concerns will be consolidated and conducted on a large scale.

Hartford, Conn.—The Lozier Mfg. Co. are moving some of the machinery from their Thompsonville factory to their Westfield, Mass., plant, where they eventually expect to consolidate their entire bicycle works.

Hartford, Conn.—Leitz & Grant, bicycles, dissolved; succeeded by J. H. Grant, Jr. & Co.

Jacksonville, Fla.—Cunningham & Shad, bicycles, etc., reported to have dissolved partnership.

Lorimor, Iowa.—Orr Bros., Hardware, sporting goods, etc., succeeded by Orr Bros. & Bailey.

Middletown, Conn.—The Keating Wheel Co. has been reorganized, with O. Vincent Coffin, president; B. M. Keating, vice-president; Max H. Crampton, treasurer and assistant clerk. B. M. Keating has been elected general manager. The company has many orders, and the officers expect that the plant will soon be running to its full capacity.

Portland, Ore.—Daly & Higley, bicycles, reported to have dissolved partnership.

Wellsboro, Pa.—F. X. Wright, Hardware, sporting goods, etc., has sold out to C. A. Roberts & Co., who will continue the business at the old stand.

Whitinsville, Mass.—J. A. Milligan, bicycle dealer, is moving his stock into the Mumford Block, on Church Street.

Recent Fires.

Indianapolis, Ind.—The Indiana Chain Co., manufacturers of bicycle chains, damaged by fire to the extent of $4500; fully insured.

Greene, Iowa. — W. Lockwood's racket store has been damaged by fire. Loss, $4500; insurance, $1500.

Philadelphia, Pa.—The Philadelphia Bicycle Co., northeast corner of Fifteenth and Alder Streets, damaged by fire at a loss of $5000.

Washington, D. C.—The bicycle establishment of Hazleton & Love has been damaged by fire.

Metal in Sky Scrapers.

Few of those who occupy high buildings ever realize the enormous amount of metal required in their construction. They notice and admire the high facade, the handsome stone pillars, the noble masonry and beautiful interior ornamentation, but they see nothing of the great steel skeleton which forms the framework of the whole structure and of which the visible wall and interior finish are but the clothing and decoration. In the new Astor Hotel, adjoining the Waldorf, in New York, the structural iron work will aggregate 10,000 tons, or one-sixth of the weight of the completed building. In the thirty-story Park Row building, in the same city, the ironwork will amount to 9000 tons, or nearly one-seventh of the total weight of the completed building, while its cost, $500,000, will be about one-fifth of that of the finished structure. The cost of the steel construction is exclusive of the elevators, stairs and all ornamentation, while the cost of the building, $2,500,000, is exclusive of the site. In a large warehouse several stories high, recently erected on Broadway, in the same city, the cost of the structural work amounts to one-fourth of that of the completed building. This difference in cost is due to the difference in the character of the clothing of the skeleton. In the Astor Hotel, a maximum of elegance, profusion and cost will probably be reached, while in the warehouse, with plain brick and fireproof clothing and little artistic embellishment, the proportion of cost will be near a minimum. The office building forms a mean between these extremes, having a handsome and expensive finish, but much less costly decoration than will be found in the magnificent hotel. In ordinary types of buildings it has often been the practice to estimate a cost per cubic foot of the entire structure for different kinds of structures. While this method has probably little application to such special construction as is mentioned in this note, it may be of interest to learn that the cost of office buildings of this type is from twenty cents to twenty-five cents per cubic feet.—*Engineering News.*

Story About Jay Gould.

A farmer had a herd of cattle, and Jay Gould went to look at it. In the midst of the bantering, a woman appeared, who had a little talk with the farmer. Gould caught a word now and then: "Now don't, husband, I beg of you not to; if you have any regard for me, don't. I shall die if you do." "What's the matter with that woman?" said Gould. "Oh, nothing—my wife has a favorite cow; she is called 'Old Pailful,' and the woman is afraid I'm going to sell her." The woman hung round, and, of course, Gould demanded that "Old Pailful" should be brought out. She was a picture, and the young trader said that the cow must go with the lot if he made the purchase. The cows were driven home, and the father sent Jay out to see what kind of a milker "Old Pailful" was. He had scarcely seated himself, before the cow threw him, pail and stool, sky-high; she tore around the pasture, leaped the fence, and started for home. Ever after, Gould never bought anything that a woman wanted to keep.—*Stamford (N. Y.) Mirror.*

The

Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

AN experienced commission traveling salesman now successfully handling several A1 lines, would like to add two or three others, providing terms, and goods are all right. Field: Michigan, Indiana and Ohio. Address "BEST TRADE," care HARDWARE, No. 143 Chambers Street, New York.

Side Line Offered.

STAPLE side line offered to traveling salesman with a good wholesale Southern or Western trade. Address R., No. 113 Miller Street, Newark, N. J.

SALESMAN wanted to sell as side line to Hardware, plumbers and gas fitters Incandescent Gas Mantels; our prices are the lowest, and goods of highest candle power and durability. Big inducements for hustlers. Address W. G. TUCKER CO., No. 555 East 116th Street, New York City.

WANTED—A few good salesmen to carry staple article as side line. Sells to Hardware trade. Liberal commission. Address ULRICH MFG. CO., Rock Falls, Ill.

For Sale.

FOR SALE—A clean, up to-date stock of Hardware, well assorted; good location; cheap rent; in an Indiana gas town of 25,000 inhabitants; plenty of factories and hustle. Will invoice about $5000. No better town in United States. Address H., care HARDWARE, No. 143 Chambers Street, New York.

A COMPLETE stock of Hardware, saddlery, stoves and tinware. Business well established in a live town and prosperous country. Address A. B. C., care HARDWARE, No. 143 Chambers Street, New York.

Agency Wanted.

MANUFACTURERS of a good staple article or popular specialty, whose prices can meet competition, and who will entertain the subject of representation in New York and vicinity, may find it advantageous to correspond with subscriber, whose firm will prove suitable in experience and repute, and would make arrangement mutually profitable. EDWARD CHARLES, care HARDWARE, No. 143 Chambers Street, New York City.

LIVE man (29) desires to represent manufacturers of small lines and specialties, suitable for the Hardware and house-furnishing trades. New York and vicinity. For particulars, address WM. SMITH, No. 718 Chauncey Street, Brooklyn, N. Y.

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. CO., Cleveland, O., 823 Society for Savings.

WESTERN AGENCY WANTED, Hardware, steel, or kindred products, by young man of executive ability and wide experience Bond, if required. Manager for one concern for nine years. Refer to Chicago office of this journal Address V. L., care HARDWARE, No. 1142 Monadnock Block, Chicago.

Russian Agency.

RUSSIA.—The undersigned, who is a resident of Warsaw, Russia, this month in New York, desires to correspond with manufacturers with a view to introduce in Russian market. Address A. BARUCH, care of HARDWARE, No. 143 Chambers Street, New York.

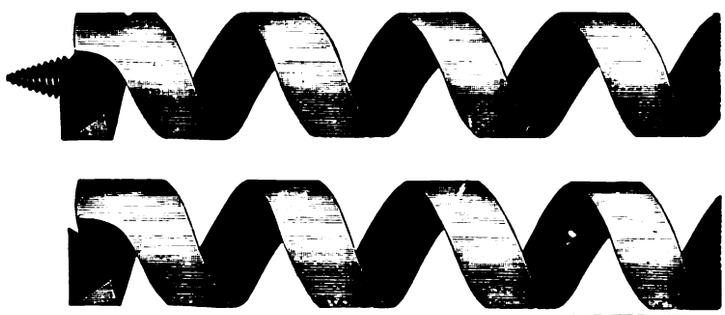
The CENTENNIAL

WATER CUT OFF

FOR CISTERNS.



There are others, but none like or equal to the **Centennial.** It is the only Cut Off in the market to-day that can be used in any position without extra pipe or elbows. Try them and you will use no other.

For sale by all the leading jobbers.

Manufactured only by

COONEY, SEINER & CO.,
17, 19 and 21 E. South St., INDIANAPOLIS, IND.

SNELL MANUFACTURING COMPANY, FISKDALE, MASS.

Ship Augers and Ship Auger Bits....

These goods are made by skilled mechanics on new and improved machinery from especially selected cast steel made for the purpose. . . .

The large increase in their sales testify to their quality that they are superior to any other make.

They are finished so they can be used to bore with the grain as readily as across the grain, through the knottiest timber without swerving. . . .

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

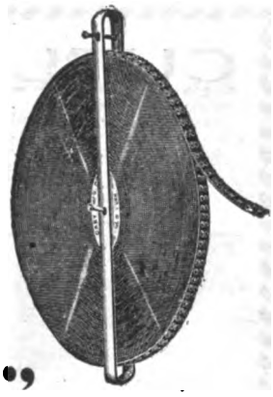
"TOO VALUABLE TO BE WITHOUT."

Charles T. Mitchell, Baltimore, Md.: HARDWARE is too valuable to be without.

"GREAT VALUE AS AN ADVERTISING MEDIUM."

Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google



NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

In favor of the

Cary Manufacturing Co.,

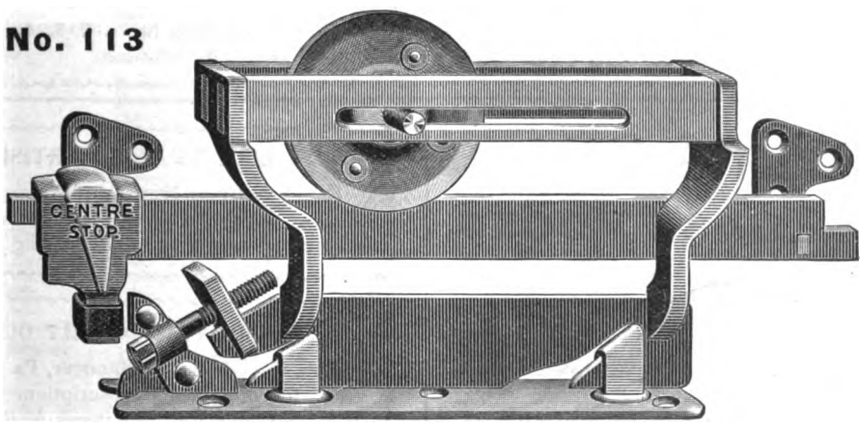
sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.

This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,



CARY MANUFACTURING CO.

S. C. Cary Pres't.

DOOR HANGERS

Manufactured by **WILCOX MFG. CO.**

No. 113

With all the improvements. We lead, the others follow.

SELLING AGENTS,

CUTLERY. CUTLERY.

Our special aim has been for years to make a little better goods, (stronger and more durable), than any one else for the same money. And we are well satisfied with the results. . . . . Before placing your fall order for butcher knives, carvers and table knives, send for our catalogue and prices. There are no goods on the market better in quality, finish or reputation, and our prices are right.

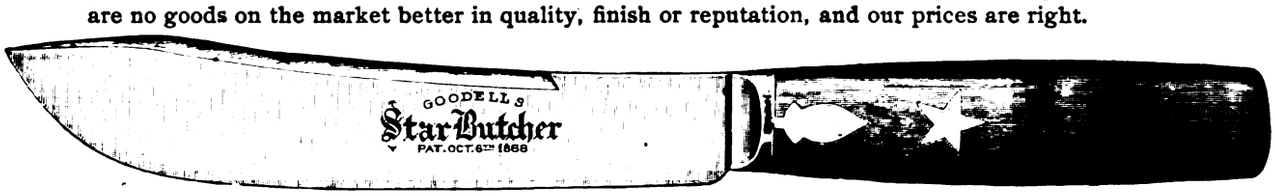

Table Knives and Forks, Carvers, Table and Butcher Steels, Butcher Knives, Boning Knives, Skinning Knives, Sticking Knives, Hunting Knives, Cheese Knives, Butter Spades, Bread Knives, Slicers, Scraping Knives, Cigar Knives, Kitchen Knives, Shoe Knives, Can Openers, &c. . . . . .

NEW YORK OFFICE, 10 WARREN STREET.

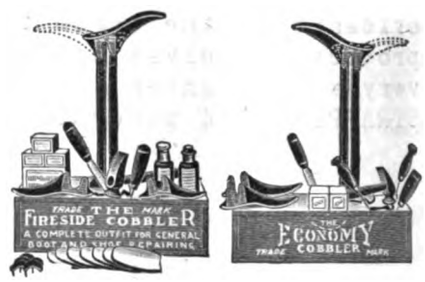
GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.



We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

NEW YORK OFFICE:
90 Chambers St.

LIGHT HEAD B

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HIT THE PIPE

as hard as you like with chisel or mallet and observe that the surface finished with simply one coat of our

ELASTIC IRON ENAMEL

is scarcely marred. It also withstands a high degree of heat; in truth it is as nearly indestructible as it is possible to make a varnish. For smoke-stacks, fire-place casings and stove-pipes

ELASTIC IRON ENAMEL has no equal.

The accompanying cut represents a miniature stove-pipe finished with one coat of

ELASTIC IRON ENAMEL.

We send these display pipes with dealers orders for this specialty. Pints, half pints and quarts are its most salable packages.

"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE
A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

HARDWARE

VOL. XVIII. NOVEMBER 25, 1898 NO. 4.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The annual convention of the National Hardware Association held in Milwaukee, Wis., last week, was of more than the usual importance to the trade, and shows an annually increasing interest taken in its proceedings. We have devoted considerable of our space in this issue to a report of the work and proceedings.

The convention was of a very representative character, delegates from jobbing centres as far remote as Maine and California indicating the interest taken in the objects and efforts of the Association by being present and contributing their quota to make it an unqualified success.

These annual gatherings are having an important bearing upon the future of the jobbing trade; opportunities are given by an interchange of ideas as to methods and embarrassments, of how more closely than ever they bring the trade together in friendly conclave, smoothing over imaginary antagonisms, manifesting a desire to work in harmony with aggressive competitors and stimulating an underlying fairness in competition that has a beneficial trend toward profitable conditions in all future business transactions.

The advancing quotations announced on wood screws, which for so long a time have been in an unhealthy and unsettled condition, are welcomed by the trade generally as being a commendable movement. The various manufacturers are showing a desire to work together in peace and harmony, hoping for "a season of revised prices" that will be stable and uniform and possibly make the future of this large industry a steady and fairly profitable one.

The business reported throughout the country is of a most encouraging character. The jobbers while not doing in some sections—notably the East—a phenomenal business, are still satisfied that the grand total will be favorably regarded when compared with 1897; while in the West a more aggressive demand is felt in several lines, which keep the jobber feeling as though the season will be a satisfactory one, notwithstanding the mixed conditions of the prevailing demand. A greater and more encouraging movement in trade is possible in the Southern territory since the quarantines have been raised, so that business is resuming its wonted channels.

Collections are reported as being favorable, and this very promising and encouraging outlook for the future will find the dealers prepared to buy more liberally and stock up more fully for the spring trade than has been their wont for several seasons past.

Indications point to a greatly increased business in builders' Hardware; the enquiry is a noticeable one, and while stocks are by no means in satisfactory shape to meet a sustained demand, the manufacturers are making preparations for the increased business apparently in sight.

Industrial Sunshine.

The improvement in business anticipated to follow the results of the election, is becoming more and more evident in many lines that for weeks previous had been sluggish and halting in movement. The clearing house payments reported for last week were the largest ever recorded, exceeding by nearly one-third even those for 1892, the year of prosperity so frequently referred to, the daily average for the month, $254,422,000, showing an increase of nearly nineteen per cent. compared with 1892.

Under a steadily increasing production the demand for iron is something to be proud of, orders for some of the products being beyond all precedent, with every indication of establishing the belief that during the coming year all records showing productive energy will be broken, the prosperity attending which may be indicated by advancing prices, for which the market for steel rails will set the pace, under an unprecedented demand, with other important lines of production, showing the sustaining influences thus made possible.

Export conditions are also of the most favorable character, continually progressing in a manner extremely encouraging. Many manufacturing interests are contemplating having direct representation abroad during 1899, the result of which, whether of a profitable turn or not, will provide an outlet for the disposal of any excess of production which our present sanguine views might create.

Our exports for October show up more largely than in the same month in any previous year of record, the increase being largely composed of the finished products of our industrial development, which is strengthened by specially good reports from our iron and steel industries seeking for foreign recognition, and engaged in shaking up thoroughly many of the profitable markets formerly dominated by the products of the old world.

Political and Commercial Colonization.

One of the most potent, if not absolutely the strongest reason for the wonderful success of Great Britain's policy of colonization is that no sooner is a new dependency acquired than the British merchant proceeds to

Digitized by Google

make its market absolutely his own. There is a popular, but mistaken, impression amongst other nations that Great Britain levies taxes on her colonies for the benefit of the home government. Long ago she learned the futility of such policy, the most salient lesson she received being the revolt and subsequent loss of this very country. She not only does not levy such taxes, but cannot even force her colonies to supply men in case of war; while on the other hand she is bound to protect them against the hostile intentions of other nations. It is true that these colonies supply a few fairly paid positions for her budding statesmen, but the number is small, and the benefit, except as a training school, of no importance.

Now that the United States has been forced into the expansion business to some extent, it may be possible for us to learn a lesson from one who is older and more experienced. The most lately added territory of the latter is the Soudan, and a London contemporary, *The Hardwareman*, says, among other things:

"If the British exporter will just attack the Soudan country in a sober yet enterprising spirit, and the British public shun the wiles of the giddy company promoter, the move Soudanward should be attended with lasting success."

In the opinion of Sir Herbert Kitchener, the general commanding, the first and most important step is direct and efficient transportation; and with that end in view a railway is already in course of construction.

The editorial caution regarding the "giddy company promoter" is, without doubt deep and heartfelt just now, when the ghosts of the many defunct Hooley companies are rearing their ungainly heads throughout the land, and refuse to be laid; when the court investigations have revealed the fact that those in high places are willing and anxious to sell their names and their honor provided the *quid pro quo* be large enough. That these names are used on the directors' list to inspire confidence and ensnare the credulous, is no deterrent. This peculiar evil is not likely to become a disease in this country, simply because the influential and confidence-inspiring American is also possessed of keen business i stinct, and knows that the moment he lends his name to a questionable enterprise his influence is gone.

Another point worthy of note is that the military heads of the British army recognize that they are simply a means to an end, and do all in their power to foster and encourage the proper conditions for their commercial brothers to follow and complete the conquest.

All hysterical attempts at forcing business are to be deplored, and should be carefully expunged from the business policy of this country in nurturing our new markets. Sober, intelligent, persistent effort will result in far more lasting benefit. Direct and efficient transportation and capable representation are of first moment; and without doubt will be forthcoming as soon as the Peace Commission has concluded its labors.

The series of articles now running through *Hardware* under the caption of "The Salesmen's Department," are written by a practical Hardwareman, who has spent years of study and experience in the department concerning which he writes. There is no Hardwareman who can read them without profit. While this discussion is being conducted especially for the benefit of the Hardware jobber and manufacturer, many of the points made by the writer can be applied with equal success in the retail trade. By the change of a word here and there, they will also prove of equal interest to those engaged in the grocery, dry goods or other trades. These articles are written with a view to adapting the department to the needs of the average jobber, and the scope of this department includes some duties that will not be necessary where a larger number of salesmen are employed. These articles, as we have said above, are not written by a theorist, but by a gentleman who has been connected with the trade, and has made a study of the Hardware business for nineteen years, and the methods which he advocates have been tested and proved successful.

The Perfection Pump.

The St. Joseph Pump & Mfg. Co., St. Joseph, Mo., have reason to feel proud because of the gold medal awarded them at the great Trans-Mississippi and International Exposition, in recognition of the merits of their celebrated Perfection Water, Elevator and Purifying Pumps. A newspaper of St. Joseph says that the awarding of this medal is nothing unusual for this company, "as it is getting to be a yearly event with them, the securing of gold medals. It is nevertheless a fact well worthy the consideration and attention of the public, especially St. Joseph people, as such recognition as this not only speaks well for the firm itself, but the city in which it is located. The St. Joseph Pump & Mfg. Co. is strictly a home concern, catering at all times to the interests of St. Joseph, but has, however, a world-wide reputation, and on account of the vast amount of advertising both domestic and foreign, St. Joseph and the 'Perfection' is known from one end of the universe to the other, Spain, with all her indignation and recent hostilities, is not excepted, as a shipment of these world-renowned goods was made Saturday to Balbaia, Spain, and orders are now on file for shipments to Cape Colony, South Africa, and Copenhagen, Denmark."

Gold Medal for Files.

The Nicholson File Co., of Providence, R. I. were awarded the gold medal, for their exhibit of files and rasps at the Omaha Exposition. The judgment of the examiners was unanimous, and was based upon the general excellence of the quality and appearance of the files and rasps of this company.

The Nicholson File Co. have always been a successful exhibitor at the prominent expositions, and have in their office a very interesting collection of medals and awards secured by the superior quality of their goods. The awards mention besides the general excellence of the files, the particular merits of hard temper, sharpness and strength of teeth, and superior uniformity of quality. Different countries are represented in the awards, the Nicholson Co.'s files being sold all over the world, and having been exhibited in several of the most prominent foreign expositions. They seldom, however, advertise the fact of their having received so many awards; as they tersely put it, "It is not the medals, but the orders, which we accept as being the best gauges of the merits of our product."

The use of the diamond circular saw for cutting stone is facilitating the erection of the Paris Exposition buildings. The diamonds which form the cutting teeth of the saw are worth about $3 a karat, and are fixed in a steel disc over six feet in diameter.

The Salesmen's Department, II.

Editor Hardware: It is no secret among the trade that the jobber and manufacturer are confronted year after year with the cold fact that the cost of marketing their goods is gradually increasing, notwithstanding the strenuous efforts put forth to curtail expenses. Not only are they compelled to face this, but they see their percentage of profit diminishing because of the ignorance of their competitors, and of their own representatives, as to the cost of doing business. It is amazing the apparent ease with which some traveling representatives give away another two and a half per cent., or twenty-five cents a dozen, under the pressure brought to bear by some wily buyer.

Each succeeding year the majority of the buyers feel compelled to make a closer study of their art, and consequently devote less time to other duties formerly considered within their province. What else could be expected in view of the fact that as their buyer's purchases increase, these so-called slight concessions which he squeezes from the seller make up the bone and sinew of the dividend to which the stockholders are eagerly looking forward?

How many times has a salesman become disgusted with himself, when he found the very confidential two and a half per cent. made to influence business his way, had leaked out and been met by his competitor. Instead of advancing his own interests, he has simply decreased the profits of all dealers in the goods.

Many representatives of both the manufacturer and the jobber say they have grown tired of securing from their employers an extra five per cent., in order to help increase their customers' margins. There was always some fool who was willing to pass the concession along to his customers, thus necessitating, if the article be staple, a general decline in price.

Granting the truth of the adage "Goods well bought are half sold," haw about the other half? Since the variety in all lines has become so great, many articles of merit are either sacrificed or do not attain the sale they should, because their selling points are not properly placed before the salesmen.

One reason the manufacturer has felt he must ignore the jobber was because many of the jobbers' salesmen seemed to sell the items their customers called for instead of introducing and encouraging the sale of the more improved articles which in many localities were displacing the goods which their grandfathers thought good enough.

Many concessions, especially on goods sold at a net price, are made on the strength of evidence which appears to be trustworthy, but is in reality not at all reliable, as mistakes occur in billing goods far oftener than is imagined. Manufacturer and jobber admit the majority of errors of which they are advised are overcharged; while mistakes in their favor aggregating in the thousands in the course of the year, to which their attention would not have been called, have been detected when systematically checked.

Out of these difficulties has arisen the Salesmen's Department, and here is its field of action. A detailed supervision of everything connected with the selling of goods has become an absolute necessity. The expense connected with it is slight in comparison to the amount which is made and saved to the jobber by the same careful study of the selling of the goods which the buyer makes in purchasing them.

Yours truly,

St. Joseph, Mo. CHARLES W. EMERY.

Two Artistic Publications.

We have received from R. C. Masten, writer and designer of advertisements, No. 602 Hickox Building, Cleveland, Ohio, two specimens of artistic work, which show that Mr. Masten is a past master in the art of producing first-class advertising literature. One of these is headed, "A New Specialist in Town," and the other "Short Sermons on Stone." The first named is a booklet containing several original designs printed in blue and gold, and sets forth the claims of the "new specialist," who is filling Cleveland and that section of the West with specimens of his art. The second is a remarkable publication printed in several colors and illustrated with those famous cuts which in the past year have assisted in making the Cleveland Stone Co. better known in all parts of the country than ever before. These specimens of the art as it is now practiced by advertising writers, artists and modern printers, are unique and attractive in the highest degree.

The Dixon Co.'s Addition.

During the past summer the Joseph Dixon Crucible Co., Jersey City, N. J., have added an extension to their pencil factory, 40 by 90 feet, three stories high. The same is driven by electric power from a generator placed in the main factory. No expense has been spared in the equipment of this addition in the way of up-to-date elevators, furnaces, dry-rooms, etc The company will also put down an artesian well, several hundred feet in depth, for a supply of water for factory use, and some time during 1899 various other additions will be built to the Dixon Co.'s very extensive plant.

The Dixon Co. was established in 1827, but during all of its more than three score years and ten of busy life, no year has in any way equaled 1898 for volume of business; its plant has been running continuously, yet the company is behind its orders in all departments. As the Dixon Co.'s products go into every known field of industry: the iron workers, the brass workers, the printing trades, the stationers, the cycle manufacturers, the hat manufacturers, the paper mills, etc., the rise or fall of the volume of business done by the Dixon Co. may be taken as a very excellent standard or pointer on the condition of business generally.

Brass Goods Mfg. Co'.s New Line.

The Brass Goods Mfg. Co., Nos. 82 and 84 Third Street, Brooklyn, and No. 110 Chambers Street, New York, report having experienced the most successful season for several years, and are confident of its prosperous continuance. They have recently largely increased their line of Cabinet Hardware by the addition of an extremely handsome and ornamental assortment of furniture drop handles, drawer pulls, knobs, etc., making a very attractive display, and one fully up-to-date. It is their intention to publish a catalogue covering these special goods, which will be issued and sent to the trade about January 1, 1899.

W. F. Brainerd, the traveling representative of the company, intends calling upon the trade in the Eastern and Western States shortly, with samples of their complete line of goods which embraces a number of new and special articles in brass and bronze metal, other than those referred to above.

T. W. Williams, second vice president of the Bissell Carpet Sweeper Co. was elected vice president of the Bassick Gold Mine Co., which was organized under date of Oct. 25th under the laws of the State of New Jersey, with a capital of $1,000,000. One quarter interest in this mine is owned by the family of Mrs. C. B. Judd, whose husband is manager of the Bissell Carpet Sweeper Co. Mr. Judd is one of the directors of the new mine company.

The Van Wagoner & Williams Hardware Co., Cleveland, Ohio, and New York, have issued a leaflet to be placed opposite page 21 of their 1897 catalogue. This illustrates their Oxford spring hinges, giving illustrations of the same with sizes, prices, directions, etc.

Files: How to Get Best Results From Their Use.

The Arcade File Works, Anderson, Ind., and No. 97 Chambers Street, New York, whose advertisement appears on page 51, have in course of preparation a series of articles on the use of files in shop practice, written by the well-known expert and authority on such matters, W. H. Vandervoort. From the opening article of the series we take pleasure in extracting the following:

"In the operations of filing, satisfactory results depend fully as much on the intelligent, skillful use of the file as on the tool itself. The skilled mechanic appreciates a good file, not because it will stand rough usage better, but because with proper use he can produce more and better work than with one of inferior quality. Give him a file correct in form, shape of teeth, quality of steel and temper, and he will produce surprising results before this file reaches that point of wear beyond which economy of time will not allow him to go.

"The kind of metal, the form of the work surface and the finish to be produced must determine in each case the correct files to use. Of these the material and its hardness are the factors that most affect the life of the file. The nearer the hardness of the work approaches that of the file teeth, the slower will the file cut and the more rapid will be the wear on the teeth.

"The greater the number of teeth in contact with the work surface, the more will be the pressure required to make the file bite. In filing broad surfaces the number of teeth that may be brought into contact with the work at any time will depend on the curvature or belly of the file. The greater the curvature the smaller the contact surface and the freer will the file take hold of the work. Ordinarily not more than one inch of the file's length will at any one position touch the surface of the work. When the surface is narrower than the length of contact fewer teeth come into work, and for the same pressure the teeth will bite keener. If, now, for the thin or narrow work a file is used, the teeth of which have lost, through wear, their keenness, it will cut the narrow surface as readily as the new one will the broader. We should therefore use the new files on the broad surfaces first, as they can be used on the narrow work when too dull to readily bite on the broad.

"The file does not bite the cast metals as readily as it does the rolled, consequently a sharper file is required for cast iron and brass than for wrought iron and steel. For these reasons the new file should be first used on the cast iron and brass, and when they become too dull to work these metals efficiently, they may be used on the steel and wrought work. A new file will pin and tear the surface of these latter metals much worse than the file that has seen a moderate amount of duty on cast iron and brass. A new file will leave a smoother surface after it has been used for a few strokes, these strokes causing the high teeth to give down a little, which prevents the danger of their scratching the work.

"The first dozen strokes of a new file on a rough piece of steel frequently lessens its cutting value as much as an hour's steady use on soft cast iron, yet not seriously injuring it for the steel work. Narrow surfaces are exceedingly hard on new files, and especially so on the double cuts, as but few teeth come in contact with the work, and they bite so freely that they are broken off by the excessive strain.

"Not until the file becomes too dull to be used efficiently on the narrow steel work should it be used on the scale of cast iron or forgings, as this scale is frequently harder than the file."

It is the intention of the Arcade File Works, upon the completion of the series, to publish them in book form under the name of "Practical Talks on Files," to be mailed free to any user of files who will forward his name and address.

Fifth Annual Sportsmen's Show.

The fifth annual Sportsmen's Show, under the auspices and management of the National Sportsmen's Association, will be held in Madison Square Garden, New York City, from March 2nd to 11th, 1899, inclusive. It is the intention on this occasion, as heretofore, to give a genuine sportsmen's show, combining new features and demonstrations of life in the woods. There are many other features under consideration that will make this show probably the best one that has ever been held in this country; it certainly embodies features that have never been attempted at any other show, and will be the only Sportsmen's Show in this country in 1899. The officers of the Association at present are as follows:

Directors:

Charles Tatham, president.
J. Von Lengerke, vice-president ex. com.
Charles Daly.
Charles H. Luscomb, ex. com.
P. G. Sanford.
Frank W. Sanger.
J. A. H. Dressel, secretary-treasurer, ex. com.

Board of managers: Dr. Heber Bishop, Geo. O. Shields, James C. Young, Elmer E. Shaner, J. A. H. Dressel, Frank W. Sanger, Samuel Armstrong Nelson, Harry Cornish, J. E. Sullivan, and others to be announced later.

1899 Columbia Calendar.

The fourteenth annual edition of the Columbia Desk-pad Calendar, issued by the Pope Mfg. Co., of Hartford, Conn., is being distributed. This calendar occupies an unique place among advertising devices. It may be said to be largely the product of the Pope Company's own customers, whose contributions in the shape of fitting testimonials to the merits of Columbia product, or clever bits of verse about bicycling in general appear at the tops of the various pages over the names of the contributors. The pages for Sundays, the first day of each month, and holidays, present appropriate selections from well-known authors.

Any person may obtain a copy by applying to the nearest Columbia dealer, or by sending five 2-cent stamps to the Calendar Department, Pope Mfg. Co., Hartford, Conn.

The Burr Manufacturing Co.

J. T. Burr, president and general manager of the Burr Manufacturing Co., Cleveland, Ohio, spent last week in New York. Mr. Burr reports a most satisfactory increase in the demand for the Burr Steel Safety Lift. This is particularly noticeable in the foreign demand; the new mechanical principle of the appliance attracting much attention in the foreign market.

The favor in which this block is held is demonstrated by the fact that the railroads are adopting it in their work shops. Among many letters of commendation received, is one from E. B. Hunt, of the Pittsburg, Cincinnati, Chicago and St. Louis Railroad Co., who after speaking in the highest terms of it says: "The lift is reaved with a ⅝-inch rope which has been in service for two years. I consider this a remarkable record, as it has been in very severe service daily for that length of time."

We may live without poetry, music and art;
We may live without conscience, and live without heart;
We may live without friends, we may live without fads;
But business to-day cannot live without ads.

THE NATIONAL HARDWARE ASSOCIATION.

They came from the North; they came from the South;
They came from the East and the West;
With hearts of hope and smiles as broad
As the Secretary's vest.

T. James was on deck, polite, serene;
His countenance fair to see;
As he sat at the table, just near to the side
Of his Mentor, the supple Supplee.

And the mien of the Bishop was grave and sedate,
And courtly and solemn his air,
As he moved a step upward, and sat him down
In the presidential chair.

Brace Hayden brought from the Occident
That plausible, silvery voice;
And Chamberlain, from far-off Maine,
Bade man and the earth rejoice;

While Bindley, the bland, with consummate skill,
Wooed gently each delegate's ear,
And corralled the votes that gave his town
The show for the coming year.

George Hart moved West with his case of cigars,
That proved him a Stanley brick,
As he sat by his chum, the exotic Weed,
From the banks of Buffalo creek.

The North gave one Foot, but the South gave Moore;
St. Paul a whole Kirk did offer.
While Boston chipped in with a Robbins and Waite—
New Orleans was content with a Stauffer.

From the pine woods of Michigan Stevens advanced;
Duluth Marshalled men of great might;
Council Bluffs filled the bill with a mighty fine Hill,
And Utica proved herself Wright.

There was music galore when they saw on the floor
Webster Walkley, the poet-romancer;
But the West matched the East in this eloquent feast,
With its Tredway, its Nutting and Crancer.

Pritzlaff was on hand, with Foerster the bland,
The cream of Milwaukee to pass;
"Don't thirst!" they would beg, as they opened a keg—
And Omaha furnished the Glass.

In short, not a town of any renown
That is found on America's map,
But awoke in full force—excepting, of course,
Sioux City, which had a fine Knapp;

Detroit had its Standart; Elmira its Booth;
Columbus sent Smith in a hurry;
Indiana's chief lamp was Cortland Van Camp;
While Pittsburg was proud of McMurray.

Spokane sent a Mason; Peoria, Clark;
Atlanta regretted its Parker;
But the South delegation was filled with elation,
As Lynchburg contributed Barker.

Topeka was a power, as it held a good Bauer;
The Rock that is Little sent Fones;
Cleveland felt good with its able Lockwood;
But Columbus went short on Jones.

The City of "Quakes" matched the State by the lakes,
In sending its Ritter and Chorley;
While Michigan, ran way in the van,
With Theodore Buhl and Morley.

Chicago was there, and did its full share
With A. Lucas Hunt, a good talker;
While the rest of the State was simply elate,
Because of Peoria's Walker.

The annual convention of the National Hardware Association for the year of Our Lord one thousand, eight hundred and ninety-eight is a thing of the past.

It was held in Milwaukee, Wisconsin, on November 16, 17 and 18th.

It was a success.

The attendance was large.

The interest was great.

An election was held with rare harmony, and a worthy successor to the most worthy President Supplee was chosen, in the person of H. H. Bishop, an Ohio man.

The able secretary-treasurer, T. James Fernley, was also succeeded by a man as fully capable as himself. He also hails from Philadelphia, and possesses many of the striking qualities of his predecessor. In fact, the two have roomed together for several score of years—more or less. His name is a household word wherever Hardware is sold, and needs no mention here.

We make no apology for the extended report of the proceedings. They were worth reporting.

THE OFFICIAL PROGRAMME.

LIST OF OFFICERS AND COMMITTEES.

President: William W. Supplee, Philadelphia.

First Vice-President: H. H. Bishop, McIntosh-Huntington Co., Cleveland, Ohio.

Second Vice-President: Brace Hayden, Dunham, Carrigan & Hayden Co., San Francisco, Cal.

Secretary-Treasurer: T. James Fernley, Philadelphia, Pa.

Executive Committee: Theodore D. Buhl; Buhl Sons & Co., Detroit, Mich.; William Chamberlain; the Emery-Waterhouse Co., Portland, Me.; Samuel A. Bigelow, Bigelow & Dowse Co., Boston, Mass.; John Bindley; Bindley Hardware Co., Pittsburg, Pa.; Richard W. Shapleigh; A. F. Shapleigh Hardware Co., St. Louis, Mo.; R. A. Kirk; Farwell, Ozmun, Kirk & Co., St. Paul, Minn.

Membership Committee: W. D. Taylor, Chairman. D. C. Delamater, Detroit, Mich.; Rufus K. Hireman, New Orleans, La.; F. H. Mason, Spokane, Wash.; R. M. Dudley, Nashville, Tenn.; W. M. Glass, Omaha, Neb.; A. J. Chase, Boston, Mass.

Fraternal Relations Committee: Thomas A. Harvey, Saginaw, Mich., Chairman. Geo. Deming, Cleveland, Ohio; C. A. Knapp, Sioux City, Iowa; Cortland Van Camp, Indianapolis, Ind.; H. W. Waite, Boston, Mass.; E. J. DeHart, Portland, Oregon; J. H. Boucher, Rochester, N. Y.

Press Committee: Col. Morris B. Belknap, Louisville, Ky., Chairman. Chas. Kruse, Cincinnati, Ohio; E. W. Crancer, Leavenworth, Kansas; Geo. A. Braun, Toledo, Ohio; Col. Jas. R. Nutting, Davenport, Iowa; Geo. B. Logan, Pittsburg, Pa.; W. A. Parker, Atlanta, Ga.

Grievance Committee: John Freeman, Detroit, Mich., Chairman. Hon C. B. Lockwood, Cleveland, Ohio; A. C. Rulofson, San Francisco, Cal.; Wm. Quincy Wales, Boston, Mass.; Chas. M. Biddle, Philadelphia, Pa.; Geo. Tritch, Jr., Denver, Col.; Col. W. W. Woodruff, Knoxville, Tenn.

Transportation Committee: Joseph Clark, Philadelphia, Pa., Chairman. Capt. F. Barker, Elmira, N. Y.; Wm. R. Wheeler, San Francisco, Cal.; John J. Robbins, Boston, Mass.; Geo. E. King, Atlanta, Ga.; J. G. Stoddart, Detroit, Mich.; A. D. Bayles, Kansas City, Kan.

Entertainment Committee: Fred. C. Pritzlaff, Milwaukee, Wis., Chairman. Hon. John C. Koch, Milwaukee, Wis.; Erwin Foerster, Milwaukee, Wis.; John R. Griffith, Philadelphia, Pa.; Lorenz Maschauer, Milwaukee, Wis.; Hobart Weed, Buffalo, N. Y.; T. James Fernley, Philadelphia, Pa.

Metal Committee: W. T. Gummey, Philadelphia, Pa., Chairman. G. W. Herrick, Boston, Mass.; P. E. Strauss, Boston, Mass.; H. H. Rudd, Cleveland, Ohio; Fred. C. Pritzlaff, Milwaukee, Wis.; C. W. Hackett, St. Paul, Minn.; Chas. D. Clark, Peoria, Ill.

ORDER OF BUSINESS.

Wednesday, November, 16th, 9.45 A. M.: At this session manufacturers and members of the press are cordially invited. All other meetings will be of an executive character—for members of the National Hardware Association only. Meeting called to order by the president. Chorus, "My Country 'tis of Thee." Calling of roll. Reading of min-

Digitized by Google

utes—1897 convention. Annual Address of the President. Report of the secretary-treasury. Introduction of official representatives, and communications from Hardware associations: Cleveland Hardware Jobbers' Association, New York State Association of Hardware Jobbers, Missouri Valley Hardware Jobbers' Association, Southern Hardware Jobbers' Association, Pittsburgh Hardware Jobbers' Association, Pacific Coast Hardware and Metal Association, Iowa State Hardware Jobbers' Association, Indianapolis Hardware Jobbers' Association, Nashville Hardware Jobbers' Association, Detroit Hardware Jobbers' Association, Philadelphia Hardware Merchants and Manufacturers' Association. Short Impromptu Addresses by Manufacturers.

Wednesday Afternoon Session, 2 P. M.: Report of executive committee. Report of membership committee. Report of grievance committee. Report of fraternal relations committee. Report of press committee. Report of transportation committee. Report of entertainment committee. Report of metal committee. Miscellaneous business. Opening of Question Box. Answers and discussion.

Wednesday evening, 8.15 P. M.: Social gathering at Deutscher Club. Delegates and others get cards of admission from Mr. Fred. C. Pritzlaff.

Thursday morning session, November 17th, 10 A. M. Miscellaneous business. Paper—"Best method of arriving at a selling price of miscellaneous goods."—F. W. Hurty. Discussion on the following questions proposed by the president. First. Are we not giving more attention to buying our goods than we are to marketing them? Second. Are we not apt to think that the first is of greater importance than the latter? Third. Is the person, or persons, in charge of the salesmen the best possible available selection you could make from those around you? Opening of question box. Answers and discussion.

Thursday afternoon: Carriage drive about the city.

Thursday evening: The following associations will meet in different rooms of the Hotel Pfister (same to be announced), at 8 o'clock P. M.: New York State Association of Jobbers. Missouri Valley Hardware Jobbers' Association. Southern Hardware Jobbers' Association. Metal Jobbers. Detroit Hardware Jobbers' Association.

Friday morning, 10 A. M.: Election of officers. Arranging seat of next convention. Miscellaneous business. Opening of question box. Answers and discussion.

Afternoon Session: Miscellaneous business. Opening of question box. Answers and discussion.

Friday evening: Annual banquet at the Hotel Pfister. Delegates and others can obtain tickets from Mr. Fred. C. Pritzlaff.

LIST OF MEMBERS.

Alabama. Moore & Handley Hardware Co., Birmingham; May & Thomas Hardware Co., Birmingham; Barney Cavanagh Hardware Co., Mobile; Cunningham Hardware Co., Mobile; Teague, Barnett & Co., Montgomery.

Arkansas. Fones Bros. Hardware Co., Little Rock.

California. Dunham, Carrigan & Hayden, San Francisco; Miller, Sloss & Scott, San Francisco; Baker & Hamilton, San Francisco; Holbrook, Merrill & Stetson, San Francisco; Geo. W. Gibbs Co., San Francisco; W. W. Montague & Co., San Francisco; Geo. H. Tay Co., San Francisco; Harper & Reynolds, Los Angeles; Union Hardware & Metal Co., Los Angeles; Schaw, Ingram, Batcher & Co., Sacramento.

Colorado. The George Tritch Hardware Co., Denver.

Florida. The S. B. Hubbard Co., Jacksonville.

Georgia. King Hardware Co., Atlanta; Beck & Gregg Hardware Co., Atlanta; Clarke Hardware Co., Atlanta; Palmer Hardware Co., Savannah; J. D. Weed & Co., Savannah; Ed. Lovell's Sons, Savannah; Dunlap Hardware Co., Macon.

Illinois. C. Sidney Shepard & Co., Chicago; Edwin Hunt's Sons, Chicago; Clark, Quien & Morse, Peoria; Isaac Walker Hardware Co., Peoria; Cummings & Emerson, Peoria.

Indiana. Van Camp Hardware & Iron Co., Indianapolis; Hildebrand Hardware Co., Indianapolis; Boetticher, Kellogg & Co., Evansville.

Iowa. The Empkie-Shugart Co., Council Bluffs; Schreiber, Conchar & Westphal Co., Dubuque; A. Tredway & Sons Hardware Co., Dubuque; Knapp & Spencer Co., Sioux City; Drake Hardware Co., Burlington; Charles F. Schmidt, Burlington; Sickels, Preston & Nutting, Davenport; J. D. Seeberger, Des Moines; Patrick & Luthe Co., Des Moines; A. Weber & Co., Keokuk; Huber & Kalbach Co., Oskaloosa; Baldwin Bros., Clinton.

Kansas. J. W. Crancer Hardware Co., Leavenworth; W. A. L. Thompson Hardware Co., Topeka.

Kentucky. W. B. Belknap & Co., Louisville.

Louisiana. A. Baldwin & Co., Ltd., New Orleans; Stauffer, Eshleman & Co., New Orleans.

Maine. The Emery-Waterhouse Co., Portland; Houghton, Clark & Co., Portland; Edwards & Walker Co., Portland.

Maryland. Carlin & Fulton, Baltimore.

Massachusetts. Bigelow & Dowse Co., Boston; Frye, Phipps & Co., Boston; Baldwin, Robbins & Co., Boston; Brown & Wales, Boston; Joseph Breck & Sons, Corp., Boston; Dana Hardware Co., Boston; Chase, Parker & Co., Boston; Fitz, Dana & Co., Boston; Dodge, Haley & Co., Boston; Holder & Herrick, Boston; Butts & Ordway, Boston; Miles F. Brennan & Co., Boston; Richards & Co., Boston; Austin & Doten, Boston; the Arthur C. Harvey Co., Boston; E. P. Sanderson Co., Boston; Geo. F. Blake, Jr. & Co., Worcester; Chas. C. Lewis Co., Springfield.

Michigan. Standart Bros., Detroit; Freeman, Delamater & Co., Detroit; Buhl Sons & Co., Detroit; Fletcher Hardware Co., Detroit; Morley Bros., Saginaw; Foster, Stevens & Co., Grand Rapids.

Minnesota. Marshall-Wells Hardware Co., Duluth; C. W. Hackett Hardware Co., St. Paul; Farwell, Ozmun, Kirk & Co., St. Paul; R. D. Cone Co., Winona.

Mississippi. Lee Richardson Co., Vicksburg.

Missouri. Wyeth Hardware & Mfg. Co., St. Joseph; Paddock-Hawley Iron Co., St. Louis; the A. F. Shapleigh Hardware Co., St. Louis; the Witte Hardware Co., St. Louis; Gille Hardware & Iron Co., Kansas City; Richards & Conover Hardware Co., Kansas City; Rogers & Baldwin Hardware Co., Springfield; McGregor-Noe Hardware Co., Springfield.

Montana. A. M. Holter Hardware Co., Helena.

Nebraska. Rector & Wilhelmy Co., Omaha; Lee-Clarke-Andreesen Hardware Co., Omaha; Baum Iron Co., Omaha.

New Hampshire. John B. Varick Co., Manchester.

North Carolina. Odell Hardware Co., Greensboro.

New York. Albany Hardware & Iron Co., Albany; Walbridge & Co., Buffalo; Weed & Co., Buffalo; Sidney Shepard & Co., Buffalo; Barker, Rose & Clinton Co., Elmira; Irving D. Booth, Elmira; Russell & Erwin Mfg. Co., New York City; Sickels & Nutting Co., New York City; Underhill, Clinch & Co., New York City; Matthews & Boucher, Rochester; Weaver, Palmer & Richmond, Rochester; Burhans & Black Co., Syracuse; Wright, Dana & Co., Utica; Charles Millar & Sons, Utica; J. M. Warren & Co., Troy; Babcock Hardware Co., Binghamton.

Ohio. The McIntosh-Huntington Co., Cleveland; the Geo. Worthington Co., Cleveland; the Lockwood-Taylor Hardware Co., Cleveland; H. W. Leutkemeyer & Sons, Cleveland; Howell, Gano & Co., Cincinnati; the Johnson Bros. Hardware Co., Cincinnati; the Kruse & Bahlman Hardware Co., Cincinnati; E. H. Huenefeld, Cincinnati; Bode Hardware Co., Cincinnati; the Smith Bros. Hardware Co., Columbus; Kilbourne & Jones Co., Columbus; the Stollberg & Clapp Co., Toledo; Bostwick, Braun & Co., Toledo; Canton Hardware Co., Canton.

Oregon. Corbett, Failing & Robertson, Portland; Honeyman, DeHart & Co., Portland.

Pennsylvania. Supplee Hardware Co., Philadelphia; Shields & Bro., Philadelphia; Biddle Hardware Co., Philadelphia; W. H. & G. W. Allen, Philadelphia; James M. Vance & Co., Philadelphia; Seltzer-Klahr Hardware Co., Philadelphia; T. James Fernley, Philadelphia; Merchant & Co., Philadelphia; W. F. Potts Sons & Co., Philadelphia; Gummey, McFarland & Co., Philadelphia; Hall & Carpenter, Philadelphia; Bindley Hardware Co., Pittsburg; Logan-Gregg Hardware Co., Pittsburg; James C. Lindsay Hardware Co., Pittsburg; Wolff, Lane & Co., Pittsburg; Lautner Hardware Co., Allegheny.

Rhode Island. Congdon & Carpenter Co., Providence.

South Carolina. Marshall, Wescoat & Co., Charleston.

Tennessee. C. M. McClung & Co., Knoxville; Woodruff Hardware Co., Knoxville; Langstaff Hardware Co., Memphis; Orgill Bros. & Co., Memphis; Buford Bros., Nashville; J. H. Fall & Co., Nashville; Gray & Dudley Hardware Co., Nashville; H. G. Lipscomb & Co., Nashville; Tenison, Son & Rose, Nashville.

Virginia. Watkins-Cottrell Co., Richmond; Barker-Jennings Hardware Co., Lynchburg; W. S. Donnan & Co., Richmond.

Washington. Holley, Mason, Marks & Co., Spokane; Seattle Hardware Co., Seattle.

West Virginia. Ott Bros. & Co., Wheeling.

Wisconsin. John Pritzlaff Hardware Co., Milwaukee; Wm. Frankfurth Hardware Co., Milwaukee; Fred. Kroner Hardware Co., La Crosse.

THE FIRST SESSION

of the Association was held on Wednesday forenoon, in the assembly hall, on the eighth floor of the hotel. The

Digitized by Google

doors were wide open to all--manufacturers, newspaper men, and whomsoever would come. President Supplee occupied the chair, with his usual dignity. At his left sat First Vice-President Brace Hayden, expressing in his beaming countenance the good will and fraternal greetings of the Pacific coast. Next to him was a gentleman who, as usual made friends of every one he met—the Secretary-Treasurer, T. James Fernley.

The meeting was called to order at 10.30. The first thing on the programme was an expression of the convention's patriotism, in the hearty and voluminous rendering of "America," in which every man present joined—those who could not sing, as well as those who could. The roll was called, after which Mr. Supplee delivered his annual address as follows:

PRESIDENT SUPPLEE'S ADDRESS.

Gentlemen of the National Hardware Association: When I look at the firm mass of our members and the faces who are now, and who have heretofore been present, I would be inconsiderate and ungrateful indeed did I not appreciate the high honor you have conferred upon me, neither have I failed to realize the responsibility to have been continuously elected for four successive years.

Appreciating this honor, it affords me great pleasure to welcome our members to this, the Fourth Annual Convention of our Association.

The city of Milwaukee and the metropolis of Wisconsin outdistanced all other contestants and was unanimously selected as the place for our 1898 annual meeting. Situated on the western shore of Lake Michigan, connecting with a chain of lakes, Milwaukee possesses the natural advantages which have made it a commercial, manufacturing and financial centre, and our members in selecting this city evidently realized the fact that the representative merchants are of that high character that they have made themselves felt through the entire Northwestern territory.

The representative gatherings at prior annual conventions, coupled with expressions of confidence in your officers, have had the natural tendency to stimulate and encourage them to future work in your behalf.

Let us at this meeting intelligently and impartially discuss the events of the past year and make strenuous efforts to unravel so far as possible the problems that may confront us during the coming year. I have, upon previous occasions, as I do now, expressed the desire that all delegates to the Convention unhesitatingly rise and join in the discussion on all subjects in which we are mutually interested, for in no other way than upon the consensus of opinion here expressed can your officers be expected to know what you desire.

Since the date of our last meeting the unwritten records of history have developed with a rapidity heretofore unknown in the history of our country. The conviction that war with Spain could no longer be avoided was of slow growth and development in this country. A nation at our very doors was being exterminated. After many years of tyranny they were no longer willing to submit to the unjust government of oppression, arrogance and cruelties and had at all hazards resolved to be free. Previous administrations had called Spain's attention to the fact that a country near to the borders of our own had for many years been in a state of insurrection, and stated that unless Spain adopted rules of more civilized warfare its continuance could not much longer be tolerated.

It remained, however, for the Congress of 1898 to bring these conditions to an end, and by a resolution of Congress war was declared and preparations for immediate warfare begun. With a unanimity of feeling the entire country sustained the action of Congress, but we must admit owing to our unpreparedness great fears existed in the minds of many as to the quick termination of the undertaking. Fortunately this war, brought about in the interests of humanity, was of short duration, two fleets of the enemy were entirely annihilated and the triumphs of our navy and army exceeded in quickness anything in the annals of history, and met with the admiration, not only of our own country, but of the entire civilized world.

The present year will be a memorable one in the history of our country, not only in the events of war but in industrial and commercial activity. Short crops throughout the Eastern hemisphere necessitated the drawing from our own vast area of productive soil for supplies, and improved trade in this country further increased our own consumption, therefore, these combined conditions largely enhanced the value of all agricultural products.

Our foreign commerce shows an increase of exports of over one hundred million dollars, and further presents the remarkable showing that while our consumption per capita showed an increase over previous years our imports for the period showed a decrease of over one hundred million dollars. This shows in the final result a trade balance to

EX-PRESIDENT WILLIAM W. SUPPLEE.

our favor the past ten months of over two hundred million dollars, and by far the largest balance ever experienced.

The bank clearings of the country, which gives one an idea of the transfers and activity of capital, for the past ten months show an increase over 1897 of nineteen per cent., over 1896 thirty-one per cent. and over 1894 nearly fifty per cent. During the same period there have been less failures, and in the aggregate smaller liabilities, than have occurred at any time since 1892. The railroad tonnage of the country also shows a material increase over any previous year in the nineties.

The endless chain churning the gold out of the United States treasury ceased to work with the same activity, and during the last two years the amount of gold coin and gold bullion in the country has increased over two hundred and sixty-five million dollars and the depletion of the United States treasury no longer through fear and distrust jeopardizes trade. During the same time the currency of our country has increased over two hundred million dollars.

The bankruptcy bill, after a long struggle lasting over many years, was passed by the last session of Congress and became fully effective the first of this month, and in the near future I believe will be of great advantage both to the manufacturer and wholesale trader and in no way

Digitized by Google

impair the credit or possibilities of the honest retail merchant. During the first four months there will likely be instances where the honest creditor may suffer from resurrected old judgment notes and hidden preferences which have bolstered up credits, and in these instances may bar out other creditors from their fair proportion, but after that date I believe the results will show a more fair and equitable division of debtors' assets, and thus lessen the financial risks and uncertainties of trade.

During the past year the average manufacturers of Hardware have shown a disposition to avoid speculative tendencies and to confine their prices within the limits of prudence. Spasmodic shifting from perhaps unremunerative and abnormally low prices to sudden and fictitious values always results in a hesitancy on the part of the buyer, demoralizes trade, and is not desirable for the jobber, retail merchant or consumer.

There is a strong thread running through and connecting the manufacturer, jobber, retail merchant and consumer; their interests are mutual, and any attempts to disarrange or disconnect them have always tangled the cord into an unmanageable mass. The success of the retail merchant depends upon the prosperity of the consumer. The jobber on his part anticipates the wants of the retail merchant, and in advance of each season he makes his purchases and is in full possession of an assorted stock with which to supply the first call from his customers, and through this channel the goods reach the retail merchant at a far less expense after they are manufactured, consequently at a less price than could possibly be the case through fifty to five hundred more direct channels, the last number stated being really an underestimate, for the writer's own ledger shows purchases from over eleven hundred firms.

The jobber, therefore, occupying a position between the manufacturer and the retail merchant, is so expected to conduct his business as to interpret his customers' wants in carrying a full supply of goods, and in many cases to furnish from as many different manufacturers as there are items on the order, extending credit to his customers depending largely upon their trade and collections rather than a strict compliance with the terms upon which the goods were sold. And there is no doubt in my mind that each member here present has saved from insolvency one or more customer some time during the years between 1893 and 1897, whose ruin would have been inevitable had their purchases been made like the scattered shots of the blunderbuss. The jobber (taking a practical view of the case) is not infrequently the financial backer of the manufacturer; he buys far in advance of his anticipated call from the retail merchant, has taken advantage of the cash discount, and the manufacturer is in possession of funds with which to pursue further business. Notwithstanding this fact, perhaps all present have occasionally come in contact with customers who entertain the very comfortable feeling that they can purchase direct from a manufacturer fifty dollars' worth of goods as low as you can buy one thousand dollars' worth, or in buying beyond their reasonable wants can buy two hundred dollars' worth as cheaply as you can buy one thousand, or perhaps during the season from five to ten thousand dollars' worth. Nor is it the part of the manufacturer to ostentatiously undeceive these persons.

It has been asserted that the jobber is between two millstones, the manufacturer and the retail merchant, consequently their investment of capital and energy is poorly paid. While willing to admit that may be the case, there is one thing sure, they fill a sphere of usefulness which is necessary and essential in the process of trade, but I very much doubt if there is any mercantile business in the United States upon which there is so small a margin of net profits as in the jobbing Hardware business.

During the past year, in a communication to our members I referred to the growing tendency of manufacturing industries to enlarge, extend and enter into combinations of interest and monopolies, which in some cases have extended into millions of dollars. The reasons usually given are economy and saving of expense account. In a national election, prior to the present administration, one of the candidates with considerable effect found in it material for a party issue, but later when the effort was made to restrict or neutralize these monopolies, the attorney-general gave an adverse opinion of such a possibility. This decision appeared to give new life, and since that time not only have increased members organized, but the amount of capital invested is somewhat startling. It was recently stated in the *New York Journal of Commerce* that in 1897 one hundred and seventy-two corporations of this kind were in existence with an aggregate capital and bonded indebtedness of over two thousand three hundred million dollars. In addition to this there are limited monopolies whose capital and bonded indebtedness are over six hundred and eighty million dollars, and this represents to-day not less than fifty per cent. of the entire invested industrial capital of the country.

Quite recently a two hundred million dollar enterprise, representing a product which is quite familiar to our members, was quickly floated, and an effort is now being made to control the productive output of another line of manufactured goods, in which many of our members are directly interested, in which not less than the same amount of money is involved. The mind and energies of the average business man are so engaged in the demands and turmoils of trade, and especially is it so in our own line, that it does not appear to have attracted more than ordinary interest or attention, and the average man, so far as I can observe, has shown no great concern as to the ultimate outcome.

But we should not overlook the fact that in these transitions of trade individuality is lost and large corporations with less individuality are frequently indifferent as to the process of goods reaching their ultimate destination. Alleviatory escape from stifling competition, or a reversal of long continued trade relations and methods as between the manufacturer and jobber, from them to the retailer and thus to the consumer, can in no way be secured through individual efforts. Efforts of that nature are not infrequently acknowledged with a pleasant letter (but with a suppressed laugh) and thus the matter brushed aside.

The foresight of the little band of promoters of the National Hardware Association, who met in Cleveland, December, 1894, could scarcely have realized the fact that through co-operation they could "build better than they knew," and too much credit cannot be given to that little band of twenty-eight firms who first enrolled their names and took as their text Article No. 2 of our Constitution and By-Laws, which reads as follows:

"The object of this Association shall be the promotion of more friendly business relations, and mutual confidence and good-will with each other and with manufacturers."

Manufacturers as a rule have commended the officers of our Association upon the reasonable and conservative suggestions we have made to them, and we ask from manufacturers no more than we ask from our members, that they should join with us in the effort to establish a "High Standard of Business Methods." We should not overlook the fact that in the transitions of trade referred to there may lurk the danger of being wrecked upon the rock of insufficient differentials as between the manufacturer, jobber, retail merchant and consumer.

If, therefore, there existed sufficient reasons why the Association should have been formed, they have not been minimized, but have enlarged fourfold. The four years of unusual and depressed trade conditions have been of serious magnitude and have taxed to the utmost the intelligence and energies of both manufacturers and jobbers, but our continued usefulness must depend upon the co-operation

Digitized by Google

we have heretofore enjoyed, and while courageous we must be conservative and honest, bearing in mind no man is infallible, but at times likely to err or make a mistake in judgment.

Since the formation of our organization other branches of trade and commerce have recognized the importance of co-operation and we are pleased to learn that not only has new life been instilled into old associations, but the number of associations has increased fourfold. There are perhaps distinctive characteristics in each. The Association of Manufacturers of the United States, which it has been stated was inspired from the success of our own, is largely entitled to the credit of having greatly enlarged our export trade.

We recognize the full importance of the fact that in the pursuance of trade the legitimate retail Hardware dealers of the country, in whose success and prosperity we are mutually interested, have suffered from recent conditions, and especially the fierce competition and aggressive methods of the department stores which are now confronting them, and I feel we should express ourselves as being in sympathy with the earnest efforts which have induced both local and sectional retail Hardware associations. Trade should rest upon mutual confidence and we see no reason why distrust or jealousy should exist in either sectional or local markets.

When the Constitution and By-Laws of our Association were adopted it was considered important that there should be a Committee on Fraternal Relations, one of whose duties should be to encourage the formation of both local and sectional associations. Time has strengthened the belief that these associations can be made instruments of good, recognizing the fact, as we do, that the same trade conditions that exist in one section of the country do not necessarily exist in other locations. While the National Hardware Association could be safely looked upon as the parent of these organizations, it is our belief that these local and sectional associations can do work which will result to the betterment of trade of not only jobbers themselves, but to both manufacturers and retail merchants.

SECRETARY-TREASURER'S REPORT.

This report will, as usual, be a resume of the work of his office during the past year, and will show a balance in the treasury of something over two thousand dollars. I have each year expressed myself, as I do now, that we should confine our expenses to our receipts, and the amount now on hand should be about the minimum amount we should show at the end of any one year unless some extraordinary expenses present themselves. No inconsiderable amount is used each year for visiting sectional and local associations, and I feel that the work in that direction could be safely increased rather than diminished.

I have this year, as heretofore, depended upon the secretary-treasurer to give you the details as well as the results, of what most of you must unquestionably realize it has taken each year from day to day not only hours or days, but weeks of your president's time to arrive at in consulting and advising with your secretary-treasurer. Your other officers, as you understand, have been freely called upon to contribute their time. Is it, therefore, too much to expect of our members to contribute from time to time during the year some thought as to how they can best serve the objects and interests of our association, while at the same time the unquestionable results must rebound to the interests of the jobbing trade at large.

TRANSPORTATION COMMITTEE.

One year ago I referred to the importance of a change in the classification of Hardware, which would lessen the difficulties that all jobbers must encounter in their attempts to comply with the present rules and regulations of the official classification of Hardware.

During the first six months of the present year the tonnage of the railroads was of that magnitude that it was suggested to your president it would be inexpedient to present our claim until some time in the early fall prior to the October Meeting of the Official Classification Committee. While your committee are able to report that there was a favorable recommendation made to that committee by one of the largest railroads in our country, notwithstanding that we received a letter from Mr. C. E. Gill, chairman, under date of November 2nd, saying that at their meeting the matter was given consideration, but it was not deemed expedient to recommend to the various railroads of the country a change at the present time.

I can only infer from what we have learned that matters of such great importance come before this Committee, and especially so at the last session, that this matter so important to us has been temporarily brushed aside. As the matter now stands that Committee have before them a proposition signed by your president and the chairman of the Transportation Committee, asking that they appoint a sub-committee of five of their members to meet a sub-committee from our Association for the purpose of going over the matters mentioned in our correspondence to them.

I recommend that this special work be continued either by a special committee, or by the Transportation Committee which may be appointed for the coming year.

EXECUTIVE COMMITTEE'S REPORT.

This committee will have been in session two days prior to the meeting of the convention. I shall therefore leave reports of all other committees to come through their hands. According to our constitution and by-laws the reports of all committees are referred to them before they are presented.

The members of the Executive committee have during the past year, as they have in previous years, been prompt in giving their opinions on matters which have been presented to them, and I feel that their conscientious work will meet with the approval of all our members.

DEATH OF MR. JOSEPH J. TILLINGHAST.

On November 30, 1897, Mr. Joseph J. Tillinghast, vice-president of the firm of J. M. Warren & Co. of Troy, N. Y., died of pneumonia at the age of sixty-six years. Mr. Tillinghast was present at our last meeting, as he was at all previous meetings, and will doubtless be remembered by all our members as he had always taken an active interest in our Association work, and through his kindness of heart and genial disposition endeared himself to all those with whom he came in contact. He was highly respected not only in his own city but in the surrounding country and his loss will be keenly felt in that location.

Once during the present year, owing to sickness and absence, I called on our vice president to temporarily assume the duties of office. Six months later, from practically the same cause, matters pertaining to these duties were in the hands of the vice president and executive committee, although during the latter period I was in correspondence with our secretary-treasurer. I especially refer to this that it may be understood why during the interim personal correspondence may have been answered by our secretary-treasurer, and second to call attention to the fact that our Association does not, nor is there any reason why it should, depend upon the official duties of any one man.

At our last convention I stated to our members, and especially called the attention of the Nominating Committee, to the fact that I did not think it wise or judicious for any one person to occupy the position of president beyond the extreme limit of three years. Having then occupied this position for that length of time, I asked that my name should not be considered as a possibility for re-election. I would, however, have failed to appreciate the high honor conferred upon me when the Nominating Committee, dis-

Digitized by Google

regarding my request, again presented my name (with no other) for re-election had I at that late hour ignored the sentiments they expressed and declined to serve you for the present year. Time, however, has developed no reason why I should change my then expressed convictions, and far beyond the fact that a multiplicity of other duties will require my personal attention for the coming year, I would not think it judicious or wise for the Association to have any one person occupy the chair longer than the time I have served you. I therefore ask that the Nominating Committee center their minds upon a representative head, who with the aid of the wise counsel of our vice presidents and executive committee will be willing to devote the necessary time to your interests in acting as president for the coming year.

I desire once more to thank the officers and members of the association for their kindness towards me, not only since our last annual meeting, but during the entire past four years, and as Section F, Article 4, of our constitution and by-laws, adopted at our last annual meeting, places me upon the Advisory Board, I desire to assure you that in that position it will be my aim to aid in the association's welfare.

Gentlemen, I once more thank you.

The address was listened to with close attention, and frequently applauded.

Mr. Supplee was followed by Brace Hayden, vice-president of the association, and president of the Pacific Coast Hardware & Metal Association. He paid a high tribute to the president, and spoke earnestly of the good work he had performed through so many years of service.

A special committee on the president's address was appointed, as follows: Griff D. Palmer, Rochester, N. Y.; John H. Robbins, Boston, Mass.; Walter R. Stauffer, New Orleans

The Secretary-Treasurer, Mr. Fernley then presented his annual report, in the following form:

REPORT OF T. JAMES FERNLEY, SEC.-TREAS.

We are assembled amid these pleasant surroundings to spend a few days in mutual conference, our object being to become better acquainted with each other, and to interchange ideas which, when put into operation in our respective businesses, will make the obtaining of a legitimate profit on the capital and ability employed a little less difficult than has been the case in the past.

It is but fitting that those to whom you, at the last annual convention, entrusted the management of affairs of the Association, should give a report of what has been done in your interest.

There are many of the details which we will not at this time rehearse, because of the fact that during the year we have kept in constant communication with our membership.

We have addressed you forty-one times. Our president through the secretary-treasurer's office, has addressed you six times; so that in this way you have been kept acquainted with what was being done in furtherance of the important objects of our Association.

It has been the pleasure of your secretary-treasurer to visit during the year 95 members, meeting on the occasion of these visits the various partners and managers of departments, and answering such questions as might be propounded on business methods, giving, to the best of his ability, an explanation of methods in vogue among the most progressive houses of the country.

It is true that we have not traveled quite so much as during previous years, but there did not seem to be the same necessity for so doing; and yet we have been absent from the office thirty-six days, covering in that time some, 8977 miles. We believe, however, that the constant changing conditions of business will require more or less of this character of work.

We have been paying very special attention during the year to competition of manufacturers with jobbers. Various bodies of manufacturers have been interviewed, as well as individual manufacturers, and several thousands of letters have been received and answered from this office, and we are most pleased to report that a much more harmonious feeling has been developed between the manufacturers and the trade, thereby benefiting the manufacturer and dealer.

Where we have interviewed manufacturers as to the expense of distributing their product, it has been demonstrated that the expense far exceeded the percentage the jobber would ask as a differential between him and his customer to cover the expense of doing business.

We have issued from our office such literature as we thought would be helpful to our interests. Some of our literature has been re-published by other Trade Organizations, and given wide circulation.

LOCAL ASSOCIATIONS.

We have interviewed local associations whenever the opportunity has presented itself, and we have done our utmost at all times to induce the members of *our* Association who are connected with these local organizations to loyally support the Association to which they belonged.

In several instances we have found on account of some erroneous report, that mutual confidence was disturbed, but after listening to both sides of the question, and making a thorough investigation, we have found that there was actually no foundation for the feeling of suspicion which existed, and we have left the members of the local association with assurance from them that hereafter they would more carefully investigate for themselves before misjudging their competitor.

After an experience of four years in this office we state without hesitancy that ninety per cent. of all the demoralization is caused by the various dealers acting on more rumors, without investigation.

METAL DEALERS.

During the year it has been our earnest desire to demonstrate to the dealers of tin plate and metals who are connected with us, that we, as an organization, could be of great benefit to them.

We further have called the attention of the manufacturers to the injustice of selling tin plate through persons known as brokers, who have invested no capital, and who do not discriminate between the various classes of trade.

RETROSPECT.

The National Hardware Association has now been in existence almost four years, and it is but proper that we should indulge in a little retrospect, in order to keep in mind just what benefits have accrued to the trade in general, and the members of our Association in particular, as a result of the efforts put forth by the various officers and committees of the Association.

It must be borne in mind that our Association has no precedent to follow, as no definite line of policy was mapped out at the time of its organization, the very nature of things making this impossible.

FRATERNAL RELATIONS.

First.—We found that in many localities of the country bitter feeling existed between the dealers, and even where this was not the case, the various competitors in certain cities had scarcely a speaking acquaintance with each other, At the present time, local associations have been formed in many sections of our land, and there is an extremely cordial feeling existing between the various jobbing houses.

IMPROVED METHODS.

Second.—We found that if any plan for the improvement of trade conditions occurred to an individual house, they were fearful of adopting it, lest the same should not prove beneficial.

Digitized by Google

Since the formation of our Association, there has been the greatest anxiety displayed by the various members to adopt the most up-to-date methods in conducting the various departments of the business.

Members of our Association have been freely writing to each other, exchanging blank forms, making suggestions and counter suggestions. The methods of various concerns have been explained by the secretary-treasurer in all their minutia. He has gone from city to city in the last four years, having spent almost one year of that time (counting various days during the four years, it would amount to that) acting as a clearing house of information, receiving a good idea as to business methods in one house, and carrying the same to other members of our Association. The result of this has been of great benefit to all.

There is no question but what it is much more profitable to compete with concerns who are fully enlightened as to the best methods of doing business, than it is to meet those who are pursuing methods which were only adapted to other years. This is a good feature of our work which must be kept up. Conditions will continually change, and we must keep pace with these changed conditions.

At the time of the formation of this Association, to the extent of our knowledge, there were no organizations amongst retail Hardwaremen of the country, or if any, not more than one or two. Since the formation of the Association a number of them have sprung into existence, and from the accounts that we read in trade papers, it may be judged that they are prosperous, growing, and of benefit to their members.

Our own Association cannot but view with great equanimity the formation of these associations. It is certainly a step in the right direction, and must inevitably tend to a clearer defining of the relative positions to be occupied by the manufacturer, the wholesaler and the retailer.

We have for years been suffering from unintelligent and greedy strife for trade. The manufacturer has encroached upon the wholesaler, the wholesaler upon the retailer and any movement that will tend to bring the distribution of merchandise into its proper channels must be hailed with delight by all well meaning men.

We hope that retail associations both in large cities and in states will continue to be formed. That they will exert their influence for the benefit of their members, and that this Association may have the pleasure of dealing with retailers through the medium of these associations, establishing relations that will be alike friendly and profitable to both.

In an association like ours, covering such a vast territory, we find there are a few people who, as our president recently expressed it, expect us "to strike the bull's eye at every shot." We do not know how to do this; we are simply trying to "strike the bull's eye" frequently enough to justify us in holding the "gun."

There are some few who would like to keep ledger accounts with our Association, putting to the debit side of the account the amount of dues, and crediting the account with the amount of direct pecuniary advantage which they secure. From the very nature of our work it is not possible to keep such an account, but we feel that any member engaged in business in this country who will carefully review the work of the past four years, will be forced to admit that it has been of vastly more than sufficient benefit to them to justify continued active and financial support.

We certainly have demonstrated that as an organization we have bettered the conditions existing at the time of our formation, and further, that we have a wide field of usefulness open for us.

This condition of affairs has been brought about through the instrumentality of an organization which, from its incipiency, has been under the guiding hand of a man in the office of president who has had the confidence and esteem of every member of the Association as well as of the manufacturers of the country.

At the sacrifice of his personal interests he has at all times been willing to give his time and talent to our organization, and if your secretary-treasurer has been of any value to you, it is because of the fact that he has been under such most excellent instruction during his term of office, and our success as an organization is further due to the fact that our president has been supported by an extremely able first and second vice-president, and by an executive committee composed of men with the brightest intellects within our ranks.

If the jobbers of Hardware in this broadening land will stand "shoulder to shoulder," this, our chosen avocation, will become more profitable, so that from the Zenith City of the Unsalted Seas to Porto Rico, and from Maine to Manila, we will hear shouts of approval from the throats of 20,000 retailers, 3500 manufacturers and 200 jobbers.

At the conclusion of the report, Mr. Fernley presented to the eyes of the convention the full printed minutes of the Buffalo convention of 1897, and very solemnly asked if he should read them. A half-suppressed groan was heard, and one gentleman moved that the public reading should be dispensed with, and Mr Fernley instructed to go into a corner, and read them to himself.

TALK FROM MANUFACTURERS.

President Supplee said that it was now in order to listen to the impromptu speeches of such manufacturers as were present, and that the convention would be delighted to hear from them. As no one volunteered, he proceeded to draft them into service.

The first gentleman called upon, was Henry B. Lupton, secretary of the Oliver Wire Co., Pittsburg. Mr. Lupton said:

Mr. President: Three years ago your Association honored Pittsburg by holding your annual convention in that city. After the meeting had adjourned and you had returned to your homes, our president called his business associates together. He said that never before had he appreciated the extent of the jobbing Hardware interests, and from that day he wished us to feel that the distribution of our products must be, as far as possible, through the jobbing Hardware houses. (Applause.) Our sales ledger of 1895 showed 3,200 accounts; our sales ledger of this year will show less than 1,100 accounts, and with a very largely increased business, with a decrease in losses and a decrease in the expense of doing our business. In every respect the business has never been so satisfactorily done as during the past three years, when the distribution of nearly 100,000 tons per year of wire product has been done through the jobbers of the United States, and for your cordial support, gentlemen, we desire to return our sincere thanks. (Applause.)

May I say a word on another subject, one in which both manufacturers and jobbers may take great pride. It is the wonderful increase of exports of the iron products. In 1881 the exports of iron products were about $12,000,000 and the imports nearly $80,000,000. In 1897 the imports were reduced to $12,000,000 and the exports increased to over $80,000,000, showing a complete reversal; this year the proportion will be far greater, and while the figures cannot now be had, the exports, we hope, will exceed $100,000,000 worth of the iron products of the United States.

Mr. Carnegie, in his masterful speech a few days ago at Pittsburg, made the assertion that there was scarcely a spot on the earth that Pittsburg could not lay down the finished product cheaper than it could be made by the home manufacturers.

This, gentlemen, takes from this country its surplus, and we need no longer fear the over-production of our factories and the consequent uncertainties in the market. Gentlemen, I thank you for your attention.

Digitized by Google

The chairman said: "We would like to hear from Mr. Chas. T. Landers, of Landers, Frary & Clark, New Britain, Conn."

Mr. Landers addressed the Association as follows: A friend last night said to me: "Has the National Hardware Association been any benefit to the manufacturers; if so, what about it?" It does not require much thought. I say unhesitatingly that I think it has been of great benefit to the manufacturers. I speak from my own experience. I think one great benefit has been done in a negative way—in what it has prevented in the last four terrible years of poverty. Perhaps you gentlemen here can realize what would have happened between 1894 and 1898 if you had not had your Association. You don't want to forget that. It has saved a great amount of trouble which would have happened. Then, in regard to the other advantages, there need hardly be anything said. The manufacturers come here and meet the jobbers; the heads of manufacturing concerns meet the head of jobbing concerns in a way that would be utterly impossible in any other way. Not only meet them individually, but get the effect that you get from consensus of opinion, and this has been very great.

I want to say just one other thing: In my judgment the success of this Association has been due not only to the co-operation and work of its members, but to the admirable way in which it has been managed. If the president and secretary of this Association, and executive committee, were made up of narrow gauged men, they would not only have wrecked your Association, but they would have wrecked the Hardware trade, both jobbing and manufacturing. I want to say to you, Mr. Secretary, that I have had twenty years' intimate acquaintance with the president of the Association. I have had to go before him in regard to several matters connected with the Association, and I want to bear testimony here that the judicial knowledge he has shown, and the utter absence of any possible personal or selfish interest, has been simply a marvel. It is for you gentlemen here to properly understand it better than I, but I want here to express my appreciation, not only to the president, but to the executive committee. So far as the secretary and treasurer is concerned, every manufacturer in the country who has come in contact with him is under personal obligation to him. To the individual members of the Association, this is not the place to express my regard for it, but it is my place to express my feelings to the Association as a whole, and that I do.

The Chairman: "I will call on Mr. Charles L. Mead, of the Stanley Rule & Level Co., of New Britain, Conn."

Mr. Mead said: It is a mystery to me to know why I should be called upon to address you upon this occasion. I came from Vermont, and I see Vermont has not a Hardware jobber in her limits, according to the book here.

I know you would not, Mr. President, but perhaps the younger men here would think that Admiral Dewey and I were samples of the whole of Vermont, but I will tell you a story of two brothers that I knew from Montpelier. One of them went out to Seattle. Unfortunately he died, and they telegraphed home to his brother to know what they should do with the body, and they said it would cost $100 to embalm him and send him home. The brother telegraphed back that they need not do anything about it, but they felt so sympathetic out there, and knew the tender relations between the two brothers, that they telegraphed back—it was in winter—that they could freeze him for $25 and send him home. He replied to that, that the winter before last his brother was frozen up above his knees, and if they could freeze the rest of him for fifteen dollars they might do it!

There is a maxim the old farmers there had: "It is the still pig that gets the most swill." That is not the text I am going to preach; it is a maxim up there. You men in rural communities know how it is. Some pigs put their noses right in and keep eating. Other pigs squeal and try to put their noses into the other pigs' feed, and they don't get fat. I think there is a lesson for all of us in that, manufacturers and jobbers too. I think it is the still pig that gets fat. You notice in a field cattle are turned out, and you see most of them go to eating; those that make good beef, just eat and keep eating, but there is once in a while a young steer, or maybe a calf, who put their tails up and fly around the field, and don't attend to their eating.

These four years that have passed I notice in your report about coincide with the time when we have had pretty hard times in this country. It has been rather dry times. There has been a great attempt for cattle to get over into the next pasture; some gentlemen have run around, and no business came. I think they have not only lost time, but not done as well as if they had remained in their pastures. To my mind success is attained by staying in your own pastures. I am sure that those who have adhered closest to that, have done the best. In my judgment we are going to have better times. I think with Mr. Landers that if it had not been for this organization in the last four years, conditions existing to-day would have been very much worse I think now on return of prosperity that the time that has been spent by you and by the organization as a whole in educating people to keep in their own pastures, and to cultivate their own fields, that the benefit will be felt in a wonderful degree, and I hope that the organization will go on, and perfect that advantage which it has commenced, and we shall see when these better times come, which I believe are surely coming, that men have learned something. I think the jobbers and manufacturers have learned hard lessons these last four years. I think we are in grand shape now to go into a period of prosperity, which I believe is just before us.

President: "I will call on Mr. Wilton C. Smith, of the Rockford Bit Co. to address us."

Mr. Smith: I can confess frankly that I am much interested in the career of the National Hardware Association. I think its purpose is to enable us to avoid mistakes in our business life. It reminds me of a story told by Mr. Depew. He said that once on one of his numerous visits to Utica, he was invited to go through the insane asylum. They took him down to one of the cells, and he found the inmate sitting astride of an old table. He had a stick in his hand, and he was pounding the table vigorously. Mr. Depew to be sociable, said: "That is a very nice horse you have?" The man said "No, it is not a horse, it is a hobby." "Well," said Mr. Depew, "I see." He said, "Mr. Depew, do you know the difference between a horse and a hobby?" Mr. Depew said: "I confess that I do not." The man said: "*You can get off of a horse.*"

At a meeting I attended in Chicago yesterday, one of the speakers spoke about the Eastern people coming out to the wild and wooly West, and said that after leaving New York it was like camping out. It reminds me of the experience of a prominent Irishman in Chicago—a man with a good deal of money. He went on to New York and spent a week or two recently, and one of his young business friends asked him if he had seen New York. He said yes, he had, to some extent. The Irish gentleman said: "I have just been there and visited the Waldorf-Astoria, and the Brooklyn Bridge and various other things," and his young friend asked him if he had any idea what coffee was worth at the Waldorf-Astoria. His young friend wanted to find if he had actually been there. He told his young friend "Yes, it is worth forty cents." The young man said, "You have never been there—it is sixty."

I might quote some remarks that I made yesterday that I think much of the amicable relations that now exist between the manufacturers and jobbers, is owing to the wise and conservative policy of your association, and also to

Digitized by Google

the care of your efficient president, and your industrious and energetic secretary, and I would predict that if the same policy is pursued in the future that has been in the past, that it will enlist the support and co-operation of manufacturers throughout the United States, and I believe that this little point you would see realized; that if this spirit continues in the future you will find the jobbers insisting that the manufacturer shall have a fair return on his manufactured product, and then you would find the manufacturer not to be outdone by his generous brother, would be protecting the jobber on every hand, both as to profits, and from competitive rivalry.

Mr. Clark, president of Clark, Quien & Morse, Peoria, Ill., spoke in behalf of the United States Eaves Trough Mfg. Association, as follows:

I wish in behalf of the National Association to thank this Association for what they have done, and also the individual members, and particularly those of New England and Boston, for their aid in carrying out our plans; and while we have not yet been able to get matters in such shape, so we can make a reasonable profit upon this line of goods, but we have arranged so you can make a reasonable margin upon pipe fittings, and we are indebted to the co-operation of Boston members who influenced certain manufacturers to work with us, and we hope within the next six months to be able to get the entire line in such shape that will afford every jobber a profit of from 15 to 20 per cent. Whether we will be able to accomplish it or not we are not certain, but we believe with the assistance of the jobbers of the country, who handle this line of goods that we can bring this matter about, and I wish to thank you for what you have done in the past.

The president: "I see Mr. C. S. Van Wagoner, of the Van Wagoner & Williams Hardware Co., Cleveland, Ohio, in the room and we would be pleased to hear from him."

Mr. Van Wagoner said: Four or five years ago when this association was started at Cleveland, I think the manufacturers were rather apprehensive as to what would be the attitude of the association towards them. I remember at that time they were in a speculative frame of mind as to whether they were going to be ignored. I am very much pleased to say that, as time has passed on we have not had any irritating interference or dictation. I don't know of a case in which the Hardware Association has acted in a dictatorial or arbitrary way to the manufacturers. Now, I think that is eminently satisfactory, so far as the manufacturers look upon this association's work. On the other hand, I think judging from my own experiences, that the social relations that have been cultivated among the jobbers of the country towards the manufacturers have been of very great service. I am sure that uppermost in my thoughts comes the feeling that the social part of these gatherings is very beneficial. I don't know how I could reconcile my position of a sort of hanger-on to the association if it was not that the jobbers of the country are so cordial towards the manufacturers who visit them at these times; and there certainly is a great deal in the good will that a man possesses towards another. If you have the friendly feelings of the jobbers of the country towards your concern it goes a long ways towards encouraging you. There are many turning points in business on which good will is the factor that turns the scale in your favor, and I believe in that one particular alone the manufacturers who visit these gatherings have had direct benefits. There is one thing, however, that always troubles me about dealing with the jobbers of the country in general. It is not this question of going out and soliciting outside. We always sell our goods through jobbers; but there is a terrible sense of the amount of cheek that the average buyer possesses; it is something appalling to the average manufacturer, and I would suggest, Mr. President, that a committee on "cheek" be appointed to look after the buyer of the ordinary jobbing concerns. Now, seriously, it is a pretty hard thing sometimes for a man to be told in a kind of an indirect way—a sort of innuendo—that he is not low enough. Well, now, I don't mean to say that the buyer is not a conscientious man, but I think in the course of time his trying it on in every direction gives him a facility in befogging and deceiving the innocent manufacturer to a point where he is actually done up when he should not be. If there is any one thing in the way of grievance that I have to present to the association, it is that I have got to take as a matter of pure faith the assertions of the jobber, that I am really not low enough and he must have another five, ten or fifty cut in order to meet his competitors; I must go it blind. Outside of this, I believe the association as a whole, in improving its business methods among jobbers, indirectly affects manufacturers favorably, and I should be very much pleased indeed if the manufacturers had an association similar to this. I think to-day the weakest point in the manufacturer's position is that one is used against the other, and the profit is ground out of his business. It is a very serious thing when our largest hardware manufacturing concerns are hardly able to make a profit on all of their large capital. Now, I think that the cheek of a buyer has a good deal to do with it. Now, gentlemen, I don't mean this personally. I feel, however, that there ought to be some way or other in which a man should not have to go it blind at critical points as much as we manufacturers do. Of course these are natural events and causes and we cannot help it. The manufacturers are looking for a loophole out of their troubles in the foreign market.

President: "We would like to hear from Mr. J. C. Birge, President of the St. Louis Shovel Co."

Mr. Birge said: Mr. President you know very well what I do, that I am not expected to say anything here, and when one appears before an intelligent body of men like this, he ought to have something to say, and should be prepared, because it is a bright body of men. I heard one of your members state this morning that it was the finest looking body of men he had ever seen. I would not like to dissent from the gentleman's opinion, because it was made by a Hardwareman. We have to be very careful what we say to the Hardwaremen. The relation of the manufacturers and the jobbers ought to be and is a very important one. For the two companies which I represent, I will state to the gentlemen here to-day, that we do not have on our books, the names of 25—centainly not more than 50—retailers, where five years ago, we had very many hundred on the list; and I think one of the two concerns which I have the honor to represent, has had relations with nearly every house that is represented here.

The gentleman spoke of the character of the Hardwaremen generally. I do think, sincerely, that as a body, it is made up of the best business men in America, and I state without any reserve, they are progressive men.

The gentleman standing over there referred to the relations between the buyer and the jobber. Of course you know the buyer is the worst of the two, although we have to do a little buying, but down in our town of St. Louis a few years ago there were two retailers. They were very intimate with each other, and used to make social visits with each other, and one of the retailers came into the other's store one day, and said he "Brown, I have learned a new trick." "Is that so, what is it?" "Honesty is the best policy." Well, Smith went home, and they didn't meet again for four or five weeks, until one day, Brown went down to make a social call upon him, and after talking some matters over, he said, "By the way, how does your new trick work? Have you used it lately; honesty is the best policy?" "Yes," he said, "I tried it on a Vermont dealer who came down here on a horse trade, and he beat the stuffing clean out of me." I suppose that every sales-

Digitized by Google

man has tried to be honest. I have made some deals, and I always tell the truth.

The relations between these two organizations are as vital to the manufacturers as they can be to the jobbers. The business of the manufacturer, dealing at least in the kind of goods which I have anything to do with, is to sell to the legitimate trade. The jobber, having a place in the trade, the manufacturer should recognize it. Now, I do not state that as a fundamental principle, and I wish to state without elaborating upon that, for the conclusions are simple; I do state that in our relations with the Hardware Jobbers Association, which have been very intimate, has brought me on various occasions in contact with your worthy president and secretary. They have been pleasant; their suggestions have been good, and we have profited very largely by it, and I thank them for what they have done, and I thank the gentleman here, many of whom I hope to meet before I leave here, for the cordial welcome which you have given to the manufacturers here.

The President: "I will take the liberty of calling on Mr. George Hart, of the Stanley Works New Britain, Conn."

Mr. Hart said: Mr. Chairman and gentleman; I am not accustomed to making impromptu remarks. I understand remarks are to be impromptu. It is so stated in the bill, and I regret not having had a little more notice in which to prepare myself. I am sure that I cannot add anything to what has already been said by the people from our own town, with reference to the benefits of this Association. We have heard something in regard to the character of the people in Vermont, and in regard to the people in Connecticut, there are two classes there—agriculturalists and manufacturers, but some of the manufacturers are *farmers*. As far as the question of the relations between the manufacturer and the jobber are concerned, I think that the question of organization, which is the prominent one in these days, has got to be carried back of the jobber to the manufacturer, in order to bring about the full and perfect results which this Association is trying to accomplish. I can understand that the organization of the jobber tends to the profit of the jobber, and indirectly to the profit of the manufacturer, but there is the other manufacturer to be considered, who is in competition with the rest of the manufacturers in the same line, and if the organization is to be carried clear through to a finish, it seems as though the manufacturers have got to be hooked up in the same kind of a way, and anything that this organization can do to bring about so happy a result as that, which will be profitable to the manufacturer, will of course, be very gladly welcomed by the people of Connecticut.

President: "I will call on Mr. James D. Foot."

Mr. Foot, of the Kearney & Foot Co., New York, addressed the Association as follows:

Mr. President: I had very little notice that I was expected to make any remarks. My views have already been so very well expressed that it seems useless for me to speak now. This organization has come to be respected by the manufactures. The manufacturer has got to get his goods on the market in the most economical way, and they have got to go through the jobber. I think if it was not for the Association to-day, we would be years and years behind. The work of the Association has put jobbers on the proper basis. Our standing is such to-day that it is possible for a man not classed as a jobber to be written a letter asking; "Are you a member of that Association—the general association of the United States?" There is another point touched upon in the president's address, which is of great advantage to the manufacture and jobber to consider; that is the subject of the classification of freights and things of that kind. Gentleman, it is possible for you to take up the various lines of Hardware manufactured and see that freights are maintained on an equitable basis. You can go before the traffic association with force and with strength. This is one point that I wish to make strongly. In my younger days I travelled a good deal, and saw my customers. As we advance in life, we find that manufacturing interests keep us nearer at home, and it is impossibe for us to get out and see those with whom we are doing business. In a meeting of this kind we can accomplish in a few minutes' conversation, what would take a great deal longer time to accomplish through travelling salesmen and correspondence.

At the conclusion of these remarks, a recess was taken until 2 P.M.

THE AFTERNOON SESSION

was devoted largely to the reports of standing committees, and to miscellaneous business. The report of the press committee was as follows:

To the members of the National Hardware Association: The work of the press committee has been exceedingly light, and certainly of not a very pressing nature, and there is no occasion for a detailed report. The chairman of the committee, Col. Maurice Belknap, has undertaken a more onerous duty in volunteering his services for the defense of our beloved country, being at present stationed at Porto Rico. We can but voice the sentiment of our Association in wishing him success and glory in his undertaking.

Respectfully submitted,

CHAS. KRUSE,

For the press committee.

That of Entertainment Committee was as follows:

Mr. President and Gentlemen: Your entertainment committee, mindful of the hearty support that the City of Milwaukee received when its name was proposed at your last year's convention, have spared no efforts to make your visit as pleasant and enjoyable as we know how.

We have chosen for headquarters, a hotel that would be a credit to any city, and the manager, Mr. Severance, has temporarily turned the ownership over to you during your sojourn. He simply requests that he be not discharged by you until after the convention, as he intends to make it as pleasant and homelike for you as lies in his power.

We have arranged for a social gathering or smoker on Wednesday evening at the Deutscher Club, for which Mr. Sammond, president of the Lyric Glee Club, has kindly tendered the services of his Club. Your committee begs of you to make this affair as informal as possible, and use this opportunity of becoming better acquainted.

In justice to you who come from far distant homes, and in justice to our city, your committee has insisted upon having one afternoon for a drive. We have arranged this for Thursday afternoon, Nov. 17th, and have bribed the man at the head of the weather bureau not to interfere with our pleasure. En-route we shall show you some of the industries that make Milwaukee famous.

Friday evening, at 8:30 P.M., the annual banquet will be given at this hotel.

Your committee has opened an office at this hotel, and members and friends can find same by looking for the sign on the door which reads: "National Hardware Association. Information Bureau." In this office all business pertaining to the entertainment committee will be conducted. Tickets for the smoker and banquet will be given out here. The railroad secretary can also be found in this office.

Some one of the committee will be constantly on hand from 9 A.M. to 8 P.M., and we trust you will come to this office for any information or assistance that lies in the power of the committee to give.

Respectfully submitted,

FRED PRITZLAFF,

Chairman Entertainment Committee.

Greetings were also brought from a number of sister Hardware associations by the gentlemen whose names are found below:

Digitized by Google

New York State Association of Hardware Jobbers, Charles H. Turner, president.

Philadelphia Hardware Merchants' & Manufacturers' Association, James H. Ritter, president.

Nashville Hardware Jobbers' Association, Col. R. M. Dudley.

Iowa Hardware Jobbers' Association, J. P. Patrick, president.

Pacific Coast Hardware & Metal Association, Brace Hayden, president.

Southern Hardware Jobbers' Association, O. B. Barker, vice-president.

New England Hardware & Iron Association, W. Chamberlain.

THE SMOKER.

As outlined in the above report, the members and their guests attended a smoker in the Deutscher Club. Special cars drew up before the Hotel Pfister at 8:30, each one decorated with electric lights in red, white and blue. On entering the club grounds, the guests were pleased at confronting a great placard in colored electric lights, spelling the words:

«WELCOME»

National Hardware Association.

A most excellent progrrmme of music had been prepared, and after the visitors were seated at convenient little tables, with specimens of Milwaukee's famous products before them, it was rendered as follows:

1. OVERTURE—America, - - - - - Tobani
2. THE BELLE OF NEW YORK, - - - - - Kerker
   Jos. Clauder's Otchestra.
3. SWORD DANCE, - - - - - - Gounod
   Lyric Glee Club.
4. WALTZ—The Song of Flowers, - - Clauder
   Jos. Clauder's Orchestra.
5. (*a*) HUSH ! - - - - - - Neidlinger
   (*b*) THE BLACKSMITH'S CHORUS, - - -
   Lyric Glee Club.
6. SOLO FOR CORNET, - - - - - -
   H. C. Epeneter.
7. RECOLLECTIONS OF THE WAR, - - - Beyer
   Jos. Clauder's Orchestra.
8. A TACK, - - - - - - Sprague
9. MY PRETTY MAID, - - - - - Caldicott
   Lyric Glee Club.
10. MEDLEY—Boquet of Melodies, - - - Clauder
11. AMERICAN PATROL, - - - - - Meacham
    Jos. Clauder's Orchestra.
12. BEAUTY'S EYES, - - - - - Shattuck-Tosti
13. A WET SHEET AND A FLOWING SEA, - - Lloyd
    Lyric Glee Club.
14. PLANTATION SONGS, - - - - - Brahm
    Jos. Clauder's Orchestra.

The music, both vocal and instrumental, was rendered in the highest manner by two of the noted musical organizations of this musical city. Songs of a patriotic and happy nature were also sung by the audience in the intervals between the numbers.

THURSDAY MORNING SESSION.

The Thursday morning session opened at 10 A.M., with President Supplee in the chair. The first order of business was the reading of a paper entitled, "Best Method of Arriving at a Selling Price of Miscellaneous Goods," by F. W. Hurty, of the Farwell-Ozmun, Kirk & Co., St. Paul, Minn. It was of great interest and attracted close attention.

The president then called attention to the subjoined questions which appear upon the official programme, and which had been propounded by Mr. Supplee, for the purpose of calling out the views of the members of the Association, upon the subject of giving more attention to the marketing of goods. These questions were as follows:

First. Are we not giving more attention to buying our goods than we are to marketing them?

Second. Are we not apt to think that the first is of greater importance than the latter?

Third. Is the person, or persons, in charge of the salesmen the best possible available selection you could make from those around you?

Before the general discussion was taken up, the president stated that he had invited Charles W. Emery, of St. Joseph, Mo., to read a paper upon "The Salesmen's Department." Mr. Emery was for a number of years in charge of the salesmen's department of the Wyeth Hardware & Mfg. Co., of St. Joseph, and has made a special study of all that pertains to this great and important department of the modern jobbing house. He has embodied his views and conclusions in a paper which he presented to this session of the Association. In response to the introduction of the president, Mr. Emery stated that this paper was now being published serially in *Hardware* the first number appearing in the issue of November 10th. (The second installment appears in to-day's issue.)

Mr. Emery's address was listened to with marked attention, and at its conclusion he received many congratulations for the clearest and ablest presentation of the subject that had yet appeared. An extended discussion along the whole line of conducting a salesmen's department and the necessity of such department ensued. On motion, Mr. Emery was tendered a vote of thanks, which was given heartily and unanimously.

On motion, the Association ordered that Mr. Emery's papers, with others, should be printed in a pamphlet immediately; and the secretary-treasurer was also authorized to send each member of the Association marked copies of *Hardware* containing these articles.

IN REMEMBRANCE OF MR. SUPPLEE.

The feeling was universal that some formal action should be taken by the Association to show its appreciation of the long and faithful service President Supplee had given and of his labors in connection with the creating of the Association and placing it upon the substantial foundation on which it rests to-day. This expression was voiced in the appointment of a special committee, whose duty should be the drafting of a memorial expressive of the above facts, and the selection of a suitable testimonial to accompany it. The committee, appointed by the vice-president, is as follows: George J. Laighton, New York; Alfred D. Clinch, New York: Charles H. Turner, Albany.

A VIEW OF MILWAUKEE.

Thursday afternoon saw no meeting of the Association, but was devoted to a carriage drive about the city as guests of the Reception Committee and the local Hardwaremen. A long line of carriages set out from the Hotel Pfister at 2:30, and points of various interest were visited, among them being the public parks, Pabst's great brewery, Kieckhefer Bros. mammoth tin-making establishment, etc. It was a delightful drive, despite the somewhat chilly atmosphere.

A number of the local associations held gatherings in the evening, such as the Iowa Jobbers' Association, the New York State Association of Hardware Jobbers, etc. At the gathering of the last named it was decided to hold the next meeting in February next, at Wilkesbarre, Pa., as one member of the Association resides in that State.

THE FINAL SESSIONS

were held on Friday forenoon and afternoon. The main thing of importance was the election of officers for the ensuing year. The absolute decision of Mr. Supplee not to accept office during the coming year caused the Associa-

Digitized by Google

tion to turn unanimously to H. H. Bishop, of the McIntosh-Huntington Co., Cleveland, O., who has for several years past acceptably held the position of first vice-president. It was the personal desire of Mr. Bishop that he should be excused, but the Association decided otherwise, and accordingly the following officers were chosen for the ensuing year:

OFFICERS FOR 1898-9.

President, H. H. Bishop, McIntosh-Huntington Co., Cleveland, O.

First vice-president, Col. Morris B. Belknap, W. B. Belknap & Co., Louisville, Ky.

Second vice-president, Brace Hayden, Dunham, Carregan & Hayden Co., San Francisco, Cal.

Secretary-Treasurer, T. James Fernley, Philadelphia, Pa.

Executive Committee:

John Bindley, Bindley Hardware Co., Pittsburg, Pa.

W. Chamberlain, Emery-Waterhouse Co., Portland, Me.

Samuel A. Bigelow, Bigelow & Dowse Co., Boston, Mass.

R. A. Kirk, Farwell, Ozmun, Kirk & Co., St. Paul, Minn.

Richard W. Shapleigh, A. F. Shapleigh Hardware Co., St. Louis, Mo.

John C. Koch, John Pritzlaff Hardware Co., Milwaukee, Wis.

These names were presented by Brace Hayden, on behalf of the Nominating Committee, which consisted of Brace Hayden, chairman; William T. Gummey, R. M. Dudley, John H. Robbins, C. A. Knapp, J. G. Standart. John T. Sterling moved that the report be adopted by a rising vote, as a whole, and that the secretary be instructed to cast the vote of the Association. It was so ordered, and when the decision was announced, it was greeted with applause.

President Supplee then said: I desire to say a few words before calling for the incoming president. I now have been president of this Association for four years, and I have called upon your newly elected president on numerous occasions, and no man has been more faithful than he. I have made requests upon him under circumstances which would have kept most men at home, and he always responded to my call. I have called upon him frequently by telegram, requesting him to be on a certain committee, whether distant from home or near, and he has responded to my request. He has been loyal to our Association and it gives me great pleasure to say to you that you have made a very wise selection, in my opinion.

Mr. Chamberlain proposed three cheers "for the incoming President!" They were given with a will.

Mr. Hayden said: Gentlemen, if you will permit me, I wish to say that Mr. Bishop has been prevailed upon to take this nomination at a great and serious detriment to himself. His firm has refused positively for a long time to have his name considered, and under the circumstances, I think we are all highly indebted to Mr. Bishop for permitting his name to be used.

Mr. Evans: I make a motion that you appoint a committee of two gentlemen to escort the incoming president to the chair.

President: I appoint Mr. Evans and Col. Dudley to do that.

Mr. Bishop was escorted to the chair, and spoke as follows: Gentlemen, I would be very insensible of the honor you have conferred upon me, if I did not in a very few words, express my appreciation of it. I want to first express my obligations to Mr. Hayden for the few remarks that he has made, which would otherwise be necessary upon my part. This is an office which I have not sought. To be candid with you, I don't want it very badly, because I have some misgivings in regard to my ability to discharge it as fully as it has been discharged in the past. However, a man can do no better than he is able to, and it is my duty to a body of men like this assembled before me, to perform that duty to the best of my ability. And those who know me are fully aware that I will do so. The future of this Association, in my opinion, depends not so much upon its officers, or the man who occupies the executive chair, as it does upon individual members. I would like to take the opportunity here presented, if possible, to impress that upon your minds, more strongly than it has ever been impressed before. You have had, during the past year, an executive committee consisting of your president, two vice-presidents, and six members—nine in all, who, as a matter of fact have done about all the work of this Association. This condition, as outlined to you in the report of the committee was not right. The combined wisdom of the trade is not contained in any nine men in this assemblage. It is in your power, and it is your duty to assist those officers to the extent of your ability. I contend that it is an absolute necessity for the life of this organization that every man, no matter what the size of his firm may be, no matter how important he may consider himself, as a portion of the organization, to put his shoulder to the wheel and push the entire organization forward, and in accepting the office of president, I want to do so with the feeling and pledge upon your part that any efforts I may make, or that the members of the executive committee who will be associated with me, will be seconded by you—that is by your advice and your counsel whenever you may be called upon, and each one will feel it his duty to come to the front.

Looking around upon this assemblage I see men who I know possess ability, and who seem to keep their light under a bushel. That is not right, gentlemen; we should all do our share of the work.

I can only say that I am deeply sensible of the honor you have conferred upon me. I propose to occupy the position to the best of my ability. I propose to keep it for a term of twelve months, if I am spared. In the course of the next twelve months you must think up some other man to succeed me. I renew my thanks to you, gentlemen.

President Supplee: With the exception of Mr. Koch, all the members have been on the executive committee before, and we would like to hear from Mr. Koch.

Mr. Koch said: Gentlemen, I did not come here with the expectation of being placed on the executive committee. I have not done much work in this assembly. You ought to have selected another man. I am pretty well tied down with work, but if you insist upon it that I shall take the office, I will do all in my power to do as much work as it is possible to do. I shall do all that I possibly can to assist the executive committee and the officers in a general way for the good of this Association.

The president: There are several members who have been elected again; the convention would like to hear from them. Mr. Brace Hayden, we would like to hear from Mr. Hayden.

Mr. Hayden said: Gentlemen, I am heart and soul in sympathy with the work of this National Association. I don't know of anything that would be of greater benefit to the trade at large than the work of this Association. I think it must be apparent to you all that an improvement has been made in many of our conditions during the past three years, and I am quite certain that much improvement could yet be made, and as we go on year by year I think our Association will strengthen, and I think it can be truthfully said before very long that what we have undertaken has proved of great benefit financially, morally, socially and every other way. I certainly thank you for your confidence, and shall do all I can to further the objects and interests of this Association.

W. S. Wright: Gentlemen, I would like to offer a resolution that the thanks of this organization be extended to the

Digitized by Google

officers and executive committee for their untiring efforts on behalf of the Association, and that each individual member of the Association pledge himself to loyally support them in their efforts, and give them all the assistance and co-operation in their power.

The resolution was unanimously carried.

Geo. J. Leighton: I desire to put a motion that we give to you as president during the last four years a special vote of thanks for your fidelity and for the benefits we have all received from your superintendence of this organization.

The motion was seconded and unanimously carried.

The president: It is not necessary for me to make any extended remarks upon that. I assure you that I appreciate it, and I appreciate the confidence reposed in me by the members here, and I have appreciated the number of letters which I have received in regard to that, and I appreciate your kind feelings towards me and the leniency you have extended toward me during all the time I have presided. I thank you.

REPORT ON PRESIDENT'S ADDRESS.

The committee appointed to prepare and present a report upon President Supplee's annual address, made their report, which was adopted, as follows:

Mr. Chairman and Gentlemen: Your committee to whom was referred the president's annual address, begs leave to report, first: After careful consideration of same, we find that the majority of the points touched upon have been duly considered by the Executive Committee. We note one exception, namely, that which pertains to the classification of freights, etc. This matter we would respectfully request, be referred to the Transportation Committee, with a recommendation that this committee be requested to keep up the work along this line commenced by our worthy president. The balance of his address we commend to the careful consideration of the members, as your committee consider this address of our president as one of the most valuable of the series of very valuable papers coming from that source. Your committee has hoped to incorporate in their report proper resolutions, etc., that would express the high consideration and esteem in which our president is held by this association. We feel that this matter will be given full justice by the special committee appointed for that purpose and would respectfully recommend that the resolutions when presented by this special committee be published and become part of the annual report of this convention.

THE FINAL SESSION

was held on Friday afternoon, at the usual hour. The most important thing considered was the place for the convention of 1899. Several cities aspired to the honor of acting as host upon that occasion. Brace Hayden extended an invitation in behalf of New York. John Bindley did the same for Pittsburg. James H. Ritter acted as spokesman for Philadelphia. Letters were received from prominent Hardwaremen of Richmond. Detroit was represented by a written invitation from the Governor of the State, Mayor of the city, and various commercial bodies.

After some discussion and a vote it was found that Pittsburg had it by a large majority. This was due to its central location, and possibly some of the delegates remembered the gathering of the clans, which was held there several years ago.

Resolutions of thanks were extended to the manager of the Hotel Pfister; to the people of the city of Milwaukee, and especially to the local members of the Entertainment Committee for the manner in which the association had been hospitably and handsomely entertained, after which the meeting adjourned.

VISITORS WELCOMED.

A large number of manufacturers were present at the convention and banquet and were made warmly welcome by the officers and members of the association.

AN IDENTIFICATION BADGE

to be worn in the buttonhole of each member was furnished, with a key, so that each might be known by his number. These badges were blue, with an anvil of gold, surrounded by the name of the association. They were presented to the association by the Ferrosteel Co., of Cleveland, Ohio.

THE ENTERTAINMENT COMMITTEE

exerted themselves from first to last for the benefit of visitors, and an information bureau was run all through the sessions, in a special room provided for that purpose. The burden, naturally, fell upon the Milwaukee members, who labored both night and day. The full committee for the past year consisted of the following gentlemen:

Fred C. Pritzlaff, Milwaukee, chairman; Hon. John C. Koch, Milwaukee; Erwin Foerster, Milwaukee; John R. Griffith, Philadelphia; Lorenz Maschauer, Milwaukee; Hobart Weed, Buffalo; T. James Fernley, Philadelphia.

THE J. D. WARREN CO. EXHIBIT.

A great many of the visitors found pleasure and profit in calling at room No. 5, parlor floor, of the Hotel Pfister, where an admirable display was made by the J. D. Warren Mfg. Co., Chicago. Mr. Warren was present in person, and was assisted by several of his office staff in showing the wonders and beauties of workmanship there displayed. All the modern boxes, cases, drawers, etc., which have found recent description and illustration in the columns of *Hardware*, and many which have not yet been shown, were set up as in actual use, and the visitor could see at a glance the handy and artistic manner in which the Hardware store of to-day is conducted, when arranged in accordance with the requirements of modern art. The expressions of approval were general, and the verdict was unanimous in favor of the economy and usefulness of the Warren appliances. A large frame on the office floor held various photographs in colors of these goods, and attracted considerable attention.

THE E. C. ATKINS & CO. SOUVENIR.

The members of the Association and visiting friends were pleased to find in their rooms a handsome box, some twenty-five inches long by six inches wide, covered with brown leather-finished paper, upon the lid of which were the words: "Compliments of E. C. Atkins & Co." Inside was a handsome and highly finished souvenir saw, presented by E. C. Atkins & Co., Indianapolis, Ind. It was one of their famous twenty-inch Gentlemen's Panel Saws, No. 53, silver-steel quality, Damaskeened. The eye was attracted especially by the beautiful finish, suggesting a temper of the finest kind. Etched upon one side of the saw was this inscription:

SOUVENIR OF
FOURTH ANNUAL CONVENTION
OF THE
National Hardware Jobbers' Association,
MILWAUKEE, NOV., 1898.
Presented by
E. C. Atkins & Company,
Incorporated,
Indianapolis, Ind.

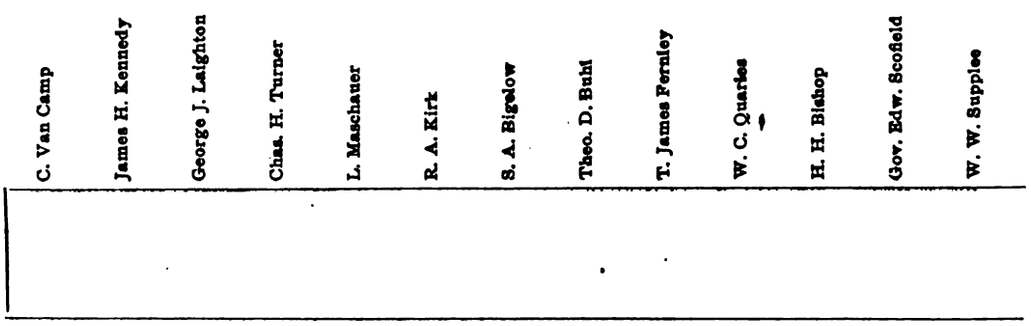
THE PRESS COMMITTEE.

In the absence of Colonel Belknap, chairman of the press commitee, Col. James R. Nutting, of the Sickels, Preston & Nutting Co., of Davenport, Iowa, was made chairman, and he was ably assisted in his work by George

Digitized by Google

A. Braun, of Bostwick, Braun & Co., Toledo, Ohio. These gentlemen were indefatigable in their endeavors to assist the newspaper men who were present, in obtaining all that was to be published, and also showed good judgment as to their selection of matter for publication. *Hardware* feels under special obligations to Colonel Nutting and Mr, Braun for their efforts in this direction.

THE ANNUAL BANQUET.



Extensive preparations had been made for the usual annual banquet, and a large number of the visitors remained over in attendance, although there were some who were compelled to take their departure at the adjournment of the convention.

It was given in the main dining-room of the Hotel Pfister, and was a success in every sense of the word. The guests assembled in the main office of the hotel, and at 9 P.M. proceeded by elevator to the top floor, where a scene of rare beauty was presented. Six tables ran the length of the room, and at right angles to them was the table for the speakers and invited guests, on a raised platform. These tables, with location of the guests, are shown in the accompanying diagram. The tables were filled with flowers, with great masses banked at the end of each, and the scene was one of unusual brilliancy. An orchestra and a glee club were in attendance, and furnished vocal and instrumental music during the evening. The following attractive menu was found upon the official programme at the plate of each guest:

Blue Points.
Celery in Branches. Haut Sauterne
Green Turtle, English Style.
Queen Olives. Radishes Roasted Salt Almonds.
Mousse of Oregon Salmon Mousseline.
Hot House Cucumbers. Potatoes Duchesse.
Filet of Beef Larded with Mushrooms.
Green Peas in Cases. Pontet Canet.
Punch Imperial. Sugar Wafers.
Roast Quail, Sur Canape au Cresson and Jelly.
Fried Sweet Potatoes. Scharzhofberger.
Combination Salad. Ice Cream, Brique Napolitain.
Assorted Cake. Fruits of the Season.
D'Isigny Cheese and Roquefort.
Toasted Biscuits. Coffee. Cigars.

The post prandial programme for the evening was as follows:

"CITY OF MILWAUKEE," - - Hon. David S. Rose, Mayor
"STATE OF WISCONSIN," - Hon. Edward Scofield, Governor
"THE MERCHANT AND MANUFACTURER IN STATE AND NATIONAL AFFAIRS," - - - - William C. Quarles
"THE GOOD FELLOWSHIP BETWEEN MANUFACTURERS AND JOBBERS,"
J. C. Spencer, Pres. Merchants and Manufacturers Association.

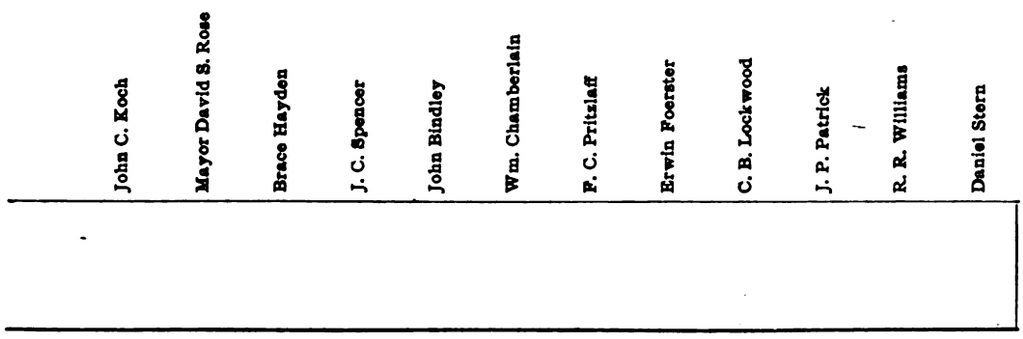
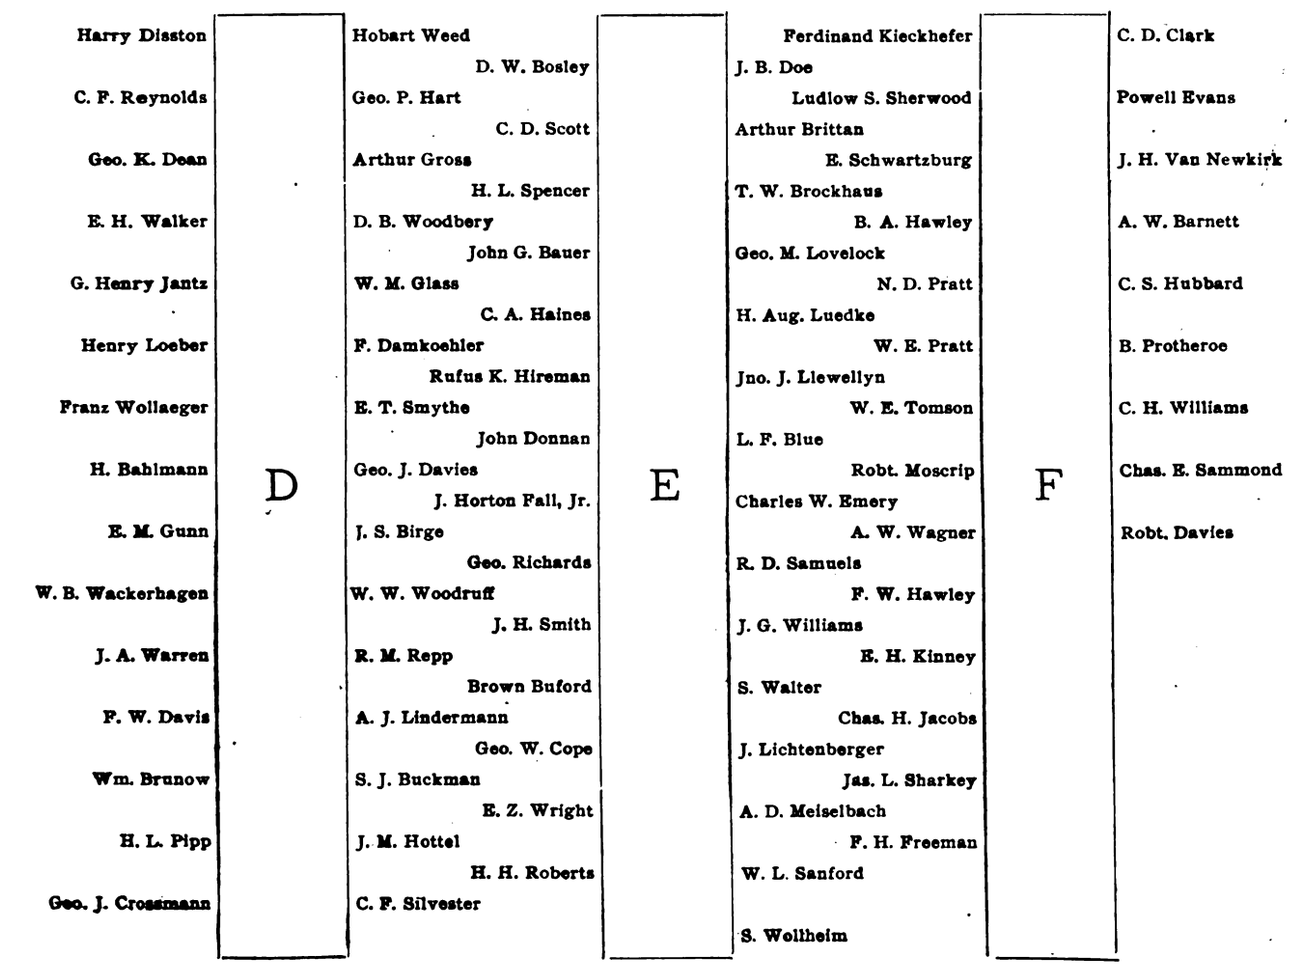
The following were the selections of music interspersed with the other exercises of the evening:



Lyric Quartette.
C. E. SAMMOND, 1st Tenor. D. PROTHEROE, 1st Bass.
C. H. WILLIAMS, 2nd Tenor. ROB'T DAVIES, 2nd Bass.
THE FUTURE MRS. 'AWKINS. - - - - Chevalier
Lyric Quartette.
JUANITA - - - - - - - Morton
Lyric Quartette.
BARITONE SOLO—Friar of Orders Grey - - Old English
Mr. Protheroe.
SPIN, SPIN - - - - - - - Jungst
Lyric Quartette.
TENOR SOLO—"The Day That's Gone Can Never Come Again," - - - - - - Waters
Mr. Williams.
KENTUCKY BABE - - - - - - Geibel
Lyric Quartette.
Bach's Solo Quintette.
MARCH—Hardwaremen's Association - - Bach
OVERTURE—Stradella - - - - Flotow
SELECTION—Telephone Girl - - - - Kerker
WALTZ—Adelyn - - - - - - Hall
PRELUDE TO "THE MASTER SINGERS," - - Wagner
POPULAR MEDLEY - - - - - - Beyer
SOLO FOR PICCOLO - - - - - Fuerst
MARCH—Our President - - - - Herbert



It was near eleven o'clock when Fred C. Pritzlaff, in behalf of the local committee, arose and called the assemblage to order. In a few well-chosen words he extended a formal welcome to the visitors, and then introduced the retiring president, William W. Supplee, as toast-master of the evening.

Mr. Supplee modestly bowed his thanks, in response to the storm of welcome that broke over him, and when permitted to be heard, declared that he had no intention to make a speech. He would better quote that old saying which proved the mundane character of affairs: "The King is dead! Long live the King!" "And now," he added, "permit me to introduce your president-elect, Mr. H. H. Bishop, of Cleveland."

The welcome extended Mr. Bishop was an explaination why his election had been made with such unanimous willingness. He was simply deafened with the applause. He congratulated the members of the association on the success of this gathering, urged a policy of concerted effort; thanked the manufacturers for their attendance, and concluded by declaring that his speeches hereafter would be made through the secretary.

At this point Mr. Fernley entered the room as an escort to Governor Scofield. The members arose as he entered and cheered him to the platform. When quiet had been

Digitized by Google

seconded, he was introduced by the presiding officer, and spoke as follows:

ADDRESS OF GOVERNOR SCOFIELD.

Gentlemen of the National Hardware Association: I congratulate you upon the successful convention which you have held here, and upon the improved prospects, now so noticeable, for the Hardware business, and all other branches of trade. The Hardware business is a sort of trade barometer, and in this country, especially, we have come to know that when the Hardware business is prosperous, or has good prospects, the outlook for all others is bright.

You have conferred an honor upon Milwaukee and the state of Wisconsin by holding your annual convention here. Yet, I have no doubt that you who are from other states have a very kindly feeling toward this one. Our diversified industries in Wisconsin, taking in the wide range of mining, lumbering and farming, offer a profitable field for the Hardware trade, and so what is our pride is your profit, I thank you for the compliment paid me in asking me to appear before you, and hope that Wisconsin may again before many years have the honor of greeting the National Hardware Association.

PRESIDENT H. H. BISHOP.

A WELCOME FROM MAYOR ROSE.

The next speaker introduced was the Hon. David S. Rose, mayor of Milwaukee. His address was eloquent, and left nothing to be desired as to the breadth and warmth of his welcome. He spoke of the diversified industries and wonderful manufacturing resources of Wisconsin, and each reference to a Hardware concern brought down the house.

The next speaker introduced was William C. Quarles, Esq., a member of the Milwaukee bar, who was often interrupted by applause. His subject was: "The Merchant and Manufacturer in State and National Affairs," and he spoke as follows:

SPEECH OF WILLIAM C. QUARLES.

Gentlemen: Probably the first man who ever attained prominence as a manufacturer, was old Noah. He had no elaborate type-written plans and specifications, no blue-prints and no wire nails, but he made a fairly good job of the ark, although 600 years of age. He also gained no little fame as a merchant. He was the proprietor of the first three-story department store on record. His inventory showed not merely a little of everything,—but all there was of it. He was the first man to corner the market. His establishment in later days would have been declared a trust, and would have tempted the fury of our Supreme Court. He handled every kind of stock,—except capital stock. Not only this, but it will undoubtedly be conceded that his Ark had some hard wear.—(ware).

Did you ever consider how indispensable the merchant and manufacturer are to our national success? Suppose that all of the merchants and manufactures of Chicago should be suddenly transported from Cook County to Heaven. (Such a supposition would tax your credulity as well as your imagination,) What sort of a city would you have left? The few thousand lawyers who remained would either amuse themselves by testing the merits of the new bankruptcy law, or begin habeas corpus proceedings against St. Peter for the return of their former clients.

The ministers, looking over the empty pews and lean collections, would secretly regret that your craft had furnished so many angels.

The doctors, those devoted men who are continually standing on the borders of life, welcoming the new comer and bidding farewell to the departing soul, dealing out congratulations and prescriptions,—at the usual rates, would be consumed with envy and regret.

If St. Peter had only confided to them his plans for a wholesale removal, it might have been accomplished with neatness and dispatch, and at the same time have furnished material aid to an honorable and ill paid profession.

You know that just now the study of genealogy is becoming a great fad in this country. Nearly everyone who makes any pretensions, aspires to be a descendant of Rameses II, or some other distinguished mummy. A day or two ago a friend of mine who was engaged in a search for ancestors, discovered that one of his great grandfathers had been a Bishop. "There" he declared, "I knew that the excellent blood of our family must have sprung from some such source." And ever since he has frequently referred to himself as a descendant of this distinguished person. There is one little fact, however, that he always forgets to mention, and that is that this same Bishop died a bachelor.

If we should trace the family chain of the Hardwaremen back, back through the musty ages, we might find for them a noble ancestry reaching back to old Vulcan, who was one of the gods of mythology. Like my friend, we might suppress the fact that he was at one time fired out of Olympus and carried a game leg as a badge of his disgrace. We might make prominent the fact that he was a peerless artificer,—the only manufacturer and jobber of thunderbolts on record.

He furnished the armor for the heroes of old, as you equip the fighting men of our day.

It is said that Vulcan fashioned out of gold two girls and endowed them with life and reason, that they might wait upon him. Even so your craft has two handmaidens,—science and art, more resplendent and glorious than the golden girls of Vulcan, who minister not to your own selfish needs and comforts, but to the enlightenment and advancement of the civilized world.

As the Greeks and Romans were wont to gather early to celebrate the skill and industry of Vulcan, the first Hardware merchant, so now do you, his business successors, touch elbows at these annual banquets.

Speaking of ancestors and descent, reminds me of the story of the Irish hod carrier who was working in Washington, carrying bricks up to the roof of the Spanish Legation in that city, which was in need of new chimneys. While progressing up and down on his weary way, a window on the first floor was opened and close to the ladder a flag-staff was protruded, bearing the obnoxious standard of Spain. Paddy viewed the red and yellow colors with dis-

Digitized by Google

dain, which speedily deepened into anger. Quickly deciding upon action, he carefully measured the distance, and giving his hod a tip, shot down its load of bricks so cleverly that the flagstaff snapped and the colors of the enemy tumbled, disgraced, to the ground. Descending his ladder to get a fresh load of brick, he was accosted by a passerby, who had viewed the whole proceeding with delight, as follows: "Pat, my boy, that was a good American brick that broke that staff." "Yis," answered the ready Hibernian, "but of Irish descent!"

It would be futile for me to attempt to detail the wonderful improvements wrought by our manufacturers or the blessings that mankind has derived from their skill and intelligence.

The record of their accomplishments is, in large part, the history of the world's progress.

The muscular strength with which we are endowed is certainly great, but it sinks into insignificance when compared with the mighty forces that are now harnessed by your cunning engines and appliances.

Man, with his unaided strength, can lift but one or two hundred weight, and that but for a moment, while with your pulleys and windlasses he raises a shaft of granite.

The strongest man may walk four miles an hour for a short time, but with the assistance of the achievements of the manufacturers' cunning, he speeds over the land at the rate of sixty miles an hour, without moving a muscle.

Formerly the voice of man perished with the very breath of the air upon which it was borne. Art came to his aid and invented the printing-press. The day before it was invented his voice could be heard by but a few thousands—the day after, he might impress his thoughts upon paper and send them to every hamlet of the globe.

Of what are these curious tools, instruments and machines composed, in which you gentlemen deal? They are wrought from the lifeless elements that surround us, from the inanimate growth of the forest, from the shapeless masses of the mine—dull, unorganized matter!

And whence comes the power and skill that works this magical transformation? What spirit has endowed the lifeless substance and who, out of a few beams of wood, bars of iron and steel, has constructed the all-powerful engine?

What magician has caused spindles and looms to ply their task as if instinct with life? This magician is the inventive genius of man.

The stunning din of your factories, the monotonous rattle, the tremendous power and the quiet, steady force of those humble useful iron servants, cause us to wonder at the mind which devised and the hand which created them.

The engine is more marvelous than the human brain in one respect, for labor does not wear away its vital force. The steel arm in the play is tireless and in its onward rush never falters from fatigue.

A few hundred miles from Milwaukee, within the limits of the State of Wisconsin, may still be seen remnants of the aborigines who once roamed over this entire continent. They are sheltered now by wretched hovels, are still largely dependent upon the uncertain results of the chase for a scanty supply of food, and are totally destitute of the luxuries which so greatly add to the sum total of human happiness.

Yet these are men, like ourselves, possessed of all the faculties common to the human race. Science is accountable for this vast gulf between savage and civilized life—science, which relieves the wearied grasp of the hand with the untiring grip of the vise, which substitutes stone, metal, leather and wood for weak flesh and bone.

All honor to the men who, in the infancy of the arts, invented the saw, the plane and the vise, while those who in later periods contributed to the wonderful system of modern implements and cunning machinery, are entitled to rank high among the benefactors of the race and the promoters of the civilization of which we are so justly proud.

"The Good Fellowship Between Manufacturers and Jobbers" was the last formal toast upon the programme, and was responded to by J. C. Spencer, president of the Merchants' & Manufacturers' Association of Milwaukee. He spoke very briefly and treated the subject in a humorous vein.

This ended the formal programme. The toast master called upon Gen. J. B. Doe, of Milwaukee, and Brace Hayden, of the United States, each of whom spoke briefly, after which, with the song of "Auld Lang Syne," the banquet came to an end.

"ON, STANLEY, ON!"

There was one especial feature of the evening's pleasure not down on the programme, but very successful and pleasing to the guests. For three days George P. Hart, of the Stanley Works, New Britain and New York, had been carefully guarding several trunks in his room, and not even Hobart Weed was permitted a peep at their contents. The secret came out when "cigars" were reached on the menu. The waiters came in loaded with packages which suggested that possibly the people of Milwaukee had decided not only to fill up their guests, but to enrich them before sending them home. At each plate was laid a combination card and cigar case of black leather, with sterling silver corner pieces. On opening this a compartment on the right side was found to contain three cigars of prime quality, while on the other side was a place for unpaid bills or money, as the owner might be in good or bad luck. On one side of the case, inside, were these letters in gold:

National Hardware Jobbers'
ASSOCIATION.
NOVEMBER, 1898.

On the opposite side was a golden reproduction of a hinge—it is rumored that the Stanley Works occasionally make a hinge—underneath which were these words:

Compliments of the
Stanley Works.

These cases will be in evidence wherever cash is carried, or money goes up in smoke, in any part of the great country of ours, during the coming year.

ANOTHER MEMENTO

of this successful meeting, was a golden button, presented by members of the Russell & Erwin M'fg. Co., who were at the convention, to be carried as a pocket piece. It was a little larger than a twenty-five cent piece and bore upon one side the monogram "R. E. Co." and on the other the inscription; "Milwaukee, Nov. 16, 17, 18, 1898." It was much appreciated, the only drawback to the pleasure of carrying it, being the fear expressed by some, that they might, during a temporary aberration of mind, lose it by passing it on some one for a ten-dollar gold piece.

PRESIDENT-ELECT H. H. BISHOP.

The elevation of Mr. Blshop to the presidency of the Association is a great compliment to that gentleman; and, what is still better, it is more than a compliment. It is a recognition of the fact that during the whole history of this Association, Mr. Bishop has been a faithful, intelligent, hard-working member; an official ready at any and all times to do all that lay within his power, to make the

Digitized by Google

organization a success. As first vice-president he has been so often called upon to prove his capacity, that his associates have learned to know his value, and have now placed him in a position where his experience and talents can be made subservient to the good of the Association.

Henry Hunter Bishop is a thorough Hardwareman, and has worked his way up to a responsible position in the trade He was born in Cincinnati, Ohio, in 1852, and remained in that city until twenty-three years of age. After the usual course of schooling, he entered the employ of the William Resor Mfg. Co., as office boy, and remainined there and in other employment in Cincinnati until 1875, when he entered the service of Morehouse & Wells, Hardware, in Decatur, Ill., as bookkeeper. He remained with them in various capacities, finally becoming one of the firm, until 1887, when he removed to Cleveland, Ohio, to take an interest as partner in the firm of McIntosh, Huntington & Co, His special work was in connection with the buying. When the concern incorporated as the McIntosh-Huntington Co., in 1891, he was elected to the office of secretary, which he still holds.

Mr. Bishop has always been a believer in the benefits sure to follow organization within the Hardware trade. He has been an active member of the Cleveland Hardware Association. He was present at the birth of the National Hardware Association. It will be remembered that in the fall of 1894, at a meeting of the Cleveland Association, Henry S. Blossom, of the W. Brigham Co., suggested that steps should be taken for the creation of a national organization among the jobbers, in order that some remedy might be found for the correction of various evils that had crept into the trade. The idea was received with favor, and steps taken to put it into effective execution; and the result was the successful gathering in Cleveland, in December, 1894.

Mr. Bishop was elected to the position of first vice-president in 1895, which office he has since continuously held. He has richly deserved the honor that has been laid upon him, and possesses in the highest degree the qualities that ensure success in this responsible work.

THOSE WHO WERE PRESENT.

The following is a transcript of the official register, showing those who were present:

Robert M. Repp, Pittsburg, Pa.
J. D. Ford, Kent, Ohio.
John H. Robbins, Boston, Mass.
Griff D. Palmer, Rochester, N Y.
W. B. Wackerhagen, Albany, N. Y.
Brace Hayden, New York, N. Y.
Bruce Keener, Knoxville, Tenn.
William W. Supplee, Philadelphia, Pa.
Samuel A. Bigelow, Boston, Mass.
W. H. Boetticher, Evansville, Ind.
E. Z. Wright, Utica, N. Y.
John Donnan, Richmond, Va.
Theodore D. Buhl, Detroit, Mich.
Charles H. Jacob, Detroit, Mich.
O. B. Barker, Lynchburg, Va.
W. S. Robertson, Richmond, Va.
F. A. Heitman, Houston, Tex.
W. T. Norton, Cleveland, Ohio.
C. A. Knapp, Sioux City, Iowa.
Brown Buford, Nashville, Tenn.
N. A. Gladding, Indianapolis, Ind.
W. C. McMurray, Pittsburg, Pa.
J. H. Fall, Jr., Nashville, Tenn.
Lee Richardson, Vicksburg, Miss.
Fred S. Merrick, New Brighton, Pa.
W. H. Pipp, Grand Rapids, Mich.
E. H. Leutkemeyer, Cleveland, Ohio.
E. M. Gann, Boston, Mass.
George Boole, Los Angeles, Cal.
J. H, Bonbright, Philadelphia, Pa.
E. T. Smyth, New York, N. Y.
C. T. Braffett, Chicago, Ill.
C. A. Lester, Duluth, Minn.
Tom Almgill, Philadelphia, Pa.
A. W. Barnett, Philadelphia, Pa.
Jos. M. Hattel, Philadelphia, Pa.
Chas. S Hubbard, Pittsburg, Pa.
T. James Fernley, Philadelphia, Pa.
R. A. Kirk, St. Paul, Minn.
H. L. Spencer, Oskaloosa, Iowa.
C. Herber, Oskaloosa, Iowa.
S. F. Stevens, Grand Rapids, Mich.
M. A. Patten, Indianapolis, Ind.
M. E. Rounds, Minneapolis, Minn.
L. A. Sayre, Newark, N. J.
Geo. M. North, Cleveland, Ohio.
E. D. Fisk, Providence, R. I.
Rufus K. Hireman, New Orleans, La.
Chas. A. Harris, Boston, Mass.
H. A. Taylor, Chicago, Ill.
James V. Booth, Elmira, N. Y.
C. A. Jewett, Cleveland, Ohio.
R. E. Gedney, Chicago, Ill.
Cortland Van Camp, Indianapolis, Ind.
W. F. Quigley, Indianapolis, Ind.
F. W. Hurty, St. Paul, Minn.
A. W. Milligan, New York, N. Y.
J. G. Standart, Detroit, Mich.
Geo. A. Braun, Toledo, Ohio.
P. B. Noyes, Niagara Falls, N. Y.
Geo. W. Herrick, Boston, Mass.
M. F. Kinsley, Niagara Falls, N. Y.
Chas. D. Clark, Peoria, Ill.
Harry L. Doten, Boston, Mass.
H. W. Waite, Boston, Mass.
Henry T. Atha, Newark, N. J.
William T. Gummey, Philadelphia, Pa.
P. E. Strauss, Boston, Mass.
J. A. Warner, St. Joseph, Mo.
J. G. Bauer, Topeka, Kan.
W. J. Landon, Winona, Minn.
A. W. Tredway, Dubuque, Iowa.
Charles D. Scott, Dubuque, Iowa.
Geo. W. Cope, Chicago, Ill.
H. H. Roberts, Chicago, Ill.
E. W. Crancer, Leavenworth, Kan.
T. G. Walther, St. Paul, Minn.
Edward W. Morley, Saginaw, Mich.
W. S. Wright, Omaha, Neb.
P. C. Devoe. Omaha, Neb.
Charles F. Schmidt, Burlington, Ia.
F. E. Corey, Cleveland, O.
Thos. Chamberlain, Detroit, Mich.
Arthur Britton, Chicago, Ill.
Elwood W. McGuire, Richmond, Ind.
Geo. M. Lovelock, Chicago, Ill.
W. L. Sandford, Flint, Mich.
A. L. Hunt, Chicago, Ill.
E. F. Schmidt, Chicago, Ill.
Wm. W. Howard, Chicago, Ill.
C. F. Landers, New Britain, Conn.
Geo. B. Richards, Kansas City, Mo.
E J. Lloyd, Pittsburg, Pa.
J. W. Crane, Springfield, O.
Frank B. Platt, St. Paul, Minn.
Charles L. Mead, New York, N. Y.
W. Chamberlain, Portland, Me.
W. H. Standart, Toledo, Ohio.
C. S. Van Wagoner, Cleveland, Ohio.

Chicago Hardware Hospitality.

A large number of the gentlemen en route to Milwaukee to attend the annual convention of the National Hardware Association were persuaded to remain for a few hours in Chicago to attend a luncheon given on Tuesday, November 15, by Wilton C. Smith, president of the Rockford Bit Co., Kokomo, Ind., with Chicago office at No. 115 Monroe Street. This luncheon was given at the Union League Club, at twelve o'clock. It was fully up to the high standard of that great organization in every respect, and reflected credit upon the hospitality of Mr. Smith and the great company which he represents. After an elaborate menu had been discussed speeches were delivered by the following named gentlemen: Wilton C. Smith, Hon. Thomas B. Bryan, an eminent resident of Chicago; Alex. H. Revell, president of the Union League Club; Col. James R. Nutting, of the Sickels, Preston & Nutting Co., Davenport, Iowa; N. G. Moore and George R. Peck, members of the Chicago bar; George S. Marsh, of the St. Paul Railway; James H. Ritter, of the Biddle Hardware Co., Philadelphia; Lee Richardson, of Vicksburg, Miss.; W. A. Talcott, of Rockford, Ill., and George W. Cope, of Chicago. After the luncheon was concluded the guests were taken to Milwaukee by a special train, leaving that city about 7 P. M.

The extent to which our columns are to-day filled with a report of the convention in Milwaukee will not permit us to give extended space to this gathering. It is with pleasure, however, that we reproduce one or two speeches delivered on that occasion. In welcoming his guests, Mr. Smith spoke as follows:

It becomes my pleasant duty as host to bid you welcome on this occasion, and at the same time I beg to express my high appreciation for the honor you do me by so generous an acceptance. When we consider how remote many of your homes are, it goes without saying that you have made a special effort to reach here at this time.

It would afford me much pleasure to be able to make my greeting as far reaching as this continent, from the fact that this company includes men from Minnesota to the Gulf and from the Atlantic to the Pacific. Breaking bread with us, and helping form this splendid composite picture of our commercial and manufacturing life, are representatives of many interests other than Hardware; and I extend to all a most cordial welcome.

Such occurrences serve to illustrate that the cord binding in a fraternal sense the jobber and manufacturer is no longer an imaginary one; their interests are identical—"Useless each without the other."

For this amicable condition of our relations we are largely indebted to the National Hardware Association, whose wise and conservative policy has enlisted the support and co-operation of Hardware manufacturers throughout the United States. I predict that if your present policy is continued and the present relations fostered the time will come—and at no distant day—when the jobber will insist that his brother, the manufacturer, shall have a fair margin on his manufactured products, and the manufacturer, not to be outdone by his generous brother, will at all times exert every influence to protect the jobber, both as to profits and competitive rivalry. These ideals perfected the age of good fellowship, will have been successfully inaugurated between the jobber and the manufacturer.

The address of Col. James R. Nutting, of Davenport, Iowa, was felicitous and expressive of the feeling of the occasion, and we here quote it as follows;

ADDRESS OF COLONEL NUTTING.

There never was a time when I was more pleased to be a member of the Hardware fraternity than now. I am glad I am one of Mr. Smith's friends. Mr. Smith resided at Davenport twenty years ago. Those who knew him there are sorry he could not have remained. Davenport is a healthy city, but Mr. Smith was afflicted with enlargement of the heart. It has continued to expand, however, until it is now large enough to take into its warmest embrace all of the Hardwaremen from ocean to ocean. I have known many Smiths that were good fellows. I am in favor of laws for the protection of American industries, but if I were the most zealous supporter of free trade, personal friendship might induce me to make an exception in favor of the Smith Mfg. Co. There can be no danger in producing too many Smiths, judging from the sample before us. There may be danger of producing too many augers and auger bits. If the Rockford Bit Co. continues to grow as rapidly as it has done during the last few years, the time will soon come when its products cannot be used in the United States, and for this, as well as many other reasons, I am in favor of annexing enough Islands of the Sea to keep this and other factories running night and day, so long as there is an island left desiring our friendship and the protection of our flag.

A few days ago, Mr. Smith, as chairman of the entertainment committee of the Union League Club, entertained in this room the President of the United States, and as the prayer book says, "others in authority." To-day he entertains some of the people who elect presidents, and who furnish sentiment that directs those in authority who recognize the will of the people is their law. The meeting around this festal board to-day is the preliminary opening of the National Hardware Association that convenes formally in Milwaukee to-morrow morning. There are representatives present from most of our great commercial cities. Important questions are to be discussed, and the result of the deliberations will influence public opinion, which will be received and recognized as the will of the people that we represent.

There is no doubt but the lawmakers at Washington will want to know our wishes as to the promulgation of pools, trusts and combinations. Concentration of capital is being urged by one, at least, of our standard trade papers, as the thing most needed in this age of competition and overproduction. Must our small manufacturers be crushed out of existence by two hundred million dollar syndicates as the natural result of evolution and development? A recent decision of the United States Supreme Court has proven that there can be laws made against gigantic trusts that can be enforced, and, for one I am glad of it. I wish every law now standing on our statute books opposing unholy pools of any kind that become monopolies and exact ex-

Digitized by Google

tortionate prices from the people could and would be enforced.

President Cleveland once said to me: "We have to depend upon the business men of this country for its safety; politicians have lost their heads." If this be true, I hope all the speakers present and those who deliver carefully prepared addresses at this convention will feel their responsibility and utter such words of wisdom as will best apply to the present business conditions that are changing so rapidly. The younger men here present can hardly realize how things have changed during the last decade. The successful business man of twenty-five years ago, employing the methods of that period, would fail now. We must face the conditions as they are. We could not change them if we would, and we would not if we could. The days of small sales and large profits have passed. The successful business man of to-day must have large sales, small profits and expect a large expense account. We have left our offices and stores to come to this meeting to learn how this can be best accomplished and to look to each other and the manufacturers of whom our worthy host is so prominent for this information.

Then here is to our honored host;
To the jobbers assembled here;
To the manufacturers from whom we buy,
For they, too, are very "*dear*."

Those invited to the gathering were as follows:

Robert M. Repp, Pittsburg, Pa.; J. H. Fall, Jr., R. M. Dudley, Brown Buford, Nashville, Tenn.; W. W. Woodruff, Bruce Keener, Knoxville, Tenn.; J. A. Warner, St. Joseph, Mo.; Gaius Paddock, O. H. Witte, St. Louis, Mo.; John Donnan, W. S. Robertson, Richmond, Va.; D. G. Fones, Little Rock, Ark.; John C. Kroner, La Crosse, Wis.; Lee Richardson, Vicksburg, Miss.; W. Q. Wales, Boston, Mass.; E. H. Walker, F. E. Smith, Peoria, Ill.: W. A. Talcott, Rockford, Ill.; H. R. Dering, A. C. Bird, N. G. Moore, A. J. Earling, J. H. Strong, Thos. B. Bryan, A. H. Revell, Geo. H. Heafford, Geo. S. Marsh, J. S. Smith, John Lambert, Geo. W. Cope, Percy J. Ford, F. A. Miller, J. H. Hiland, B. B. Felix, C. A. Rosecrans, Seymour Coman, Chicago, Ill.; Chas. F. Schmidt, Burlington, Iowa; W. D. Taylor, Cleveland, Ohio; Geo. Boole, Los Angeles, Cal.; F. H. Mason, Spokane, Wash.; J. S. Bonbright, J. R. Griffith, Philadelphia, Pa.; T. D. Honeyman, Portland, Ore.; Geo. P. Hart, New York, N. Y.; J. D. Moore, Birmingham, Ala.; H. A. Bruner, H. C. Davis, Kokomo, Ind.; Cortland Van Camp, R. P. Van Camp, W. F. Quigley, Indianapolis, Ind.; J. R. Nutting, Davenport, Iowa; A. C. Knapp, H. L. Spencer, Sioux City, Iowa; C. D. Scott, Dubuque, Iowa; F. H. Hill, Council Bluffs, Iowa; J. P. Patrick, Des Moines, Iowa; W. P. Stauffer, New Orleans, La.; T. J. Chamberlain, Detroit, Mich.; W. M. Glass, H. J. Lee, Omaha, Neb.; Hobart Weed, Buffalo, N. Y.; J. H. Kennedy, R. R. Williams, New York, N. Y.; Henry Bode, Jr., Cincinnati, Ohio; J. H. Smith, Columbus, Ohio; John Stollberg, Toledo, Ohio; J. H. Ritter, W. T. Gummey, Powell Evans, Philadelphia, Pa.

Banquet to Treasurer A. W. C. Williams.

The executive staff and branch managers of the Capewell Horse Nail Co., on October 31 made a new departure in the entertaining line, when they gave a complimentary banquet at the Hotel Heublin, Hartford, Conn., to A. W. C. Williams, the treasurer and general manager of the company. It proved an extremely felicitous affair for all concerned, and was made even more so to the guest of honor by the presentation of a handsome testimonial conveying a grateful expression of high regard and valued esteem for his able counsel and generous treatment, while at the same time congratulating him upon his return to health.

The whole affair was arranged in the nature of a surprise to Mr. Williams, which feature was faithfully carried out. A message was sent for him to meet a friend at the hotel, and upon his arrival he was immediately surrounded by the corps of branch managers, some of whom were supposed to be half-way across the continent, but who, as well as the directors of the company were on hand to join in the tribute to Mr. Williams' able management of the corporation's interests, which has made it one of Hartford's most successful and prosperous enterprises.

Twelve years ago, when the Capewell Horse Nail Co. was one of the smallest concerns making horse nails, Mr. Williams took up the product of the machine invented by Mr. Capewell, and, by his successful general management, formulated such phenomenal results that to-day the name of "Capewell" is of world-wide renown.

Covers at the banquet were laid for eighteen and the menu was one of Heublein's best efforts. The menu card was a gem. It was of eight pages, with a half-tone picture of Mr. Williams on the front cover, and on the back appeared the trade-mark, a design in horseshoe nails. Each guest's name was painted on a ribbon on his menu card and it was placed to indicate his position at the table.

Among those present were: John E. Gillette, Judge J. H. White and J. M. Allen, of the board of directors; President E. C. Lewis, of Waterbury; G. J. Capewell, vice-president and superintendent; Dr. G. C. F. Williams, secretary and assistant treasurer; H. O. Friedrichs, auditor; J. G. Hawley, chief clerk; C. W. Sponsel, assistant superintendent, and the following branch managers: W. G. Newbury, Chicago; A. J. Stevens, Detroit; F. O. Snow, St. Louis. C. S, Hawley, New York; Herbert Russ, Philadelphia; J. J. Reintgen, Cincinnati; F. O. Eldridge, Baltimore; F. H. Carpenter, Buffalo; H. E. Hardy, New Orleans. W. H. Standart and C. L. Mead, Portland, Ore., were unable to be present.

Dr. George C. F. Williams happily presided and called on President Lewis. The latter congratulated the branch managers and commended their object in honoring Mr. Williams. W. G. Newbury, of Chicago, rose to "the occasion." Then was brought forth a gorgeous gilt frame, three by four in size, mounted on a gold easel of beautiful design. It contained, artistically arranged, Mr. Williams' photograph in the center, in a circle around it those of his executive staff and branch managers. The names were placed beneath with their titles and an additional tablet read:

"Presented to Mr. A. W. C. Williams, treasurer and general manager of the Capewell Horse Nail Company."

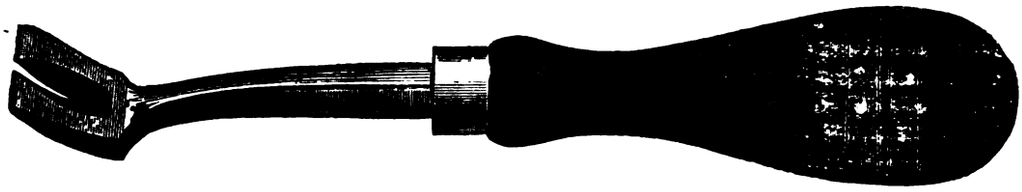
Mr. Newbury's speech of presentation was enthusiastically received.

Mr. Williams was much affected, modestly replied, and expressed his sincere appreciation of their thoughtfulness. He said that he thought himself fortunate in the selection of men around him, and in building up his business it had always been his aim to treat men fairly. He attributed his fortunate undertakings to integrity, fairness and kindly treatment and believed it in the line of everyone's duty.

Auditor H. O. Friedrichs followed with a toast to "the general manager." He told the story of how Mr. Williams had advanced his men to the full extent of their ability, and of their affection for their employer, so unusual in the business world nowadays.

Vice President and Superintendent G. J. Capewell responded to "The Inventor." The stories of his inventions were of much interest, and he told how capital and business sagacity had made them go.

Each of the branch managers replied in response to the call from Dr. Williams. The result was an outpouring of good will and the hope that Mr. Williams might live long to enjoy the fruits of his enterprise.



A weedless garden is always a hoe-made affair.—*L. A. W. Bulletin.*

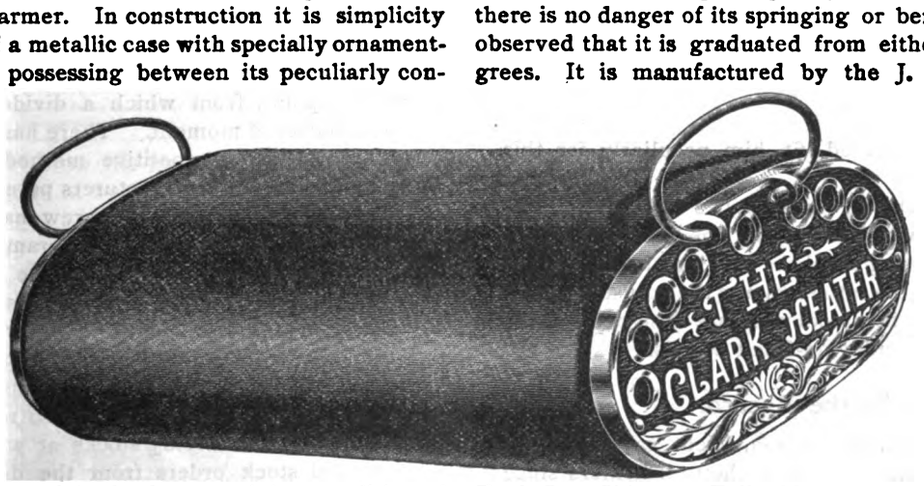
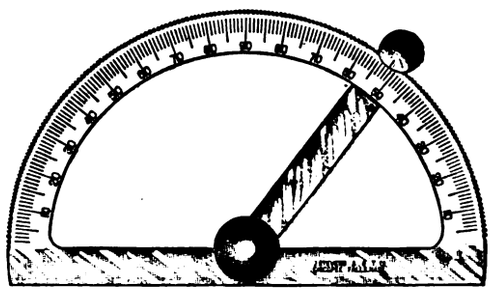
NEW GOODS AND SPECIALTIES.

Pryor's Hardware Specialties.



The W. W. Pryor Hardware Mfg. Co., Newark, N. J., W. W. Pryor & Co., sole agents, No. 124 Chambers Street,

New York, are largely engaged in manufacturing an extensive line of mechanics' tools and other Hardware specialties, many of which are characteristically known to the Hardware trade as "Newark, N. J., goods," under which title are known such articles as nail sets, bits, reamers and countersinks, pinking irons, belt and round punches, solid center and prick punches and rivet sets; conductors' punches, gas and burner pliers, spring and revolving punches, washer cutters, tack claws and screwdrivers, etc. They are also manufacturers of the "Foster" coil door spring, which possesses important features unobtainable in any spring of similar construction. We call attention to their advertisement on page 58. Those in the trade not already in possession of their catalogue should write for one.



The "Clark Carriage Heater."

The Chicago, Flexible Shaft Co., No. 158 Huron Street, Chicago and No. 97 Chambers St., N Y., are placing upon the market the "Clark Carriage Heater," which is a new device for the purpose of heating a carriage or similar conveyance, that should meet the approval of the trade. We give herewith an illustration of this valuable provider of comfort to the riding public. They seem to have solved the problem in a masterly manner, as nearly every previous contrivance having this beneficent object in view had some very fatal objection to its becoming popular. While previous methods involved the necessity of smoke, odor, danger or trouble, the present device changes all this. The Clark Carriage Heater combines all the requisites for a perfect carriage warmer. In construction it is simplicity *itself*, consisting of a metallic case with specially ornamented end plates, and possessing between its peculiarly constructed walls a material, the heat-retaining qualities of which are truly marvelous. The case is provided with a perforated box or drawer working in a metallic slide and held in place by a spring. Into this drawer is placed a piece of prepared carbon, known as Clark Carbon. The drawer is then inserted in heater and same requires no further attention until entirely consumed, which is accomplished in the space of from twelve to fifteen hours. All this is accomplished absolutely without flame, smoke, odor or dirt; even the combustion is not visible unless the surface is scraped, and, as it is not affected by draft, it cannot go out. The heater is oval in shape and is covered with either blue or dark green velvet plush to conform to the upholstering. The heaters are placed upon the market at $3 each; the "Clark" Carbons being 75 cents per dozen.

The "Angle Indicator."

This tool, as its name implies, is used to indicate or give angles. The construction can be readily observed from the illustration. It will be noted that the circumference is graduated, and has a serrated edge corresponding to the graduations. On the bar where it engages with the edge, are corresponding cuts, so that there is no possibility of an angle being indicated differently at different times, the notches always making the reading constant. This tool will be invaluable to those who make use of a universal bevel and similar tools, while it can be used in connection with lathe and similar work without the bevel or any other tools. The retail price is but $1.00, and as this is a strong tool, well made, of good quality of steel, .090-inch thick, there is no danger of its springing or bending. It will be observed that it is graduated from either end 0 to 90 degrees. It is manufactured by the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., who will be pleased to give full information.

No. 2 Brazer or Brazing Forge.

In their No. 2 Brazer or Brazing Forge, the National Cement & Rubber Mfg. Co., Toledo, Ohio, have met the necessary demand for a brazer that will do all classes of work, such as light and heavy brazing, tempering, welding, melting of metals, etc. This is a portable apparatus, fitted with three of their improved hydro-carbon adjustable

Digitized by Google

burners, with a large cast-iron coke tray supported by four iron legs. The tank, piping and joints are tested before leaving the factory, and fitted with a 40-pound pressure gauge, large floor pump and full instructions how to oper-

ate. By bedding in the tray with coke or coal and applying the center burner, you have a complete blacksmith's forge. Nearly all metals can be melted in crucibles by using the three burners with coke fire. Ask for their catalogue.

Small Hand Wrench.

The small hand wrench as here indicated is very convenient for holding such tools as taps, reamers, drills, etc. It is so constructed that it will hold either with round, square or oval shanks up to one-fourth inch in diameter.

This is a neat tool, strongly made, well polished and carefully fitted, and the price is but 50 cents. This will make a good line for a Hardware dealer who has any call for such tools. The manufacturers, the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., will send prices, etc., on application.

Dressing Tools for Grinding and Polishing Wheels.

Undoubtedly one of the most widely experienced experts in the carbon trade, so far as its special mechanical application is concerned, is Thomas L. Dickinson, No. 45 Vesey Street, New York City. He began his career in this work

with his father, and his forefathers for the past several generations have been engaged in similar lines.

For the past fifteen years Mr. Dickinson has devoted special attention to the manufacture of tools suitable to the dressing of the hard and unyielding faces of emery and corundum wheels, and of leather polishing wheels.

Long investigation has led him to the conclusion that, for accurate and effective work, the diamond-pointed tool, when properly selected, is without equal; and his years of

experience, as before stated, fit him peculiarly for this work.

He is now manufacturing three styles of tools for this work, which are herewith illustrated. The hand tool, which is adapted to the dressing of all the smaller wheels, is most generally used, while the lathe tool and the adjustable tool, which are set rigidly in a tool post, are designed for the dressing of very large and wide-faced wheels.

Breaks the Record.

The Novelty Mfg. Co., of Jackson, Mich., say they have never had so many late orders for their oil heaters since they were put on the market. Ordinarily they are through with the bulk of this trade and have commenced the manufacture of summer goods by November 15, but there has been no let up in the demand for heaters up to date. Their orders for last week were the largest ever booked for a similar period in November.

Manzanillo, Cuba, on the bay of that name, has a population of 12,000.—*Ex.*

Review of the Markets.

Hardware: The season is now approaching a close, and holiday goods are assuming an importance not previously noticed. Travelers are beginning to come in, new plans for the future are being made, some changes in present methods are anticipated by several concerns, a widening of territory being contemplated in some quarters, and a general preparation for hard work next season is apparent on every hand.

That we shall find the coming year full of enjoyable surprises is the belief of the thinking principals in the firms now directing the energies of our great industry.

Wire Nails: The lower prices recently adopted for current sales have not developed any surprising amount of business. At this season of the year it is doubtful if any large sales are anticipated. Prices remain nominally as previously quoted; taking the above conditions into account, they will probably remain so.

We quote as follows: To jobbers in car load lots, f.o.b., Pittsburg, $1.30; single carloads, f.o.b., Pittsburg, $1.35. The same advance on prices, for delivery in Cleveland, of 2½ cents a keg, and Chicago, Cincinnati and Louisville of 7½ cents a keg, continues in force. New York prices are quoted as follows: Carload lots on dock, $1.45; smaller lots from store, $1.55.

Cut Nails: The market is virtually without important movement, only a moderate business being noted. Prices remain about as previously noted, and we quote as follows;

Mill quotations of f.o.b., Pittsburg, are, for carload lots, $1.10 base. New York prices continue as previously quoted: Carload lots on dock, $1.25 to $1.28; smaller lots from store, $1.33 to $1.35.

Cordage: But little speculative life is noticeable in the market for this staple, demand being exceedingly moderate and prices well sustained by the manufacturers at prices previously given, which continue as follows:

Manila, 7-16 inch and larger	per pound,	9½	cents
" ⅜ inch	"	10	"
" ¼ and 5-16 inch	"	10½	"
Sisal, 7-16 inch and larger	"	8	"
" ⅜ inch	"	8½	"
" ¼ and 5-16 inch	"	9	"
" Lath Yarn	"	7½	"

Smaller quantities are held at the customary advance.

Screws: Although for a number of months past there has not been that cutting and slashing of discounts in the screw market which prevailed a year or more back, the conditions governing the market have been of an unsatisfactory and unprofitable character; they were generally regarded as being entirely unnecessary, and needing only a conference to produce results that would inaugurate a conservative policy from which a dividend might eventually be a matter of moment. There has of late been a freedom from sharp competitive methods, and the more friendly temper of the manufacturers permitted a meeting for considering the future of the screw market, which was held recently and resulted in a program being adopted which will be gratefully welcomed by the trade generally. In the list prices on iron and steel wood screws, advances have been made, more with a view of equalizing than seriously making advanced quotations, not covered by the difference in established discounts. It will be the policy of the manufacturers to so regulate the production as to avoid unwieldy stocks at warehouse, and to stimulate good stock orders from the dealers; while the agreement in regard to prices will make the market in future more regular and uniform than has been prevailing for some time past. We give herewith, as representative of the changes agreed upon, the scale of discounts announced by the Russell & Erwin M'fg. Co., New Britain, Conn , and No. 45 Chambers street, New York, to which those of all other associated makers conform:

Flat Head Iron	87½%
Round and Oval Head Iron	85%
Round and Oval Head Piano, Unpolished	85%

Digitized by Google

Fillister Head Iron	85%
Flat Head Brass	85%
Round and Oval Head Brass	82½%
Flat Head Bronze Metal	82½%
Round and Oval Head Bronze Metal	80
Flat Head Iron Screws, Blued, 5 per cent. advance on net.	

The following are the new list prices on iron wood screws to which revised discounts refer:

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 38 cents per gallon; in lots of 5 barrels or more, 37 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE CLEVELAND TRADE.

I wonder if the clerks read *Hardware*. If they do not, perhaps the proprietors will tell them that a good salesman makes customers feel that their trade is appreciated as an act of friendship. A salesman that shows indifference to this is out of place. He should aim to make every customer feel glad that he came to that store. The way to secure an advance in salary is to overfill his present position. If he earns more than he gets, he is on the way up. If he gets more than he earns, he is on the way down. He should never be more anxious about his wages than he is about his usefulness, for he has in his own hands the power to make both secure.

Success in business so largely depends on salesmen that there is little danger that the service of a salesman will be overlooked. Proprietors soon discover the one who is glad to do more than his work, and the one who spares himself by doing less.

The place for a lazy man is on the farm driving an ox team. The opportunity for advancement in mercantile business was never better than the present. No age or country ever presented a more inviting opportunity. Usefulness to the proprietor is the very best self-service. There is no lost motion; every stroke counts. Fear of lack of appreciation is weakness. Proprietors' interests, like the law of gravitation, are always at work. Anxiety to deserve appreciation should be foremost. Usefulness is sure to bring success; best places are wide open for men who are capable to fill them.

Manufacturers are prohibited from becoming interested in individuals and rewarding faithfulness, but the mercantile class are free from such degradation. Clerks have the advantage of having nothing to prevent their advance but themselves. The violation of fundamental principles by organized labor has done much to degrade laborers; and this is a potent influence in delaying prosperity.

Organized labor ought to, and would be a great benefit if it was under the control of intelligent officers. The men who prefer to work with their tongues rather than their hands usually get control, and ignorantly or purposely mislead their followers and put them in false positions, from which the poor women and children suffer. Demagogues, and sometimes officials, through pretended sympathy, aid in misleading them, when they well know the foundation principles of society are being violated, until necessity requires that the law be enforced, and the poor laborer who has been the dupe must bear the suffering. Mercantile occupations are largely free from this influence.

Digitized by Google

Trade continues good; merchants are beginning to inquire for prices for spring shipments on nails, wire, screen wire, poultry netting, binder twine, etc., which indicates a favorable outlook.

Business men feel encouraged by the result of the election, especially in the West, where the craze for some new experiment seems subsiding. If politics can be kept from interfering with business interests the country is sure to prosper. LOCKWOOD-TAYLOR HARDWARE CO.

THE PITTSBURG TRADE.

At this writing the representatives of the various jobbing houses are met in convention at Milwaukee to discuss the interests of the jobbing trade. The question box is to be employed to bring out matters of interest, and it will take the combined wisdom of all present to answer satisfactorily some of the puzzlers fired at them. There is no doubt that these gatherings are of value and bring clearly before the members matters concerning which they supposed perhaps their own house was only concerned, but which turn out to be a common affair in which all have an interest.

The big question at present is the expense of doing business; that is, the percentage on the dollar for marketing goods. Some way of reducing this must be found before the jobbing business can be profitable.

As intimated in our last letter, Mr. Carnegie made an interesting talk at the banquet held in his honor by our Chamber of Commerce lately. His subject—Pittsburg—gave opportunity to bring out our strong position as a manufacturing centre for steel and to give some good advice as to transportation, etc., in the future.

All the industries hereabouts are at work and fairly well employed—some rushed with business. One large concern building steel cars of latest fifty-ton pattern has orders to keep it employed with 3000 hands for months to come.

Trade in jobbing line is good, but not so heavy as was expected earlier in the season. The year will close ahead of 1897, however. LOGAN-GREGG HARDWARE CO.

THE KANSAS CITY TRADE.

Since last we wrote, Missouri has gone Democratic and Kansas has returned to the Republican fold.

"You pays your money and takes your choice."

On the two sides of an imaginary line which separates two States, you find two classes of people. One is "sot in its ways" and repeatedly votes the good old Jacksonian brand of statesmanship. The other is a frisky, experimental, yet acute people, who go from Dan to Beersheba and persist in doing marvelous things, to which the attention of other nations is called, if not from force of habit, at least from the effects of too much "politics."

Kansas, if nothing else, is filled with "political statesmen," and Missouri, if nothing else, is filled with Democrats. This is a distinction with a difference, under certain mitigating circumstances.

We have no idea that business in either State will suffer a collapse or palpitate with a "boom."

For a business tale, we need a new vocabulary or new conditions. It's the same old story. Delightful weather; steady markets; fair values for everything that one has to sell and plenty of money for the transaction of all legitimate business. Business failures are light; new business concerns succeed old with unaccustomed frequency, it seems to us, which indicates two things, either of which the "intelligent reader" can imagine is the more probable.

Individually we can cheerfully report a very steady and growing volume of business as compared with other periods at this time of the year. This favorable condition is one that will not "pinch out" either for many years to come. Kansas City, gentle reader, is all right, and don't you ever overlook this observation. Out here, we get such enlarged ideas, where an inch of land is not worth an ordinary farm, that we take delight in just swelling up. Bust, some day?

Yes, we will "bust" some illusions which our dear friends entertain toward the "rowdy West"—and one of the illusions which has already gone glimmering is that of "rowdyism" itself. We don't live on science and ethics seasoned with "culcha" and "eclat;" we haven't many multimillionaires nor poodles of pedigree; but when it comes to short horn bulls with pedigree or multi-millions of hogs with and without pedigree, or the ethics of a great big, robust, wide-awake, virile, progressive, stanch, intelligent citizenship, which has subdued and conquered problems of vast moral, commercial and political portent, then you want to cast your eye this side the Mississippi River, and, stretching from there to the farther confines of the continent, you find something of which Berkeley saw in vision as he wrote of "the course of the empire."

Come out West some day and see us grow.

In our next letter we will, with the editor's permission, tell you something of the biggest thing of the kind in the United States. You will be interested.

Wishing an abundant success to our brethren elsewhere, trusting that they will have reasons many to celebrate Thanksgiving, we are still the

GILLE HARDWARE & IRON CO.

THE ALBANY TRADE.

"Home again," not as the old song has it, "from a foreign shore," but from the beautiful city of Milwaukee on the shore of Lake Michigan, U. S., which was so advantageously viewed by the occupants of the fifty carriages bearing the delegates of the National Hardware Association Convention on their afternoon outing, Thursday. The convention itself was a great success, as testified by the many Hardware dealers present, and the meeting of so many representative manufacturers added greatly to the interest of the occasion.

The printed reports give excellent record of the proceedings, and will, no doubt, cause feelings of regret to the jobbers who were obliged to remain away, and miss actual participation in the meetings.

Tempora Mutantur is evident to all and *et nos mutamur in illis* must not be lost sight of. The necessity of keeping up to date and adopting modern ideas and methods was never more apparent as time rolls along, and formulating new systems in conducting business economically, as tonnage increases and profits grow smaller, keeps one on the alert. Many excellent views regarding the present business situation were exchanged, starting trains of thought that will ultimately lead to more satisfactory results in handling one's business.

Screws: The recent change in lists and the cutting off of several serial discounts, we understand, makes a net advance of about twenty per cent. on the average Hardware assortment. Even now the price is low, and will it not be higher ere long? With all the factories united, what is to prevent?

Tools: Considerable activity is noticed in this line, and a full display of these attractive goods of American make will amply repay the trouble, and possibly surprise the dealer who attempts it.

Digitized by Google

Cutlery: Increased sales were apparent, as Thanksgiving season approached and the coming of Christmas will now warrant early exhibits of our finest goods that buyers may be impressed with their beauty and utility for presents.

Orders: The mail is bringing them in larger numbers from customers and salesmen, and items and quantities show material increase. "A good cold snap" would enliven the trade in skates, and must soon be expected as winter must assert itself ere long.

The placing of orders for early spring goods by retailers is proceeding more freely than in the past few years and betokens excellent business in many lines greatly to the satisfaction of the jobber.

Collections average slow in some sections hereabouts. Possibly because stove bills carry a larger cash discount than general Hardware and command prompt pay, so we must wait. ALBANY HARDWARE & IRON CO.

Members of the Hardware Club.

At the regular monthly meeting of the board of governors of the Hardware Club of New York, held on November 22nd, the following gentlemen were unanimously elected to membership:

Lewis Cass Strauss, Tribune Building.
Willis Sharpe Kilmer, Binghamton, N. Y.
Peter Donald, No. 99 Franklin Street.
George H. Olney, No. 36 Dey Street,
D. P. McClelland, No. 104 John Street.
George L. Holton, No. 145 Fulton Street.
William D. Baldwin, N. 36 Park Row.
Henry C. Hulbert, No. 53 Beekman Street.
Walter Bernard Maynard, No. 253 Broadway.
J. D. Crary, No. 18 Broadway.
Harold G. Murray, Potter Building.
Ira E. Douglass, No. 280 Broadway.
Frank S. Smith, Times Building.
Meinrad A. Benziger, No. 36 Barclay Street.

Philadelphia Lawn Mower Co.

The Philadelphia Lawn Mower Co., No. 3107-3109 Chestnut Street, Philadelphia, Pa., have recently issued and are now mailing to the trade their catalogue for 1899, commemorating as it does their thirtieth year of manufacturing the Genuine Philadelphia Lawn Mowers, of which during that period of time they claim to have sold one million. The catalogue referred to covers an extremely wide assortment of these useful machines, from the 10 and 8-inch open wheels and open wiper with four and five blades to the 9¼ and 8-inch solid high wheels with four blades. They also manufacture a golf mower with 10-inch open wheel and eight blades, which is stated to be made on the correct principles of construction that insure a fine, close, even cut, while the draft is light, with simple action, and the construction durable. It is specially adapted for use on golf and cricket grounds and lawn tennis courts. While manufacturing so large a line of high grade mowers, in which every improvement is embodied known to mechanical perfection. They also manufacture several medium grade mowers, suitable for the wants of those who require a good working mower at a reasonable price. These are marketed under the name of the Drexel, which is an 8-inch high wheel, and The Gold Coin, having a 7-inch regular size wheel.

Included in the assortment shown in the catalogue are several styles of horse, pony and two man mowers, for use on large lawns, public parks and government grounds. The catalogue concludes with illustrations and prices of the Philadelphia Lawn Sweeper, Grass Collector and the several lawn sprinklers, which are specialties of large sale and commendable importance.

A boom in the wheelbarrow business may be expected to set in soon. An enterprising druggist on Broadway has discovered a new use for this already overworked article. In the front window of his store is a wooden wheelbarrow full of tooth brushes and "slopping over." This is, perhaps, equalled by the Fulton Street jeweler, in whose window is a flour barrel full of watches, numerous holes being bored in the side of the receptacle to show that the contents are the same all the way down.

Time used to fly, but now the wheelmen make a century run.—*Ex.*

Profits of Cash Discounts

In almost every line of trade a discount is allowed for prompt cash, for cash in ten days, and for cash in thirty days. The discount for cash ranges from the minimum of a quarter of one per cent. up to 10 per cent., and even to 15 per cent. in some cases. The discount for cash is a very important factor in business dealings, and yet, strange to say, it is recognized, apparently, by very few retailers.

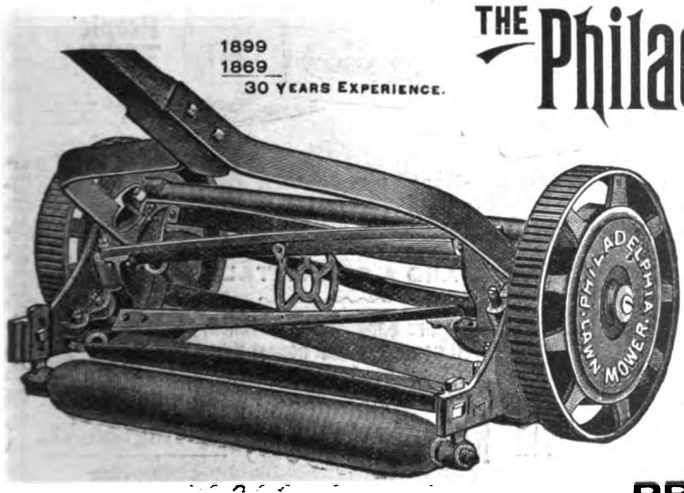
The shrewd, alert retailer, perceiving the advantages of cash discounts, will make it the earnest purpose of his business career to reach the point where he can discount all his purchases. It is not possible for all retailers to pay cash for all their purchases at all times, but in his own interest it is the duty of every retailer to take the advantage that the terms of sale offer, up to the limit of his ability.

Let us examine into these advantages. If the face value of a bill matures at ninety days and the time of sale is subject to a discount of 1 per cent per month, then 3 per cent. on the amount will be saved by cash payment. The ambition of the retailer should be to make this entire amount, but failing to accomplish this, he should save as much of it as possible, say at least 1 per cent.

To arrange one's financial system so that he may acquire the habit of discounting bills should be the aim of every enterprising merchant. It will be a surprise to those merchants who at present feel that they are selling at sufficient profit to be able to disregard a small matter of 1 per cent. a month, to see how fixed the discounting habit will become if it is only indulged in. It is a most admirable habit, because it is a profitable habit.

Anticipating payments by the retailer may be likened to the morning opening of his business place. If he opens fifteen minutes earlier than usual, the fifteen minutes thus gained will appear to be the longest fifteen minutes of the whole day. So it is with a dollar saved by discounting. While it is only a dollar, yet it seems larger than an ordinary dollar, because it comes as a special reward for the capable administration of the finances of the business.

The time-honored terms of the dry goods trade, for example—6 per cent. ten days, or 5 per cent. thirty days, with datings—were undoubtedly devised to induce retailers to anticipate their payments. Large profits follow from the acceptance of these terms. For example, a bill sold subject to 6 per cent. in ten days, or 5 per cent. in thirty days, with thirty days dating, practically gives the retailer 6 per cent. off in forty days, or 5 per cent. off in sixty days. Note that for the twenty days the buyer loses 1 per cent. or, in other words, that by neglecting the discount he pays interest at the rate of 18 per cent. per annum for that interval. On terms of thirty days net, or 1 per cent. for cash in ten days, the same loss of discount occurs if the bill is permitted to reach maturity. Successful merchants improve these opportunities to make money; hence the advantage of cultivating the discounting habit.—*John R. DeZeller, in Hardware Trade.*



Another Bicycle Paper Converted.

The trend of the bicycle business for the future is evidenced by the attitude of the papers devoted to that trade: as witness the following assurance from *The Bicycling World:*

"Exit the department store and other mushroom sellers of cycles and re-enter the cycle dealer. The field is not to be left open to the latter, however, for if the Hardware trade is to be believed, a very large slice of the business belongs to it and it is going to leave no stone unturned to obtain it."

The convict on a chain gang is always attached to his work.—*Exchange.*

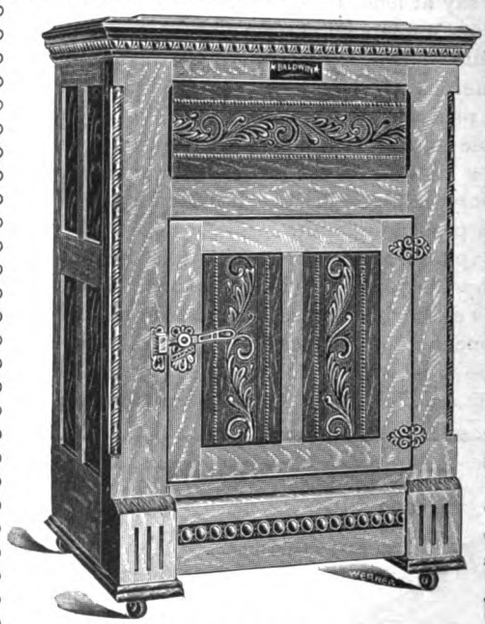
Marvelous Strides in Electrical Industries.

Surprising as the development of electricity in practical ways has been during the past twenty years, it requires a statistical exhibition of the subject, particularly on the financial side, to furnish an adequate picture of this progress. A recent examination of the subject furnishes some interesting details. For instance, it is stated that as recently as 1884 the total investment in electrical appliances throughout the United States did not aggregate much over $1,000,000, while at the present time the total capitalization of electrical railroad, lighting and other concerns is put down as fully $1,900,000,000. The 14,000 miles of electrical railroads which exist to-day in the United States represent a capitalization, at its par value, of about $1,000,000,000, while the electric lighting stations and plants in the country are believed to represent an investment of fully $600,000,000, the capital involved in the telephone business and all its ramifications being placed at not less than $100,000,000.—*Bradstreet's.*

The Berlin Iron Bridge Co., East Berlin, Conn., are erecting the extension of the foundry for the Benjamin Atha & Illingworth Co., Harrison, N. J. This extension is 51 feet wide and 152 feet long. The framework is of steel throughout. The sides are covered with corrugated iron on steel purlins, and are arranged for suitable doors and windows. The side columns support a 30 ton electric crane having a span of 46 feet. The roof construction is of steel trusses and purlins arranged with openings in the roof for skylights.

Hardware Dealers!

Are you thinking of adding a line of cycles to your stock this season? It will pay you to do this provided you get the right line of wheels. This is easily proven by the large number of Hardware dealers now handling them with profit. . . . . .



Iver Johnson Cycles

Are now sold by many Hardwaremen throughout the country and each year sees the increase of this branch of their business. Suppose you write us or let us send a salesman to talk the matter over with you. . . Perhaps you already carry a line of our Fire Arms. If so, you know their merits. Our cycles are equally as good. . . . .

—Let us hear from you.—

New Hardware Stores.

Chattanooga, Tenn.—The Chattanooga Mfg. Co. has been organized by W. R. Patten and W. E. Hendrick to conduct a plumbers' supplies business.

Goldsboro, N. C.—The Goldsboro Hardware Co. has been incorporated by G. A. Norwood, Jr., H. B. Barker, Jr., W. E. Jenkins, W. H. Dardin, Thos. I. Sutton and J. W. Winslow. Capital stock, $10,000.

Lima, Mont.—E. A. Baily is so well satisfied with the business done at his branch store in Centennial Valley that he has put in a complete line of Hardware.

Reynoldsville, Pa.—Hall & Barton, Hardware, have opened in Centennial Hall building.

Shucktown, N. Y. — Olin Seager has opened a Hardware store, intending to keep a full assortment.

Troy, Idaho.—W. Herrman, the Genesee Hardware merchant, has opened up a branch store here.

Changes and Improvements.

Athelstan, Ia.—Harry R. Tennant, Hardware, etc., succeeded by J. W. McCann.

Avoca, Ia.—Aug. Tanke & Co., agricultural implements, succeeded by Fred Tanke.

Bloomfield, Ind.—Bynum & French, Hardware and agricultural implements, succeeded by French & Shields.

Carthage, N. Y.—Ed. H. Montondo has sold his block and interest in the Hardware firm of Montondo Bros., at Natural Bridge, to his brother, J. N. Montondo.

Chattanooga, Tenn.—The Chattanooga Hardware Co., improving place of business, corner of Seventh and Market Streets.

Detroit, Mich.—The new Northern Hardware & Supply Co., of Menominee, has bought out the immense jobbing stock of Buhl, Sons & Co., of Detroit, and has purchased the mill and mining stock of the Menominee Iron Works Co.

Duquesne, Pa.—A. W. Kennedy, Hardware, reported to have sold out.

Eau Gallie, Fla.—George T. Paddison & Co., Hardware and lumber, dissolved partnership Nov. 1st. Mr. Paddison will continue the lumber branch of the business and Mr. Bennett will carry the Hardware line.

Elmira, N. Y.—E. Buhr, the Hardware merchant, will shortly move his establishment to the store formerly occupied by W. O. Monroe, on Oakwood Avenue.

Greenfield, Ind. — Thomas & Jeffries, Hardware and agricultural implements, succeeded by Thomas & Son.

Harriman, Tenn.—J. O. Hanks, Hardware, stoves, etc., selling out business.

Hiawatha, Kan.—Sam Bradahl has purchased the Hardware stock of A. B. Prouty and moved it into the Bradahl building. Mr. Prouty has purchased A. Shober's harness business and also moved it into the Bradahl building.

Hopkinsville, Ky.—Forbes & Bro. are preparing to erect another immense addition to their mammoth establishment. When it is completed, which will probably be this winter, the Hardware and machine department will occupy the largest storeroom in Kentucky. The dimensions of the addition when the building is completed will be 100 by 120 feet. The front will rest on Main Street, extending back more than half way to Virginia and it will be flanked on the north by Tenth and on the south by Eleventh Streets.

Jamesport, Mo.—R. L. Isherwood, Hardware and agricultural implements, sold to C. & F. McClung.

Ladonia, Mo. — Alexander & Rippey, Hardware, succeeded by E. A. Mounts.

Montgomery, Ala.—The Tullis Hardware Co. has just moved into new quarters on Commerce Street, the store recently vacated by Griel Bros. & Co. The firm's business has been gradually growing from the time they opened in this city. The firm has determined to make a specialty of their retail trade, keeping everything that can be found in a regular department store. In their new quarters they are handsomely fixed up, and are prepared to fill orders for anything to be desired in their line.

Nashville, Tenn.—Tenison Son, wholesale Hardware, succeeded by A. M. Tenison & Son.

Pekin, Ill.—A. L. Meyer, Hardware, succeeded by A. L. Meyer & Co.

Pierce, Neb.—T. W. Guy has sold his interest in the Hardware firm of Guy & Keppert to J. G. Griswold, of Madison, who expects to move here at once. The new member of the firm is an expert tinner and has had years of experience in the Hardware business.

Pittsburg, Pa.—Reiter & Armstrong Ltd., Hardware, dissolved. H. C. Reiter continues business.

Pullman, Wash.—Henry Chambers & Co., the Hardware merchants, have sold their stock to Charles Waters, of Davenport, and E. E. Plough, of Harrington, the new firm to be known as Plough & Waters. Both of the new merchants have moved their families to Pullman and will reside here permanently. Mr. Chambers will remain in Pullman, where he has lived for eight years.

Rich Hill, Mo.—D. W. Johnson, advertising to sell out on account of impaired health.

Santa Monica, Cal.—J. S. Wilson, Hardware, etc., succeeded by Jackson Bros.

Spokane, Wash.—W. J. Herman, a leading Hardware and furniture dealer of this place, has opened a branch store at Troy, with J. O. Finson in charge.

St. Albans, Vt.—H. G. Folsom & Co. have opened at their Hardware store, No. 138 Main Street, a very complete stock of crockery, china, glassware and lamps which they have recently purchased. The stock will comprise all that is new and beautiful in these wares and will be one of the finest line of these goods in Northern Vermont. The firm of H. G. Folsom & Co. has built up a large trade in Hardware, and with this addition to its business hopes to achieve even greater success.

Business Embarrassments.

Bandon, Ore.—George Schroeder, Hardware, reported to have made an assignment.

Pigeon, Mich.—Foster & Challis, dealers in farm implements and Hardware, have made an assignment to F. W. Merrick, of the Farmers Bank.

Greenville, Texas.—W. J. Taylor, Hardware dealer at Commerce, made a general assignment, filing a complete schedule of liabilities and assets. Sixty-one creditors are named with liabilities placed at $13,077; assets estimated over $20,000. P. A. Norris is named as trustee.

Paris, Texas.—W. M. Lea, A. Lea and J. M. Lea, composing the firm of Lea Bros., doing a Hardware business at Sherman, filed a petition for bankruptcy in the Federal Court.

Fires in Hardware Stores.

Athens, Tenn.—Bayless & Moody, Hardware, etc., damaged by water at a loss of $100. Fully insured.

Bristol, Vt.—E. C. Dike & Co., burned out. Damage, $7000; no insurance.

Crisfield, Md.—George W. Long & Co., Hardware, store, etc., damaged by fire.

Niagara Falls, N. Y.—E. H. Cannon, Hardware, suffered loss by fire, caused by explosion of oil stove, amounting to $2500 on building and stock. Covered by insurance.

Pekin, Ill.—Weyrich & Son, Hardware and agricultural implements, damaged by fire; fully insured.

Ricev ille, Tenn.—The Hardware store of J. M. Vicars & Son was destroyed by fire. Loss, $2000; insurance, $500.

Tobias, Neb.—J. C. Chaloupka, implements, destroyed by fire. Total loss, $2200; insurance, $1500. Cause of fire unknown.

Wichita, Kan.—Houck's Hardware store, No. 116 East Douglas Street. Damage, $100. insured.

Burglaries in Hardware Stores.

Buffalo, N. Y.—A. S. Reeslander, cutlery, etc., valued at $100.

Carlisle, Pa.—Morris & Riley, Hardware; loss, $150.

Cincinnati, Ohio.—John Buchler, No. 710 Main Street; cutlery, razors, shears, etc., amounting to $500.

Lubec, Me.—Kelly's Hardware store; shot guns and rifles valued at $50.

Pittsburg, Pa.—Folks Hardware store; large quantity of cutlery. Amount not stated.

Taylor, Texas.—The Taylor Hardware Co., store burglarized and a quantity of goods stolen.

Toledo, Ohio.—Ketel Hardware Co.; loss, $50.

Westport, Conn.—Guyer & Co; loss, $300.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Atlantic, Ia.—A broom factory has been started by I. Sandburg & Son on West Fourth Street.

Camden, N. J.—The Gale Mfg. Co. have filed articles of incorporation. The objects of the corporation are to buy and sell window sashes and general Hardware. The capital stock is $50,000, and the amount paid in is $40,000. The corporators are Rufus E. Eggleston and Harry Eggleston, of Philadelphia, and Lewis' H. Wilson, of Camden.

Corfu, N. Y.—A new enterprise has been undertaken by Nelson A. Brown. He has rented part of the Barden block on Main Street and will open a factory for making brooms.

Kansas City, Mo.—The Springless Lock Co. have filed articles of incorporation. Capital stock, $5000. Incorporated by J. J. Kendrick, H. B. Coleman, J. E. Dusbach and others.

Lincoln, Neb.—The Woodmansee & Hewitt Mfg. Co. has filed articles of incorporation with the Secretary of State. The capital stock is $40,000 and the incorporators are Harrison Woodmansee, J. J. Hewitt and T. D. Hewitt. The business of the company is to manufacture and sell windmills and pumps.

Maumee, Ohio—A window glass factory to cost $50,000 and to employ 125 men is about to be built.

Moline, Ill.—The Eastern Moline Plow Co. has been incorporated; capital stock, $50,000; incorporators: G. A. Stephens, N. Gallen and C. R. Stephens.

New Haven, Conn.—The American Plating Co. has just been organized with a capital stock of $5000. This company will carry on a plating and japanning business and will also manufacture rods and Hardware.

Peoria, Ill.—W. A. Selby, a son of James Selby, late of the firm of Selby-Starr, has leased the old Fort Clark power house, at the end of Monroe Street, and will soon be ready to start manufacturing a full line of farm implements and machinery.

Portland, Me.—The Saylor Rubber Co. has been organized for the purpose of manufacturing and dealing in all kinds of rubber goods, with $150,000 capital stock, of which $500 is paid in. The officers are: President, F. G. Saylor, of Boston, Mass.; treasurer, Chas. J. Southwick, of Winthrop, Mass.

St. Louis, Mo.—The Home Lead Co. have filed articles of incorporation, with a capital stock of $130,000; fully paid.

Changes and Improvements.

Akron, Ohio.—The Frantz Body Co. have purchased the plant of the Akron Hardware Co. They will manufacture bodies for carriages, giving employment to 100 men. Active operations will begin shortly.

Cleveland, Ohio.—The Champion Rivet Co., which occupies a leased building on the C. & P. tracks near Euclid Avenue, has decided to erect a building of its own. The new building will be located on the C. & P. tracks near Union Street. Employment will be given to about 50 men.

Eaton Rapids, Mich.—The Eaton Rapids Axe Factory, at Petreville, has been leased by Holcomb & Bunker, who will commence operations immediately,

Elwood, Ind.—The defunct forge works have been purchased by the Wright Spade & Shovel Co., of Anderson. New machinery will be put in, and the works will be converted into a rolling mill, to manufacture heavy sheet iron for the Anderson plant.

Ithaca, N. Y.—The Ithaca Gun Co. have purchased the entire plant of the Wilkes-Barre Arms Co., makers of the Wilkes-Barre and Parry guns. The whole equipment will be moved to Ithaca and added to the plant of the Ithaca Gun Co.

Kansas City, Mo.—The McCormick Harvester Co. have concluded negotiations for the vacant property at the northeast corner of Hickory and West Thirteenth Streets, adjoining their present building, and will erect a four or five-story warehouse 120 by 127 feet. The new building will cost about $70,000.

Kansas City, Mo.—The four-story brick business block at Nos. 1416-18 West Eleventh Street has been purchased by the J. S. Case Threshing Machine Co., of Racine, Wis., and will be used as a Western headquarters for the implement company.

Kansas City, Mo.—The officials of the Eagle Mfg. Co. announced that increasing business has made an addition to the plant, in the shape of a large warehouse, necessary. The new building will be one story high, and built of brick. Forty by 250 feet will be its dimensions. The plans have already been drawn and ground will be broken for the building shortly.

Kokomo, Ind.—The capital of the Kokomo Rubber Co. has been increased from $50,000 to $100,000.

Lorain, Ohio.—The formal transfer of the enormous business of the Johnson Co. has been made to the Lorain Steel Co.

Mansfield, Ohio.—The new structural iron building of the Lean Harrow Co., which has been in course of construction for some time past, is nearing completion, and will be ready for occupancy shortly. The building is substantially built. It is a one-story brick building, trussed with steel, and its dimensions are 60 by 306 feet. It has a slate roof and will be equipped with a lot of new machinery and latest improved appliances for work. In the building will be assembling room, paint shop and warerooms.

Muncie, Ind.—The White River Iron Mill now owned by T. F. Ross, will soon pass into the hands of William Martin, a wealthy iron manufacturer of Pittsburg. The mill is one of the largest of its kind in the West, but has not been running with a full complement of men for some time.

Springfield, Mass.—Members of the firm of Bausch & Harris, who operate the Brightwood machine and tool-making factory, are now considering plans for the erection of a large addition to their plant. It has been estimated that the addition will cost about $25,000, and when built will give the plant the shape of a quadrangle. More engine room is required, and this will be included in the plans.

Toledo, Ohio.—The Union Mfg. Co. have decided on a new departure—that of manufacturing door and window screens.

Toledo, Ohio.—The Prentiss Tool Co., of New York, Chicago and elsewhere, are purchasing the machinery of the Yost bicycle plant, and it is being rapidly shipped out. When the machinery has all been removed the disposition of the building will be made, but who will take it is a matter of doubt yet.

Toronto, Ont.—The Cockshutt Plow Co. have just erected a large new five-story warehouse and shipping room at a cost of $10,000, and are to-day engaged in the building of new and handsome office premises, which will cost, when completed, something near $5000.

Toronto, Ont.—Within the past twelve months the Verity Plow Co. commenced the building of a new factory at a cost of $75,000. This factory is almost completed and ready for occupation.

Troy, N. Y.—The plant of the Empire Stove Works, at the corner of Ida and Second Streets, has been purchased by Felton & Hughes, who will conduct the business under the new firm name. The new proprietors ore W. A. Felton, for several years manager of the Empire Stove Works, and for forty years an employe of the company, and B. F. Hughes, who has been an employe of the company for twenty years.

Recent Embarrassments.

New York, N.Y.—Henry T. Bragg, manufacturer of light machinery and patented devices, at No. 73 Watt Street, corner of Greenwich Street, has made an assignment without preferences, to James S. Fitch, of Yonkers.

Recent Fires.

Lafontaine, Ind.—The handle works of John L. Davis & Co. have been destroyed by fire of unknown origin. The loss of machinery and stock is $3000; insurance, $2000.

Toronto, Ont.—The McDonald Tin Mfg. Co., damaged by fire at a loss of $55,000.

Roxbury, Mass.—The plant of the Trimont Mfg. Co. has been badly damaged by fire.

Miscellaneous.

Springfield, Ohio.—The Superior Drill Co. are preparing to send out twenty-two cars of grain drills for shipment to Australia. They have sent out 10,000 disc drills this year alone.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Baltimore, Md.—The Baltimore Rubber Co. has been incorporated by Wm. A. Jones, Alfred L. Lindsay, Thomas J. Skinner, Charles L. Lucas, Samuel H. Jones. Capital stock, $100,000.

Calera, Ala.—D. T. Demarest, of Alexandria, is reported to have arranged with the McKnight Mfg. Co., of South Calera, Ala., for the manufacture of his patented wood bicycles.

Cambridge, Mass. — The Wesley B. Churchill Co. has been incorporated with Wesley B. Churchill, president; Henry C. Churchill, treasurer; to manufacture and deal in bicycles and motor carriages. Capital stock, $10,000.

Chicago, Ill.—The Heath-Quim Co., manufacturers of the Heath bicycle pump, and bicycle specialties, etc., of Minneapolis, Minn., have opened up a branch office in this city, at No. 56 Fifth Avenue.

Pardeeville, Wis.—Thomas Madden, Hardware, sporting goods, etc., has opened up store.

Portland, Me.—The Saylor Rubber Co. has been incoporated by Franklin G. Saylor, Chas. J. Southwick and others. Capital stock, $150,000.

Springfield, Mass. — Hendee Mfg. Co., bicycles, incorporated under same style.

Changes and Removals.

Athens, Ga.—W. D. McGregor, bicycle sundries, etc., selling out stock.

Chicago (Burnside), Ill.—Chas. M. Perkins, bicycles, discontinued.

Chicago, Ill.—Kabaker & Debbs, manufacturers of bicycles, dissolved.

Clarinda, Iowa. — David Tharp, Hardware, sporting goods, etc., has been succeeded by Tharp & Klise.

Fort Wayne, Ind.—Black & Peltier, bicycles, dissolved.

Hempstead, N. Y.—Harvey & Co., bicycles; business is now conducted by R. F. Harvey alone.

Hollywood, N. J.—The Hollywood Golf Club has been incorporated by Joseph J. O'Donohue, Jr., Maurice M. Sternberger, Thomas J. O'Donohue and others, to manufacture golf club and other athletic goods, etc. Capital stock, $5000.

Kansas City, Mo.—C. H. Rebenschied & Son, bicycles, etc., discontinued.

Kinston, N. C.—Bell & Sons are building a bicycle shop next to their repair shop, on Gordon Street.

Newark, N. J.—The Bevel Gear Wheel Co., principal office, No. 788 Broad Street. To manufacture bicycles, etc. Capital, $1,000,000. Incorporators: Theodore F. Merseles, Charles M. Richards, Wm. H. Miller, Victor W. Hungerford, Frederick J. Stimson and Elliott Mason, 788 Broad Street, Newark, N. J.

Santa Ana, Cal.—Wright & Hill, bicycles, dissolved, succeeded by A. C. Hill.

West Liberty, Ia—Morris & Son, Hardware, sporting goods, etc., succeeded by B. H. Smith and A. H. Floyd.

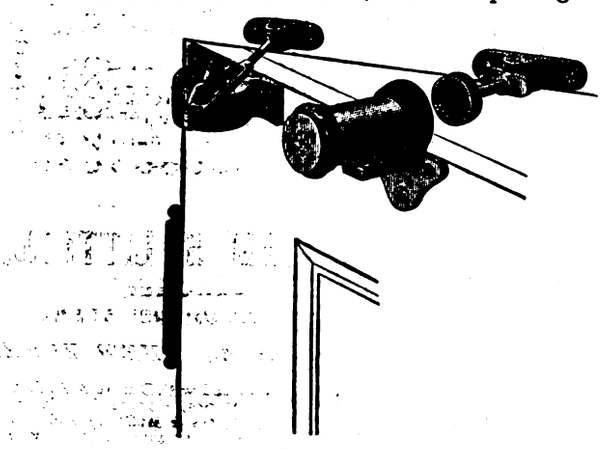
Recent Embarrassments.

Indianapolis, Ind.—Frost Gear Case Co., reported to have appointed a receiver.

Recent Burglaries.

Lake Charles, La. — Burglars entered Woolman's retail store of sporting goods a few nights since and carried away $200 worth of revolvers, pocket-knives and other goods.

Recent Fires.



Cleveland, Ohio.—The Standard Wheel Co., works at No. 44 Bessemer Avenue, destroyed by fire. Partially covered by insurance.

Reading, Pa.—The Keystone Cycle Co.'s plant has been burned. The building, machinery and contents are a total wreck. Loss, $30,000; partly insured.

Tyler City, Conn.—New England Tricycle Co., manufacturers of tricycles; works destroyed by fire.

The Eclipse Door Check and Spring.

In all large office buildings, hotels and public institutions, the increasing use of the Eclipse Door Check and Spring has become a positive necessity. In days gone by it was considered a proper thing to ornament the door with some such peremptory notice as "Shut the Door," but the frequenter of these elegant modern structures no longer looks for such a reminder, rather expecting the door to

close noiselessly and effectually by an attachment for closing it, without his assistance.

The manifold advantages of "The Eclipse" are generally recognized by the Hardware trade. It is easy to obtain, easy to apply and easy to keep in order. If at any time repairs should be needed, it is not necessary to send the whole appliance back to the factory to place it in working order. All one has to do is simply to order the broken part; anyone can attach it.

Sargent & Co., No. 149 Leonard Street, New York, the manufacturers of the Eclipse Door Check and Spring, announce that, to assist disposing of this seasonable article, they are prepared, as usual, to furnish electrotyped advertisements to all dealers handling their specialties, for use in the columns of the local paper of their town, together with booklets and envelope slips, setting forth their merits and advantages, the intelligent use of which materially helps the sale. Dealers who have never handled the Eclipse would find it wise to communicate with Sargent & Co., with a view of adding this profitable line to their stock.

Irish Wit.

The well from which Irish stories are drawn is inexhaustible. Here is a good example of Pat's wit and readiness. An Irish witness was being examined as to his knowledge of a shooting affair. "Did you see the shot fired?" the magistrate asked. "No sorr, I only heard it," was the evasive reply. "That evidence is not satisfactory," replied the magistrate, sternly. "Stand down!" The witness turned around to leave the box, and directly his back was turned, he laughed derisively. The magistrate, indignant at this contempt of court, called him back and asked him how he dared to laugh in court. "Did ye see me laugh, your honor?" queried the offender. "No, sir; but I heard you," was the irate reply. "That evidence is not satisfactory," said Pat, quietly, but with a twinkle in his eye. And this time everybody laughed except the magistrate.—*Westminster Gazette.*

The man with a shady character ought to be able to keep cool.—*Exchange.*

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

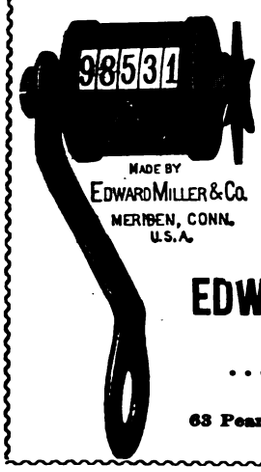
Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.



Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

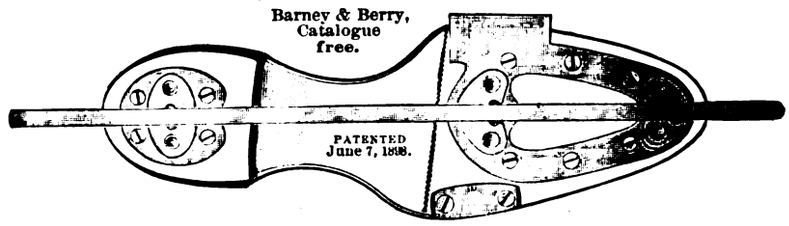
BARNEY & BERRY'S



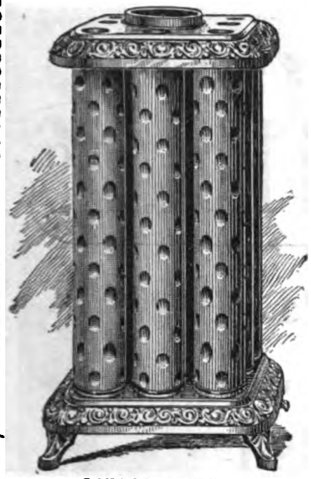
SAFETY EDGE HOCKEY.

Patented June 7, 1898.
BARNEY & BERRY,
Springfield, Mass.

A glance at above cut will immediate'y convince skaters ot the superiority of design of this skate. All Hockey skates heretofore in general use have a very wide open space between stanchions, in which Hockey sticks catch, tripping the player, and through which the puck passes when he attempts to stop it with skate, and blade between stanchions is very narrow and thin without reinforcement, which prevents high temper without extreme tendency to break. In the construction of our Hockey blades we avoid all these difficulties by several braces which strengthen without adding weight, and blades are of high temper, for which our skates are celebrated.

An examination of the shoes used by Hockey players will show them to be badly worn on the edges such wear showing the frequent contact of the leather with the ice in making short turns, which results in slipping and many falls.

Our newly patented safety edge foot plate, which prevents this wear, having an extension projecting beyond the inside edge of shoe sole, which is ground off to conform to shape of sole after skate is fastened for use, as illustrated by the dotted lines at "A" in cut.



We also furnish with each pair of skates two pieces marked "B" in cut, for use on outer side of sole. All parts finely finished. Workmanship and material guaranteed.

Weight of pair (size 10 inch) is 20 ounces.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

NOTICE TO THE TRADE.

JUDGE LACOMBE

Rendered a Judgment, July 2, 1898

In favor of the

Cary Manufacturing Co.,

sustaining their Letters Patent #403,247, and declaring that the goods in question made by Hugh DeHaven are a direct infringement of the CARY COMPANY'S patent, which relates to

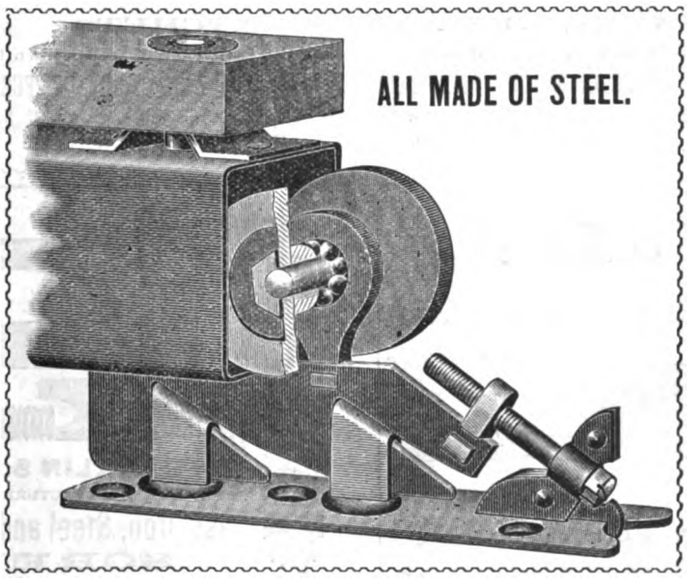
REELS OF BOX STRAPPING

such as has been made by the DeHaven Manufacturing Co., and sold under the name of "Trojan" Box Strap, since August, 1893, immediately after which our suit was commenced.

This is the THIRD Judgment we have obtained against Hugh DeHaven in suits relating to infringements of patents. In every suit so far decided we have obtained a judgment against them. This should be ample evidence to the trade that we are seeking only to maintain our rights, and protect ourselves against parties offering infringing goods, which are very much lighter in weight and inferior in quality to our UNIVERSAL BOX STRAPPING, so generally known in this country and abroad.

Respectfully,

CARY MANUFACTURING CO.



S. C. Cary Pres't

CUTLERY. CUTLERY.

Our special aim has been for years to make a little better goods, (stronger and more durable), than any one else for the same money. And we are well satisfied with the results. . . . . Before placing your fall order for butcher knives, carvers and table knives, send for our catalogue and prices. There are no goods on the market better in quality, finish or reputation, and our prices are right.

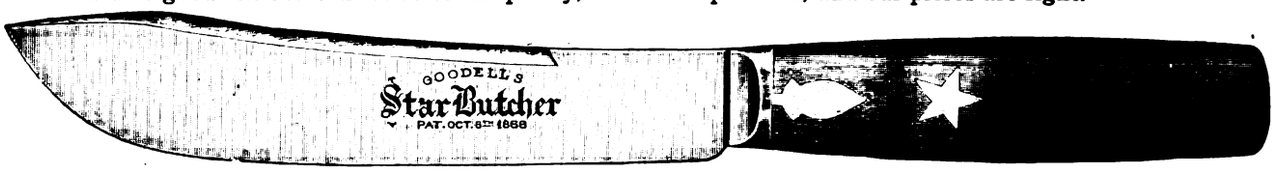

Table Knives and Forks, Carvers, Table and Butcher Steels, Butcher Knives, Boning Knives, Skinning Knives, Sticking Knives, Hunting Knives, Cheese Knives, Butter Spades, Bread Knives; Slicers, Scraping Knives, Cigar Knives, Kitchen Knives, Shoe Knives, Can Openers, &c. . . . . .

NEW YORK OFFICE, 10 WARREN STREET.

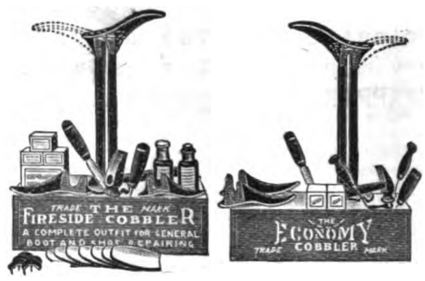
GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.



We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

NEW YORK OFFICE:

THE TOLER
Liquid Door Check and Spring.
PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HENRY HOPKINS, - - Associate Editor.
FRED A. CATON, - - Asst. Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

November has gladdened the hearts of the jobbers and retail dealers alike, the demand having been sustained through all the domestic markets, even up to date. The showing made by the record of sales so far this year will bring it to an end in a manner more promising of a profitable future than would have been deemed possible when the year made its inauspicious beginning.

For a change in the usual Fall programme, we had an early warning by the clerk of the weather, that the prospect for a good old-fashioned winter was an extremely promising one, starting in so early with deeper snows than for years we have seen arrive previous to Christmas, and this was the wintry feature in many States, resulting in the sale, while the ground was covered, of all the early stocks of sleds, snow shovels, ice-choppers and similar seasonable commodities. Householders everywhere were seekers after comfortable conditions; everything that conduced toward this end was gratefully sought for, and every branch of business seemed to be benefited, the Hardware trade getting its full share. That this encouraging state of affairs has continued through December so far goes without saying, and flags are flying over the total results of a year of traffic, which even though the "blast of war" did "blow in our ears," and "dread disease appalled the warrior's heart," still showed a silver lining under every floating cloud.

Failures continue to "grow small by degrees and beautifully less," and show that the prospects for keeping some sick concern alive are, at the present time, more sunny than stormy. Money continues abundant, with no immediate prospects of any financial restriction; even savings banks find it necessary to reduce their low rates of interest still further, through positive inability to obtain good bonds with years enough of life guaranteed by the coupons attached.

Collections are reported as being unusually good for this time of the year and this golden period will have the effect of making the annual trial balance assume an appearance that will make guess-work as to results less problematical.

There is less apprehension felt on the state of affairs that will dominate the coming season than was the case a year ago. A stronger background of confidence is abundantly evident, and unless abnormal changes, not perceptible at the present moment, shall check the trend of traffic, we may anticipate nothing that will prove a source of regret to the commercial greatness of our industrial advancement.

The Closing Year.

The year is closing with a record for commercial and industrial results far in advance of previous anticipations. Te meet foreign views, we have been constantly making prices that have been phenomenally low, and enabled us to obtain large specifications reasonably sure to follow sharp competition.

Our manufacturing facilities in almost every line have been largely augmented by the demands of each successive month, and this important fact has materially assisted the accomplishment of these results. A willingness to get in the swim of reviving prosperity's tidal wave, has forced upon us many possibilities through which we have sailed with flying colors. We are to-day leading the commerce of the world on too many lines of industrial strength, as far as price is concerned, and we intend to increase onr prestige and maintain our advanced position, won by majestic nerve, unfailing resources and financial conditions of an unusually favorable character.

Great Britain, with her long and disadvantageous strikes of a year ago, materially assisted in driving business this way, and now the resumption of good trade in so many other industries making so favorable a showing within her borders, will continue to make orders come our way, especially those conditioned on rapid production, superior finish and a guaranteed date of future delivery.

Never, in several decades, has a year so "breathed the word of promise to the ear," as 1899 is now engaged in doing. At the present moment the impetus will be found so great, the money conditions backing them up so vast and enormous, we will forget by the time the twentieth century opens, that we ever had a period of adversity lasting over five years, when we "knew not what a day might bring forth" only we were sure it wouldn't be of a prosperous complexion; when the industrial skies were black with doubt and distrust, and the financial situation handicapped by the necessity for the nation to sell its bonds in order to overcome a deficit in revenue few statesmen care to contemplate.

Our exports continue to show the most wonderful expansion with brilliant prospects ahead. New territorial possessions which up to date have been limited purchasers of our stupendous products, will, under American push and Yankee progressiveness, soon become so energized in a few short years after American capital has found a profitable foothold, that they will become

Digitized by Google

a source of fabulous revenue; an absorption of our products with reciprocal advantages will follow, and through our national wealth in a short period of time, will receive an impetus unknown to the policy of the slower nations previously so friendly, but who now regard our progress with jealous amazement, while filled with increasing fear of our growth in competing vigor.

We should prove anything but firm believers in our own perfect system of government if we failed to possess the ambition to extend its beneficent influences, and make other nations or their wards, sharers in the good things which every nation on earth is beginning to believe springs from the rule of the American people. As long as we are able to produce enough of anything to supply the markets of the world through our commercial energies, prices will not be materially enhanced in the domestic markets; but when the contingency arises that we are able to control production so greatly beyond our own consumption, and the demand abroad creates a scarcity, we may look forward to a stiffening of prices that would then seem unavoidable. It is for purposes of this kind combines are created, the increasing number of which the trade views with apprehension. As is fitly expressed in our Cleveland trade letter given in this issue of *Hardware:* "The accumulating combinations call for a modifying influence against radical advances, which these jobbers' conventions (as at Milwaukee) tend to restrain. They do not fear combinations to reduce costs, but when used to rob consumers by extortionate prices, jobbers are unanimously opposed to them. Competition may become the death of trade, when co-operation becomes necessary to soften it. It is no permanent benefit to consumers to have goods sold below cost, as the reaction sure to follow will exact recompense."

Commercial Education.

The New York Chamber of Commerce has appointed a special committee, consisting of Hon. Seth Low, president of Columbia College; Gustav H. Schwab, W. Bayard Cutting, James G. Cannon and F. B. Thurber, to consider and report upon the subject of commercial education. No more important question can be considered by the business men of the United States, and the first requisite, it seems to us, is the study of modern languages in our schools and colleges. Since the confusion of tongues at the tower of babel this has been the great barrier to international trade. If half the time spent on the study of the dead languages was expended on the study of the live ones this barrier could be quickly overcome. Greek is all very well for the professional man, and Latin is useful as a base for understanding the languages of the Latin races, but what business men need is to know how to talk to a customer in his own language and explain the merits of the goods we have to sell. A further knowledge of commercial customs and usages is of course desirable, but ability to speak the language of the customer is a first requisite.

C. B. Judd, vice-president and general manager of the Bissell Carpet Sweeper Co., arrived on the steamship *St. Paul* on the 26th ult. Mr. Judd had been on a tour of inspection among the foreign offices of the Bissell Carpet Sweeper Co. and was well pleased with the results of the last year's business and the outlook for the future. Mr. Judd returns, too, greatly improved in health.

The Ohio Hardware Association.

A meeting of the executive committee of the Ohio Hardware Association was held at Columbus a few days since, to gather up the ends of business left unfinished for the past year, and to arrange for the coming annual session which is to be held at Toledo on February 22 and 23, 1899. There are, in addition to the officers, seven members of the executive committee, and it is of interest to know that, with the exception of W. A. Remy, who was unavoidably detained, all members were present. The officers and members of this year are as follows:

President, H. C. Wiseman, Springfield.

Vice-President, E. L. Harris, Columbus.

Secretary and Treasurer, John F. Baker, Dayton.

Executive Committee, W. A Remy, Mansfield; O. M. Scott, Marysville; L. F. Stahler, Waverly; Frank Harrison, Toledo; W. P. Scott, McConnellsville; George M. Gray, Coshocton; C. C. Fouts, Middletown.

The meeting was very enthusiastic, and excellent reports were made as to the condition of the Association in various parts of the State, with many promises of greater success for the future. The members were informed that Toledo had taken steps for excellent care of the Association during its two or three days' session in that city. Every Hardware dealer in Ohio will be notified of the coming meeting and invited to be present.

Not in the Combination.

It will be noticed that an addition of some importance has been made to the advertising card of R. Heinisch's Sons Co., Newark, N. J., in to-day's issue. This line is very emphatic and to the point, and is as follows:

"*Not Connected with any Shear Combination.*"

A reporter of *Hardware* in a visit to the works of the Heinisch Co., some days since, was informed by one of the officers of the company that their position is fully outlined by the above terse and emphatic sentence. Said he: "We have been annoyed by various rumors to the effect that we had become members of the new shear combination. There is no truth whatever in this statement. We have no connection with that combination, nor do we expect to make one. We intend to occupy, as heretofore, the independent position held by us for seventy-three years past, as the largest and oldest manufacturers of shears in America."

Cary Mfg. Co.'s Improvements.

Cary Mfg. Co., No. 19 and 21 Roosevelt St., N.Y., are manufacturing a line of specialties well known throughout the trade as Cary's Universal Box Straps, Flat Wire and Braided Box Straps, Pail Clasps, Corner Fasteners, etc. The business of the company has so greatly increased they have been compelled to add considerably to their manufacturing facilities in the shape of an additional engine and more machinery, the plant now occupying six entire floors in a double building, the area of each floor being 50x100 feet. They have made an important and pleasant change by moving their office facilities to the front portion of the first floor above the store, where they are enabled to use a fine suite of rooms possessing ample space for all purposes, and permitting the use of the entire floor formerly devoted to the office for the shipping department. This progressive company are largely increasing their output of the "Universal Box Strap" shown in their advertisement on page 54, for which they are finding a good outlet through leading Hardware jobbers who carry it in stock.

The W. Bingham Co., Cleveland, Ohio, have issued a neat and entertaining leaflet entitled, "Chafing Dishes and Chafing Dish Utensils." It is a compendium of the subject of which it treats.

THE SALESMEN'S DEPARTMENT---III.

BENEFITS TO SALESMEN.

"Heretofore we were herded together like cattle for a few days once a year, then turned loose on our territories until the time for another round up."—A Western salesman.

"We started out the first of the year full of determination, but the shove given us, in my case at least, was not enough to send me through twelve months' work."—A salesman near the top of the list.

The above may not be the testimony of all jobbers' salesmen, but many will verify the statements.

It has been proven in other matters, what was everybody's business, no one attended to, and why should not this be true of the oversight of salesmen? The buyers can not do it justice; the sales department hasn't the time to devote to it; the credit man's usefulness in his own particular line would be impaired should he undertake it; while the president does not want to be annoyed by the details and seeming trivialities connected with it. As a result there has been no one in the house whom the salesman felt had a listening ear for his trials and difficulties.

If a salesman writes a letter of inquiry regarding some item not quite clear to him, he receives too often a reply which summed up says, "Any fool should know that," all because the mind of the writer is filled with other matters. He does not stop to think that information upon a number of such items, cheerfully and fully given to the salesman who is seeking after knowledge, means a gain of many dollars to the profit account for the year.

The greatest benefit the salesman derives from the salesmen's department is the information and encouragement given him, thus inciting him to greater and more intelligent efforts in increasing his sales and profits. Where this is lacking, the jobber cannot expect all the returns he should receive for the money expended in travelers' salaries and expenses.

No business can be a success unless there is carried into it an enthusiasm that surmounts difficulties and discouragements.

The best salesman is the one who wants to know all the advantages the goods he is selling have over others, and who knows how to use this information to the best interest of his employers.

With the proper material at its command this ideal salesman is readily developed by the salesmen's department.

The best salesman to-day is the one who acquired a knowledge of the business first at retail, then in a jobbing house. He can better advise his customers in the purchase of goods, because he knows intuitively just what is wanted and which of a series will be the sellers. This salesman also knows thoroughly his employer's stock and business methods. This is of great importance, but not of greater value than his retail experience if it be of the right character, and if obtained in the right place.

Manufacturers often overlook material among their own employes from which they can make better salesmen than they can procure elsewhere.

Referring to errors in billings, many jobbers and manufacturers have gladly admitted, when their attention was called to an extremely low price which had been shown to a competitor when proof was demanded that such a price had been made, that the price was a mistake and had been billed without being noticed. In a properly organized salesmen's department there are at least two checks upon such errors. The department is of benefit to the salesman along this line, as he knows the manager's attention will be called to every error he makes, and that he will hear from it. He also knows he will be complimented if he makes an exceptionally good profit on an order or on a certain line of goods in the order.

An opinion prevails among many jobbers who have not adopted the improved business methods that a salesman can be "coached" too much. Similar jobbers have a feeling that a salesman can receive too much information.

Methods can, of course, be carried to an extreme with detriment to any business, but many manufacturers, jobbers and retailers stand by and see their neighbors succeed and their business double and triple and wonder why it is.

St. Joseph, Mo. CHARLES W. EMERY.

Comments on the Articles—"The Salesmen's Department."

Editor Hardware: I have just read the first article upon the subject of the "Salesmen's Department" in your issue of Nov. 10th. I must say the article interests me, for it covers subjects and points that would naturally interest every business man—particularly the jobber and manufacturer.

From our point of view (speaking for the Iowa Farming Tool Co.), we regard the jobber as our natural agent or distributer. He can place our goods in the hands of the retailer cheaper than we can; we can afford to give him the extra discount for doing this work.

The traveling man representing the manufacturer is a necessity; it is a satisfaction to buyers to talk with him about the details of manufacture, of new patterns, of improvements, etc., and it is of value to the concern that the traveler represents to learn the particular and peculiar demands of each and every jobber's local market. It is through the traveling man that the manufacturer can become most easily posted, and thus economically and satisfactorily care for the trade. In the introduction of novelties or new goods, the manufacturer may sometimes feel that the jobber is not as enthusiastic as the maker, but in these days of elegant printing at low prices, the manufacturer can reach the retailer, and even the consumer, and thus create a demand, and still work in harmony with his customer, the jobber.

The development of the camera has revolutionized the art of engraving, and with it the art of printing. As a result, attractive, interesting and instructive literature, liberally furnished by the manufacturer to the retailer, advertises the merits of his goods and saves the traveling men time in explanation and bringing trade without much effort on his part.

The buyers of our leading Hardware houses, with a line in hand embracing thousands of articles, have all, and in very many instances more than they ought to do, to do the buying alone, without superintending the traveling men, and the creation of a Salesmen's Department is a wise and economical move. The manager of this department can keep in touch with both the buying department as well as salesmen on the road; he can post the salesmen as to advances and declines, answer little points about quality or merits of goods over those sold by others. He should also encourage the salesman when he needs it, bolster him up when he seems to require it, and praise

Digitized by Google

him when he deserves it; he is not only the support of the traveling man, but the right hand man of the buyer.

In some branches of business, where the retailer's purchases are large, the results may justify his being called upon by the manufacturer's representative, but generally this is unnecessary, for the jobber's salesmen, as a class, are alert, bright, intelligent, persistent men, and where inclined to do their duty to the house they represent, they can accomplish all, and frequently more than the salesman of the manufacturer can accomplish. The jobbers' salesmen should be in full harmony with the house he represents, and should offer, push and sell such goods as the buyer puts into his hands to sell.

As a rule, the buyer reaches his important position only after years of experience, and while he may have points to learn daily, coming from the traveling men, or the manager of the salesmen, yet someone must be in authority, and it is fair to assume that he will purchase such lines as quality, price and demands of his market incline him to.

Too frequently, the jobber's salesman expects to sell every dealer on his territory; is jealous of salesmen of other houses handling a different line, whether that line be locks, saws, files, steel goods or what not. In some instances were the buyer guided by the wishes of the salesman, he would have several makes of one line. The result would be a mixed stock, and the jobber's trade would be at a decided disadvantage against the house buying but one line, pushing it, advertising it and putting its whole energy on it.

I believe there is one important move that could be made on the part of the jobber, and this is, to give his buyer and manager of the salesmen's department a vacation every year. It need not necessarily be spent at a summer resort; a visit to the leading factories from whom they are purchasing, would be productive of larger sales and more enthusiasm in the sale of the goods, and the benefits derived would be largely in excess of the expense. It is not rest a busy man needs, so much as a change of scene, and a release from his daily routine for a time.

Respectfully yours,

F. S. KRETSINGER,

Fort Madison, Ia., Nov. 1898. Pres. The Iowa Farming Tool Co.

"Salem" Roofing Nails.

The Salem Nail Co., No. 279 Pearl Street, New York, having recently moved to the commodious establishment indicated by the above address, have been enabled by the increased facilities afforded them, to largely extend their stock and assortment of nails, until now it is doubtful if it is exceeded in usefulness or surpassed in variety by any similar stock in the country. It will need but a glance at the list furnished in their advertisement on page 46 to realize how many different kinds made from so many different metals comprise a complete stock of nails at the present time. The company issue quotation cards covering the entire variety of nails turned out by them, which are adapted for every possible business requirement.

One entire section of their business is devoted to the nails and tools required for roofing purposes. In this line, where the importance of a first class article is a prerequisite, they seem prepared to meet every possible demand that may be made upon them. In order to insure the continued usefulness of any roofing in which nails are used, every tinner is well aware how important a part these little articles play, and how necessary it is for the manufacturer to be able to guarantee the quality as being superior. The tin roofer requires for his purposes both cut and wire nails, and either plain, tinned or galvanized, with the plain nail least in demand on account of its shorter life. They are made in lengths of ¾, ⅞ and 1 inch, and there is a constantly increasing use of the tinned variety, as it is a little stouter in shape, will drive with less trouble, and being more easily soldered over, will last as long as the roof.

Slaters' nails are similarly required to be of both styles, cut and wire, and in the three varieties of finish, the greatest demand being for galvanized. Some descriptions of slating require a special nail produced by this company having an extra large head, firmly formed, by an original method of making. For a nail with promise of a long life a greater demand is noticeable for copper nails, either of the cut or wire type, as the chance of corrosion or deterioration is too slight to affect it. Slater's nails and sheathing nails are also made from a yellow metal, being lower in price than copper and well adapted for all constructive requirements where gases and destructive vapors impair the life of the steel nail.

For large acid tanks and chemical works it is frequently necessary to use a lead nail, for properly and securely holding the slate. Nails of this description require holes bored for them, and the nails have to be of a length that admits of clinching on the other side. In the large stock of this company, to which a more extended reference could be made, everything in the line of slaters' tools can be found, such as slaters' hammers, knives, rippers, roof and bench stakes, and other important requirements of a mechanical character.

The Sportsmen's Exhibition.

The Sportsmen's Exhibition, to be held here early in the coming year, bids fair to surpass those of former years both in point of interest and in magnitude of exhibits. The impression given by this function has always been that its prime object has been to furnish an opportunity for the manufacturers of sporting goods to display their products. The manifest unfairness of this to the visiting public has been recognized by the present management, and radical steps have been taken to eliminate all such objectionable features in the future. In the first place the floor of the Madison Square Garden will contain no trade display of any kind. All the space will be devoted exclusively to the exhibits of the various hunting countries, and to special features of interest to the public. The exhibits of manufacturers and the trade generally are relegated to the tiers and galleries, where there is ample room to make a most effective showing, and where the visitor can view them at leisure without the discomfort of the crowds which congregate around the special features.

Another move in the proper direction is the exclusion of trade exhibits of an irrelevant nature. No space, we are informed, will be sold or allowed to the manufacturers of such lines as do not come directly under the head of sportsmen's goods, and already a number of would-be exhibitors, whose products come under this ban, have been gently but firmly refused. Visitors will thus be spared the spectacle of seeing soap, oatmeal or multi-colored dyes nefariously sneaking in to an alleged exhibition for lovers of sport.

One of the most interesting facts in connection with this year's exhibition is the active interest taken by the Provincial Governments of Quebec and New Brunswick. The former has already secured 1650 square feet of space on the immediate left of the Madison Avenue entrance, while there is a strong probability of New Brunswick taking the corresponding space on the right. Every effort is to be put forth by these governments to have their displays as interesting and attractive as the prolific woods of these provinces and a liberal appropriation can make them.

"Young man," said the minister to the heedless sinner, "have you ever thought on your future life?" "Yes, a great deal, and do you know I cannot make up my mind between Puerto Rico and the Philippines."—*Kansas City Star.*

HARDWARE NOTES BY THE WAY.

Editor Hardware: Ours is a busy trade just now, and bids fair to be in the rush of activity all the winter. This is true of Ohio, Michigan, Indiana and Kentucky; territory covered by me during the past thirty days. Of course, the bulk of the demand is centered upon staples, but with the money flowing in so freely from the country districts, a healthy specialty trade must soon develop. There is a great deal of dating ahead business being booked, although it was thought the better times would do away in a measure with this feature. While this dating ahead method has always existed in some form, the hard times have thoroughly habilitated it. Merchants not in need of any goods, but anxious to oblige a favored traveler, frequently do this sort of thing. But dating ahead is not looking ahead, and many a traveler has come to rue the dating ahead practice. Look at it as you may, between jobber and retailer, it is an arrangement that is not generally advantageous. At the end it may crop out in the nature of an embargo, and while it is in force, imparts a certain artificial influence which may tempt to indiscretion. It's an unstable element, and at times may render insecure our whole commercial basis. Between manufacturer and jobber it is less consequential. In fact, certain conditions of the modern supply and demand have made it obligatory. Truth is, however, that the house which is doing the minimum of dating ahead business, or does not hold over orders for any lengthy period to facilitate their delivery, is doing the business which entails the least risk and most satisfaction.

Merchants are not "taking much stock" in the resurrection of the roller skating sport, as heralded from the East. They will be extremely wary of investing in the line, and probably carry sample or consignment stocks only for the time being. Travelers express the opinion that it will be a country, rather than a metropolitan sport. Nevertheless, since the new-fangled rubber-tired roller skate may appeal to the novelty-craving taste of the public, there is no telling to what extent the revived sport may be exploited.

No one looks forward to sensational doings in the cycle trade next season. Prices are now so debased, and trademarks are so numerous that dealers have lost interest in the line. While the low prices will stimulate enormous sales, the distribution of the demand will be so general that but few dealers who already have an established trade and possess the facilities to specialize and knack to introduce, will reap any material benefit.

The club system of selling bicycles has proved very advantageous to several dealers. The scheme was already referred to in one of my letters, but for the benefit of those who wish to try it, it is here repeated: The dealer will issue coupons, each specifying a full membership and certain rate of payment. Members of these clubs generally pay from fifty cents to one dollar per week until a certain total has been reached. The holder of these coupons is then entitled to a choice of wheels priced at that total. But some dealers allow wheels to be taken out immediately after the first coupon has been issued. This is simply the instalment plan, while the original scheme is only an economic way of placing the bicycle within the reach of those who cannot buy for spot cash, or are otherwise inconvenienced. During the winter months, a scheme of this sort will not interfere with the other duties of the Hardware dealer, providing he is not enabled to put a special man in charge of it.

A certain Western wholesaler employs new travelers on the commission basis only, for the first three years. After that time, he offers them a salary based on their average earnings. He holds to the conviction that no man is entitled to a salary that cannot earn enough in commissions to make him valuable to the house. If a man has proved his worth to this house, he has a life-time tenancy to any position which he may be called upon, or which he is able to fill.

There are people who prefer a steel snow shovel. They prefer it because it is durable, rather than practical. But the wooden shovel is the ideal snow shovel. If made of the right timber, it can't fail to please your trade. Basswood has proved its efficiency in this direction simply because it is light. A clumsy, heavy snow shovel will never be a success in the American market.

From an ad.: "We know your grocer sells stove polish. He may even handle the best, but he will not sell it to you if he can sell you something 'just as good.' The grocer always looks to the profit end. The complexion of his business, unless he sells for cash only, compels him to. We are not thusly situated. We sell the best in the market for the satisfaction of our customers and the pecuniary benefit of ourselves. That only is satisfaction which is mutual."

From another ad.: "Yesterday was a corker. Subsequent to our display of cork screws and cork pullers in our window, our store was flooded with people. Wonderful how many people need corks crews and cork pullers nowadays! We had an idea that the up-to-date American takes his stimulant at home, because we do it, and saw others do it, and now we are convinced that we haven't ever seen one half that do do it. Thus, to give the other half a chance, we have reserved this day for their reception. N.B.—We pull corks from 'original' packages to show how. And we don't re-cork the bottles, but serve the contents as a treat."

If you are in want of a live window feature, try a spectacular display with liquid cements. Set apart a special day or week for the benefit of the line, if you think it is profitable enough to specialize. Since the new rubber cements have come into the market, quite an interesting display can be arranged. I know of a dealer who has tried it, and who sold as a result, in one week, over 1000 packages of various kinds of liquid cements.

Cleveland, December, 1898. J. B. RINDFLEISCH.

Took the Medal.

The Cleveland Twist Drill Co. take pleasure in informing their friends that at the late Trans-Mississippi & International Exposition, held at Omaha, Neb., they were "awarded the Gold Medal, against all competition." This is another feather in the hat of Cleveland, as a Hardware manufacturing center.

The Builders' & Traders' Exchange, Columbus, Ohio, have added to their Exchange rooms and exhibition department, a library of trade catalogues of every description, for the use of the architects and their clients. The architects of Columbus are all members of the Exchange, and it was due to their suggestion that this new step was taken. The officers of the Exchange ask us to invite manufacturers and jobbers everywhere to send their catalogues for permanent exhibition in this department.

Recent Trade Publications.

The Northern Refrigerator Co., Grand Rapids, Mich., have issued a handsome and attractive catalogue of their famous seven-walled Glacier cold dry air refrigerators. This contains some seventy-five pages, and is printed in colors upon very heavy paper, so that each illustration stands out like the real article itself. Bound with the catalogue are samples of their charcoal sheathing and woodfelt used in these refrigerators, so that the person who is inquiring as to the character of these articles, can see at a glance the methods of scientific insulation used. In a note of introduction, the manufacturers say: "We are pleased to call your attention to the elegant and greatly improved refrigerators which we manufacture. We have had long experience in this business and are owners of some of the most valuable patents in this line ever issued. As we have ample stock of dry hardwood lumber, the latest improved machinery, the best of dry kilns, and the most skilled workmen, we guarantee our goods to give perfect satisfaction, both as to price and quality. The capacity of our works is over two hundred complete refrigerators per day. We have five large warehouses in which we carry a stock of over twenty thousand refrigerators at the beginning of each season. We find there is a demand for refrigerators of artistic design, provided they are superlative in merit and of medium price. This demand we meet in our Glacier Refrigerators. Each size has a special design of great beauty. There is extraordinary merit in the seven walls for insulation, also in the Glacier air-tight locks, and the Barrett movable flues for cleaning. patented January 26th, 1892."

The Eclipse Refrigerator Works, Burlington, Vt., have prepared for the season of 1899 a handsome catalogue of their Eclipse Cleanable Refrigerator. This is finely printed upon heavy coated paper, and the various styles of refrigerators are shown in colors, making them stand out in a bold and attractive manner. Prices and dimensions are given with each article shown. In a note of introduction to the trade, the manufacturers say: "In presenting our trade catalogue for the season of 1899 it is with pleasure we are able to state that our new patent Eclipse Cleanable Refrigerator proved, in practical use, an unqualified success during the past season, and that the demand for all our popular sizes having exceeded our anticipations, it was with difficulty we were able to fill many of our orders. In view of this gratifying experience we are now manufacturing the goods in larger quantities, and, with the advantage of a full equipment of modern machinery, and other unsurpassed facilities, we feel confident of our ability to fill promptly any orders with which we may be favored hereafter. This line of cleanable refrigerators is particularly suited to the needs of the dealer whose aim is to build up a trade in a reliable specialty, our refrigerator being radically different from all other makes of removable ice chamber refrigerators, while our large variety of popular styles and sizes, in plain and ornamental finish, also makes it a desirable line to handle."

The Buhl Stamping Co., Detroit, Mich., not only know how to produce good goods, but also how to attractively present them to the trade. They have, no doubt, an artist somewhere concealed about their establishment. We are led to this belief by a perusal of their latest literary production, a monograph entitled "A Study in Milk Cans." It is surprising how much study can be given to a milk can—how much can be said about it. The thirty-odd pages occupied in describing the Buhl products are well employed. "This book," its makers say, "contains all that is necessary to enable salesmen to sell the best Milk Cans and Can Stock intelligently and profitably." Some special points to which they call attention are the following: "A novel method has been devised for packing six complete sets of stock in a compact crate, as shown below. Each crate can be divided in a moment into two crates of three sets each. A number on each crate designates the size and pattern of its contents. Nothing is left to the ignorance or imagination of order clerks." Many improvements over last year's goods will be noted. All cylinders are offset and rolled. Special attention is called to the new bottom hoop and the new Elgin pattern and the New Sunlight and Jersey cans, which they declare are "the best two low-priced cans ever offered."

The Clipper Lawn Mower Co., Norristown, Pa., whose illustrated card appears in to-day's issue, upon page 49, are sending their friends a leaflet entitled "The Clipper," which illustrates and describes this successful article. We are informed that the company were compelled to return cash to a number of their would be patrons last year, in May and June, as they were unable to fill their orders, a large number of which came by mail during those two months. In the leaflet to which reference is above made, there is a description of the special points in this improved lawn mower, from which we make the following extract: "The cutter bar is directly in front of the wheels. The wheels travel over the ground where the grass is cut, never rolling down the standing grass with the wheels. The small gauge wheels at the side are to gauge the height you wish to cut the grass. The knives can be sharpened in the machine with a small file or whetstone, or can be taken out and ground, but they must never be sharpened anywhere except on the beveled side of the knives."

Merchant & Co., Philadelphia, Pa., are sending their friends a small publication entitled "How Roofing Tin is Made." This is a treatise on tin-plates for roofing purposes, and, as the company inform us, is "published in the interest of consumers and for the protection of the reputable roofing plate manufacturers of the United States." As is well known, this concern has manufactured and sold this product for a great many years. Most of the information contained in this booklet is entirely unknown to consumers, and even to dealers generally, and in too many cases to architects who specify various brands of tin. It is well worthy of perusal by all who have to use tin roofing. The publishers say: "If property owners were aware of the inferior goods they are using, and the immense amount of money lost by using acid plates, a change for the better would soon take place." The publishers will be pleased to send a copy of this publication to any who may wish.

The Boston & Lockport Block Co., No. 142 Commercial Street, Boston, with New York office at No. 33 South Street, issued previous to Thanksgiving, a very unique leaflet upon which was securely fastened a small wooden case, containing a real basting needle, all threaded for sewing up the turkey. Several good hits are made in this little publication, accompanied by the hospitable wish that all of their customers would enjoy Thanksgiving Day as well as they expected to enjoy it themselves. They add the cheerful news that business is picking up, and mention incidentally that there is another point they wish to mention—"Blocks." They add: "Our complete 112-page illustrated catalogue tells the rest."

The Russell & Erwin Mfg. Co., New Britain, Conn, and New York, have issued a very attractive and artistic little publication, illustrating and describing their wrought steel and brass padlocks. This is made in the form of a hinge and padlock, and is printed in green and blue, with embossed gold upon the cover. A number of their wrought padlocks are exhibited with sizes and prices. Considerable skill has been shown in the preparation of this little monograph, and copies will be sent to those who may wish the same.

Only Slightly Scorched.

When the members of the Hardware Club of New York took up their newspapers on the morning of Monday, December 5th, and glanced at the lurid headlines which occupied the most prominent position on the first page, they came to the conclusion that so far as the lunch hour was concerned, they would be homeless, and wandering orphans for some time to come.

Happily this dire realization was not realized.

The tremendous fire which occurred in the Rogers, Peet & Co. building on the corner of Broadway and Warren street, on the night of the preceding Sunday, and damaged the upper stories of the Home Life Insurance Co. building continued its way a little farther to the south, by leaping across an open air-shaft, and scorching the Hardware Club by way of the six windows which looked out toward the Home Life building. The report as given at first, was that the club was seriously damaged, but as a matter of fact, very little was injured besides the total demolition of the ladies' dressing room, damage by water to several carpets, and by fire to several pieces of furniture, and, in addition, the burning away of the woodwork around the six windows above mentioned, The total loss to the club amounted to about $1,250, which was fully covered by insurance, and the period for which the members were deprived of the use of the club, covered only Monday and Tuesday, as everything was in shape for the usual rush of business on the morning of Wednesday.

The first thing that President McCartee did on arriving at his office on Monday morning, was to make a hurried visit to the club rooms, after which he directed that a call should be issued for a special meeting of the board of governors at 1 P. M. that day. This meeting was held, all the members of the board being present, and the chief thing in order consisted of congratulations from one to the other, that things were in so much better shape than had been expected.

The secretary was instructed to immediately prepare a notice and send it to all members of the club, to the effect that it would open for business on Wednesday morning. These notices were delivered in the hands of the members on Tuesday morning, and on the day mentioned, the attendance was very large at the club rooms, and everybody seemed more at home than ever, because of the enforced absence of two days.

It was quite gratifying to the members of the club to learn that immediately on the announcement of the injury to the club rooms, cordial invitations were received from a number of neighboring organizations, tendering to the Hardware Club all the privileges accorded to their own members during such time as the rooms of the Hardware Club might be unfit for use. These invitations were from the following clubs: The Commercial Club, the Drug Trade Club, the Merchants' Club, the Fulton Club, the Underwriters' Club, the Arkwright Club, and the Wool Club.

At a meeting of the board, the secretary was instructed to cordially thank these organizations in the name of the Hardware Club for their generous courtesy in the matter.

A matter of some interested comment was the fact that hanging on the wall next to the Home Life building, within two feet of one of the burned windows, was an elegant life-size portrait of George Dewey, the hero of Manila. Notwithstanding the fact that the flames poured in through this window, and the whole sash and window frame were burned away, and the carpet and part of the furniture in the room ruined, there was not a flake of soot, nor a drop of water discovered upon the portrait. As one of the gentlemen expressed it, "If this had been a picture of Blanco, Weyler or even old Sagasta himself, it certainly would have been burned to cinders, but neither fire, nor water, nor anything else, could do damage to George Dewey or his fame!"

DEWEY REPORTED SAFE.

"In spite of all danger, the oil portrait of Admiral Dewey came out of the fire unscathed."—Daily Paper.

'Twas a noteworthy fact we are called to admire—
Though surrounded by flames that were fearfully nigh,
Admiral Dewey, as usual, stood serene under fire,
Altogether too hot for the "Home Life" near by.

A FIRE EXPERIENCE.

Several of the tenants of the Home Life Building were connected directly or indirectly with the Hardware trade, and there was some lively hurrying done on Monday morning, to discover the extent of the loss, and to provide new business homes.

One of these concerns was the New York office of the Central Expanded Metal Co., presided over by Merrill Watson, whose experiences were doubtless those of other tenants rendered homeless by the sudden conflagration of Sunday night.

A representative of *Hardware*, who met Mr. Watson at the Hardware Club, said to him: "How does a man feel after he's been burned out?"

"That depends," said Mr. Watson, "largely upon the man, and somewhat upon the conditions which surround the disaster. Speaking for myself, I can only liken the sensation to that which small boys who are sent to bed without their supper describe as—a peculiar sense of goneness. I opened my paper on Monday to see if there were any new developments in the Philippine Islands or Cuba, and the first thing I knew I found my hair standing on end, and my breakfast appetite gone, for the simple reason that my office, according to the report, was a total ruin. I remember striking a train and ferry boat on my way to the city, but don't recollect much else connected with the trip. One look at the Home Life Building was enough for me. The next thing I did was to plunge into the Postal Telegraph Building, engage an office, plank down a month's rent, and then go out on a wild chase after my office force, finding my manager breaking his neck with gazing at the tenth floor of the burned building, my stenographer over by the City Hall calculating how many weeks she would lose before pay commenced again, and the rest of the force scattered around promiscuously. We were soon fitted up with desks, and an insurance agent had a policy upon the same before noon."

"That is merely the business side—how about the personal internal emotions?"

"As I said before, the only phrase which will describe it is that peculiar sense of emptiness which cannot be described. It seemed as though my whole business life had been chopped off square, and that I was compelled to commence entirely new. If I wanted to consult the calendar, I would look over my right shoulder, as usual, but there would be no calendar there. If I wanted a postage stamp, I reached out after the usual drawer, but neither drawer nor stamp was there. If I wished to recall some incident of business, I reached around for my ledger, but the ledger wasn't there. The only thing that was familiar, and that reminded me of my pre-Adamite existence of last week, was the fact that I was still wearing the same clothes, and that I happened to have my personal check book in my pocket over Sunday. A day or two later, I visited the ruins, and found the steel blade of a paper cutter among the cinders. I have had that remounted, and it is the only relic I possess of the happy days that were."

Santiago de Cuba was founded by Velasquez in 1514, and fronts on a beautiful bay 6 miles long and 2 miles wide, on the southeastern coast, 100 miles west of Cape Maysi. Its population is 59,614. It is unhealthy, from neglect of sanitary measures.—*Exchange.*

Barney & Berrys's New Ice Skates.

Barney & Berry, Springfield, Mass., New York office, No. 114 Chambers Street, have inaugurated the skating season by bringing out a series of the latest improved Ice Skates, which we herewith illustrate, and which will upon investigation show the novel inventive ability that has been applied to the products of this industry. The Lock Lever skate shown in Fig. 1 is finished in either the plain polished or fully-nickeled styles, and with either plain or diamond toes, as may be required. While this well-known skate is greatly enhanced in appearance by its perfect finish, it is possessed of two important features, new this season, which are in evidence in the illustration, Fig. 2. The improvements enable the wearer, no matter what the style or shape of his shoe is, to so adjust the skate in a proper position sideways upon the shoe that the blade will be on a line drawn between the center of the heel and large toe; this is accomplished by aid of the inside toe clamp, which, being constructed in two parts, is connected by a right and left-threaded screw, which is marked with letter B, and plainly shown in Fig. 2. In Fig. 1 will be noticed a small set screw marked with the letter A, by means of which, when the adjustment is made to fit any particular shoe, it can be depended upon to be held securely. A small screwdriver that can be carried on a key-ring, accompanies each pair of skates. This lock lever skate is made with engraved blades of a highly ornamental character, and may be supplied with the owner's name etched on both sides of each blade, which may also have, if desired, diamond toe points for fancy skating. Fig. 3 represents a safety edge hockey skate, made by this firm. The blade is so designed that there is no opportunity for hockey sticks being caught between the stanchions, often the cause of badly tripping the player; neither is it possible for the puck to go through, when an effort is made to stop it with the skate. Fig. 4 is a bottom view of this skate, and shows how it is constructed. The safety edge shown at letter A, protects the shoe whenever necessary to make a quick, short turn; at the same time it prevents the skate from slipping when the sole comes in contact with the ice. As the skate is attached permanently to the sole, sufficient material is left, so that it may be filed to conform to the shape of the sole, the dotted lines indicating the excess of the material. Extra pieces, as in letter B, are furnished with each pair of skates to protect from wear the other side of each shoe. In Fig. 5 is represented a tubular Racer, which for racing purposes, is made especially light, and is yet firm and rigid in construction. It will be noticed how clever is the construction of the brackets and the shape of the tube, which while offering very little resistance, possesses great strength and is free from any tendency to collect snow and ice in use. The safety edge plate shown in Fig. 4 is also a feature of this skate. Complete catalogue of their line of skates will be forwarded upon application, and attention is called to their advertisement on page 47.

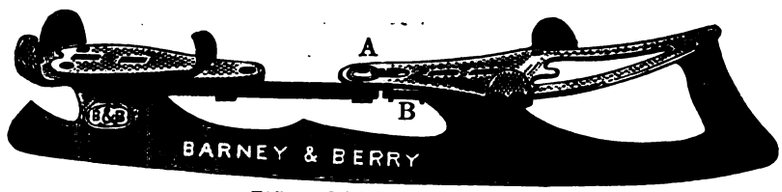

FIG. 1.—LOCK LEVER SKATE.

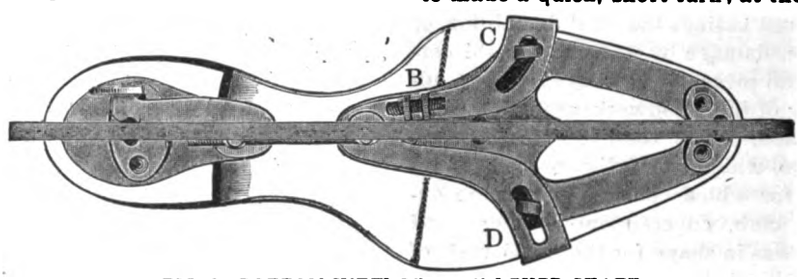

FIG. 2.—BOTTOM VIEW OF LOCK LEVER SKATE.

FIG. 3.—SAFETY EDGE HOCKEY SKATE.

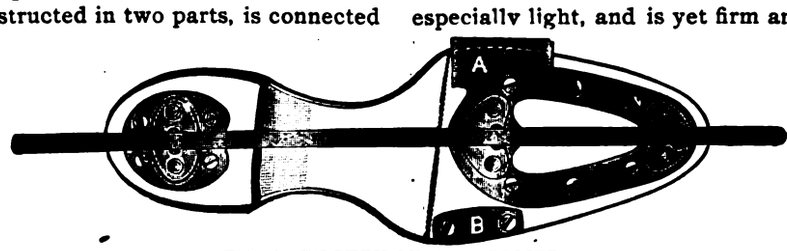

FIG. 4.—HOCKEY SKATE APPLIED.

Hartford Nails in Cuban Wars.

The following is from a recent issue of the Hartford (Conn.) *Globe:* Aaron W. C. Williams, treasurer and general manager of the Capewell Horse Nail Co., will leave this week for an extended tour through the West. Mr. Williams goes seeking still further improved health, and at the same time will make a business visit to some of the branch offices of the Capewell Co., located in many parts of the United States. He will go first to Chicago or St. Louis. Then he will visit the Hot Springs, Arkansas, for a time, and incidentally travel to New Orleans for an inspection of the company's offices there.

During several months past Mr Williams has been seriously ill, but despite that fact, he has kept his hands on the reins of the enormous business interests which he directs in a remarkable way.

The past year has been by far the greatest, from a financial point of view, that the Capewell Co. has ever known. That refers to a business of no mean proportions either.

President E. C. Lewis, of Waterbury, in speaking of the growth of the company, says: "Even one with an extended knowledge of manufacturing experience can hardly realize the growth of the Capewell Co. To Mr. Williams' shrewd direction is it attributable." In a recent interview he said that the company was extremely fortunate in having a man of sagacious business character at the helm, and that it had made the product of the Capewell machine very popular.

Some ascribe the success of the Capewell Co. to Mr. Williams' keen judgment of human nature, and his selection of lieutenants, and fair dealing with every one with whom he is brought in contact.

His branch managers all admire him. In an interview concerning their leader, one of them said: "Mr. Williams has more than seventy traveling salesmen on the road and twelve branch managers sprinkled over the country between the two big oceans. All owe their business education to his tutelage and their positions to his character and sagacity. When times were the very dullest, instead of reducing his forces and cutting us down he increased in all directions. He just passed the word along to reach out, and we did reach out, out even as far as Alaska and Australia, and goods are going there to-day. Capewell nails sold for twenty-five cents each in the Klondike, though they merely held up in proportion to other commodities in that gilded locality. There were no dull times at the Capewell factory. No one was cut down and no one was put on short time when other concerns were wondering whether they were going to sink or swim. Tons and tons of horse nails went out daily as fast as fifty or more machines could each finish 110 a minute. When the war came on, the government wanted the horse nails that were made in Hartford, so they played their part in the Cuban campaign as well as elsewhere. Mr. Williams has helped his men with kindly consideration, and the principles involved have been such that they could also prosper individually. It is seldom a man is favored with such an employer in these times."

A *Globe* man who met Mr. Williams asked if he could tell just where the Capewell nail was used in the war. He answered that he could not with certainty, though the government gave them a large order for different sized nails and that they probably figured, as much as horse nails could, in any fight. "They usually do hold their own in a fight," he sententiously added.

When asked for an opinion on general business prospects, he replied that his business showed continual improvement, and that he hoped everyone was beginning to feel the renewed impetus that seems to be a sign of better times.

"About horse nails," answering a further inquiry, he modestly said: "Time was when the blacksmith had to make them by hand. But the waste of time was so great that a machine had to be made to do the work. It was Mr. Capewell's inventive genius that put together just such a machine. We make small nails for the light shoes of the trotter and all the way up to the size required to fasten the footing of the heaviest draft horses.

"Consumers have found we make the very best article that can be produced; that we have confidence in the quality and deal fairly with them. There is nothing phenomenal about our business. It has been hard work, painstaking management and honorable treatment that makes the Capewell nail so favorably known. That is why I have been able to place them on the market with gratifying results."

Mr. Williams' health is very much improved. He received much needed rest in the early summer by a sojourn at his shore cottage at Short Beach, and later by a cruise at sea in his yacht as far north as Bar Harbor.

New England Hardware Dealers' Association.

The December meeting of the New England Hardware Dealers' Association will be held at the United States Hotel, Boston, on Wednesday, December 14th, at 4:15 P.M. A meeting of the executive committee will be held, after which there will be a reception from 4:30 to 5:30 o'clock, and dinner will be served promptly at the hour last named. As this is Ladies' Night, the occasion promises to be one of exceptional interest. The entertainment committee have secured the services of the Ladies' Royal Orchestra and Miss Caroline Belle Howe, reader. Vocal selections will also be given by Mrs. G. W. Barber and Robert L. Van Buskirk. Edward A. Loomis, the president, will make the usual address of welcome; Hon. Henry A. Thomas, postmaster of Boston, will respond to the toast "Our Government;" Chaplain George A. Crawford, U. S. N., to the toast "Our Navy;" Major James A. Frye, to the toast "Our Army." The committees of the evening consist of the following named gentlemen:

Entertainment Committee: D. Fletcher Barber, Boston; Albert M. Wiley, Boston; Frank R. Washburn, Taunton.

Reception Committee: William H. Warren, Boston; Austin H. Decatur, Boston; Elisha J. Neale, Lowell; Edwin H. Mansfield, Boston; J. Carleton Nichols, South Boston; George W. Burditt, Cambridgeport: James A. Farless, Boston.

Notice of Removal.

F. E. Myers & Bro., Ashland, Ohio, have issued the following announcement as to the removal of their office at Milwaukes, Wis., to a more advantageous location. They say: "Our line of Myers Pumps and Hay Tools for 1899 will exceed anything we have ever offered. The largely increased line and rapidly growing demand have influenced us to lease jointly with the Bucher & Gibbs Plow Co., Canton, Ohio, new rooms at No. 75 West Water street, a few doors south of our present branch, where our office and representatives are both offered for the service and comfort of all our Wisconsin dealers. New posters, calendars, attractive printed matter, etc., will be furnished. Do not fail to examine our new goods, get prices and even samples before contracting elsewhere."

Bommer Gold Medal.

The Bommer Bros., Brooklyn, N. Y., made an exhibit of the famous Bommer Spring Hinges at the trans-Mississippi International Exposition at Omaha, Neb., and as a result were awarded a gold medal, which is one more evidence added to the many that have gone before, that they have a first-class article.

We have received from the Wilber H. Murray Mfg. Co., of Cincinnati, Ohio, a very comprehensive catalogue of their vehicles, harness and saddles. About everything required in these three lines is shown in this work.

NEW GOODS AND SPECIALTIES.

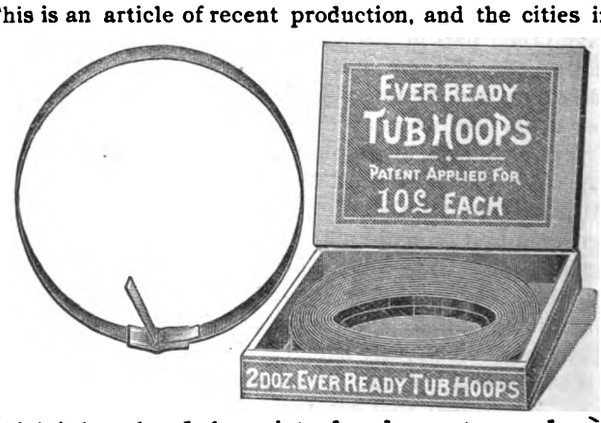
A Handsome Christmas Present.

Millers Falls Co., No. 93 Reade Street, New York, are placing upon the market a set of superior carving tools, consisting of twelve carving and one matting tool, which combined forms a complete set that will be known as Carving Set No. 3, and prove an element of happiness in the shop or household during the holiday season. They were originally designed for use in the numerous manual training schools now claiming the attention everywhere of those interested in fitting the American youth for a higher mechanical walk in life than was formerly possible under educational influences. The blades are claimed to be made from the best grades of material obtainable for the purpose, carefully tempered and finished, and are sent out already sharpened for immediate use. The handles are made from the very attractive cocobola wood, and of the most approved shapes. They are put up in boxes holding

one set, in the manner shown in the illustration herewith, the case being 9¾ by 8¼ inches in size, and being very neatly finished, compare favorably with the tools enclosed. Each tool is provided with a clamp to hold it in its proper place in the case. In the selection of the styles of tools to form the set, the manufacturers have endeavored to select just such shapes and sizes best adapted for the work designed; and, so far, the set has met universal approval, and will be found a desirable addition to a tool stock at any season of the year, but more especially at this time. They are intended to be retailed at $5 a set, with satisfactory discount to the trade.

The Fox Shaving Cases.

The Fox Cutlery Co., No. 20 Ferry Place, Hoboken, N. J., are placing upon the market a very attractive and desirable line of novelties, under the name of the "Fox" Shaving Cases, one style of which is illustrated herewith. These shaving cases are made in eight different varieties ranging in price from $1.75 to $6 each. They are put up for the trade in a very neat, compact and attractive style, having substantial cases and superior fittings. The razors in particular, as is the case of all "Fox" Razors, are fully warranted. The cases, according to price, are sent out in leatherette, leather or Turkey morocco, all the styles being very tastefully lined and nicely finished. One of the most popular sets, with a list price of $2.50, consists of one "Fox" full hollow ground razor, with written guarantee, to the purchaser; one porpoise hide and linen combination swing strop, with padded handle; one astringent shaving

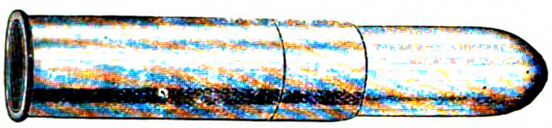


"FOX'S" SHAVING COMPANION No. 200.

pencil, to apply to any cut, stopping flow of blood at once; one cake of magnesia and one cake of fine mustache cosmetic. Another very popular set is shown herewith. No. 200, with a list price of $5, forms an exceedingly attractive novelty for holiday sales, being in a wood case strongly made and richly lined with plush. The warranted "Fox" Razor included in the set is full hollow ground, with black antique or onyx handle, with written guarantee; this set has in addition one decorated china shaving mug, one nickel body collapsion leather brush, with badger hair; one "Fox" shaving stick, a very fine shaving cream in enameled box; one "Fox" porpoise and linen combination swing strop, etc.; one box of "Fox" razorine, one astringent shaving pencil, and two cakes of magnesia and cosmetic. Attention is called to their advertisement on page 35. Catalogue of these goods and other specialties forwarded to the trade, with discount, upon request.

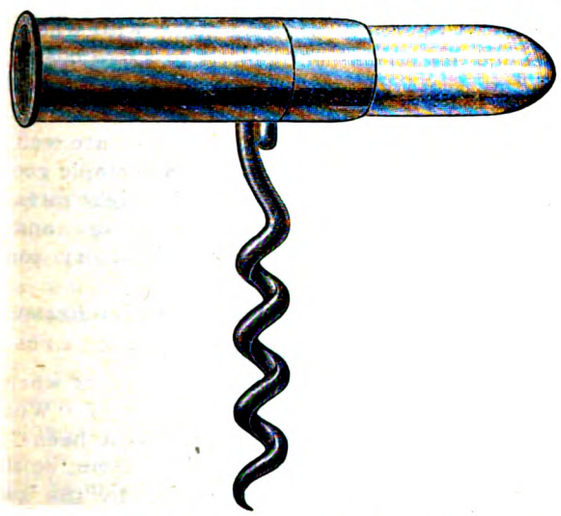
Ever-Ready Tub Hoops.

We are pleased to show in this connection a new article being placed on the market by Weaver, Palmer & Richmond, Rochester, N. Y., in the Ever-Ready Tub Hoops. This is an article of recent production, and the cities into



which it has already been introduced report a ready sale. The hoop itself and the method of packing is shown in the illustration accompanying this, and in regard to this article the manufacturers say: "The usual charge of ten cents which the retail dealer makes to his customer for the small quantity of hoop iron and rivets which he gets out to fill the call for 'Enough hoop iron to hoop a tub,' is often in-

Digitized by Google



sufficient to pay him for the time he consumes in so doing. By making the above mentioned purchase of a piece of common hoop iron the user has an awkward and difficult job before him to make and put on the hoop. A case of Ever Ready Hoops and Clamps gives the retail dealer an article which supplies this want in compact, easily salable shape, and enables him to give his customers a hoop which anyone can easily and quickly apply to any size tub without the use of any special tools, making at the same time a better finished and stronger job than can be done by the old fashioned way of making hoops. The Ever-Ready Hoops are rolled flaring, so that they fit when applied without any hammering to draw them down to the flare of the tub. Retail Hardware and grocery dealers will find that at the popular price of ten cents for hoop and clamp complete they will meet with a ready sale if shown. Sizes for pails and barrels in preparation. Tub Hoops are packed in 2, 4 and 6 dozen cases."

"Dewey's Slug."

The Williamson Co., Newark, N. J., are putting on the market their newly patented Cartridge Cork Screw called

"Dewey's Slug," as shown by the accompanying illustrations. This pocket corkscrew makes one of the most useful and durable articles now on the market, as well as an appropriate souvenir of the times. The upper portion, or tip of the cartridge, is finished in nickel plate, while the lower

portion is a light, bright copper shade, while the worm is heavily nickeled, the whole making a decidedly catchy novelty and sells readily at twenty-five cents each.

Beck & Gregg's Nail Deal.

The firm of Beck & Gregg, Atlanta, Ga., has been awarded the contract by the government for 25,000 pounds of nails, to be delivered in Savannah, and from there distributed to various points in Cuba. The best bids for the large supply of nails were furnished by Southern houses, for the reason that they could put the Hardware at government wharves in sea coast towns at a lower figure than their competitors in the North. The supply of nails to be furnished by this firm is as follows: One thousand pounds four-penny wire nails, 4000 pounds ten-penny wire nails, 2000 pounds six-penny wire nails, 2000 pounds twenty-penny wire nails, 15,000 pounds eight-penny wire nails, and 1000 pounds forty-penny wire nails.

The hand that once rocked the cradle now grips the handle bar.—*Ex.*

The New Silver Combine.

The combination among the silver men, concerning which we gave detailed information some issues since, seems likely to become a permanent feature of the trade. The International Silver Co. has been organized under the laws of New Jersey, with a capital of $20,000,000, and the following named companies have already agreed to go into the combination:

Rogers & Hamilton Co., Waterbury, Conn.
The Norwich Cutlery Co., Norwich, Conn.
Standard Silver Plate Co., Toronto, Can.
The Holmes & Edwards Silver Co., Bridgeport, Conn.
Meriden Britannia Co., Meriden, Conn.
Rogers & Bro., Waterbury, Conn.
The Barbour Silver Co., Hartford, Conn.
The Wm. Rogers Mfg. Co., Hartford, Conn.
Manhattan Silver Plate Co., Lyons, N. Y.
The Watrous Mfg. Co., Wallingford, Conn.
The Rogers Cutlery Co., Hartford, Conn.
Meriden Silver Plate Co., Meriden, Conn.
Wilcox Silver Plate Co., Meriden, Conn.

The officers of the company are as follows:

President: Samuel Dodd, Meriden, Conn.
First Vice-president: George H. Wilcox, Meriden, Conn.
Second Vice-president: George C. Edwards, Bridgeport, Conn.
Third Vice-president: Charles A. Hamilton, Waterbury, Conn.
Secretary: John J. Treacy, New Jersey.
Treasurer: Samuel Thomas, New York.
Assistant Treasurer: George M. Curtis, Meriden, Conn.
Auditor: O. F. Thomas, Lyons, N. Y.
Counsel: Simpson, Thacher & Barnum, New York.
Executive Committee: Samuel Dodd, George H. Wilcox, George C. Edwards, Charles A. Hamilton and C. T. Barbour.

C. E. Jennings & Co.'s Tool Chests.

C. E. Jennings & Co., No. 79 Reade Street, New York, as usual at this season of the year, are placing on the market a fine assortment of tool chests, in every stage of importance, from one intended only for domestic use in a well-ordered household to the larger one having a greater variety of modern tools, and suitable for factory purposes, the advanced carpenter or the skilled machinist. Those in the trade contemplating showing up this line among other possible surprises for Christmas, would do well to call and inspect the assortment prepared by this old and experienced house. Catalogues forwarded the trade upon request.

The Berlin Iron Bridge Co., East Berlin, Conn., are erecting for the United Gas Improvement Co., Waterbury, Conn., the steel work for a generator room and an engine room. These roofs are to have steel trusses, supporting the roof covering. This covering is corrugated iron lined with the Berlin Iron Bridge Co.'s patent anti-condensation fire-proof lining. The engine room has a span of about 33 feet, and the span of the generator room is about 51 feet.

A man in Delaware County, when a little boy, accidentally sat down on a hot hearth, and in an instant the lettering "Patented May 19, 1836," was branded on the sitting portion of his body, says an exchange. A kind mother doctored him and succeeded in healing the burns, but the letters remain, and this man's wife now claims that she is the only woman on the earth who can prove that she married a patent right.

Trinidad de Cuba, on the slope of La Vijia (Lookout), 900 feet above the port Casildo and 4 miles west of Masio Bay—a deep-water harbor—has about 18,000 people, and is a very healthy place.—*Exchange.*

Review of the Markets.

Hardware: Business generally drops off in a very noticeable manner about this time of the year, except on such staples as ice and extremely cold weather make prominent upon the want book. Purchases, however, are this year being kept up in a satisfactory way, the early snow having encouraged a quick sale of special lines, which most of the dealers had already in stock in anticipation of wintry conditions. Then again, the holiday trade is more active than usual, and stocks which are beautified with goods that can be classed under this head, are deriving the benefits following good judgment. Some choice orders for spring goods, quotations for which were favorable, terms satisfactory and prompt delivery approaching hazardous possibilities, have already gone forward, but the bulk of the stock orders will await as usual the result of the inventory taking, now the order of the day throughout the trade. The jobbers have a fear in connection with the formation of so many consolidations among manufacturers, that the lines customarily drawn between jobbers and retailers will not be maintained in so strict a manner as was formerly the case, especially on some of the special brands that are now made part of some general combination output. Such consolidation also makes adverse criticism regarding department stores of a less important character, as affecting general trade, the dividing lines being broken down to the detriment of the wholesaler. Still, these are only among the fears of the present, and may be absent from the facts of the future.

Wire Nails: But little change in quotations is noted in the wire nail market, conditions being about the same as have prevailed for some time; only a moderate demand by the dealers, and the manufacturers feeling they have done all that should be required of them in the concession made in the middle of the season. For immediate delivery the market may be stated: At $1.25 base for carload lots, f.o.b., Pittsburg; with the differentials previously agreed upon, for other points, of Cleveland, 2½ cents; Chicago, Cincinnati and Louisville, 7½ cents, and St. Louis, 12½ cents. New York prices, with a fair demand in progress, without large specifications, may be quoted as follows: Carload lots on dock, $1.40 to $1.45; smaller lots from store, $1.50 to $1.55.

Cut Nails: There is but little doing in cut nails, business being limited only to sorting up requirements. New York prices remain as follows: Carload lots on dock, $1.25; smaller lots from store, $1.35.

Horse Nails: The season has proved an unusually good one for this important staple, in common with many other goods in heavy Hardware on which prices have been maintained without material change under a demand that was gratifying to witness. Stocks are no longer felt to be large, as assortments have been much broken up.

Skates: The skate trade has been a generous one so far this season, although considerable stock was carried over from the comparatively short winter of '97–'98. With good cold weather, now possible previous to Christmas, a full and free continued demand is expected, with the manufacturers well prepared to attend to current wants.

Shot: In noting the advance in shot, dated Nov. 7th, in our previous issue we failed to give the changes in prices, which were as follows:

Drop Shot, up to B, 25-pound bag	$1.20
" " 5 " "	.30
Buck Shot, 25-pound bag	1.45
" 5 " "	.35
Chilled Shot, 25-pound bag	1 48
" 5 " "	.35
Dust Shot, 25-pound bag	2.00
" 5 " "	.50

Terms, net 30 days, or 2 per cent. discount for cash in ten days.

Cordage: Since our last report on the market for manila and sisal rope, the prices have declined 1¼ cents on manila and ¼-cent on sisal, while the demand is fairly limited, and the market not over and above strong. The following quotations are held firmly at present by the manufacturers:

Manila, 7-16 inch and larger	per pound,	8¾	cents
" ⅜ inch	"	8¾	"
" ¼ and 5-16 inch	"	9¼	"
Sisal, 7-16 inch and larger	"	7¾	"
" ⅜ inch	"	8¼	"
" ¼ and 5 16 inch	"	8¾	"
" Lath Yarn	"	7¼	"

With the customary advance on small lots. In addition to above, manila hay rope is quoted at 8¼ cents; manila tarred rope, 15 thread, at 8¼ cents. Jute rope, 5½ to 6 cents, according to quantity.

Binder twine: As manufacturers are already soliciting early orders for binder twine for the approaching season, the following prices for carload lots, f. o. b. factory, may be given as prevailing in the Eastern market:

White Sisal, 500 feet to the pound,	per pound,	8½	cents
Standard, 500 feet to the pound	"	8½	"
Manila, 600 feet to the pound	"	9	"
Pure Manila, 650 feet to the pound	"	9½	"

For less than carload lots, the usual advance is made.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 38 cents per gallon; in lots of 5 barrels or more, 37 cents per gallon. The 5 barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE OMAHA TRADE.

November business closed with a very satisfactory record, and December starts in with a snap that, if continued, promises to more than meet present expectations with reference to the volume of trade. Considerable difficulty has been experienced in securing stock with which to fill orders, and this applies particularly to stove boards, guns and ammunition and similar season goods on which the demand appears to be considerably in excess of the ability of the factories to supply. Prices, as a rule, are well maintained, though the price of nails, wire and staple goods has softened to some extent on account of freight rates. Collections are considerably above the average, and taken throughout, business is in a very satisfactory condition and leaves no ground for complaint.

RECTOR & WILHELMY CO.

THE COLUMBUS TRADE.

It is getting pretty close to the time of year when most business houses will change the question of "What will the harvest be?" to: "What has the harvest been?" It is a certainty that we have all ploughed, sown, cultivated, dug, hoed, and earned our bread; some by the sweat of their brow and others by the racking of their brains, and now we must find out to a certainty whether there is any surplus.

We do not think any one can complain as to the volume of business done in 1898, as it has been the largest for a number of years. There have been quite a number of failures during the last three or four months that will reduce dividends some, but taking the year through, we do not think the total amount of losses in Ohio will be as large as they were for a few years past. It is a certainty that each year will bring its failures, and it seems to be one of the unsolved problems as to how they can be avoided.

The writer has been on a few excursions in the country to see how the quail crop is, and in conversation with farmers, find that the wheat was never in better condition at this time of the year than it is now and a very large acreage was put out. If nothing happens to it before harvest time, it will make many a farmer's heart light and his pocket-book heavy. Prices are not very firm as a rule. Some low prices are being made on certain lines for shipment in December and January to reduce stocks and get ready money. Rope is on the down grade and binder

Digitized by Google

twine will no doubt be much larger than last harvest. We have not heard of Dewey starting a binder twine factory, but it must be so as Dewey twine is on the market.

The writer saw and heard many interesting things while on his visit to the National Hardware Convention. For instance, Pabst Church. Now I trust your readers will not think that what I got in the church impressed me especially, as many can testify that I was not under the influence of Pabst's best, but it is the first time I ever saw a few hundred jolly Hardwaremen drinking beer in what was once a church.

I have found a satisfactory explanation for the great shortage of lumber in the Northwest. Without doubt it is on the account of the board sidewalks around Chicago. Chicago evidently expected to cover the whole State of Illinois and laid out streets and put down miles and miles of board sidewalks right out on the prairie. Now it is really a good thing for hunters and farmers. Part of the time the walks rest on the ground but a good deal of the time they are used as pontoon bridges.

You can always tell when you are getting in the vicinity of Chicago. When you are within 25 miles or so of the city, you will see large signs out "in a pond" that read something after this style: "Wind & Co, fine suburban addition. Choice building lots for sale, buy quick before they are all gone." (I think they were all there yet, because something was holding the water up.)

The boulevards and streets are named, and board sidewalks laid on each side of a streak through the prairie. There is only one way that choice lots can be made of some of that territory and that is to bore holes through to China and drain it. Chicago may do it. It is too flat to drain to the lake. China is the only route we can think of.

I should think Toledo would be jealous of Chicago for Toledo as a frog pond is not in it with Chicago.

SMITH BROS. HARDWARE CO.

THE BOSTON TRADE.

New England has put on its winter overcoat much earlier than usual, and the effect has been to stimulate trade in certain lines to an unexpected degree. The demand for sleds, snow shovels and ice choppers has been much beyond expectation, but as nearly all jobbers are accustomed to place these goods in stock early in the season, it found them well supplied and in a position to answer such demands as we have had during the past week. The stocks now are about exhausted, but factories are commencing to make second shipments and we expect the trade will be easily supplied for all future wants.

Business in other lines is satisfactory and the month just closed was an improvement over October.

There seem to be but few changes to note, and about the only way to advance the present ruling quotations is by combination or trust.

The tendency on the part of manufacturers to united action in order that their interests might be protected, is growing in favor, and this seems to be the only way to restrain evil effects of competition.

Prices are being well maintained, and collections are satisfactory. FRYE, PHIPPS & CO.

THE KANSAS CITY TRADE.

We are tired of saying that "trade" is "good;" "business is bully;" weary of saying that "collections are fair," "remittances are out of sight." See it? No diagram needed with this "joke." All our competitors, so far as we have met of late, report a satisfactory volume of business. The volume is large enough, but the margin of profit seems to be whittling off.

One of our city customers this morning, in adjusting his claims, asked for an allowance on skates. We had billed them regularly, but because—using his words—"some —— fools were selling that skate for 85 cents at retail, he was compelled to meet them."

The wholesaler is whipped into line oftentimes by the demands of the retailer, and the retailer is the "chump" that conduces to decreasing wholesale profits. This writer thinks it somewhat unfair to lay all the blame for lessening profits upon the traveling salesman. We believe that the day of large profits has long since passed, and the details of business must now concern themselves quite as much in selling as in buying.

Last year we found the screen door and similar lines of trade very unsatisfactory on the whole. This year we are buying the goods cheaper, and already our city salesman has found advance orders for future delivery based on a profit of not to exceed 5 per cent. clear profit—some not over 7 per cent. on the gross sale, and no expenses considered. Does such a statement need further comment to justify an immediate visitation of the fool killer to the other fellow's store? And of course we meet it—and there you are.

But who is it that makes the price for the other fellow to sell at?

If our salesmen don't meet the other man's price, who gets the order? And there you are. It's enough to make a man gray-headed to think very long along this line.

How can a profit be made on the sale of seasonable goods? Bear in mind that on the actual sale itself, considered by itself, and bearing its share of selling expenses many—nearly all—such sales are made at a loss. How can this craze to make "leaders" be eliminated, in other words? Why not have a discussion, all with the hope of devising better plans, but quite as improbable of results as it is certain the business is now profitless.

In our last previous letter we hinted that, with the editor's permission, we would tell you of the biggest thing of the kind in the United States.

It is nothing else than a $160,000 auditorium, popularly christened and known as "Convention Hall." It has the greatest seating capacity of any public hall in the United States. It is architecturally beautiful; in acoustics and unbroken vision not excelled by anything on earth. It is adapted to every sort of use from a convention hall to a circus indoors, horse show or the largest ball room under cover. It is the absolute creation of the people; marvelous in conception, development and completion It is so huge and stupendous a structure that not one man in five from "back East" will believe that it was built for the price named. The dimensions of this building, briefly named, are: Outside measure, 198 by 314 feet; arena floor, 60,000 square feet. Amphitheatre floor, 31,000 square feet; second gallery, 19,000 square feet; roof garden and gallery, 43,100 square feet; total floor space, 153,100 square feet; total standing capacity, 76,500 people, and seating capacity of 20,000. Not a post or pillar inside the hall. Think of it, filled with people at a great convention!

The editor of *Hardware* can entertain his correspondents in our new hall without danger of the walls bulging out. To detail all the interesting features connected with this vast enterprise would be utterly impossible. It would require half of an issue to do so. We will give the closing incidents only, and these will, in a measure, reflect others: About four weeks ago it was found that $10,000 was needed to complete the hall. Then "schemes" were hatched. The goose that laid the golden egg was Kirk B. Armour, of this city, the largest breeder of Hereford cattle in the United States, and of the great Armour Packing Co. He donated, first of all others, a pure-bred registered Hereford heifer, valued at $1000. Happy thought. This heifer was to be sold at auction and the proceeds donated. Soon a piano was donated; a new Remington typewriter, four building lots, a thoroughbred driving horse, and gifts ga-

Digitized by Google

lore. The idea spread like wild fire, and instead of selling the gifts, further donations were sought. One hundred thousand tickets at 25 cents each for two concerts on January 2, 1899 were placed on sale, and a "chance" at the heifer, horse, etc., was thrown in as an inducement. In three weeks 72,000 tickets have been sold, and the Convention Hall is blessed with surplus funds to take in, if wanted, more ground.

It is characteristic of Kansas City people to pull together in such enterprises, and instead of a few donations ending the effort, hundreds and hundreds more have been made, ranging in value from twenty-five cents to $4000. The $4000 donation consists of a completely finished dwelling, to be erected on the four building lots donated. Where else would you find such enterprise? Lumber, lime, brick, sand, nails, Hardware, paint, wall paper, furnace, labor, fire insurance policy, architect's plans, everything from start to absolute completion donated by the various firms and laboring men of this imperial city.

This writer recently visited the headquarters building. Here he found a Hereford heifer, Shetland pony, a shorthorn heifer, a jackass, from Arkansas, and, we believe, a recent donation was a Jersey bull. Hagenback donates a cub lion; we have an American eagle, twenty-five cases bottled beer, mineral water, vinegar, sulky plow, a dress suit, from J. Waldere Kirk (you New Yorkers know him); bottled whiskey, of "The Spring of '82"; a sewing machine, three refrigerators, a Columbia chainless safety, a paper full of diaper pins, which makes twelve other chainless safeties; then there is a porcelain bath tub, shoes, socks, suits, overcoat, hats, gloves, $100 in gold, $100 government bond, flour, pickles, mustard, sheet music, lamps, tobacco, cigars by the wholesale, wrought iron range, beautiful buggy, cash register, bric-a-brac and brickbats, a galvanized steel water tank, etc. Hundreds of items are overlooked at this.

Permit us one more article. Most unique of all is a cork leg. As soon as this writer saw the cork leg he immediately bought four "lucky" tickets, and his heart is set on that "cork leg." While we have a healthy and able-bodied credit man, we believe that if we succeed in getting the cork leg it will not hurt so much to have one leg "pulled" anyway, and if this one leg works well we will get him its mate and bid defiance to the bankruptcy law.

If any of your brethren have a desire to share in this "grand enterprise," what a prospect before a good Democrat there is in that bath tub and whiskey, while some Republican might get the Arkansas jackass and set out for Manila at once.

Our friends of the "shovel combine" are invited to buy tickets. They might exchange such prizes as they doubtless would receive, for the galvanized steel water tank. In this, they could water their stock much more artistically, and with far less expense than hitherto they have been able to do so.

Some woman subscriber might get Kirk's dress suit, and some Prohibitionist a case of bottled beer. The possibilities of amusement are illimitable, and the success of our Convention Hall is the biggest thing in this country to-day. GILLE HARDWARE & IRON CO.

THE SAGINAW TRADE.

Owing to bad roads, trade in this section of the country is quiet. Up to date we have had no sleighing. It requires cold weather and sleighing in this part of the country to make things lively at this season of the year. We anticipate a good trade in the spring.

There has been a sugar beet factory located here in the valley, and they are now making beet sugar, and it is an assured success. There is also another company organized, who are going to put up a factory, ready for business next fall. Bituminous coal has been discovered here during the last three or four years, and there are several mines in operation, and we are getting good coal. There is some land being prospected now, and in the near future the coal industry will be quite a feature. MORLEY BROTHERS.

THE MINNEAPOLIS TRADE.

There is very little complaint to make about business. We think generally in all lines, dealers have had a very fair trade this fall, while the jobbers have been exceedingly busy, in many instances having done a larger business than ever before.

Collections are very good; prices, as a rule, well maintained. We find our customers pay a little more for some of their goods without question, expecting an advance. We are getting better profits. As we look back over the year, we are surprised at the amount of building that has been done here; very much more than was anticipated, and more than people, generally, are aware of.

There has been a marked increase in wages of mechanics, with considerable complaint about scarcity of good men, particularly carpenters. With the customers of these two cities—that is, the farmers and country merchants generally—in the most prosperous condition they have ever been in, we can see no reason why we should not have a very busy and prosperous year to come. There never was so much money in the Northwest; in fact, there is such a surplus that there is not sufficient demand for it here, and our bankers are buying paper in Chicago and New York, strange as it may seem.

There is something of an inquiry for real estate; we want to see a demand for it, but no boom.

We are having beautiful winter weather, a fair amount of snow, and clear, bright days, that people who have ever lived in Minnesota can understand and appreciate.

W. K. MORISON & CO.

THE CLEVELAND TRADE.

It would be very interesting reading if the controversy could be republished that took place over expansion when Florida, North-Western Territory and Alaska were added to the country. If our duty to the Philippines is not conclusive, our duty to ourselves may be considered part of the problem. Saving others may have a potent influence on our own condition. The more one goes out of the business of saving his own soul, his prospects for success improve. This rule is quite as imperative in national life as it is in individual. It may be that external interests and new duties are essential to our own development, and if they result in sacrifice, that, too, may be profitable.

The extension of our own system of government, we can believe withoat egotism, is desirable. While this would not authorize our enforcing it on others, it suggests the propriety and perhaps the duty of seeking its extension.

Our duty towards the Philippines must be settled by principle on these lines. Party capital may result, but partisan feeling at this stage is out of place. Statesmanship and not politics is required. The administration must avoid every appearance of national or personal interest, and act on lines that universal consciousness of right will approve, and this country can and will enforce its conclusions.

The future alone can determine the wisdom of the adjustment to be made, but for that we cannot wait. We must meet the responsibility. Statesmanship consists of power to act in such crises, and our history is full of noble examples to inspire courage of conviction.

A delightful sense of companionship prevailed at the Milwaukee convention. Co-operation in place of competition was the theme, and the soul-shrinking effect of one was alleviated for the time. The accumulating combinations call for a modifying influence against radical advances, which the jobbers' convention tends to restrain. They do not fear combinations to reduce costs, but when

Digitized by Google

used to rob consumers by extortionate prices, jobbers are unanimously opposed to them.

Competition may become the death of trade, when co-operation becomes necessary to soften it. It is no permanent benefit to consumers to have goods sold below cost, as the reaction sure to follow will exact recompense.

As near a family relationship between merchants and their employees as is possible should be maintained. At stated times a meeting should be held, when all should be asked to make suggestions for the good of the business. Efforts should be made to have each clerk interested in other departments, and make suggestions for their improvement. The proprietor should show appreciation and give careful consideration to such suggestions, as many valuable hints will be given, perhaps revealing weak places and it will tend to harmonize the work and strengthen the efficiency of the force.

The proprietor will find it easier to introduce reforms and estimate the value of different members of his force than can be done in the hurry of business.

If the proprietor can invite his employees to his own home and lunch together, it will emphasize the benefit, and tend to a friendship that will be of great value.

Evidence of interest secures a loyalty that nothing else can, and loyalty to the proprietor makes life pleasant and is a promise of success.

These may be commonplace suggestions, but in the hurry and rush of business life common humane considerations are likely to be neglected and clerks be considered part of the machine.

Self respect and respect for the proprietors are of too much value as a means of success to be lightly regarded. Struggle as we may against them, machine methods will force themselves in, unless better ideals prevent them. Pleasure and profit alike in business depend largely upon good methods.

Notwithstanding the immense demand for steel, the supply is so large that no advance for products is anticipated. Wire and wire nails are weak in price, although the time is near at hand when there will be a heavy demand. The dissolution of the ropemakers' agreement has demoralized the price. Combination seems to be the only means of steadying prices.

If the president had the power to suspend the tariff on goods controlled by them when they advanced prices excessively, it would protect people against them. The usual legislation against them is harmful, because it does not protect the right of the individual. The right to enjoy the benefits gained through mental or physical energy must be protected. The right to enjoy these benefits is the foundation of all prosperity. The failure to protect and enforce this fundamental law has been the destruction of flourishing cities and nations, and has left desolation in their place. It has been the immediate cause of every national decline in history. It always results in destroying the incentive to action.

Special legislation "on the merits of the case" usually impair more rights than it protects, and injures those that it aims to benefit. Perfect liberty to the individual to act in any way that does not prevent others from enjoying the same liberty, must be maintained.

LOCKWOOD-TAYLOR HARDWARE CO,

THE DAVENPORT TRADE.

Hardware has given us a very complete and accurate account of what was accomplished at the National Hardware convention in Milwaukee. It was an interesting meeting; we feel that we were well repaid for the time spent there. We beg, however, to mention some things that were not done that would have interested us and perhaps other members of the Association.

They did not discuss territorial rights. We do not think there is, or should be, such a thing as territorial rights in the jobbing Hardware trade. Still, if when one jobber goes from his own legitimate territory beyond a line where it is possible to secure profit on his sales, he might, with a little discernment on his part, realize that he was approaching the bailiwick of a competitor. Knowing that he could not possibly make any money by crossing this line, if he would gently lay down his sample case and repeat to himself the Golden Rule, he would, in some cases at least, prevent his jobbing competitor from going back to the time when business was done on that other silver or brass rule, beginning with an eye for an eye and a tooth for a tooth, etc., etc. On the way to the Milwaukee convention an assistant of one of our State institutions here said to the writer: "We are buying our Hardware in two towns far distant from Davenport in Iowa." Now those parties know full well that they cannot make as much money selling goods here as we could if we sold the same goods at the same prices, for they must pay the freight, packing, carting, etc., etc. If we did not have a satisfactory business, and did not believe in doing as we would be done by, we might retaliate by invading those cities with prices and terms that would prevent their making any money in their own towns.

In making calculations how to reduce expense accounts, which were complained of as excessive, there was not one word said about one of the largest items of expense in the Hardware jobbing trade, that is, packing and carting, which probably amounts to more than the rents of stores and warehouses in use.

There were no suggestions made as to the best disposition of the few still living "back numbers" in the trade who growl for *revenue* by constantly making small, insignificant, but nevertheless annoying claims for overcharges,

Digitized by Google

shortages, etc., etc. There seems to be no legal punishment to fit the case.

But we are taking more than our allowance of space this week. We do not draw a salary for writing what has not been done; you evidently prefer to know what has been done.

Nails are weak; rope lower; binder twine prices are fixed for the present and some contracts are being made. We look for advances in Potts irons, chisels and drawing knives, tin plate and manufactured tinware.

Sales for November were larger than the same month last year, notwithstanding the one week's absence of some of us who could probably have been best spared from business at the Milwaukee convention.

Banks have an overstock of money which they are anxious to loan at a very low rate of interest. Collections satisfactory.

SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

From time to time statistics are appearing in the trade and daily papers of the amount of business done in 1898 compared with former years. We gather from these that this year will be a record-breaker in almost every commodity. In iron and steel production the increase is very large, and the best of it is that it is all wanted—England and Germany have plenty of demand to keep them out of our way, and while our home consumption is growing fast, our exports are growing at a greater percentage. So far the active demand has not advanced values greatly, but may be depended on to bring prices up to a fair manufacturers' profit should the present condition of affairs continue into the spring trade, and everything points to even a larger demand next year.

November was a good month for the jobbers of this locality. The early touch of winter started an active movement of seasonable goods, which is keeping all hands busy up to present writing. The prospect of good December trade is quite favorable.

LOGAN-GREGG HARDWARE CO.

THE GRAPHITE TRADE.

Not much to write about for your present issue in the way of variety, for the November story is but a sequel to that of October. The same characters appear, but a little more hard-worked; the same scenes enacted, but with more rush. It was not our fault that Thanksgiving Day was a business day, or that extra force is required to help in the manufacture and shipment of goods. It is because we are going through a season of national prosperity which has extended to the graphite productions. It is not necessary to select any particular line of our products in calcuating the percentage of increase—they are all hand in hand—every one up head.

What would *Hardware* do if its circulation jumped so rapidly that the presses could not run off enough copies to satisfy "Old Subscriber" and "Constant Reader," and "One-who-would-not-give-up-his-paper-for-thousand-dollars if-he-could-not-get-a-duplicate-copy" and no room for presses or working force?

How delightful to write them that their copies of November 10th would reach destination November 25th and so on!

"Blest hour! it was a luxury—to be."

Quoting from the motto on a conversational lozenge, "May you also be happy."

JOSEPH DIXON CRUCIBLE CO.

Exports to Africa.

The rapid expansion of our export trade is illustrated by some figures just prepared by the Treasury Bureau of Statistics showing the gains in our exports to Africa. The fact that the manufactures and products of the United States are finding an increased market in that part of the world is just now the subject of a great deal of attention in European countries which have hitherto supplied most of the articles imported into Africa. A recent issue of a prominent European trade publication calls attention to the fact that British exports to South Africa in the nine months ending with September 30, 1898, show a decrease of 725,209 pounds sterling or 12½ per cent. as compared with the corresponding nine months of the preceding year. The figures of the Treasury Bureau of Statistics show that meantime our exports to Africa have increased 13½ per cent.

The recent development of our trade in this direction has been very rapid. In the fiscal year 1894 the total exports to Africa were less than $5,000,000, while in 1898 they were over $17,000,000.

The following table shows our exports to and imports from Africa in the ten months of each calendar year since 1894:

Ten months ending Oct. 31.	Exports to.	Imports from.
1894	4,380,425	3,852,701
1895	6,901,569	5,032,625
1896	12,833,259	8,507,488
1897	13,173,250	8,447,134
1898	14,986,476	7,267,317

The Northern Refrigerator Co., Grand Rapids, Mich., are sending their friends an attractive little Christmas present in the form of a pen-wiper, upon which are represented two of Michigan's best products—the Glacier Refrigerator and a sweet little daughter of Michigan, who is illustrating its methods of use. It is a useful and ornamental addition to any desk.

Cienfuegos de Cuba is on a peninsula in the Bay of Jaqua, 6 miles from the sea. The depth of anchorage in the harbor is 27 feet; at the wharves, 14 to 16 feet. Population, 24,030. Ordinary death rate, 42.82 per 1000.—*Exchange.*

A Cheerful Voice from the Corner.

The Man in the Corner of the W. Bingham Co., Cleveland, Ohio, extends to the new year a very cordial greeting. He says: "Now we are drawing to the close of another year, and are all making a little extra effort to get everything in shape to present as brave a front as possible when old Father Time, the great original usurer, makes his annual visit to demand an accounting for the twelve months last entrusted to us and to make a new loan upon terms that will vary with the showing made. The old Shylock must have his pound of flesh, and not a stiver will he abate from the reckoning; but if he does burden the new deal with the deficit and losses of the old, he is as ready to credit the gains and to make the new twelve months the richer for the past profit.

"If the experience of the W. Bingham Co.'s man of accounts is to be relied upon as a criterion, the Hardware merchants of the country this side of the Rockies can meet the old gentleman with the snickersnee, with the glad assurance of the debtor who liquidates in full, and can start upon a new lease of time with an unmortgaged future. He —the man of accounts—tells me that there is a better tone to business than for a few years past, and that collections have been easier, particularly in the past few months; that according to his best judgment the trade in general is in a prosperous condition, and will be in good form financially for the demands of 1899. The volume of trade has been enormous, and if the growth of what is termed the 'American idea' of quick sales and small profits has reduced the increment on many of the sales, the nickels have dropped into the till enough faster than the dimes formerly did to go far toward making the tale good."

To Put in His Stocking.

Mrs. McK. is in New York to-day
To find "Mac" a present amidst its scenes;
As we are well posted on what he wants,
She'll probably buy him "the Philippines."

We have received a copy of a very interesting address delivered before the Portland Credit Men's Association by W. H. Preston, treasurer of the Knapp & Spencer Co., Sioux City, Iowa. The speech shows very careful preparation, a thorough knowledge of the subject, and no small amount of careful thought. Mr. Preston has certainly demonstrated the fact that there is a great deal in the credit question, and that no one is better fitted to elucidate the points connected therewith than himself.

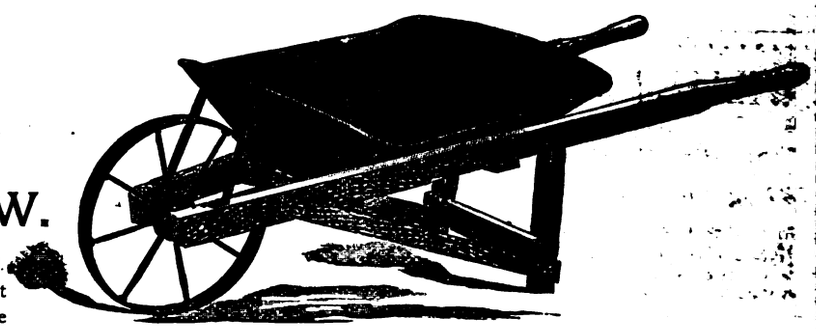
George W. Church.

George W. Church, who is well and favorably known in the Hardware trade, has returned from his services in the field, and is prepared now to make new business connections. In April last, when the call came for volunteers, Mr. Church, who had been for seventeen years quartermaster of the First Regiment of the National Guard of New Jersey, volunteered his service, and did good and faithful work in that important position, in connection with his regiment. His absence necessitated the closing up of the business which has been carried on under the name of Church & Sleight, and of the George W. Church Co., at No. 109 Fulton Street, for so many years. The store he occupied was vacated because of this closing up of the business, and it is his expectation to re-open the same, making good business connections with old and new customers. The location is certainly one of great convenience for the Hardware and machinery trade, being handy to all the ferries and the elevated railroads.

Mr. Church is a veteran in the Hardware line. In April, 1865, he started in the business with his uncle, Peter A. Frasse, and put in eleven years of solid work at No. 95 Fulton Street. When the business with which he was then connected dissolved, and James M. Montgomery started for himself at No. 105 Fulton Street in May, 1876, Mr. Church continued with the new firm for five years, until the death of Mr. Montgomery in May, 1881, when Mr. Church became the only active partner in the firm of Montgomery & Co. at the same address. He remained here for ten years, or until May, 1891, when, on the dissolution of the firm, he started in at No. 109 Fulton Street, in partnership with James E. Sleight, the traveling man of the concern. This partnership expired by limitation in January, 1896, and Mr. Church continued by himself until the first of the present year, when the corporation of the Geo. W. Church Co. was formed. This makes thirty-three years up to last April which Mr. Church has spent in business on Fulton Street. This long experience, and the acquaintance he has made in the trade, certainly merits the approval and confidence of that trade. He is now, as before said, making arrangements for the renewal of the old relations, and those who wish a first-class connection in New York City will do well to correspond with him.

There are few Hardware stocks in this or any other city from which so large an order can be filled as in many of the establishments known under the head of "Auction Goods" or "Job Lot" houses. One of the largest of these is that of Charles Broadway Rouss, of this city, which in 1897 did a business of nearly half a million dollars in the Hardware business alone, his line of goods in that section of his business embracing some articles not legitimately regarded as Hardware by the general trade. Among orders recently received was one from Japan, in which a single line ordered "twelve thousand clocks" of one kind, size and style.



The Utica Belt Line Railroad Co., Utica, N. Y., are erecting on the line of their road a new riveted lattice bridge, having a span of about seventy-five feet. The bridge is known as the Half-way Bridge. It is a modern structure in every way for the class of work which it is called upon to do. It is to be all steel except the cross tier on which the rails rest. The Berlin Iron Bridge Co., East Berlin, Conn., have the contract for furnishing and erecting the steel work.

"You can't allus tell whaw ter put de credit by lookin' at de surface," said Uncle Eben. "De cork on de fishin' line dances aroun' an' 'tracts a heap o' 'tention. But it's de hook dat's doin' de business.—*Washington Star.*

The hog may be a squealer, but he never gives anything away.—*Exchange.*

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Ansonia, Conn.—The Ansonia Mfg. Co. has been organized with Charles H. Jockmus, as president and manager. The line of goods to be manufactured is brass Hardware, with screw machine work as a specialty. A plant capable of accommodating 250 hands has been leased, and it is expected to have the factory running at its full capacity by January 1st. The contract has also been given for the erection of a large addition, in which the firm is to engage in the manufacture of chandeliers.

Birmingham, Ala.—The Alabama Steel & Wire Co. has been organized here by Illinois, Ohio and Alabama capitalists, with a capital stock of $2,000,000, and have just let a contract to the Garrett Cromwell Engineering Co. for the erection of an immense wire rod and wire nail mill at Ensley City, six miles from Birmingham, with a daily capacity of 600 tons. The officers are E. T. Schuler, of Chicago, president; C. E. Robinson, of Joliet, Ill., vice-president and general manager, and G. H. Schuler, of Cleveland, Ohio, secretary and treasurer.

Bound Brook, N. J.—The Central Hardware & Mfg. Co. has been incorporated by G. V. Cornell, W. Cornell and I. G. Wood, to manufacture articles made of minerals, metals, wood or vegetable fiber. Capital stock, $60,000.

Chicago, Ill.—The Mills & Hastings Co. has been incorporated by S. M. Hastings, J. P. Brown and G. C. Masten, to manufacture scales. Capital stock, $10,000.

Chicago, Ill.—The Hine-Watt Mfg. Co., capital, $50,000, to manufacture Hardware and bicycle sundries. Incorporators, Lucius A. Hine, Seth P. Watt, Joseph T. Burnham, Jr., Ernest W. Hicks.

Cincinnati, Ohio.—The R. K. LeBlond Machine Tool Co., capital $50,000. Directors: R. K Le Blond, John A. Le Blond, R. E. Le Blond, John J. Hay, D. A. Hay.

Grand Rapids, Mich.—The Grand Rapids Clamp & Tool Co. has been incorporated by Wallace McKee, Frederick A. Ledward and Willard E. Stocktell, for the manufacture and sale of clamps and all ordinary carpenters' tools. Capital stock, $7500.

Jamestown, N. Y.—C. W. McCormick is engaged in forming a company in this city to manufacture Hardware specialties.

Los Angeles, Cal.—The Breidenbach Iron Stove Co., capital stock, $50,000, all subscribed. Emile H. Breidenbach, R. Moloney, Daniel Innes, Leonard Dearth, D. M. McGarry.

Oswego, N. Y.—Barnard Geer & Co., to manufacture washing machines. Directors: G. D. Geer, A. H. Geer, A. B. Middaugh, W. M. Emerson.

Philadelphia, Pa.—The Cambria Iron & Steel Co. has been incorporated by J. M. Bacon, D. Reeves, R. F. Kennedy, Powell Stackhouse, B. F. Wood, J. L. Welsh and others. Capital stock, $5000.

Changes and Improvements.

Binghamton, N. Y. — The Osgood Scale Works are erecting a large addition to their plant.

Canning, N. S.—The axe factory lately burned down, will be rebuilt.

Chicago, Ill.—Krueger & Hunter, brass works, succeeded by E. C. Krueger.

Cincinnati, Ohio.—The concern of W. T. Simpson & Co., known as the American Galvanizing Works, in East Pearl Street, has been converted into a stock company, with a capital of $50,000. It will be known in the future as the American Galvanizing Tinplate Co., and will continue to operate along the same lines as before. The incorporators are Wm. T. Simpson, Fenton Lawson, W. C. Lawson, S. H. Burton and James D. Richards.

Cleveland, Ohio.—The American Steel & Wire Co. have purchased the McMullin Fence Co.'s big wire fence mill at Evanston, Ill. The American Co. will take possession immediately. The fence mill in the wire and nail mill at Joliet will be moved to the Evanston plant.

Detroit, Mich.—The C. C. Worner Machinery Co., Nos. 55–69 Woodbridge Street, West, have purchased the entire stock of the Toledo Drop Forge Co., at Glassboro, Ohio; the Wood Mfg. Co., of Toledo; the Hamilton & Kenwood Co., of Grand Rapids, and the Superior Bicycle Co., of Buffalo.

Green Island, N. Y.—The new foundry being built by the Grant-Ferris Co., at Mechanicville, will remove from Green Island the company's present foundry. The space now occupied by the foundry will be used for the manufacture of agricultural implements. The new foundry at Mechanicville is expected to employ between 150 and 200 men. The work of building the new foundry, for which ground has been broken, will be hurried, and next spring will probably see stoves manufactured at the new plant.

Louisville, Ky.—The Lithgow Mfg. Co., one of the oldest and largest stove foundries in the South, is to be liquidated. Its proprietor is J. S. Lithgow, who organized the foundry in 1836.

New Haven, Conn.—The firm of Mallory, Wheeler & Co. are making arrangements to go into the manufacture of small padlocks almost exclusively, and will also make some small articles of Hardware.

Omaha, Neb.—The Minneapolis Threshing Machine Co. have acquired title to two lots immediately north of the Hardware establishment of R. D. Amy, at the junction of Pearl and Main Streets, and purpose erecting a one-story warehouse.

Roanoke, Va.—The Norwich Lock Works have been purchased by H. E. McIlwaine, R. B. Fairfax and others, who will put the same in operation.

Smith Falls, Ont.—Frost & Wood, the well-known agricultural implement manufacturers, will change to a joint stock company, with a capital of $800,000. The reason is because of the increasing demand for their goods and the necessity of doubling their plant.

Wheeling, W. Va.—S. P. Jennings & Son have decided to locate a handle factory at Charleston that will employ from 20 to 30 people. The capacity of the factory will be 2000 dozen handles per day.

Recent Embarrassments.

Louisville, Ky.—Raible, Smith & Co., manufacturers of tinplate ware, have filed a deed of assignment in the County Clerk's office. Christopher Wright was named as assignee. The liabilities and assets are estimated at $70,000 each.

Recent Fires.

Asbury, Mo. — By an explosion at the Hercules Powder Works, one mile north of this place, recently, six men were killed; three others are missing. They were seen going to the works this morning and have not been seen since. The packing house was completely demolished. The main building, which was filled with explosives, was but little damaged.

Montreal, Can.—Fire in the forging department of the Pillow & Hersey Bolt & Nut Works on Mill Street, has effectually put a stop to manufacturing operations for some time to come. The damage, so far, is not known. The entire roof of the building is destroyed, but the debris will have to be cleared away before an estimate of the damage to the machinery can be gained.

New Castle, Ind.—The handle factory plant owned by Simon P. Jennings & Sons, has been completely wrecked by fire. Loss $30,000, with small insurance.

Norfolk, Va.—Fire in the plow factory of S. R. White, on Water Street, has done damage to the extent of about $50,000, covered by insurance. There was about $100,000 worth of stock in the building, but by heroic efforts the firemen saved half.

Vincennes, Ind.—Hartwell Bros.' handle factory, one of the most extensive industries in this city, has been destroyed by fire. Loss on building, machinery and stock estimated at from $15,000 to $20,000.

Miscellaneous.

Cincinnati, Ohio.—Work is fast progressing on the new building that is to be occupied by the Lodge & Shipley Machine Tool Co., in Camp Washington. The stone and brick front is being completed, and it is thought that the building will be ready for moving in the machinery in about a month or six weeks. The company have secured several large new machine tools for the new factory, and will begin working in the concern with an increase of from 50 to 75 men.

Dresden, Ohio.—The opening of the new sheet iron mill, recently, was an event of much interest, and was celebrated in an elaborate manner by the residents of this place. The new mill will employ 300 hands.

Wells, Minn.—J. A. Harriman, bicycles, succeeded by M. A. Rentz.

Recent Fires.

West Reading, Pa.—The Keystone Bicycle Co.'s bicycle plant destroyed by fire, at a loss of about $75,000, on which there is an insurance of about $25,000 or $30,000.

Eccentricities of Chinese Buyers.

The United States Consul at Shanghai in a recent report gives the following advice to American exporting firms, concerning some of the eccentricities of the Chinese buyers:

"I find there are two great obstacles in the way of business with America. In the first place, American firms do not take care to fill the orders exactly. There is somewhat of a feeling at home, 'Oh, anything will do for the Chinese.' As a matter of fact, there are no people more particular than the Chinese. Their customs and their superstitions must be considered, as well as the things which come into account in other countries. It is a great thing to have a lucky trade-mark. It is above all necessary to handle the goods through a man on the ground, in whom the Chinese have confidence. They do not think anything about the firm at home; they think of the man directly with whom they deal. This man, if he is wise, knows the demands of the trade and caters to them; and, however eccentric some of his directions may seem in ordering, they should be followed to the letter.

"In the next place, almost all English and German firms have an arrangement by which all claims for damages through faulty packing, etc., are settled very promptly through the arbitration of their Consul at the place where the goods are delivered. Most American shipments are made without any such agreement, and the consequence is that should the goods be damaged through faulty packing, etc., the parties interested are so far apart that the local dealer here is forced to stand the loss, rather than go to the expense of suit or arbitration in America; and the consequence is that on even terms or at some difference in price he buys his goods from England or Germany. He is willing to pay the higher price for a certainty of a speedy, just and inexpensive settlement of any damage there may be."

The skating season cannot be said to have commenced, but that it is scheduled to arrive without much further delay the skate manufacturers give us ample evidence by their early announcements. The advertisement of Barney & Berry, Springfield, Mass., whose perfect product make of skating an unrivaled pleasure, will be found on page 47, and their catalogue for the season can be had upon request.

"The only objection I have against the young man, my dear child, is that he has no noble ambition—no high or worthy object in life."

"Why, papa, how can you say that? He wants me!"—*New Orleans Times-Democrat.*

The

Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

SOMETHING NEW.

BARNEY & BERRY'S LOCK LEVER.

This skate can be adjusted to the proper position sideways upon the shoe, whatever the style or shape, by means of inside toe clamp, which is made in two parts connected by right and left threaded screw, "B," which shortens or lengthens clamp.

When skate is adjusted to the desired position and set for use the rotary movement of main adjusting screw is locked by small set screw in stud at "A," which prevents loosening of skate in use and keeps it ready to attach to the same shoe without readjustment.

For various grades and all sizes send for FREE CATALOGUE.

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

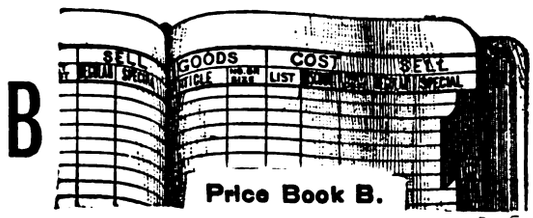
HARDWARE PRICE BOOKS.

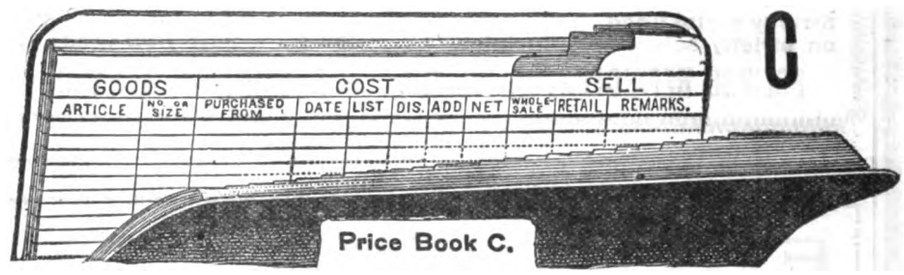
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



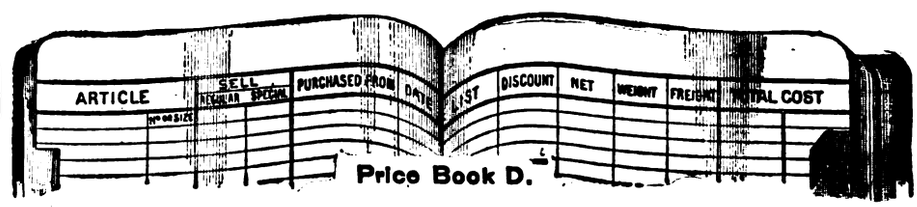
A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¼ inches.***



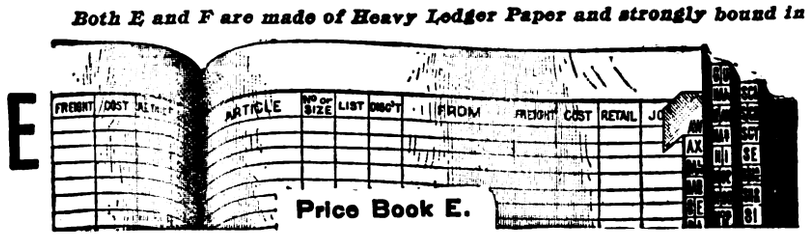
FOUR EDITIONS:

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

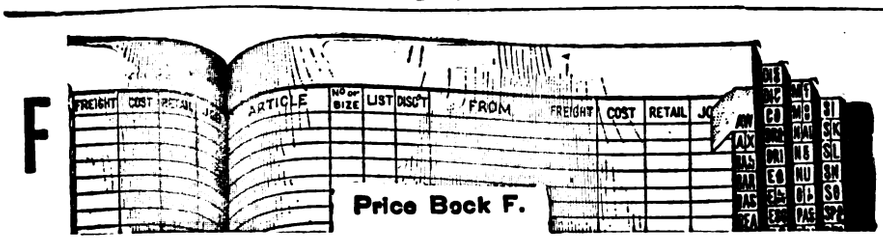
D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CHI	For Iron,	turn to	IRO
" Parers, Apple	"	PAR	" Cutlery,	"	CUT	" Irons,	"	IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

Disston's Superior Files.

The Steel used in these Files is manufactured by our own steel works. They are cut by skilled mechanics on our own improved machinery, hardened by a special process which insures an even temper.

Each File is carefully inspected before leaving the factory.

We Guarantee the quality of our Files to be equal to that of our Saws. . . . . .

IF YOU CANNOT BE SUPPLIED WRITE US.

Highest Award given our Files wherever exhibited

Henry Disston & Sons, Incorporated,

Philadelphia, Pa.

HIT THE PIPE

as hard as you like with chisel or mallet and observe that the surface finished with simply one coat of our

ELASTIC IRON ENAMEL,

is scarcely marred. It also withstands a high degree of heat; in truth it is as nearly indestructible as it is possible to make a varnish. For smoke-stacks, fire-place casings and stove-pipes

ELASTIC IRON ENAMEL has no equal.

The accompanying cut represents a miniature stove-pipe finished with one coat of

ELASTIC IRON ENAMEL.

We send these display pipes with dealer's orders for this specialty. Pints, half pints and quarts are its most salable packages.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.
